----------	---	---

Manager of the agricultural holding

The **manager** of the agricultural holding is the natural person responsible for the normal daily financial and production activities of the agricultural holding.

Farm work is every type of work on the agricultural holding which contributes to either of the following:

- (i) the activities listed in Article 2, point (a) of Regulation (EU) 2018/1091
- (ii) maintaining the means of production;
- (iii) the activities directly derived from these productive actions.

The **time spent on farm work** on the agricultural holding is the working time actually devoted to farm work for the agricultural holding, excluding work in the households of the holder or manager.

Annual work unit (AWU) is the full-time equivalent employment, i.e. the total hours worked divided by the average annual hours worked in full-time jobs in the country.

Full-time means the minimum hours required by the national rules governing contracts of employment. If these do not state the number of annual hours then 1800 hours is to be taken as the minimum figure (225 working days of eight hours per day).

CGNR 016	-	<p>Year of birth</p> <p>The year of birth of the manager of the agricultural holding</p>
CGNR 017	-	<p>Sex</p> <p>The sex of the manager of the agricultural holding:</p> <p>M — Male</p> <p>F — Female</p>
CGNR 018	-	<p>Farm work on the agricultural holding (apart from household work)</p> <p>Percentage band of annual work units (?) of farm work carried out by the manager of the agricultural holding.</p>
CGNR 019	-	<p>Year when classified as manager of agricultural holding</p> <p>The year in which the manager of the agricultural holding took up this role</p>
CGNR 020	-	<p>Agricultural training of the manager</p> <p>The highest agricultural education level that was obtained by the manager:</p> <p>PRACT — only practical agricultural experience, if the manager's experience was acquired through practical work on an agricultural holding;</p> <p>BASIC — basic agricultural training, if the manager took any training courses completed at a general agricultural college and/or an institution specialising in certain subjects (including horticulture, viticulture, silviculture, pisciculture, veterinary science, agricultural technology and associated subjects); a completed agricultural apprenticeship is regarded as basic training;</p>

(?) Annual work unit (AWU) percentage band 2: (> 0-< 25), (≥ 25-< 50), (≥ 50-< 75), (≥ 75-< 100), (100).

		FULL — full agricultural training, if the manager took any training course continuously for the equivalent of at least 2 years full-time training after the end of compulsory education and completed at an agricultural college, university or other institute of higher education in agriculture, horticulture, viticulture, silviculture, pisciculture, veterinary science, agricultural technology or an associated subject.
CGNR 021	-	<p>Vocational training undertaken by manager during the last 12 months</p> <p>If the manager took vocational training, a training measure or activity provided by a trainer or a training institution primarily aimed at the acquisition of new skills related to the farm activities or activities related directly to the agricultural holding or the development and improvement of existing ones.</p>

Type of tenure of the UAA (in relation to the holder)

The type of tenure depends on the situation on a reference day of the year of the survey.

CGNR 022	-	<p>Farming on own land</p> <p>Hectares of UAA farmed by the agricultural holding and held by the holder as a property or farmed by the holder acting as a usufructuary or heritable long-term leaseholder or under some other equivalent type of tenure.</p>
CGNR 023	-	<p>Farming on rented land</p> <p>Hectares of UAA rented by the agricultural holding in return for a fixed rent agreed in advance (in cash, kind or otherwise), and for which there is a (written or oral) tenancy agreement. The UAA is allocated to only one agricultural holding. If the UAA is rented out to more than one agricultural holding during the reference year, it is normally allocated to the agricultural holding with which it is associated on the survey reference day or which used it for the longest period during the reference year.</p>
CGNR 024	-	<p>Share farming or other tenure modes</p> <p>Hectares of UAA which is:</p> <ol style="list-style-type: none"> shared, meaning farmed in partnership by the landlord and the sharecropper under a written or an oral share-farming contract. The output (either economic or physical) of the share cropped area is shared between the two parties on an agreed basis; under other modes of tenure not covered elsewhere under the previous items.
CGNR 025	-	<p>Common land</p> <p>Hectares of UAA used by the agricultural holding but not belonging directly to it, i.e. on which common rights apply.</p>
CGNR 026	-	<p>Organic farming</p> <p>The agricultural holding has production methods that comply with (i) Regulation (EU) 2018/848 of the European Parliament and of the Council (*) or, where applicable, in the most recent legislation, and (ii) the corresponding national implementing rules for organic production.</p>

(*) Regulation (EU) 2018/848 of the European Parliament and of the Council of 30 May 2018 on organic production and labelling of organic products and repealing Council Regulation (EC) No 834/2007 (OJ L 150, 14.6.2018, p. 1, ELI: <http://data.europa.eu/eli/reg/2018/848/oj>).

CGNR 028	-	<p>Total UAA of the agricultural holding that is under conversion to organic farming production methods to be certified according to national or European Union rules</p> <p>Hectares of the UAA of the agricultural holding on which organic production methods are applied during the transition from non-organic to organic production within a given period ('conversion period') as set out in (i) Regulation (EU) 2018/848 or, where applicable, in the most recent legislation and (ii) the corresponding national implementing rules for certification of organic production.</p>
CGNR 029	-	<p>Participation in other environmental certification schemes</p> <p>The agricultural holding participates in national or regional environmental certification schemes such as those referred to in Article 43 paragraph 2 and paragraph 3, point (b) of Regulation (EU) No 1307/2013 or in Annex IX thereto (current certification schemes equivalent to the greening payment of CAP) or, where applicable the most recent legislation, and the application for a subsidy has been accepted.</p>

II. VARIABLES OF LAND

The total area of the agricultural holding consists of the utilised agricultural area (arable land, permanent grassland, permanent crops and kitchen gardens) and other farmland (unutilised agricultural land, wooded area and other land not elsewhere classified).

The **area** to be collected for each item is known as the **main area** and refers to the physical area of the parcel(s), regardless of whether there was only one single crop or several crops during the crop year. In the case of annual crops, the main area corresponds to the sown area; in case of permanent crops the main area is the total planted area; in the case of successive crops, the **main area** corresponds to the area occupied by the main crop in the parcel during the year; in the case of simultaneous crops, it corresponds to the area where the crops co-exist. In this manner, each area is listed only once.

The **main crop** is the one with the highest economic value. When it is not possible to determine what the main crop is on the basis of the production value, then the main crop will be the one which occupies the ground for the longest period of time amongst all the crops harvested during the reference year.

The **utilised agricultural area** (UAA) is the total area taken up by arable land, permanent grassland, permanent crops and kitchen gardens used by the agricultural holding, regardless of the type of tenure.

Crop rotation is the practice of alternating crops grown in a specific field in a planned pattern or sequence in successive crop years so that crops of the same species are not grown without interruption in the same field. In a crop rotation the crops are normally changed annually, but it is possible to have a crop rotation with multiannual crops.

Open field and areas under glass or high accessible cover are to be reported separately.

For land variables, the use of the land shall refer to the reference year.

MODULE 1. LABOUR FORCE AND OTHER GAINFUL ACTIVITIES

DESCRIPTION OF LABOUR FORCE VARIABLES

For variables on labour force, a 12-month reference period ending on a reference day within the reference year shall be established by each Member State.

Holder

The **holder** is the natural person (or the selected natural person in case of a group holding) on whose account and in whose name the holding is operated and who is legally and economically responsible for the holding. If the holder is a legal person, data is not collected for the holder.

Farm work is defined in Annex I - I. GENERAL VARIABLES

Topic: farm management

		Detailed topics: holder and gender balance
MLFO 001	-	Sex of the holder The sex of the holder M — Male F — Female
MLFO 002	-	Year of birth Year of birth of the holder
		Detailed topic: labour input
MLFO 003	-	Holder's farm work on the agricultural holding Percentage band of annual working units of farm work on the agricultural holding for the holder, apart from household work.
		Detailed topic: safety measures, including farm safety plan
MLFO 004	-	Farm safety plan The farm has carried out a workplace risk assessment with the aim of reducing the work-related hazards, resulting in a written document (such as a 'farm safety plan').

Topic: family labour force

		Detailed topics: labour input, number of persons involved and gender balance
		Family members carrying out farm work <i>This item applies only to sole holder holdings, because group holdings and legal persons are considered not to have family labour force.</i> Family members carrying out farm work (apart from housework) include spouse or recognised partner, relatives in ascending and descending line, and siblings of the holder and holder's spouse or recognised partner on sole holder holdings. When relevant, these include the manager who is a member of the holder's family.
MLFO 005	-	Male family members carrying out farm work Number of male family members per percentage band of annual working units
MLFO 006	-	Female family members carrying out farm work Number of female family members per percentage band of annual working units

⁽¹⁾ Codes and concept IDs used during actual data transmission may differ from those indicated in the Annex.

MODULE 3. ANIMAL HOUSING AND MANURE MANAGEMENT

DESCRIPTION OF ANIMAL HOUSING AND MANURE MANAGEMENT VARIABLES

Topic: animal housing

Places in animal housing for cattle, pigs and poultry. The term '**places**' refers to the usual number of animals present in the animal houses during the reference year. This means that the number of animals must be corrected on the reference day if conditions are not normal (over-housing, under-housing, sanitary emptying, special production schemes, etc.). Only animal housing in use during the reference period is to be recorded. The number of temporarily empty places in the animal houses during the reference period is also recorded.

Animals are defined in Core Section III. VARIABLES OF LIVESTOCK
