Schedule 2 Exempted Pesticide B5127

Pesticide Residues in Food Regulation

(Made by the Director of Food and Environmental Hygiene under section 55(1) of the Public Health and Municipal Services Ordinance (Cap. 132))

1. Commencement

This Regulation comes into operation on 1 August 2014.

2. Interpretation

In this Regulation—

air transhipment cargo (航空轉運貨物) has the meaning given by section 2 of the Import and Export Ordinance (Cap. 60);

compounded food (合成食物) means food containing 2 or more ingredients;

Director (署長) means the Director of Food and Environmental Hygiene;

exempted pesticide (獲豁免除害劑) means any pesticide that is set out in Schedule 2;

extraneous maximum residue limit and ***EMRL*** (最高再殘餘限量), in relation to the residue definition specified in column 3 of Part 2 of Schedule 1 of a pesticide specified in column 2 of that Part, mean the extraneous maximum residue limit for that residue definition specified, in column 5 of that Part (as read with Part 3 of that Schedule), opposite to the pesticide;

maximum residue limit and ***MRL*** (最高殘餘限量), in relation to the residue definition specified in column 3 of Part 1 of Schedule 1 of a pesticide specified in column 2 of that Part, mean the maximum residue limit for that residue definition specified, in column 5 of that Part (as read with Part 3 of that Schedule), opposite to the pesticide;

pesticide (除害劑) means—

(a) any substance intended for preventing, destroying, attracting, repelling or controlling any pest (including any unwanted species of plants, animals, birds or aquatic products) during the production, storage, transport, distribution or processing of—

(i) food or agricultural commodities; or

(ii) fodder, or feeding stuffs, for animals, birds or aquatic products;

(b) any substance which may be administered to animals, birds or aquatic products for the control of ectoparasites;

(c) any substance intended for use as a plant growth regulator, defoliant, desiccant, fruit thinning agent or sprouting inhibitor; and

(d) any substance applied to crops before or after harvest to protect them from deterioration during storage or transport,

but does not include—

(e) fertilizers;

(f) nutrients for plants, animals, birds or aquatic products;

(g) food additives; or

(h) drugs for animals, birds or aquatic products;

pesticide residues (除害劑殘餘) means any substance present in food resulting from the use of pesticide, and includes any derivatives and impurities of toxicological significance;

primary food commodity (原食品) means a product in, or nearly in, its natural state that—

(a) is intended for processing into food for sale; or

(b) can serve as food without further processing;

residue definition (殘餘物定義), in relation to a pesticide, means the combination of the pesticide and its derivatives or related compounds.

3. Application

This Regulation does not apply to food which is imported solely for the purpose of export if the food—

(a) is air transhipment cargo; or

(b) during the period between its import and export, remains in the vessel, vehicle or aircraft in which it was imported.

4. Import, sale etc. of food containing pesticide residues

(1) A person may import, consign, deliver, manufacture or sell for human consumption a food which contains pesticide residues only if—

(a) the food is of a description specified in column 4 of Part 1 of Schedule 1 and—

(i) the pesticide residues are the pesticide residues of a pesticide specified, in column 2 of that Part, opposite to the food; and

(ii) the concentration of the pesticide residues in the food does not exceed the MRL for the residue definition of the pesticide specified, in column 3 of that Part, opposite to the food;

(b) the food is of a description specified in column 4 of Part 2 of Schedule 1 and—

(i) the pesticide residues are the pesticide residues of a pesticide specified, in column 2 of that Part, opposite to the food; and

(ii) the concentration of the pesticide residues in the food does not exceed the EMRL for the residue definition of the pesticide specified, in column 3 of that Part, opposite to the food;

(c) the pesticide residues are the pesticide residues of an exempted pesticide;

(d) section 5 applies to the food and the concentration of the pesticide residues in the food does not exceed the MRL or EMRL applicable to the food by virtue of that section;

(e) section 6 applies to the food and the concentration of the pesticide residues in the food does not exceed the aggregated MRL or EMRL applicable to the food by virtue of that section; or

(f) any of the conditions set out in subsection (2) is met (except for cases that also fall within paragraph (d) or (e)) and, having regard to the factors set out in section 7, consumption of the food is not dangerous or prejudicial to health.

(2) The conditions referred to in subsection (1)(f) are—

(a) the food is not of a description specified in column 4 of Part 1 of Schedule 1 or column 4 of Part 2 of that Schedule; or

(b) the food—

(i) is of a description specified in column 4 of Part 1 of Schedule 1 but the pesticide residues are not the pesticide residues of any pesticide specified, in column 2 of that Part, opposite to the food; or

(ii) is of a description specified in column 4 of Part 2 of that Schedule but the pesticide residues are not the pesticide residues of any pesticide specified, in column 2 of that Part, opposite to the food.

(3) A person who contravenes subsection (1) commits an offence and is liable to a fine at level 5 and to imprisonment for 6 months.

5. Principles for determining MRL and EMRL for certain food (other than compounded food)

(1) If—

(a) a food (other than compounded food) contains pesticide residues of a pesticide listed in Schedule 1 but the food is not specified in that Schedule opposite to the pesticide; and

(b) a MRL or EMRL is specified for the residue definition of the pesticide in respect of a food that is the primary food commodity from which the food described in paragraph (a) is derived,

subject to subsection (2), that MRL or EMRL is to apply to the food described in paragraph (a).

(2) If a food is in a dried, dehydrated or concentrated form, the MRL or EMRL is to be adjusted proportionately by reference to the ratio between the following—

(a) the weight of the food in such form; and

(b) the weight of the food after dilution or reconstitution (as the case requires).

6. Principles for determining MRL and EMRL for compounded food

(1) If—

(a) a compounded food contains pesticide residues of a pesticide listed in Schedule 1; and

(b) any of the conditions set out in subsection (2) is met in respect of each of the ingredients of the compounded food,

then, in relation to the compounded food, the MRL or EMRL for the residue definition of the pesticide is the aggregated sum of the pro-rata MRL or EMRL for the residue definition of the pesticide in respect of each of the ingredients of the compounded food (***aggregated MRL or EMRL***).

(2) The conditions referred to in subsection (1)(b) are—

(a) the ingredient is a food in respect of which a MRL or EMRL is specified for the residue definition of the pesticide; or

(b) by virtue of section 5, a MRL or EMRL for the residue definition of the pesticide is applicable to the ingredient.

(3) In this section—

ingredient (配料) means a food that is used as an ingredient of a compounded food;

pro-rata MRL or EMRL (按比例最高殘餘限量或最高再殘餘限量) means the percentage of the MRL or EMRL for the residue definition of the pesticide in respect of an ingredient that equals the percentage of the ingredient in the compounded food.

7. Factors for determining safety of food with pesticide residues

(1) For the purpose of section 4(1)(f), in determining whether the consumption of a food is dangerous or prejudicial to health, the probability of known or potential adverse public health effects which may occur from dietary exposure of the general public to the pesticide residues concerned must be evaluated.

(2) Without limiting subsection (1), all factors relevant to the circumstances of the case may be taken into account, including—

(a) the toxicological profile and safety reference values of the pesticide concerned;

(b) the characteristics of the pesticide and the level of the pesticide residues in the food concerned;

(c) the consumption pattern of the food, and the long-term and short-term dietary exposure data of the general public and vulnerable groups to the pesticide residues;

(d) any statutory requirement relating to the food;

(e) information provided by an importer or supplier of the food;

(f) information, reports or testing results provided by a public analyst;

(g) information (including reports, warnings and decision documents) provided by an international food or health authority or the food or health authority of any place outside Hong Kong; and

(h) information on the source and extent of any hazard incurred by the presence of the pesticide residues in any food, in particular information on whether the hazard—

(i) exists throughout or in any part of the manufacture or supply chain; or

(ii) is limited to a particular batch of food.

8. Name in which proceedings may be brought

Without prejudice to any Ordinance relating to the prosecution of criminal offences or the powers of the Secretary for Justice relating to the prosecution of criminal offences, the prosecution of an offence under this Regulation may be brought in the name of the Director.

Part 3

Interpretation of Schedule 1

1. In this Schedule—

aquatic products (水產) means any product derived from any edible part of any aquatic organism, including—

(a) fish;

(b) fish roe;

(c) edible offal of fish;

(d) crustacean;

(e) mollusc (including cephalopod); and

(f) any other aquatic invertebrate animal,

but does not include an amphibian, marine mammal or reptile;

milk and ***milks*** (奶、奶類) mean the normal mammary secretion of milking animals—

(a) obtained from one or more milkings without either addition or extraction; and

(b) is intended for consumption as liquid milk or for further processing.

2. Where "(Fat)" forms part of the description of a food as set out in column 4 of Part 1 of this Schedule (or column 4 of Part 2 of this Schedule), it means that the MRL (or EMRL) for the residue definition of the pesticide specified, in column 3 of Part 1 of this Schedule (or column 3 of Part 2 of this Schedule), opposite to the food, applies only to the fat of the food.

3. Where—

(a) a food is a product obtained by any processing of milk and contains pesticide residues of a pesticide;

(b) a MRL (or EMRL) for the residue definition of the pesticide applies to the food by virtue of section 5; and

(c) "(F)" forms part of the description of the primary food commodity from which the food is derived (***primary food***) as set out in column 4 of Part 1 of this Schedule (or column 4 of Part 2 of this Schedule),

the MRL (or EMRL) for the residue definition of the pesticide is to be determined in accordance with section 4 of this Part.

4. In relation to a food referred to in section 3 of this Part—

(a) (where the fat content of the food is less than 2%) the MRL (or EMRL) for the residue definition of the pesticide specified, in column 3 of Part 1 of this Schedule (or column 3 of Part 2 of this Schedule), opposite to the primary food is to be construed as if it were reduced by 50%;

(b) (where the fat content of the food is 2% or more) the MRL (or EMRL) for the residue definition of the pesticide specified, in column 3 of Part 1 of this Schedule (or column 3 of Part 2 of this Schedule), opposite to the primary food is to be construed as if it were multiplied by 25 and expressed on a fat basis.

[s. 2]

Exempted Pesticide

Column 1 Item	Column 2 Description of pesticide
1.	1,4-Diaminobutane
2.	Acetophenone
3.	Alder bark
4.	*Alternaria destruens* strain 059
5.	Ammonium acetate
6.	Ammonium bicarbonate / potassium bicarbonate / sodium bicarbonate
7.	Amorphous silicon dioxide
8.	*Ampelomyces quisqualis* isolate M10 and strain AQ10
9.	*Bacillus cereus* strain BP01
10.	*Bacillus pumilus* strain QST2808
11.	*Bacillus subtilis* strains GBO3, MBI600 and QST713
12.	*Bacillus thuringiensis*
13.	*Beauveria bassiana* strain GHA
14.	Boric acid / borates (borax (sodium borate decahydrate), disodium octaborate tetrahydrate, boric oxide (boric anhydride), sodium borate and sodium metaborate)
15.	Bromochlorodimethylhydantoin (BCDMH)
16.	Calcium carbonate / sodium carbonate
17.	Capsaicin
18.	Chitin

Column 1 Item	Column 2 Description of pesticide
19.	Chitosan
20.	Cinnamaldehyde
21.	Clove oil
22.	*Coniothyrium minitans* strain CON/M/91-08
23.	Cytokinins
24.	Extract from *Quillaja saponaria* (saponins)
25.	Extract from tea tree
26.	Fatty acid C7-C20
27.	Fatty alcohols / aliphatic alcohols
28.	Gamma aminobutyric acid
29.	Garlic extract
30.	Geraniol
31.	*Gliocladium catenulatum* strain J1446
32.	Homobrassinolide
33.	Inclusion bodies of the multi-nuclear polyhedrosis virus of *Anagrapha falcifera*
34.	Indian meal moth granulosis virus
35.	Indole-3-butryic acid
36.	Iron(III) ethylenediaminetetraacetate (EDTA) complex
37.	Iron(III) phosphate
38.	*Isaria fumosorosea* Apopka strain 97
39.	Lactic acid
40.	Lime sulphur (calcium polysulphide)
41.	Lysophosphatidylethanolamine (LPE)

Column 1 Item	Column 2 Description of pesticide
42.	Methyl anthranilate
43.	Methyl nonyl ketone
44.	Mineral oil
45.	Monocarbamide dihydrogen sulphate (urea sulphate)
46.	*Muscodor albus* strain QST20799 and the volatiles produced on rehydration
47.	Neem oil
48.	*Nosema locustae*
49.	Occlusion bodies of the granulosis virus of *Cydia pomonella* (codling moth)
50.	*Paecilomyces lilacinus* strain 251
51.	Peracetic acid (peroxyacetic acid)
52.	Pheromones
53.	Plant extract derived from *Opuntia lindheimeri*, *Quercus falcata*, *Rhus aromatica* and *Rhizophoria mangle*
54.	Potassium dihydrogen phosphate
55.	Potassium o-nitrophenolate / potassium p-nitrophenolate / sodium o-nitrophenolate / sodium p-nitrophenolate
56.	Potassium tri-iodide
57.	Protein hydrolysate
58.	*Pseudomonas chlororaphis* strains 63-28 and MA342
59.	*Pseudozyma flocculosa* strain PF-A22 UL
60.	*Pythium oligandrum* strain DV74
61.	Rhamnolipid biosurfactant

Column 1 Item	Column 2 Description of pesticide
62.	S-abscisic acid
63.	Seaweed extracts
64.	Sodium aluminium silicate
65.	Sorbitol octanoate
66.	Soya lecithins
67.	*Spodoptera exigua* nuclear polyhedrosis virus
68.	*Streptomyces lydicus* strain WYEC108
69.	Sucrose octanoate esters
70.	Sulphur
71.	Tall oil
72.	Terpene constituents of the extract of *Chenopodium ambrosioides* near *ambrosioides* (α-terpinene, d-limonene and p-cymene), as synthetically manufactured
73.	*Trichoderma asperellum* strain ICC012
74.	*Trichoderma gamsii* strain ICC080
75.	*Trichoderma hamatum* isolate 382
76.	*Trichoderma harzianum* Rifai strains T-22 and T-39
77.	Trimethylamine hydrochloride
78.	Yeast extract hydrolysate from *Saccharomyces cerevisiae*

Explanatory Note

The purpose of this Regulation is to provide a legal framework for the control of pesticide residues in food.

2. Section 1 provides for the commencement of the Regulation. Section 2 defines certain terms used in the Regulation.

3. Section 3 defines the scope of application of the Regulation.

4. Section 4 stipulates that a person may import, manufacture or sell for human consumption a food which contains pesticide residues only if—

   (a) the food and the pesticide residues concerned are specified in Schedule 1 and the amount of the residues does not exceed the limit specified in that Schedule;

   (b) the pesticide residues concerned are residues of an exempted pesticide set out in Schedule 2;

   (c) section 5 or 6 applies to the food and the amount of the residues does not exceed the limit applicable to the food; or

   (d) the consumption of the food is not dangerous or prejudicial to health.

   Contravention of the requirement is an offence with a maximum penalty of a fine at level 5 and imprisonment for 6 months.

5. Sections 5 and 6 set out the principles for determining the maximum pesticide residues limits for certain kinds of food.

6. Section 7 sets out the factors for determining whether the consumption of a food containing pesticide residues is dangerous or prejudicial to health.

7. Section 8 provides that a prosecution of an offence under the Regulation may be brought in the name of the Director of Food and Environmental Hygiene.

8. Schedule 1 sets out the maximum limits of certain pesticide residues that are allowed in certain food and the interpretation provisions for that Schedule.

9. Schedule 2 sets out the exempted pesticides.
