

COMMISSION IMPLEMENTING REGULATION (EU) 2015/1316**of 30 July 2015****derogating from Council Regulation (EC) No 850/98, as regards the minimum conservation reference size for sea bass (*Dicentrarchus labrax*)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Regulation (EC) No 850/98 of 30 March 1998 for the conservation of fisheries resources through technical measures for the protection of juveniles of marine organisms ⁽¹⁾, and in particular Article 45(1) thereof,

Whereas:

- (1) According to Article 2(2) of Regulation (EU) No 1380/2013 of the European Parliament and of the Council ⁽²⁾, the common fisheries policy shall aim to ensure that exploitation of living marine biological resources restores and maintains populations of harvested species above levels which can produce the maximum sustainable yield.
- (2) In Article 45(1) of Regulation (EC) No 850/98 it is provided that, where the conservation of stocks of marine organisms calls for immediate action, the Commission may, in addition to, or by way of derogation from that Regulation, adopt any measures necessary.
- (3) According to scientific advice from the International Council for the Exploration of the Sea (ICES) as well as from the Scientific, Technical and Economic Committee for Fisheries (STECF) sea bass in the Celtic Sea, Channel, Irish Sea and southern North Sea (ICES divisions IVb, IVc and VIIa, VIId to VIIf) suffers from a rapid decline in biomass, because of a combination of declining recruitment and increasing fishing mortality. Sea bass is a late maturing and slow growing species. The spawning stock biomass is converging towards the lowest historically observed level. The current fishing mortality is almost four times as high as the stock can sustain. ICES therefore advise to implement measures to reduce substantially fishing mortality throughout the range of this stock in the above areas.
- (4) By Commission Implementing Regulation (EU) 2015/111 ⁽³⁾, based on Article 12 of Regulation (EU) No 1380/2013, the Commission has adopted urgent measures to reduce the fishing mortality caused by pelagic vessels targeting spawning aggregations of sea bass. A restrictive limit has been introduced by Council Regulation (EU) 2015/523 ⁽⁴⁾ to reduce the mortality from recreational anglers. Scientific advice has indicated that a combination of limiting the catches and an increase in the minimum conservation reference size would be more effective in reducing the fishing mortality.
- (5) Regulation (EC) No 850/98 establishes minimum conservation reference sizes for marine organisms with the aim of ensuring the protection of juveniles.
- (6) The four sea bass stock areas identified by ICES are: Celtic Sea, Channel, Irish Sea and southern North Sea (ICES divisions IVb, IVc, VIIa and VIId to VIIf), Bay of Biscay and Atlantic Iberian waters (ICES divisions VIIIf and VIIIfb), Atlantic Iberian Waters (ICES divisions VIIIfc and VIIIfa), and Celtic Sea and West of Scotland (ICES divisions VIIIfa, VIIIfb and VIIIfc).
- (7) The current minimum size for sea bass established in Annex XII to Regulation (EC) No 850/98 Regulation is 36 cm.

⁽¹⁾ OJ L 125, 27.4.1998, p. 1.

⁽²⁾ Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy, amending Council Regulations (EC) No 1954/2003 and (EC) No 1224/2009 and repealing Council Regulations (EC) No 2371/2002 and (EC) No 639/2004 and Council Decision 2004/585/EC (OJ L 354, 28.12.2013, p. 22).

⁽³⁾ Commission Implementing Regulation (EU) 2015/111 of 26 January 2015 establishing measures to alleviate a serious threat to the conservation of the sea bass (*Dicentrarchus labrax*) stock in the Celtic Sea, Channel, Irish Sea and southern North Sea (OJ L 20, 27.1.2015, p. 31).

⁽⁴⁾ Council Regulation (EU) 2015/523 of 25 March 2015 amending Regulations (EU) No 43/2014 and (EU) No 2015/104 as regards certain fishing opportunities (OJ L 84, 28.3.2015, p. 1).

- (8) However, for the stock of sea bass in the Celtic Sea, Channel, Irish Sea and southern North Sea (ICES divisions IVb, IVc, VIIa and VIId to VIIh), the information from ICES assessments indicates that female sea bass reaches first sexual maturity at a size of 42 cm. Catch statistics confirm that fishing and landing sea bass below 42 cm removes juvenile female sea bass at a point in time where they have not yet contributed to the reproduction of the stock. Allowing catching and landing sea bass at a size of less than 42 cm therefore seriously harms the reproductive capacity of this stock, contributing significantly to the overall fishing mortality, and causes a serious threat to the conservation of the sea bass stock. As sea bass stocks in these ICES divisions depend on female sea bass remaining in the sea until they reproduce, it is appropriate to increase the minimum conservation reference size for that species to 42 cm.
- (9) Moreover, as maturity appears to be temperature dependant, it is precautionary to include the other northern stock, i.e. in the Celtic Sea and West of Scotland (ICES divisions VIa, VIIb and VIIj), under the same restriction.
- (10) It is therefore urgent to take measures in order to prohibit the fishing and landing of sea bass below 42 cm as a protective measure for juvenile sea bass in the two stocks of sea bass identified by ICES: Celtic Sea, Channel, Irish Sea and southern North Sea (ICES divisions IVb, IVc, VIIa and VIId to VIIh) and Celtic Sea and West of Scotland (ICES divisions VIa, VIIb and VIIj). Further delay in providing protection to juvenile sea bass would considerably increase the risk of serious harm to the sea bass stock, contribute significantly to its fishing mortality and accelerate the decline of its biomass.
- (11) The measures provided for in this Regulation are in accordance with the opinion of the Committee for Fisheries and Aquaculture,

HAS ADOPTED THIS REGULATION:

Article 1

By way of derogation from Annex XII to Regulation (EC) No 850/98, the minimum size for sea bass (*Dicentrarchus labrax*) in Region 2, as defined in Article 2 of that Regulation, shall be 42 cm.

Article 2

This Regulation shall enter into force on the third day following that of its publication in the *Official Journal of the European Union*.

It shall take effect on 1 September 2015.

Before the end of 2017 the Commission shall assess whether the measures introduced by this Regulation are still necessary.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 30 July 2015.

For the Commission
The President
Jean-Claude JUNCKER
