Harvesting Procedure. Amended by: L.N. 189 of 2020.

- **3.** (1) Caged Bluefin Tuna shall at the moment of harvest be weighed.
- (2) The average e-BCD caging weight for the corresponding cage is multiplied by the growth factor applicable for that month of harvest with a further 10% added to the resulting weight to account for technical errors.
- (3) If at the exhaustion of the cage, the average weight of Bluefin Tuna at harvest is higher than the weight calculated in sub-regulation (2), no further eBCDs for that cage shall be validated by the Department of Fisheries and Aquaculture.
- (4) During the harvesting period the Department of Fisheries and Aquaculture shall monitor and forecast harvesting weights in order to estimate the acceptable final HRV per cage.
- (5) Harvested fish corresponding to the weight exceeding the HRV will be confiscated. All expenses related to the haulage, transportation and storage of this fish into an appropriate cold store will be carried out at the operator's expense.
- (6) Without prejudice to sub-regulation (7), the operator may opt to release the equivalent weight of live Bluefin Tuna from a different cage in lieu of the weight referred to in sub-regulation (5).
- (7) All the provisions of regulation 8 of the Aquaculture Operations Regulations shall apply *mutatis mutandis* to the operations regulated by these regulations.

S.L. 425.12.
