

**Economic Modernisation Vision Executive Program
(2023- 2025)**

The vision is clear, and the only way forward is through action and achievement to build a new Jordan—a modern state rooted in participation, active citizenship, the rule of law, and dedicating all available resources to development; a state led by its young men and women, with their limitless aspirations and relentless resolve.

Abdullah II bin Al-Hussein

Introduction

The Economic Modernisation Vision is an essential pillar within the course of comprehensive reform called for by His Majesty King Abdullah II Ibn Al-Hussein with the goal of unleashing national potential in various sectors. An effort to forge inclusive and sustainable growth that ensures creating job opportunities for Jordanians and ensuring a better quality of life for citizens. The Speech from the Throne at the Opening of the Second Ordinary Session of the 19th Parliament contained clear Royal directives for the government to move forward with the reform process and emphasized the importance of the Economic Vision in attracting investment, supporting economic growth, and providing job opportunities for young Jordanians over the next decade.

The Vision included key principles for drawing a clear roadmap for the future of Jordan, in which the private sector would play a pivotal role in the economic activity, based on two strategic pillars: accelerated economic growth and improved quality of life for all citizens, while sustainability is a cornerstone of this Vision in an effort to achieve the national priority goals, with the overarching goal of generating one million new jobs for Jordanians in the labor market.

The Executive Program for the Economic Modernisation Vision (2023-2025) reflects the government's commitment to delivering the Modernisation Vision as a key pillar in the comprehensive modernisation process led by His Majesty the King in its three political, economic and administrative spheres, including initiatives, projects, legislation and priority procedures in the various development sectors, which all relevant ministries and institutions will put into practice within the timelines contained therein. The Executive Program for the Economic Modernisation Vision (2023-2025) serves as a starting point for subsequent Executive Programs, thereby paving the way for achieving targets related to growth, job creation, investment and partnership with the private sector.

The Program comes in light of the exceptional economic and financial challenges experienced by Jordan due to global crises, external shocks and their aftermath on the economic sectors. Its development has also coincided with the completion of the Fifth

Review of the Economic Reform Program developed by the Government of Jordan and supported by the International Monetary Fund (IMF). A review that commended Jordan's reform approach and the prudence of its fiscal and monetary policies, while maintaining future growth projections of economic performance within the present levels under these exceptional circumstances.

The Executive Program, which is complemented by the Public Sector Modernisation Roadmap, features (183) initiatives as part of the Vision's eight drivers (High Value Industries, Future Services, Destination Jordan, Smart Jordan, Sustainable Resources, Invest Jordan, Green Jordan, and Vibrant Jordan), adopted according to the readiness and availability of funding, taking into account the alignment with the economic reforms matrix, sustainable development goals, and contribution to providing added value for growth and employment, and enhancing partnership with the private sector. The total cost of the program is estimated at JD2.3 billion for the entire duration of the Program of 2025. The Program also included the review, amendment and approval of legislative packages and action plans to improve Jordan's ranking in international indicators and reports.

The Executive Program is featured by including initiatives associated with women's economic empowerment, including legislative reviews and measures to improve Jordan's ranking in the Global Gender Gap Index, as well as further implementing of the action plan related to improving Jordan's ranking in the Women, Business, and the Law Report, and in addition to developing a national index to monitor and track women's economic participation.

In developing the Executive Priorities Program, the government has pursued the same participatory approach of the Vision's development process. Whereas sectoral task forces were formed, whose membership includes the public sector, along with representatives of the private sector and experts from different sectors and were key to the development process in reviewing the Vision's document and its proposed initiatives, aligning them with the sectoral strategic plans and elaborating the final output of the Vision's Executive Program in a form that reflects the goals and aspirations of the Vision.

Moreover, the Executive Program as a living and flexible document will be subject to annual revision and assessment in line with the government's economic developments and priorities. As such, it includes a specific timeframe for implementation, clear indicators to measure performance, and an online system to monitor progress..

Summary of the Economic Situation

The Jordanian economy has achieved positive outcomes during the period (2000-2009), as this was due to the growth in national exports, increase in foreign investments and rise in the pace of remittances from Jordanian expatriates, resulting in an average growth rate of 6.5% then.

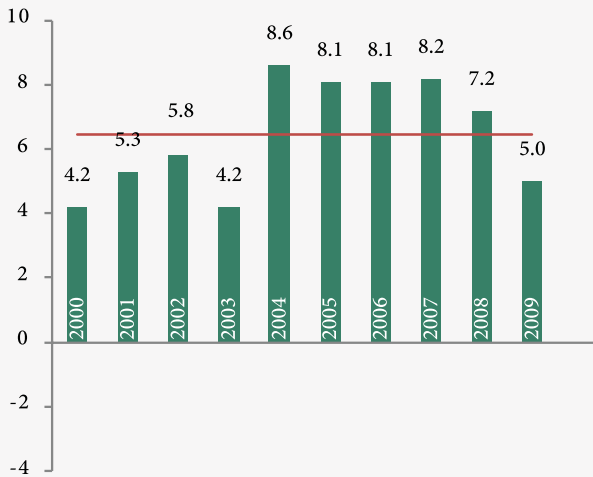

On the contrary, the economic growth rate during the period (2010-2021) has dropped to an average of 2.1% only. This intense drop was a result of various reasons, including the global financial and economic crisis in 2009, the state of insecurity in the region in 2011 and the subsequent influx of nearly 1.3 million Syrian refugees into the Kingdom, the consequent strain on public finances and essential government services such as, health, education, transport, water, sanitation, and others, as well as the impact of COVID-19 pandemic.

Afterwards, in 2021, the national economy has shown a noticeable trend for recovery from its pandemic-induced 1.6% drop in 2020. This was driven by several measures taken by the government in the health sector, monetary and financial measures taken to reduce the impact of the pandemic, such as lifting lockdown protocols and allowing economic sectors to operate. All of which resulted in achieving a positive growth reaching 2.2%, as this positive trend remained until mid-2022, with a growth rate of up to 2.7% compared to 1.8% during the same period in 2021.

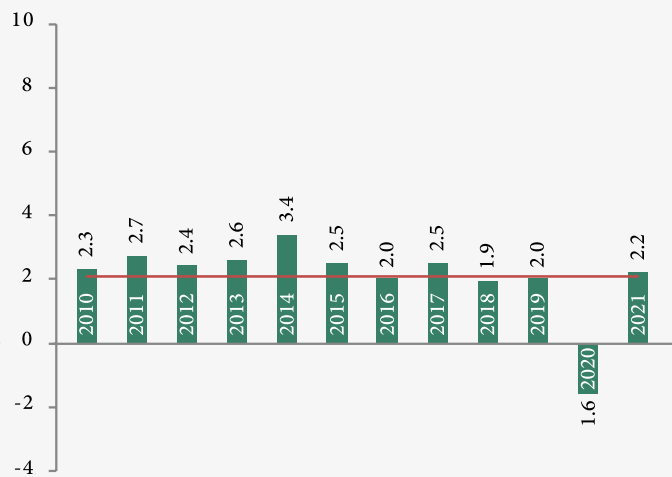

Real GDP Growth Rate Trend

Average Real GDP Growth Rate %6.5

Average Real GDP Growth Rate 2.1%

Real GDP Growth Rate Trend

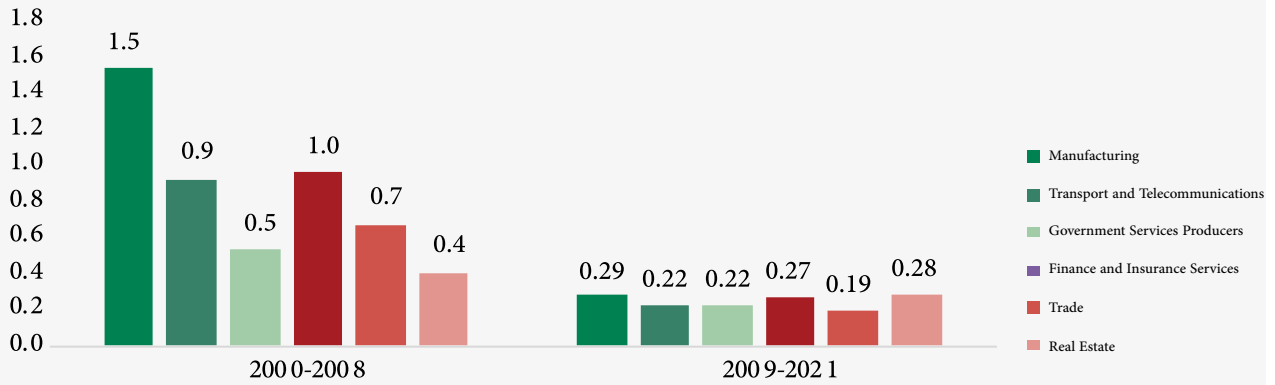

The national economy has faced different shocks over the past decade which have led to a change in the structure of the economy in general. In terms of supply, the real estate sector ranked second with regard to its contribution to the real economic growth rate (0.28%, or around 12.2% of the real growth rate of 2.3%) during the period 2009-2021, preceding important sectors such as transport and trade. While in terms of demand, the private consumption expenditure expanded, due to the

influx of nearly 1.3 million Syrian refugees into the Kingdom, as this was at the expense of government consumption expenditure and gross capital formation. However, the relative importance of net exports to GDP improved. Accordingly, there is a pressing need for further economic diversification and transition towards an economy that is more dependent on productive sectors for its growth and capable of creating exportable goods and services.

Contribution of Key Sectors to Real GDP Growth Rate

Average Real GDP Growth Rate 6.5%

Average Real GDP Growth Rate 2.3%

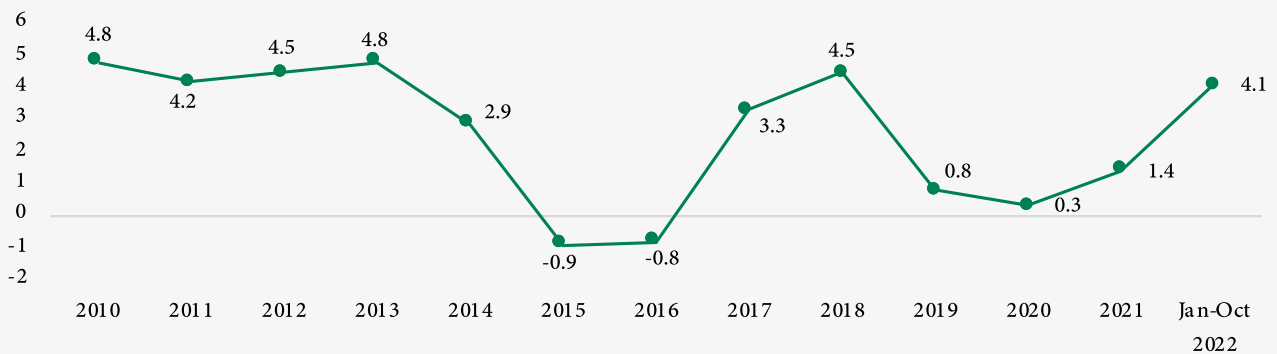

Inflation Rate

During the period from 2010 to 2019, moderate inflation rates were recorded reaching an average of 2.5%, despite the liberalization of petroleum products prices in 2012 and having petroleum prices trending towards increase during that period and the period after. Also, the inflation rate fell to 0.3% in 2020 due to the drop in domestic demand and global prices as a result of COVID-19

Pandemic's lockdown, this inflation rate then rose again to reach 1.4% in 2021 as the growth rates have gone up to what they were (pre-pandemic levels). In 2022, as the global inflationary pressures broadened owing to the rise in food and energy prices, the annual inflation rate surged from 2.5% in January to 5.2% in October 2022, thereby increasing the average inflation rate to 4.1% during the first ten months of the same year

Inflation Rate Trend

Average Inflation Rate (2010-2020) 2.5%

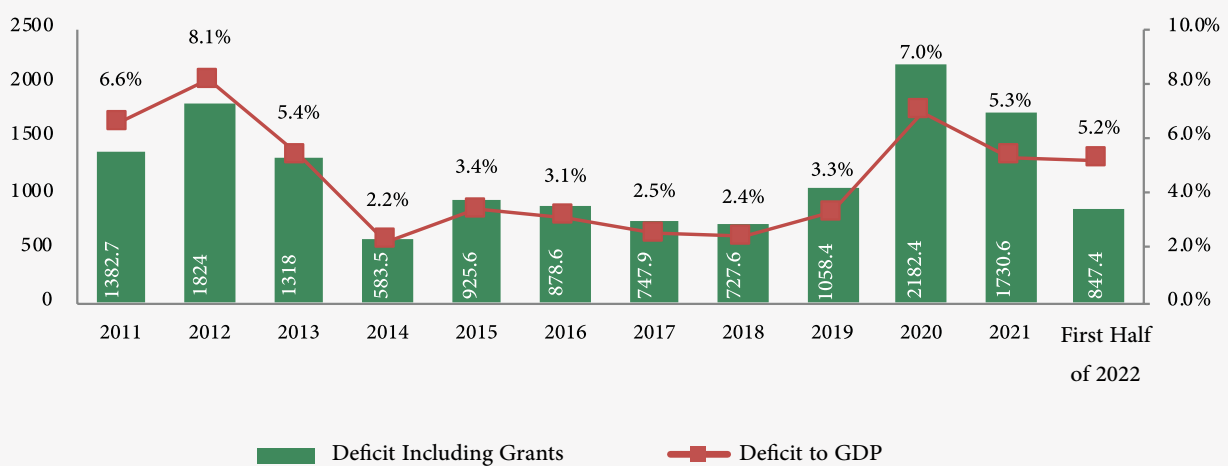

Public Finance Sector

- General Budget:** The general budget suffers from a chronic deficit, reaching record levels of about 8.1% of GDP (including grants) in 2012, as this was mainly due to the decline in total revenue growth rate, with relative stability in expenditures. The various fiscal reforms in subsequent years, especially in the tax system, had a major impact on the stability of public finance indicators which caused a drop in the budget deficit to reach 2.4% of GDP in 2018.

However, the financial impact of COVID-19 pandemic pushed the budget deficit up to 7% of GDP in 2020. While in 2021, because of the economic recovery, the government was able to achieve the General Budget Law targeted projections for domestic revenues, reducing the actual budget deficit to 5.4% of GDP. Also, during the first half of 2022, deficit (including grants) reached 5.2%, compared to 5.4% for the same period in 2021.

Deficit as percentage of GDP

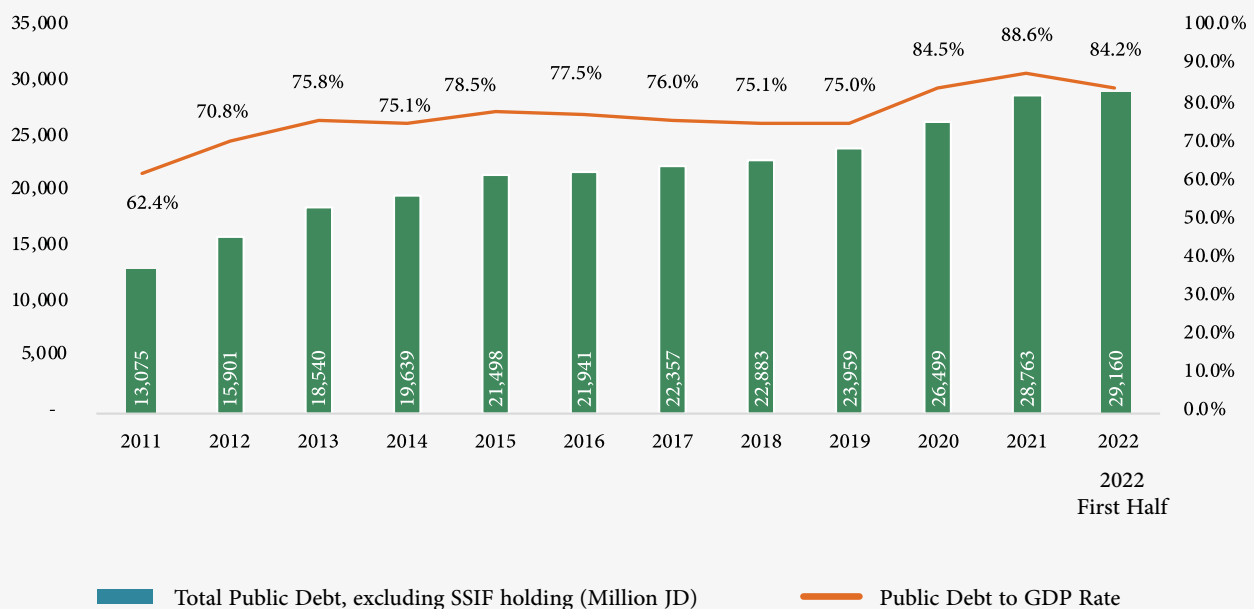

- Public Debt:** The persistent deficit in the general budget resulted in a public debt average of 74.7% of GDP in the period (2011-2020). The highest percentage of public debt during this decade was in 2020, when it reached 84.5% and that resulted from the impact of COVID-19 pandemic on the budget, in addition to financing the deficit of the Water Authority of Jordan and installments of outstanding loans guaranteed to the National Electric Power Company which are considered extra burdens on the financial debt. Public debt kept increasing until it reached 88.6% in 2021, after excluding debt holding by

the Social Security Investment Fund (SSIF).

Based on the available figures for the first half of 2022, upward trends are seen in the debt-to-GDP ratio amid heavy pressures on the general budget. Despite of the challenges related to the budget deficit and public debt levels, the government was able to meet the requirements of the (Economic Reform Program 2020-2024) while maintaining the Kingdom's credit rating granted by global rating agencies and that was regardless of the economic conditions experienced by all countries in the world.

Total Public Debt, excluding SSIF

Monetary Sector

During the period (2010-2020), the monetary sector has shown positive outcomes, represented by maintaining comfortable levels of foreign reserves that are enough to cover imports of goods and services for an average of 7.2 months, i.e., two times higher than the international standard. Furthermore, the total balance of foreign reserves reached around USD15.9 billion at the end of 2020, compared to USD13.0 billion at the end of 2010. The banking sector deposits increased by 5.6% annually, on average, to reach around JD36.8 billion at the end of 2020, compared to JD22.5 billion at the end of 2010.

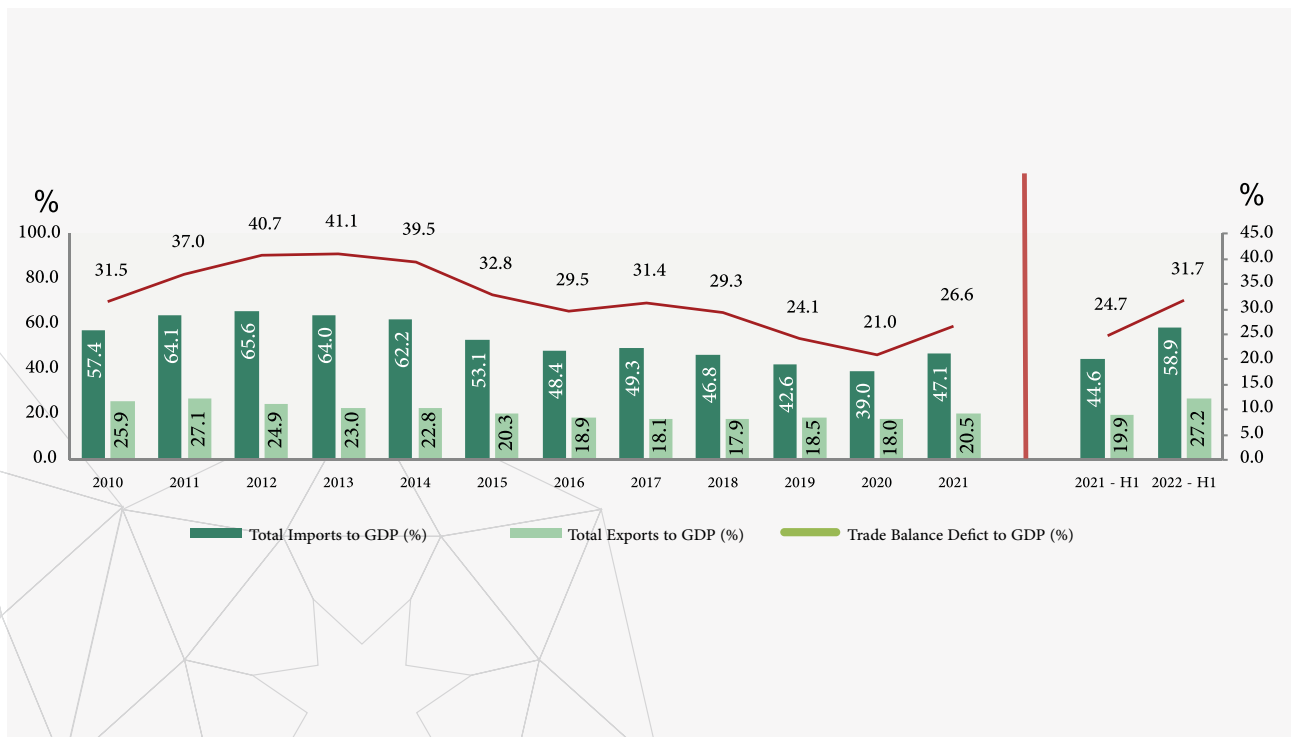

Credit facilities for all economic sectors have also gone up by an annual average of 7.2%, reaching JD28.6 billion by the end of 2020, compared to JD14.5 billion by the end of 2010. Domestic liquidity has recorded an average growth of 5.8% per year, equivalent to JD37.0 billion at the end of 2020, compared to about USD22.3 billion at the end of 2010. Going to 2021, the monetary sector maintained its positive indicators, with the total foreign reserves balance recording comfortable and high levels of around USD18 billion, deposits increasing by 7.4%, credit facilities by 4.9%, and domestic liquidity increasing by 6.7%. In the first ten months of 2022, the monetary sector indicators

maintained a good performance, demonstrating trust in monetary policy, a solid banking sector, as well as a vision to a stable outlook for the Jordanian economy.

Foreign Trade

Due to its small size and its openness to the outer world, the Jordanian economy is affected by changes in both the external economies in general, and economies of our trade partners in specific. Jordanian economy faces many challenges too, including those associated with the lack of primary resources, political circumstances of surrounding countries, as well as the recent impact of the COVID-19 pandemic, which had effects that extended to reach the global trade.

- Trade in Goods: Over the past two decades, foreign trade in goods accounted for nearly 80% of the Kingdom's GDP on average, while imports accounted for most of the trade in goods within the weak industrial base and the heavy reliance on the outer world for the provision of various types of goods and production inputs. Consequently, the trade balance endures a chronic deficit, which has averaged 33% of GDP annually in the last two

decades. Nonetheless, the deficit decreased to 21.0% in 2020 and 26.6% in 2021 due to a greater decline in imports values against the decline in exports values, and that was a result of COVID-19 pandemic, but rates reverted back to their levels in the first half of 2022.

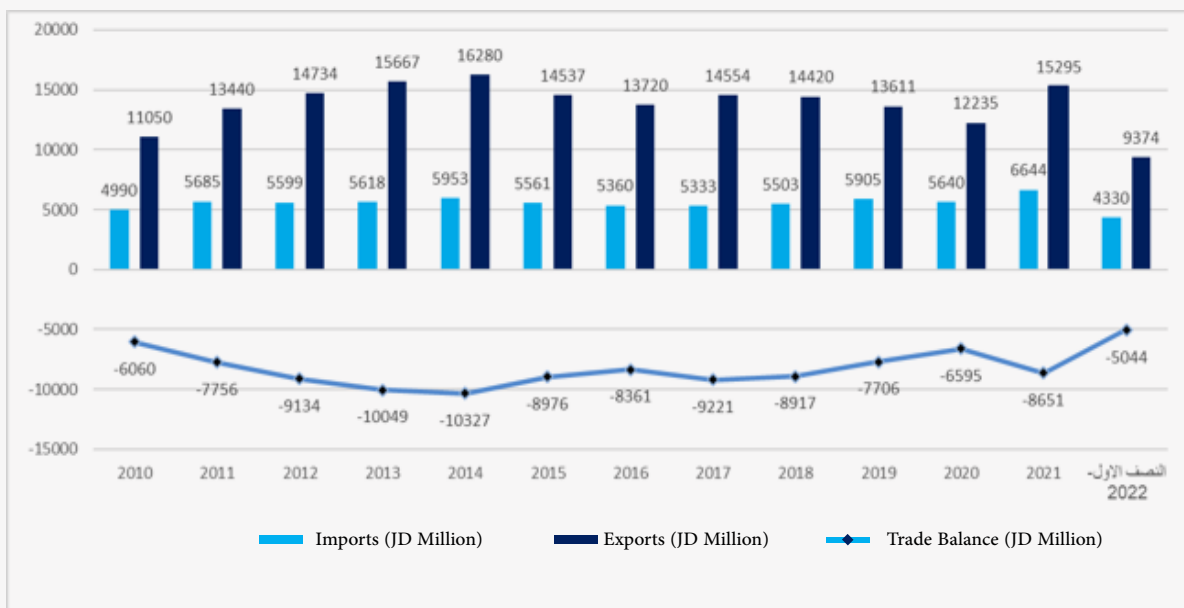

Comparing the first half of 2022 against the same period in 2021, total exports of the Kingdom increased by 43.4%, reaching JD4,329.8 million. This was the result of a 45.5% increase in national exports, reaching JD3961.0 million, and a 24.8% increase in re-exported goods, reaching JD368.8 million.

Imports also increased during the first half of 2022 by 38.6% compared to the same period of 2021, reaching JD9373.9 million.

Accordingly, the trade balance deficit (which accounts for the difference between imports and total exports) widened in the first half of 2022 to 34.6% compared to the same period in 2021, reaching JD5044.1 million.

- **Trade in Services:** Jordan's economy is described as a service economy, which is why further attention must be paid to the competitiveness of service sectors both domestically and internationally. Besides the tourism sector, there is a need to seize on other service sectors, such as financial services and ICT services that keep pace with developments in the digital economy space, and the transport sector, which offers enormous potential given Jordan's geographical location along the trade routes.

During (2010-2019), the services balance recorded average annual surplus of 5.1% of GDP, compared to an average deficit of 0.2% during (2000-2009). In 2020, however, the services trade balance showed a deficit of 1.3% for the first time since 2005 due to COVID-19 pandemic. The balance recorded a surplus of 0.8% again in 2021. The service balance continued to attain a surplus of 2.4% of GDP during the first half of 2022, compared to a deficit of 1.6% during the same period in 2021.

Assumptions Underlying the Macroeconomic Framework (2023-2025)

- Maintaining and expanding levels of domestic and foreign private direct investment.
- Maintaining the current level of capital expenditures over the next three years.
- Maintaining financial and monetary stability and adequate levels of foreign reserves at the Central Bank of Jordan.
- Continuing the implementation of fiscal reforms by reducing the deficit and limiting the growth of public debt and its service burdens.
- Achieving sustainable growth in exports over the next few years.
- Better global economic conditions in terms of supply chains, energy and food prices, and growth rates.
- The continued presence of Syrian refugees as a long-term phenomenon not a temporary one.

**Economic Modernisation Vision Executive Program
Priorities (2023- 2025)**

Main Features of Economic Modernisation Vision

Executive Program (2023-2025)

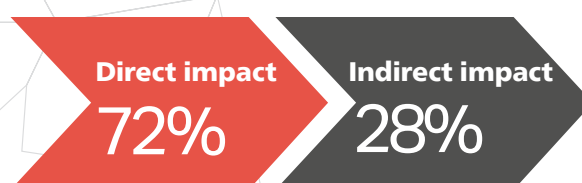

- A living and flexible document that will be reviewed and revised annually in line with the developments, in a complementary manner with the Economic Modernisation Vision Document and the Public Sector Modernisation Roadmap.
- A participatory Executive Program through four ministerial committees and (22) task forces across agencies.
- The Executive Program includes (182) initiatives, selected from approximately (380) initiatives identified in the Economic Modernisation Vision.
- The Executive Program includes (406) priorities with a specific timeframe for implementation.
- Priorities include policies, procedures and projects for each driver and sector.
- Adopting prioritization criteria in terms of project readiness for implementation, identifying owners, and funded from the public budget or foreign aid.
- Priorities consistent with the key objectives of supporting economic recovery and growth, creating job opportunities, and promoting participation.
- Reviewing, revising and enacting (45) legislations.
- Alignment with the Economic Reforms Matrix, Sustainable Development Goals, and sectoral strategies and plans.
- Priorities related to women economic empowerment and increasing women economic participation.
- Action plans to improve Jordan's ranking in international indicators and reports
- Setting macroeconomic targets 2023-2025.
- An electronic system to monitor performance and achievement through the Prime Ministry Delivery Unit (PMDU) (to be rolled out in two phases), defining performance and achievement indicators and an (Online Dashboard) that will be accessible by the public.

Women Empowerment Initiatives in the Executive Program

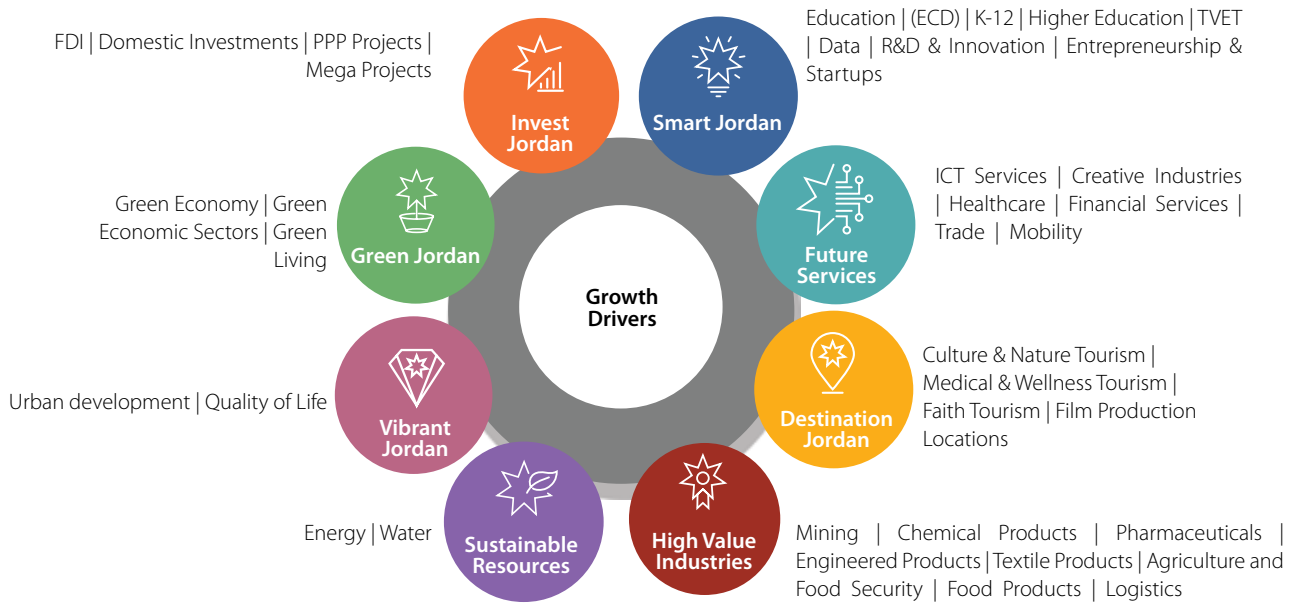

for the Economic Modernisation Vision, Priorities (2023-2025)

- Implementing the Women Empowerment Strategy in the Economic Modernisation Vision, which was launched on 4/12/2022
- Reviewing the laws and regulations to enhance women economic empowerment
- Developing and implementing an action plan to improve Jordan's ranking in the Global Gender Gap Index
- Implementing the action plan to improving Jordan's ranking in the Women, Business and the Law Report
- Developing a national index to monitor and track women economic participation

Impact of the Initiatives on Women Empowerment:

Drivers of the Economic Modernisation Vision

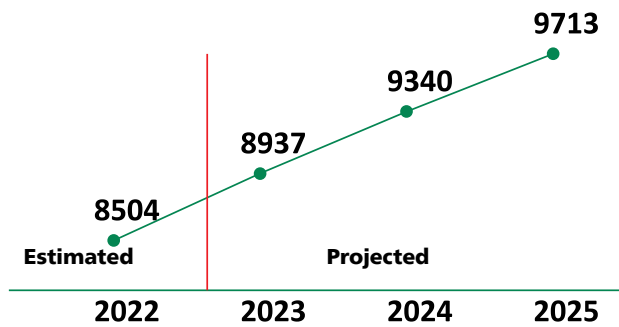

Objectives	
 High Value Industries	Develop Jordan into a regional industrial hub through high growth exports with high quality and value products
 Future Services	Achieve excellence in services sectors to enhance national development and increase exports of services on regional and global levels
 Destination Jordan	Position Jordan as a prime tourism and film production destination
 Smart Jordan	Develop and prepare local talents to meet the needs of future skills, required resources and institutions to accelerate economic growth and enhance quality of life
 Sustainable Resources	Optimise the use of natural resources to ensure sustainability, unleash inclusive sectoral growth and enhance quality of life
 Invest Jordan	Stimulate domestic and foreign investments through an attractive and efficient investment and doing business ecosystem
 Green Jordan	Support sustainable practices as a pillar of Jordan's future economic growth and enhance quality of life
 Vibrant Jordan	Improve quality of life for Jordanians through developing and adopting higher life standards that revolve around the citizen and the environment

Promising Opportunities and Potentials

in Future Services

ICT Services	• Providing online and digital government services
	• Advanced research and development centers/ innovation Center
	• 5G infrastructure
Film	• International feature and local film production projects
	• Post- Production Studio and a Film Academy
Transport	• National Railway Network
	• Warehousing and distribution centers
	• Electric vehicle charging stations network
	• Toll roads projects
	• Smart mobility solutions
	• Developing services at the border crossings
E-gaming	• Design and development of video games
	• E-sports websites
	• Video Games Academy
Financial Services	• Specialized financing institutions to finance small, medium and micro enterprises
	• Locally- Based Reinsurance service providers Infrastructure projects for enhancement of digital financial services
	• Infrastructure projects for enhancement of digital financial services
Healthcare	• Various health care facilities and the medical city conScept
	• Specialization Hubs in the north, center and south (PPPs or private investments)
Creative and Design Services	• Consumer Product and industrial design studios
	• Apparel design studios
	• Creative Industries Hub
Trade	• E-commerce platforms
	• Regional trading businesses (between Jordan and neighboring countries)

Promising Opportunities and Potentials

in Service Sectors

Early Childhood and Education	• Daycare centers
	• Children Edutainment Hub
Energy	• Energy storage systems
	• Green Ammonia and Green Hydrogen plant
	• Smart metering solutions
Water	• National water desalination plants
	• Water DSM Equipment and Solution Company
Higher Education	• Specialized colleges
	• International university
	• Online education courses platforms
	• Medical University
TEVT	• Vocational training institutes
	• Specialized technical programs
Tourism	• Small hotels in tourism locations (Boutique Hotels).
	• Tourism projects of a cultural and natural heritage nature
	• Projects in religious tourist sites
	• Agri and Culinary, and environmental tourism projects
	• Digital tourism experiences productions
	• Adventure tourism and Wellbeing and Spa Projects

Initiatives and Priorities of the Industrial Sector

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Developing an action plan to improve Jordan's ranking in the Competitive Industrial Performance Index			Ministry of Industry, Trade and Supply
Enhance the competitiveness of domestic industries	Developing a comprehensive industrial policy to promote sustainable competitiveness and commencing its implementation			Ministry of Industry, Trade and Supply
	Industrial Support Fund			Ministry of Industry, Trade and Supply
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Increase the volume of national exports of goods and services	Developing and implementing the National Export Strategy (2023-2025)			Ministry of Industry, Trade and Supply
	Developing and launching the Local Product Promotion Policy (Made in Jordan)			Ministry of Industry, Trade and Supply
	Building a database of various manufacturing sectors and developing their related strategies			Ministry of Industry, Trade and Supply
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Support entrepreneurship and small and medium-sized enterprises (SMEs)	Facilitating and mainstreaming registration and licensing procedures, especially for small enterprises and entrepreneurs			Ministry of Investment
	Designing and implementing specialized training programs for entrepreneurs in the field of manufacturing to help them manage their projects.			Ministry of Industry, Trade and Supply
	Laying the foundations and criteria for the Entrepreneurship Award to recognize the achievements of entrepreneurs and their contribution to the manufacturing sector			Ministry of Industry, Trade and Supply
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Environmental compliance in manufacturing	Developing standards for circular economy practices in industrial activities and focusing on environmental industrial clusters			Ministry of Industry, Trade and Supply

Initiative	2023	2024	2025	Owner
Environmental compliance in manufacturing	Supporting the establishment of local recycling companies and the legislative environment governing such process			Ministry of Industry, Trade and Supply and Ministry of the Environment
	▶ Sustainable Development Goals    Women Empowerment Medium Impact 			
Enhance the competitiveness of food manufacturing and increase exports	Developing a detailed strategy and roadmap to promote food manufacturing and the sector exports			Ministry of Industry, Trade and Supply
	Building the capacity of food manufacturing workers through a skills development programme			Ministry of Labor
	Streamlining procedures for licensing food manufacturing			Ministry of Industry, Trade and Supply
	▶ Sustainable Development Goals    Women Empowerment Medium Impact 			
Market and promote food manufacturing	Preparing and implementing a campaign to market and promote Jordan food industries both domestically and internationally (within "Made in Jordan" Program)			Ministry of Industry, Trade and Supply and Chambers of Industry
	Expanding the services of the National Packaging Center and increasing the number of companies benefiting from these services			Ministry of Industry, Trade and Supply
	▶ Sustainable Development Goals     Women Empowerment Medium Impact 			
Enhance supply chains for plant-based food manufacturing and enhance quality and specifications of Jordan food products	Crop allocation in the food manufacturing			Ministry of Industry, Trade and Supply
	▶ Sustainable Development Goals    Women Empowerment Medium Impact 			
Increase the competitiveness and share of Jordan pharmaceuticals in the domestic and foreign market	Developing and implementing a plan to promote Jordan pharmaceutical products in the domestic and foreign market			Ministry of Industry, Trade and Supply
	▶ Sustainable Development Goals     Women Empowerment Medium Impact 			

Initiative	2023	2024	2025	Owner
Facilitate search and access to intellectual property data	Providing intellectual property data for pharmaceutical manufacturing ▶ Sustainable Development Goals 			Ministry of Industry, Trade and Supply
Develop the productivity of the pharmaceutical sector and enhance cost competitiveness	Improving productivity and cost competitiveness in the pharmaceutical sector ▶ Sustainable Development Goals 			Ministry of Industry, Trade and Supply
Improve quality of pharmaceutical products and academic industrial interconnection	Developing and implementing research and development strategy for pharmaceutical sector ▶ Sustainable Development Goals 			Ministry of Industry, Trade and Supply
Enhance and improve productivity of the engineering sector and its contribution to value chains	Developing detailed feasibility studies to encourage engineered products from fastgrowing categories (system solutions, mobility devices, agricultural technology, security systems, etc.) ▶ Sustainable Development Goals 			Ministry of Industry, Trade and Supply
	Spreading and encouraging the use of technologies and fields of the Fourth Industrial Revolution in manufacturing ▶ Sustainable Development Goals 			Ministry of Industry, Trade and Supply
	Increasing opportunities for interconnection between the engineering industries and other sectors to enhance competitiveness ▶ Sustainable Development Goals 			Ministry of Industry, Trade and Supply

Initiative	2023	2024	2025	Owner
Enhance competitiveness of the textile sector	Creating an enabling and stimulating environment for the textile sector and integrating vocational skills into school and industrial training programs ▶ Sustainable Development Goals 			Ministry of Industry, Trade and Supply
Access to foreign markets through new free trade agreements	Expanding access to foreign markets through trade agreements ▶ Sustainable Development Goals 			Ministry of Industry, Trade and Supply

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Implementing an action plan to improve Jordan's ranking in the Competitive Industrial Performance Index			Ministry of Industry, Trade and Supply
Enhance the competitiveness of domestic industries	Implementing the outputs of the comprehensive industrial policy to enhance a sustainable competitiveness			Ministry of Industry, Trade and Supply
	Industrial Support Fund			Ministry of Industry, Trade and Supply

Increase the volume of national exports of goods and services	Implementing the outputs of the National Export Strategy (2023-2025)			Ministry of Industry, Trade and Supply
	Further promoting local products (Made in Jordan)			Ministry of Industry, Trade and Supply
	Further updating the database of various manufacturing sectors			Ministry of Industry, Trade and Supply

Support entrepreneurship and small and medium-sized enterprises (SMEs)	Further facilitating and mainstreaming registration and licensing procedures, especially for SMEs and entrepreneurs			Ministry of Investment
	Further designing and implementing specialized training programs for entrepreneurs in the field of manufacturing to help them manage their projects.			Ministry of Industry, Trade and Supply

Initiative	2023	2024	2025	Owner
Support entrepreneurship and small and medium-sized enterprises (SMEs)		Launching the Entrepreneurship Award to recognize the achievements of entrepreneurs and their contribution to the manufacturing sector		Ministry of Industry, Trade and Supply

► Sustainable Development Goals  Women Empowerment
Medium Impact

Environmental compliance in manufacturing	Applying circular economy practices in industrial activities and focusing on environmental industrial clusters	Ministry of Industry, Trade and Supply
	Developing and implementing green marketing for industrial products	Ministry of Industry, Trade and Supply
	Supporting and promoting the intelligent design concept	Ministry of Industry, Trade and Supply
	Supporting the establishment of local recycling companies and the legislative environment governing this process	Ministry of Industry, Trade and Supply and Ministry of Environment
	Considering Sustainable Manufacturing Certifications and providing incentives for sustainable production certified companies or the ones applying environmental practices in manufacturing and in their administrative operations	Ministry of Industry, Trade and Supply

► Sustainable Development Goals  Women Empowerment
Medium Impact

Enhance the competitiveness of food manufacturing and increase exports	Implementing the outputs of the strategy and the roadmap to promote food processing and the sector exports	Ministry of Industry, Trade and Supply
	Studying the Reduction of the informal economy in the food manufacturing	Ministry of Industry, Trade and Supply

Initiative	2023	2024	2025	Owner
Enhance the competitiveness of food manufacturing and increase exports	Building the capacity of food manufacturing workers through a skills development programme			Ministry of Labor
	Streamlining procedures for licensing food manufacturing			Ministry of Industry, Trade and Supply

Market and promote food manufacturing	Further implementing a campaign to market and promote Jordan food industries both domestically and internationally (within "Made in Jordan" Program)			Ministry of Industry, Trade and Supply and Chambers of Industry
	Expanding the services of the National Packaging Center and increasing the number of companies benefiting from these services			Ministry of Industry, Trade and Supply

Enhance supply chains for plant-based food manufacturing and enhance quality and specifications of Jordan food products	Crop allocation in the food manufacturing			Ministry of Industry, Trade and Supply
---	---	--	--	--

Increase the competitiveness and share of Jordan pharmaceuticals in the domestic and foreign market	Implementing a plan to promote Jordan pharmaceutical products in the domestic and foreign market			Ministry of Industry, Trade and Supply
---	--	--	--	--

Initiative	2023	2024	2025	Owner
Facilitate search and access to intellectual property data	Providing intellectual property data for pharmaceutical manufacturing			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals    Women Empowerment Medium Impact </p>				
Stimulate contract production of biologics	Facilitating and encouraging contract production of biologics, biotech drugs, and biosimilars			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals    Women Empowerment Medium Impact </p>				
Develop the productivity of the pharmaceutical sector and enhance cost competitiveness	Improving productivity and cost competitiveness in the pharmaceutical sector			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals    Women Empowerment Medium Impact </p>				
Improve the quality of pharmaceutical products and academic-industrial interconnection	Implementing the outputs of research and development strategy for pharmaceutical manufacturing			Ministry of Industry, Trade and Supply
<p>▶ Sustainable Development Goals    Women Empowerment Medium Impact </p>				
Enhance and improve productivity of the engineering sector and its contribution to value chains	Developing and Implementing a national strategy and roadmap to promote the engineering industries sector both domestically and internationally			Ministry of Industry, Trade and Supply
	Implementing the outputs of feasibility studies to encourage engineering products from fast-growing categories			Ministry of Industry, Trade and Supply

Initiative	2023	2024	2025	Owner
<p>Enhance and improve Productivity of the engineering sector and its contribution to value chains</p>	<p>Establishing a research, development and innovation center focused on high-potential engineered product solutions, value chains and commercialisation opportunities.</p>			<p>Ministry of Industry, Trade and Supply and the private sector</p>
	<p>Spreading and encouraging the use of technologies and fields of the Fourth Industrial Revolution in manufacturing</p>			<p>Ministry of Industry, Trade and Supply</p>
	<p>Increasing opportunities for interconnection between the engineering industries and other sectors to enhance competitiveness</p>			<p>Ministry of Industry, Trade and Supply</p>
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
<p>Enhance competitiveness of the textile sector</p>	<p>Creating an enabling and stimulating environment for the textile sector and integrating vocational skills into school and industrial training programs</p>			<p>Ministry of Industry, Trade and Supply</p>
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
<p>Access to foreign markets through new free trade agreements</p>	<p>Expanding access to foreign markets through trade agreements</p>			<p>Ministry of Industry, Trade and Supply</p>
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Developing an action plan to improve Jordan's ranking in the Economic Complexity Index			Ministry of Industry, Trade and Supply
	Further implementing an action plan to improve Jordan's ranking in the Competitive Industrial Performance Index			Ministry of Industry, Trade and Supply
Enhance the competitiveness of domestic industries	Further implementing the comprehensive industrial policy to promote sustainable competitiveness			Ministry of Industry, Trade and Supply
	Industrial Support Fund			Ministry of Industry, Trade and Supply
Increase the volume of national exports of goods and services	Further implementing the outputs of the National Export Strategy (2023-2025)			Ministry of Industry, Trade and Supply
	Further promoting local products (Made in Jordan)			Ministry of Industry, Trade and Supply
	Further updating the database of various manufacturing sectors and developing relevant strategies			Ministry of Industry, Trade and Supply
Support entrepreneurship and small and medium-sized enterprises (SMEs)	facilitating and mainstreaming registration and licensing procedures, especially for SMEs and entrepreneurs			Ministry of Investment

Initiatives and Priorities of the Mining Sector

Initiative	2023	2024	2025	Owner
Create a regulatory framework for natural resources	Establishing an institutional organizational (an independent body for conducting) structure responsible for geological surveying in accordance with best international standards.			Ministry of Energy and Mineral Resources
	▶ Sustainable Development Goals  Women Empowerment Indirect Impact 			
Promote investment in national mineral resources	Developing a national mining strategy and starting the implementation			Ministry of Energy and Mineral Resources
	Marketing several exploration industries projects			Ministry of Energy and Mineral Resources
	Reviewing, amending and approving the Natural Resources Law No. (19) of 2018 and its regulations			Ministry of Energy and Mineral Resources
	Conducting a study to identify constraints in the mining sector			Ministry of Energy and Mineral Resources
	Creating a digital platform for investment opportunities in the mining sector			Ministry of Energy and Mineral Resources
▶ Sustainable Development Goals  Women Empowerment Medium Impact 				

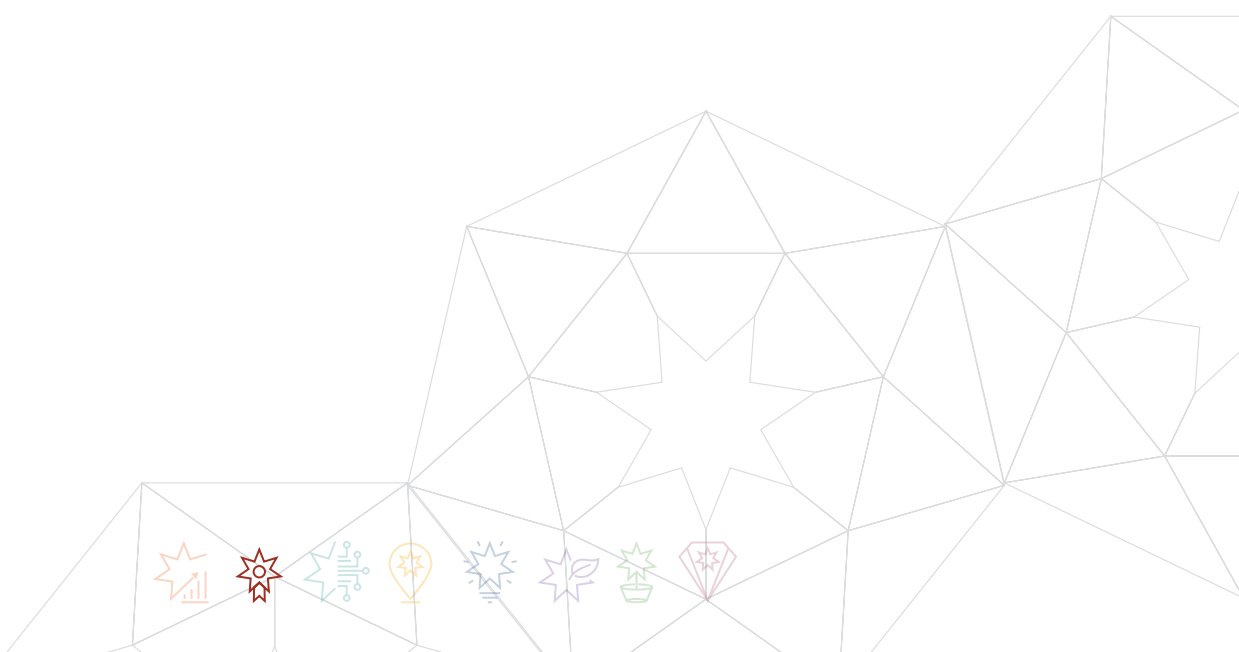

Initiative	2023	2024	2025	Owner
Promote investment in national mineral resources	Further implementing the outputs of the National Mining Strategy			Ministry of Energy and Mineral Resources
	Marketing several exploration industries projects			Ministry of Energy and Mineral Resources
	Conducting a study to identify constraints in the mining sector			Ministry of Energy and Mineral Resources
	Updating the information of the digital platform for investment opportunities in the mining sector			Ministry of Energy and Mineral Resources

► Sustainable Development Goals  Women Empowerment Medium Impact 

Initiative	2023	2024	2025	Owner
Promote investment in national mineral resources	Further implementing the outputs of the National Mining Strategy			Ministry of Energy and Mineral Resources
	Marketing several exploration industries projects			Ministry of Energy and Mineral Resources
	Conducting a study to identify constraints in the mining sector			Ministry of Energy and Mineral Resources
	Updating the information of the digital platform for investment opportunities in the mining sector			Ministry of Energy and Mineral Resources

Initiatives and Priorities of the Agriculture and Food Security Sector

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Developing an action plan to improve Jordan's ranking in the Global Food Security Index			Ministry of Agriculture
Strengthen the food security system	Activating the work of the Higher Food Security Council			Prime Ministry
	Creating a comprehensive national database for food security *			Ministry of Agriculture
Develop and streamline regulatory procedures of the agriculture sector	Amending the instructions for licensing agricultural, plant and livestock activities in line with the Control Law			Ministry of Agriculture
	Amending the instructions for registering pesticides, fertilizers, veterinary medicines and vaccines			Ministry of Agriculture
	Issuing instructions related to inspection and control of agricultural activities			Ministry of Agriculture
	Creating a digital system for registering agricultural holdings			Ministry of Agriculture
Expand agricultural financing programs	Developing the financing services and procedures at the Agricultural Credit Corporation			Agricultural Credit Corporation
	Implementing Agricultural Lands Reconstruction and Exploitation Project			Agricultural Credit Corporation

► Sustainable Development Goals  Women Empowerment Medium Impact

► Sustainable Development Goals  Women Empowerment Medium Impact

* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Expand agricultural financing programs	Implementing Water Resources Development and Use of Modern Technologies Project			Agricultural Credit Corporation
	Stimulating the agriculture sector and food processing			Ministry of Agriculture
	Amending the Agricultural Risk Fund Law to expand the coverage to the largest number of farmers			Ministry of Agriculture
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Expand the support to agriculture industries dependent on local input	Establishing the agricultural industries park in the southern Jordan Valley (investment opportunity)			Ministry of Agriculture
	Stimulating the establishment of agricultural industries dependent on local agricultural products in the industrial cities			Ministry of Agriculture
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Develop the agriculture sector practices and support services	Further implementing of Irrigation Canals Maintenance and Lining Project			Ministry of Agriculture
	Using rainwater harvesting techniques in agriculture and rehabilitating desert pastures			Ministry of Agriculture
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				

* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Enhance the strategic stocks of grains	Expanding the scope of work of the National Seed Bank (NSB) *			National Agricultural Research Center
	Preparing designs and tender documents, tendering and awarding of the project to increase the storage capacity of grain containers (100,000 tons in Al-Ghabawi)			Ministry of Industry, Trade and Supply
	Preparing designs and tender documents and awarding the project to construct new containers in the Qatraneh area accommodating (500) thousand tons			Ministry of Industry, Trade and Supply
	Agricultural investment of the state lands/ Al-Hammad and Al-Sarhan by the private sector and signing investment agreements			Ministry of Agriculture

► Sustainable Development Goals

Women Empowerment
Medium Impact

Enhance agricultural research and development and expand the use of modern technology and techniques	Implementing a program to promote the use of modern agricultural technology in the field of modern irrigation systems and clean energy			Ministry of Agriculture
	Creating leading business models to use modern agricultural technology (Tannoor Dam and Mujib Dam)			Ministry of Agriculture
	Establishing accelerators and incubators for innovation in agricultural industries *			Ministry of Agriculture

► Sustainable Development Goals

Women Empowerment
Medium Impact

Improve Agri education and vocational training services

Developing and implementing agricultural vocational training programs in Vocational Training Corporation institutes

Vocational Training Corporation

* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Improve Agri education and vocational training services	Developing and implementing the agricultural pattern based on export need through coalitions to develop supply chains for agricultural industries and contract farming/agricultural pattern			Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact 

Develop the agricultural marketing ecosystem	Introducing a program in the Agricultural Credit Corporation to finance supply chain development and cold storage projects	Agricultural Credit Corporation
	Introducing a program for the use of solar energy and clean energy in the cold chain sector and agricultural industries	Agricultural Credit Corporation
	Preparing designs and tender documents, tendering and awarding the project for the expansion of refrigerated warehouses at Juwaideh Silos Complex with a capacity of (5) thousand tons	Jordan Silos & Supply General Co.
	Amending legislations for tracking agricultural products in alignment with international practices	Ministry of Agriculture
	Preparing studies and tender documents, tendering and awarding the project for the development of a digital system for tracking agricultural and food products	Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact 

Develop the work of cooperative societies and unions	Reviewing and amending legislation to enhance the economic and social role of Jordan Cooperative Corporation	Jordan Cooperative Corporation
--	--	--------------------------------

► Sustainable Development Goals  Women Empowerment Medium Impact 

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Further implementing an action plan to improve Jordan's ranking in the Global Food Security Index			Ministry of Agriculture
Strengthen the food security system	Activating the work of the Higher Food Security Council			Prime Ministry
	Updating the comprehensive national database for food security *			Ministry of Agriculture
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Develop and streamline regulatory procedures of the agriculture sector	Applying a digital system for registering agricultural holdings			Ministry of Agriculture
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Expand agricultural financing programs	Further implementing the Agricultural Lands Reconstruction and Exploitation Project			Agricultural Credit Corporation
	Further implementing Water Resources Development and Use of Modern Technologies Project			Agricultural Credit Corporation
	Stimulating the agriculture sector and food processing			Ministry of Agriculture
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				

* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Expand the support to agriculture industries dependent on local input	Establishing the agricultural industries park in the southern Jordan Valley (investment opportunity)			Ministry of Agriculture
	Stimulating the establishment of agricultural industries dependent on local agricultural products in the industrial cities			Ministry of Agriculture
	Introducing a program to finance specialization in the production of industrial crops for the agro-industrial sector (vertical integration)			Ministry of Agriculture
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Develop the agriculture sector practices and support services	Irrigation Canals Maintenance and Lining Project			Ministry of Agriculture
	Further implementing the use of rainwater harvesting techniques in agriculture and rehabilitating desert pastures			Ministry of Agriculture
<p>▶ Sustainable Development Goals  Women Empowerment Medium Impact </p>				

* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Enhance the strategic stocks of grains	Expanding the scope of work of the National Seed Bank (NSB) *			National Agricultural Research Center
	Executing the tender for the expansion of the storage capacity of grain containers (100,000 tons in Al-Ghabawi)			Ministry of Industry, Trade and Supply
	Executing the tender for the expansion of new containers in the Qatraneh area with a capacity of (500) thousand tons			Ministry of Industry, Trade and Supply
	Agricultural investment of the state lands/ Al-Hammad and Al-Sarhan			Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact 

Enhance agricultural research and development and expand the use of modern technology and techniques	Further implementing a program to promote the use of modern agricultural technology in the field of modern irrigation systems and clean energy			Ministry of Agriculture
	Further creating leading business models to use modern agricultural technology (Tannoor Dam and Mujib Dam)			Ministry of Agriculture
	Further establishing accelerators and incubators for innovation in agricultural industries *			Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact 

Initiative	2023	2024	2025	Owner
Improve Agri education and vocational training services	Developing and implementing agricultural vocational training programs in Vocational Training Corporation institutes			Vocational Training Corporation
	implementing the agricultural pattern based on export need through coalitions to develop supply chains for agricultural industries and contract farming/agricultural pattern			Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact 

Developing the agricultural marketing ecosystem	Further implementing a program in the Agricultural Credit Corporation to finance supply chain development and cold storage projects			Agricultural Credit Corporation
	Further implementing the program for the use of solar energy and clean energy in the cold chain sector and agricultural industries			Agricultural Credit Corporation
	Executing the expansion of refrigerated warehouses at Juwaideh Silos Complex with a capacity of (5) thousand tons			Jordan Silos & Supply General Co.
	Tendering, awarding and commencing the project for the development of a digital system for tracking agricultural and food products			Ministry of Agriculture

► Sustainable Development Goals  Women Empowerment Medium Impact 

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Further implementing an action plan to improve Jordan's ranking in the Global Food Security Index			Ministry of Agriculture
Strengthen the food security system	Activating the work of the Higher Food Security Council			Prime Ministry
	Updating the comprehensive national database for food security *			Ministry of Agriculture
▶ Sustainable Development Goals  Women Empowerment Medium Impact 				
Develop and streamline regulatory procedures of the agriculture sector	Applying the digital system for registering agricultural holdings			Ministry of Agriculture
▶ Sustainable Development Goals  Women Empowerment Medium Impact 				
Expand agricultural financing programs	Further implementing the Agricultural Lands Reconstruction and Exploitation Project			Agricultural Credit Corporation
	Further implementing Water Resources Development and Use of Modern Technologies Project			Agricultural Credit Corporation
	Stimulating the agriculture sector and food processing			Ministry of Agriculture
▶ Sustainable Development Goals  Women Empowerment Medium Impact 				
Expand the support to agriculture industries dependent on local input	Implementing the agricultural industries park in the southern Jordan Valley (investment opportunity) and starting up its operations			Ministry of Agriculture

* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Expand the support to agriculture industries dependent on local input	Stimulating the establishment of agricultural industries dependent on local agricultural products in the industrial cities			Ministry of Agriculture

Initiatives and Priorities of the Transport and Logistics Sector

Initiative	2023	2024	2025	Owner
Alignment of laws, regulations and procedures related to facilitating and streamlining transport and trade	Developing the National Strategy for the Transport Sector (2023-2027) *			Ministry of Transport
	Conducting a study for the regulation of light and medium freight*			Land Transport Regulatory Commission (LTRC)
	Drafting and approving railway legislation (regulations and instructions) *			Ministry of Transport
	Conducting the study of land freight costs against total fuel cost and setting an equation for fees and costs *			Land Transport Regulatory Commission (LTRC)
	Completing the stages of structuring the customs tariff brackets *			Jordan Customs
	Reviewing the and laws and regulations governing the transport sector and proposing amendments thereto			Land Transport Regulatory Commission (LTRC)
	Developing the foundational framework for the Post-Clearance Audit Project (PCA) (legislative reviews and necessary technical requirements) *			Jordan Customs
	updating and developing the Golden List Program, the Silver List Program and the National Golden List Program			Jordan Customs
	Completing the stages of pre-approvals and licensing platform project to include all the targeted entities in the customs manifests - Phase (2) *			Jordan Customs

* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Alignment of laws, regulations and procedures related to facilitating and streamlining transport and trade	Developing a smart and integrated risk management system for all Control Agencies and partners in customs clearance procedures *			Jordan Customs
	Streamlining Control Agencies for customs clearance *			Jordan Customs
	Preparing and issuing fee regulation for maritime shipping agent services *			Jordan Maritime Authority
	Drafting civil aviation laws and regulations and adopting smart instructions approach *			Civil Aviation Regulatory Commission CARC

Develop the land transport and ports sector infrastructure	Preparing designs and tender documents, tendering and awarding of the project for updating the surveillance devices of the coast station (maritime communication devices) *			Jordan Maritime Authority

	Implementing the Technical and Vocational Education and Training Enhancement Program HTU+			Al Hussein Technical University
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				
Provide sustainable job opportunities for young men and women	Establishing production branches/units in the governorates (new projects) (existing projects/ finalizing wage subsidy)			Ministry of Labor
	National Employment Program			Ministry of Labor
<p>► Sustainable Development Goals  Women Empowerment Medium Impact </p>				

* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Provide a governance framework for the sector within best international practices	Implementing the outputs of TVET Sector Strategy*			Technical and Vocational Skills Development Commission (TVSDC)
	Conducting impact studies of the labor market programs and updating them continuously			Ministry of Labor
	Implementing a plan for gender mainstreaming to enhance women’s economic participation.			Ministry of Labor

Align the outputs of vocational and technical education and training with the labor market requirements	Applying and activating a unified information system to link education outputs to the labor market*			Ministry of Labor
	Supporting vocational and technical training projects			Technical and Vocational Skills Development Commission (TVSDC)
	Introducing digital skills curricula for public school students from grade 7 to grade 12 in vocational education *			Ministry of Digital Economy and Entrepreneurship Ministry of Education
	Developing vocational and technical education			Ministry of Education
	Implementing vocational guidance from grade 4 to grade 12			Ministry of Education

Enhance vocational and career guidance	Implementing the outputs of the National Vocational and Career Guidance Strategy in the education, vocational and technical training and employment sectors			Ministry of Labor
--	---	--	--	-------------------

* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiative	2023	2024	2025	Owner
Strengthen the training infrastructure and keep up with global techniques and technology		Expanding vocational schools (classrooms and vocational education workshops) and conducting the necessary maintenance for existing facilities		Ministry of Education
		Tendering, awarding and commencing the tender for the establishment of an integrated vocational training institute		Vocational Training Corporation
		Establishing a vocational training center specialized in the hybrid and electric cars sector and heavy machinery		Vocational Training Corporation
		Implementing the Technical and Vocational Education and Training Enhancement Program HTU+		Al Hussein Technical University
	▶ Sustainable Development Goals  Women Empowerment Medium Impact 			
Provide sustainable job opportunities for young men and women		Establishing production branches/units in the governorates (new projects) (existing projects/ finalizing wage subsidy)		Ministry of Labor
		National Employment Program		Ministry of Labor
	▶ Sustainable Development Goals  Women Empowerment Medium Impact 			

Initiative	2023	2024	2025	Owner
Provide a governance framework for the sector within best international practices	Further implementing the outputs of TVET Sector Strategy*			Technical and Vocational Skills Development Commission (TVSDC)
	Conducting impact study of the labor market programs			Ministry of Labor
	Further implementing a plan for gender mainstreaming to enhance women's economic participation			Ministry of Labor
	Sustainable Development Goals Women Empowerment Medium Impact			
Align the outputs of vocational and technical education and training with the labor market requirements	Applying and activating a unified information system to link education outputs to labor market			Ministry of Labor
	Further Supporting vocational and technical training			Technical and Vocational Skills Development Commission (TVSDC)
	Introducing digital skills curricula for public school students from grade 7 to grade 12 in vocational education *			Ministry of Digital Economy and Entrepreneurship Ministry of Education
	Developing vocational and technical education			Ministry of Education
	Implementing vocational guidance from grade 4 to grade 12			Ministry of Education
	Sustainable Development Goals Women Empowerment Medium Impact			
Enhance vocational and career guidance	Implementing the outputs of the National Vocational and Career Guidance Strategy in the education, vocational and technical training and employment sectors			Ministry of Labor
	Sustainable Development Goals Women Empowerment Medium Impact			
Strengthen the training infrastructure and keep up with global techniques and technology	Expanding vocational schools (classrooms and vocational education workshops) and conducting the necessary maintenance for existing facilities			Ministry of Education
	Commencing the establishment of an integrated vocational training institute			Vocational Training Corporation
	Implementing the Technical and Vocational Education and Training Enhancement Program HTU+			Al Hussein Technical University
	Sustainable Development Goals Women Empowerment Medium Impact			
Provide sustainable job opportunities for young men and women	Establishing production branches/units in the governorates (new projects) (existing projects/ finalizing wage subsidy)			Ministry of Labor
	National Employment Program			Ministry of Labor
	Sustainable Development Goals Women Empowerment Medium Impact			

* Initiatives outlined in the Economic Modernisation Vision were reflected as priorities in the Executive Program

Initiatives and Priorities of the Data Sector

Initiative	2023	2024	2025	Owner
Enhance Jordan's position as a destination for data centers and clouds	Developing the digital infrastructure for data centers and data warehouses and e-government cloud * (Data Centers and Data Warehouses)			Ministry of Digital Economy and Entrepreneurship
	Establishing and attracting data centers, and promoting investment in building global data centers in Jordan to serve the region and neighboring countries *			Ministry of Digital Economy and Entrepreneurship
	Approving an amending draft law of the Access to Information Protection Law No. (47) of 2007			Ministry of Culture
	Reviewing and amending the General Statistics Law No. (12) of 2012			Department of Statistics
	Transforming the Department of Statistics into a national statistical center			Ministry of Planning and International Cooperation

Sustainable Development Goals

Women Empowerment

Medium Impact

Initiative	2023	2024	2025	Owner
Enhance Jordan's position as a destination for data centers and clouds	Completing the development of the digital infrastructure for data centers and data warehouses and e-government cloud * (Data Centers and Data Warehouses)			Ministry of Digital Economy and Entrepreneurship
	Establishing and attracting data centers, and promoting investment in building global data centers in Jordan to serve the region and neighboring countries*			Ministry of Digital Economy and Entrepreneurship
	Establishing the Open Government Data Portal *			Ministry of Digital Economy and Entrepreneurship

Initiatives and Priorities of the Energy Sector

Initiative	2023	2024	2025	Owner
Transition toward clean energy	Modernising the Energy Sector Strategy			Ministry of Energy and Mineral Resources
	Developing a roadmap for hydrogen use and production			Ministry of Energy and Mineral Resources
	Studying the transition toward electric transportation			Ministry of Energy and Mineral Resources
	Completing the economic feasibility studies for the green hydrogen and green ammonia production project			Ministry of Energy and Mineral Resources
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Develop the legislative environment for the energy sector	Reviewing and amending the General Electricity Law No. (64) of 2002			Ministry of Energy and Mineral Resources
	Reviewing and amending the Renewable Energy and Energy Efficiency Law and its Regulations No. (13) of 2012			Ministry of Energy and Mineral Resources
	Drafting and approving hydrogen-related laws and regulations			Ministry of Energy and Mineral Resources
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Enhance the efficiency of the electrical system	Adopting policies to reduce the cost of the electrical system, such as time-related tariffs, and increasing storage capacities			Ministry of Energy and Mineral Resources
<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Enhance the environmental sustainability of the energy sector	Supporting energy efficiency in 100 medium and small industrial enterprises- (conducting energy audit studies)			Jordan Renewable Energy & Energy Efficiency Fund (JREEEF)
	Installing 100 solar heater systems for poor families			Jordan Renewable Energy & Energy Efficiency Fund (JREEEF)
	Installing solar heater systems in the household sector			Jordan Renewable Energy & Energy Efficiency Fund (JREEEF)
	Installing solar cell systems for 33 municipalities			Jordan Renewable Energy & Energy Efficiency Fund (JREEEF)
	Conducting a study to determine the optimal options for converting waste into energy			Ministry of Energy and Mineral Resources
	<p>► Sustainable Development Goals  Women Empowerment Indirect Impact </p>			

Initiative	2023	2024	2025	Owner
Reduce energy supply costs	Developing and implementing a financial sustainability plan for the electricity sector			Ministry of Energy and Mineral Resources
	Gradual transition toward smart grids			Ministry of Energy and Mineral Resources
	Reviewing the pricing mechanism of petroleum derivatives to shift from fixed price to price thresholds			Ministry of Energy and Mineral Resources
	Setting up Onshore/Jetty Regasification Unit and its accessories and making the necessary modifications to the port, while maintaining all the existing elements of the project			Aqaba Development Corporation (ADC)
	Supplying industrial cities with natural gas (Al-Muwaqqar Industrial City, Al-Rawdah Industrial City, and the industrial city planned to be established in Al-Quweira)			Ministry of Energy and Mineral Resources
	Studying electrical energy storage options			Ministry of Energy and Mineral Resources

► Sustainable Development Goals

Women Empowerment
Indirect Impact

Initiative	2023	2024	2025	Owner
Energy infrastructure development	Implementing the Jordanian-Iraqi Interconnection Project			National Electric Power Company (NEPCO)
	Implementing a project to increase the capacity of the electrical interconnection line between Jordan and Egypt to 1100 megawatts			National Electric Power Company (NEPCO)
	Conducting studies and selecting the best model for the Jordanian-Saudi interconnection project			National Electric Power Company (NEPCO)
	The fourth expansion project for Jordan Petroleum Refinery Company			Jordan Petroleum Refinery Company
	Completing the installation of smart meters on distribution networks			Jordan Electric Power Company (JEPCO)/Irbid Electricity Company/ Ministry of Energy/ Electricity Distribution Co EDCO
	Implementing a project to connect industrial cities and areas with natural gas networks			Ministry of Energy and Mineral Resources
	Conducting a study for the electrical transmission network from transmission stations and lines			National Electric Power Company (NEPCO)
	Developing the National Monitoring and Control Center by establishing a control building north of Amman and renovating the current control system			National Electric Power Company (NEPCO)
	Developing laws and regulations governing investment in electric charging stations			Ministry of Energy and Mineral Resources
	Conducting a study to link Jordan electrically with the countries of the Middle East, North Africa and Europe			Ministry of Energy and Mineral Resources
	Signing an investment agreement for the Liquefied Petroleum Gas Storage Project			Ministry of Energy and Mineral Resources
	Developing the oil port /Phase 2			Aqaba Development Corporation (ADC)
	Signing an investment agreement for the Oil Storage Project			Aqaba Development Corporation (ADC)
Studying the renewable energy and green energy generating capacity			Aqaba Development Corporation (ADC)	

Initiative	2023	2024	2025	Owner
Energy infrastructure development	Completing Sarhan field development			Ministry of Energy and Mineral Resources
	Completing Hamza field development			Ministry of Energy and Mineral Resources
	Completing Al-Reisha field development			Ministry of Energy and Mineral Resources
<p>▶ Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Market investment opportunities in the energy sector	Creating a database that includes reports and brief publications on investment opportunities in the field of oil, gas and oil shale exploration			Ministry of Energy and Mineral Resources
<p>▶ Sustainable Development Goals  Women Empowerment Indirect Impact </p>				
Investment opportunities and enhance partnership with the private sector	Launching exploration operations and analyzing the cost benefits of reserves and converting them into investment opportunities *			Ministry of Energy and Mineral Resources
<p>▶ Sustainable Development Goals  Women Empowerment Indirect Impact </p>

Initiatives and Priorities of the Water Sector

Initiative	2023	2024	2025	Owner
Reduce Non Revenue Water (NRW)	Implementing the NRW Strategy to reduce NRW by 2% annually			Water Authority/ Ministry of Water and Irrigation
	▶ Sustainable Development Goals   Women Empowerment Indirect Impact 			
Enhance water supply	Implementing water distribution networks and procuring and transporting water from its sources			Water Authority/ Jordan Valley Authority
	Further implementing the Dams Program , Procuring new sources of water and Increasing the strategic stock of water			Ministry of Water and Irrigation / Water Authority
	Signing an agreement to implement the water desalination and transportation project (national carrier) and starting implementation			Ministry of Water and Irrigation
	▶ Sustainable Development Goals    Women Empowerment Indirect Impact 			
Governance of the water sector and enforcement of water laws and regulations	Implementing Water Sector Governance Project			Water Authority
	Developing a plan for the financial sustainability of the water sector and implementing its components			Water Authority
	Eliminating abuse of transmission lines and distribution networks			Water Authority
	Amending the Groundwater Control Bylaw			Ministry of Water and Irrigation
	Amending Water Resources Protection Instructions			Ministry of Water and Irrigation
	Amending and approving the foundations for drilling saline groundwater wells in Jordan Valley for 2022			Ministry of Water and Irrigation
	▶ Sustainable Development Goals    Women Empowerment Indirect Impact 			
Improve energy efficiency and carbon emissions	Further implementing energy efficiency projects in the water sector			Water Authority
	▶ Sustainable Development Goals    Women Empowerment Indirect Impact

Initiatives and Priorities of the Green Economy Sector

Initiative	2023	2024	2025	Owner
Improve Jordan's Ranking in the International Reports	Developing an action plan to improve Jordan's ranking in the Environmental Performance Index (EPI).			Ministry of Environment
Develop policies and stimulate the transition towards a green economy in the various economic and social sectors	Promoting green activities in industrial facilities GAIN			Ministry of Environment
	Upscaling Sustainable Cooling			Ministry of Environment
	Developing and implementing qualitative agricultural projects around the treatment plants			Water Authority
	Increasing the number of waste management facilities linked to the National Waste Monitoring and Information System			Ministry of Environment
Sustainable Development Goals				
Environmentally sound waste management	Commencing the selection of areas for waste recycling from the commercial sector			Greater Amman Municipality
	Commencing the implementation of the solid waste management and sorting from the source project			Greater Amman Municipality
	Implementing the Biological-mechanical Waste Treatment Project			Greater Amman Municipality
	Implementing the rehabilitation of Al Shaer Solid Waste Transfer Station			Greater Amman Municipality
	Further developing waste recycling			Ministry of Environment
	Activating the provisions of Waste Management Framework Law No. (16) of 2020			Ministry of Environment
	Implementing the Environmentally Sound Management of Mercury Waste Project			Ministry of Environment
	Developing a case study and designing sanitary landfill cells for Al-Akaidir landfill site			Ministry of Local Administration
	Further implementing the solid waste management project in Southern Jordan			Ministry of Local Administration
	Recycling agricultural plastic waste in deir Alla			Ministry of Interior
Implementing the Extended Producer Responsibility System for the Packaging Waste Sector			Ministry of Environment	

Initiative	2023	2024	2025	Owner
Environmentally sound waste management	Monitoring private sector initiatives in promoting, encouraging, and supporting local industries to manufacture renewable energy components			Ministry of Industry, Trade and Supply
▶ Sustainable Development Goals  Women Empowerment Indirect Impact 				
Protect and preserve biodiversity and natural habitats	Creating a national research platform on climate change, waste, transportation, energy and biodiversity			Ministry of Higher Education and Scientific Research
▶ Sustainable Development Goals  Women Empowerment Indirect Impact 				
Develop policies and stimulate the transition toward a green economy in the various economic and social sectors	Supporting and financing initiatives of the economic vision and green transformation			Ministry of Planning and International Cooperation
▶ Sustainable Development Goals  Women Empowerment Indirect Impact 				
Provide sustainable green jobs	Improving green infrastructure through labor-intensive green measures			Ministry of Environment

Mechanism for Monitoring Progress of the Executive Program

The Prime Ministry Delivery Unit (PMDU) will monitor the progress and delivery of the initiatives and priorities outlined in the Executive Program for the Economic Modernisation Vision. PMDU will provide all forms of technical support to overcome any obstacles that may arise during implementation.

Monitoring Performance in the Implementation of the Economic Modernisation Vision

The process of monitoring the implementation of the of Economic Modernisation Vision shall be carried out along two parallel tracks to achieve the desired outcomes and goals.

1. Monitoring the delivery of the Vision Executive Program for all initiatives and priorities outlined in the Program via the PMDU follow-up and evaluation team. The progress of the implementation of initiatives and projects will be monitored by liaison officers and delivery units established in the ministries and government institutions for this purpose.
2. Monitoring the implementation of high-priority projects, so that these projects are closely monitored through PMDU team on a daily basis. PMDU will provide all forms of technical support to overcome any obstacles that may arise during implementation.

Online Government Performance Monitoring System

An online system has been deployed to monitor performance and achievement. All parties involved will utilize the system to provide periodic reports and update data on work progress within the priorities and projects outlined in the Executive Program.
