Whereas:

- (1) At present, there are many different models for the veterinary and public and animal health certificates required by Community legislation for the import of live animals, semen, embryos, ova and products of animal origin into the Community, which are laid down in several dozen fragmentary instruments. Despite the differences in their graphic presentation, the certificates' contents are largely identical as regards the information which has to be provided. It would greatly simplify use of the certificates by the authorities of third countries if the existing models were standardised.
- (2) Standardisation is, moreover, essential for effective computer processing of the certificates in the system set up by Commission Decision 2003/623/EC of 19 August 2003 concerning the development of an integrated computerised veterinary system known as TRACES ⁽³⁾.
- (3) Standardisation will facilitate and accelerate administrative procedures at borders, enabling the data contained in the certificates to be transferred automatically to the Common Veterinary Entry Documents laid down by Commission Regulation (EC) No 136/2004 of 22 January 2004 laying down procedures for veterinary checks at Community border inspection posts on products imported from third countries ⁽⁴⁾ and (EC) No 282/2004 of 18 February 2004 introducing a document for the declaration of, and veterinary checks on, animals from third countries entering the Community ⁽⁵⁾.

- (4) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS DECISION:

Article 1

1. The various veterinary and public and animal health certificates required for the import of live animals, semen, embryo, ova and products of animal origin into the Community and the certificates for transit through the Community of products of animal origin shall be based on the standard models for veterinary certificates in Annex I.

2. Part I of the standard models referred to in paragraph 1 containing information on the consignment shipped replaces the corresponding parts of the model certificates laid down in the Community provisions referred to in Annex II.

3. Part II of the standard models referred to in paragraph 1, covering certification by the competent authority, includes the public health certificates, health certificates, animal health certificates, animal welfare certificates or declarations, health attestations, information or data, animal transport certificates or rules, specific requirements and specific animal health conditions as mentioned in the certificates, stipulated by the Community provisions which are referred to in Annex II.

Article 2

Veterinary and health certificates which conform with the models laid down by the Community provisions referred to in Annex II may, provided there have been no later amendments, be used by third countries.

Article 3

This Decision is addressed to the Member States.
