

A.L. 89 ta' l-2005

**ATT TA' L-2001 DWAR IS-SERVIZZI VETERINARJI
(ATT NRU. XXIII TA' L-2001)**

**Regoli ta' l-2005 dwar Prodotti li Jintużaw fl-Għalf
ta' l-Annimali**

BIS-SAHHA tas-setgha mogħtija bl-artikoli 24 u 25 ta' l-Att ta' l-2001 dwar is-Servizzi Veterinarji, il-Ministru ta' l-Affarijiet Rurali u l-Ambjent, wara konsultazzjoni mal-Ministru tas-Sahha, Anzjani u Kura Komunitarja, għamel dawn ir-regoli li ġejjin:-

1. (1) It-titolu ta' dawn ir-regoli hu Regoli ta' l-2005 dwar Titolu u skop. Prodotti li jintużaw fl-Għalf ta' l-Annimali

(2) L-iskop ta' dawn ir-regoli huwa l-implementazzjoni tar-regoli li hemm fid-Direttiva tal-Kunsill ta' l-Unjoni Ewropea 82/471/KEE tat-30 ta' Ġunju, 1982, dwar certi prodotti li jikkonsistu f'sors dirett jew indirett ta' proteini, li huma manufatturati skond certi processi tekniċi u li jitqegħdu fis-suq bhala ghalf ta' l-annimali jew fl-ghalf skond l-artikoli 24 u 25 tal-Att dwar is-Servizzi Veterinarji.

(3) Dawn ir-regoli ma għandhomx ikunu ta' preġudizzju għar-regoli oħra dwar:

(a) addittivi fl-ghalf;

(b) l-iffissar ta' livelli massimi ta' sustanzi jew prodotti mhux desiderabbi fl-ghalf;

(c) l-iffissar ta' livelli massimi ta' fdalijiet ta' pestiċidi fuq jew fil-prodotti intenzjonati ghall-użu fl-ikel tal-bniedem jew ta' l-annimali;

(d) it-tqegħid fis-suq ta' ghalf kompost, mikro-organiżmi patogenici fl-ghalf; ghalf intenzjonat ghall-nutriment partikolari; i-irkolazzjoni ta' materjal użat fl-ghalf.

2. Ghall-iskop ta' dawn ir-regoli, għandhom jaapplikaw id-Tifsir. definizzjonijiet li ġejjin:

“addittivi” tfisser sustanzi li meta jiġu inkorporati ma’ l-ghalf dawn jistgħu jibdlu l-karatteristiċi ta’ l-ghalf jew tal-produzzjoni tal-bhejjem;

“ghalf” tfisser sustanzi organiči jew inorganiči, użati weħedhom jew fit-tahlitiet, li għandhom jew li ma għandhomx addittivi, biex jittiekel mill-annimali;

“ghalf komplet” tfisser taħlita ta’ l-ghalf li minħabba l-kompożizzjoni tagħha li biżżejjed għar razzjon ta’ kuljum;

“ghalf supplimentari” tfisser taħlitiet ta’ l-ghalf li għandhom kontenut għoli ta’ certu sustanzi u li minħabba l-kompożizzjoni tagħhom, huma biżżejjed għar-razzjon ta’ kuljum biss jekk ikunu imħallta ma’ l-ghalf iehor;

“razzjon ta’ kuljum” tfisser il-kwantità medja tat-total tal-ghalf, ikkalkulat fuq il-kontentut niedi ta’ 12%, li hu meħtieġ kuljum minn annimal ta’ speci, età u tkabbir spċifici, biex jiġu sodisfatti l-bżonnijiet kollha tiegħu;

“taħliti li jsiru minn qabel” tfisser addittivi konċentrat intenzjonati ghall-manifattura industrijali ta’ l-ghalf kompost.

Tqegħid fis-suq ta’
ghalf.

3. (1) Ghalf li jaqa’ taħt xi wieħed mill-gruppi ta’ prodotti mniżżla fl-Iskeda li tinsab ma’ dawn ir-Regoli jew li fih dawn prodotti, jista’ jitqegħdu fis-suq biss jekk:

- (a) il-prodott innifsu ikun imniżżeġ fl-iskeda;
- (b) kull kondizzjoni imnizzla hemmhekk tkun sodisfatta.

(2) L-awtoritajiet kompetenti jistgħu, għal skopijiet ta’ riċerka jew dawk xjentifiċi, jagħmlu derogi minn dak li hu mniżżeġ f’subregola (1), basta ssir ispezzjoni uffiċjali adegwata.

(3) Prodotti msemmija f’ Kapitolu I.1 (a) tad-Direttiva tal-Kunsill 95/69/KE tat-22 ta’ Dicembru, 1995 li tistabbilixxi l-kondizzjonijiet u l-arrangamenti għall-approvazzjoni u r-registrazzjoni ta’ certi stabbilimenti u intermedjarji li jahdmu fil-qasam ta’ l-ghalf, jistgħu biss jitqegħdu fis-suq minn stabbilimenti jew intermedjarji li jissodisfaw il-kondizzjonijiet imniżżla f’ Artiklu 2 jew Artiklu 3 ta’ dik id-Direttiva, skond kif japplika.

(4) Subregola (3) għandu japplika mingħajr preġudizzju ghall-Artiklu 4 (2) tad-Direttiva tal-Kunsill 95/69/KE.

4. (1) Mingħajr preġudizzju ghall-miżuri dwar it-tikkettjar li Il-partikolaritajiet li
japplikaw ghall-ghalf wahdu jew kompost, il-prodotti mniżzla fl-Iskeda
jistgħux jitqegħdu is-suq bhala għalf jew jiġu miżjudha ma' l-ghalf,
ma jistgħad lu għalli fuq il-pakkett
sakemm xi partikolaritajiet imniżzla fl-Iskeda ma jidhru fuq il-pakkett
jew il-kontenitur, jew fuq tabella imwaħħla fuqhom.

(2) Ghall-materjali mibjugħha bl-ingrossa, il-partikolaritajiet
imsemmija f'subregola (1) għandhom jidhru fuq id-dokument li jimxi
magħhom.

5. (1) Fl-Iskeda għandhom jiġi osservati dawn il-principji li Prinċipji osservati
gejjin:

(a) Prodott ma għandux jiġi imniżżeel fl-Iskeda sakemm:

(i) ma jkollux valur nutrittiv ghall-annimali ghax ikun
fihi in-nitrogħenu, jew

(ii) meta jintuża sew ma jkollu ebda effett detrimentali
fuq is-sahħha tal-bniedem jew ta' l-annimali jew fuq l-ambjent,
u ma jkunx iweġġa' lill-konsumatur billi jfixkel il-karatteristiċi
distintivi tal-prodotti mill-annimali, jew

(iii) ikun jista' jiġi monitorjat fl-ghalf.

(b) Prodott għandu jiġi mneħħi mill-Iskeda meta xi waħda
mill-kundizzjonijiet imposti f'paragrafu (a) ma tiġix sodisfatta.

(2) Il-kriterji li jagħmluha possibbli li jiġu definiti l-prodotti
mniżzla f'dawn ir-regoli, b'mod partikolari il-kriterji tal-kompożizzjoni,
il-purità, u l-proprietajiet fizjokimiċi u batterjoloġiċi, jistgħu jiġu
stabbiliti skond tagħrif xjentifiku u tekniku.

6. (1) Sabiex jiġi żgurat li l-prodotti mniżzla fis-sezzjonijiet Konformità tal-
1.1 u 1.2 ta' l-Iskeda, jissodisfaw il-principji imniżzla f'regola 5 (1), id-
dossier, preparat skond id-disposizzjonijiet ta' subregola (2) ta' dawn
ir-regoli, jiġi mibgħut ufficjalment lill-Istati Membri, lill-organizzjoni
internazzjonali rilevanti u, jekk ikun hemm bżonn li jiġu konsultati, 'l
kumitat xjentifiċċi neċċesarji.

(2) L-awtoritajiet kompetenti u r-riċevituri l-oħra tad-*dossier*
imsemmi f'subregola (1) għandhom jiżgħi raw, jekk mitluba minn
applikant għal xi raġuni valida, li kull informazzjoni li jekk din tigħi
mikxu fa tista' tolqot drittijiet ta' proprjetà industrijali jew kummerjali,
tinżamm kunfidenzjali. Is-segretezza industrijali u kummerċjali ma
għandiekk tapplika għal:

- (a) Ismijiet u l-kompożizzjoni ta' prodott, u kull informazzjoni dwar proprjetajiet tas-*substrate* u mikrobijologika,
- (b) Il-proprjetajiet fiżjokimiċi u batterjoliġiċi tal-prodott,
- (c) L-interpretazzjoni tad-*data* farmakoloġika, tossikoloġika u ekotossikoloġika,
- (d) Il-metodi analitiċi sabiex jiġi monitorjat il-prodott fl-*ghalf*.

Sospensjoni
temporanja eċċ ta'
l-applikazzjoni
tal-provvedimenti.

7. Jekk, abbaži ta' raġunijiet dettaljati minhabba *data* ġdida jew evalwazzjoni ġdida ta' *data* esistenti li saret evidenti minn meta ġew adottati r-regoli konernati, l-awtoritajiet kompetenti jsibu li wieħed mill-prodotti mniżzla fl-Iskeda jew l-użu tieghu taht kull kundizzjoni li jinsab fiha, jirrappreżenta periklu għas-sahħha tal-bniedem jew ta' l-annimali avolja jilhaq il-kundizzjonijiet ta' dawn ir-regoli, dawn jistgħu temporanġament jissospendu jew inaqqsu l-applikazzjoni ta' dawk ir-regoli. Huma għandhom immedjata ġininformaw lill-Istati Membri l-ohra u lill-organizzazzjonijiet internazzjonali rilevanti, u jagħtu r-raġunijiet għal dik id-deċiżjoni.

Il-partikolaritajiet
għandhom
jingħataw bil-
lingwa uffiċċiali.

8. F'dak li għandu x'jaqsam ma' kummerċ bejn Malta u l-Istati Membri l-ohra, il-partikolaritajiet imsemmija f'regola 4 għandhom jingħataw għal ta' l-anqas, f'lingwa wahda uffiċċiali tal-pajjiż tad-destinazzjoni.

Restrizzjonijiet
dwar tqegħid fis-
suq.

9. Sa fejn għandu x'jaqsam mal-preżenza u t-tikkettjar ta' prodotti mniżzla fl-Iskeda, għalf li jkun konformi mal-kundizzjonijiet imposti minn dawn ir-regoli hu soġġett biss għal dawk ir-restrizzjonijiet dwar it-tqegħid fis-suq bħalma huma mniżzla f'dawn ir-regoli.

Prodotti ta' l-
annimali mhux
soġġetti għal
restrizzjonijiet.

10. Il-prodotti ta' l-annimali ma jkunu soġġetti għal ebda restrizzjoni dwar it-tqegħid fis-suq bħala riżultat ta' l-applikazjoni ta' dawn ir-regoli.

Sorveljanza fuq
kemm l-*ghalf* ikun
konformi.

11. L-awtoritajiet kompetenti għandhom jieħdu kull miżura neċċesarja sabiex uffiċċjalment jimmonitorjaw li l-*ghalf* ikun konformi mal-kundizzjonijiet imniżzla f'dawn ir-regoli, għal ta' l-anqas billi jittieħdu kampjuni waqt li dan ikun qiegħed jiġi mqiegħed fis-suq.

SKEDA

Isem tal-grupp tal-prodott	Isem tal-prodott	X'inhu il-principju nutritiv jew il-mikro-organizmu	Culture substrate (specifikazzjonijet, jekk hemm)	Karatteristici tal-kompozizzjoni tal-prodott.	Speci ta' l-annimali	Regoli specjali
1. Proteinini meħuda minn dawn il-gruppi ta' mikro-organizmi						
1.1. Batterja	1.1.1. Prodott proteiniku minn fermentazzjoni miksub mit-tkabbir ta' <i>Methylotilophilus</i> fuq il-methanol	<i>Methylotilophilus methylotrophus NCIB strain 10.515</i>	<i>Methanol</i>	- proteini mhux mahduma min. 68 % - Indiči riflettiv ta' lanqas 50	- majjali għoġġiela tjur hut -	Dikjarazzjonijet li għandhom isiru fuq it-tikketta jew l-ippakkjar tal-prodott: - isem tal-prodott - proteini mhux mahduma -irmied mhux mahdum -xaham mhux mahdum -kontenut ta' umdià -istruzzjonijiet għall-użu - Dikjarazzjoni tal-klie'm Ixxomnux -numru approvat Dikjarazzjonijet li għandhom isiru fuq it-tikketta jew l-ippakkjar ta' xi prodotti fiċċi l-ghalf, -ammont tal-prodott li fiċċi l-ghalf
1.1.2. Batterja kkultivata fuq gass naturali	1.1.2.1. Prodott proteiniku minn fermentazzjoni ottenut minn gass naturali bit- tkabbir ta' <i>Methylococcus</i>	<i>Methylococcus capsulatus (Bath) NCIMB strain 11132</i>	Gass naturali: (aprox. 91% methane, 5% ethane, 2% propane, 0, 5% isobutane, 0, 5% nbutane, 1%	Proteini mhux mahduma: min. 65%	- Majjali għass-simma minn 25 sa 60 kg - Ghogġiela minn 80 kg - il-fuq - Salamun	Dikjarazzjonijet li għandhom isiru fuq it-tikketta jew l-ippakkjar tal-prodott: - isem tal-prodott " Prodotto proteiniku minn

	<i>capsulatus (Bath), Alcaligenes acidovorans, Bacillus brevis et Bacillus firmus</i> , u c-ċelloli li ġew maqtula	<i>brevis NCIMB strain 13288 Bacillus firmus NCIMB strain 13280</i>	kompONENTI OHRAJN), <i>ammonia mineral salts</i>	<p>fermentazzjoni ottenuut minn gass naturali bit- tkabbir ta': <i>Methylcoccus capsulatus (Bath)</i>, <i>Alcaligenes acidovorans</i>, <i>Bacillus brevis et Bacillus firmus</i>"</p> <ul style="list-style-type: none"> -proteinī mhux mahduma -irmied mhux mahdum -xaham mhux mahdum -kontenut ta' unditā -istruzzjonijiet ghall-użu - rata massima ta' inkorporazzjoni - 8% majjali għas-simma - 8% ghogġiela - 19% salamun (ilma helu) - 33% salamun (ilma bħar) <p>- Dikjarazzjoni tal-kliem Ixxommux'</p> <ul style="list-style-type: none"> -numru approvat Dikjarazzjoniż li għandhom isiru fuq it-tikketta jew l-ippakkjar ta' xi prodotti fiċċi l-għalf, -l-isem: "Prodott proteiniku ottenut mill- fermentazzjoni batterika tal-gass naturali" - ammont tal-prodott li fin l-għalf.
1.2. Yeasts 1.2.1. Yeasts	Il-yeasts kollha miksubin mill-mikro-	<i>Saccharomyces cerevisiae</i> ,	<i>Molasses, residwi ta' distillerja, čerejji u</i>	- L-ispeċi kollha ta' l-annimali

ikkultivat fuq substrates ta' origini animali jew vegetali	organici jew substrates li huma mniżja ful-kolomni 3 jew 4 rispettivament - li cċelloli tagħhom ġew maqtula	<i>Saccharomyces carlsbergensis</i> , <i>Kluyveromyces lactis</i> , <i>Kluyveromyces fragilis</i>	prodotti li għandhom il-lamtu, meraq ta' frott magħsur, xghir (whey), lactic add, fibri vġetalii hydrolyzed
1.2.2. Yeasts ikkultivati fuq substrates barra dawk imsemmija f' 1.2.1	-	-	
1.3. Alka			
1.4. Lower fungi			
1.4.1. Prodotti mill-produzzjoni ta' antibiotici bil-fermentazzjoni			
1.4.1.1. Mycelium, wet byproduct mill-produzzjoni tal-penicillin, ensiled permezz ta' <i>lactobacillus brevis</i> , <i>plantarum</i> , <i>sake</i> , <i>collenoid</i> u <i>streptococcus lactis</i> biex ma jħallix ill-penicillin jahdem u ttrattat bis-shana	<i>Nitrogenous compound Penicillium chrysogenum ATCC 48271</i>	Sorsi differenti ta' karboidrati u l-hydrolysates tagħhom min. 7 %	Nitrogenu espress bħala proteini mhux mahduma: min. 7 %
			Dikjarazzjoni li għandha ssir fuq it-tikketta jew fuq l-ippakkjjar tal-prodott: - l-isem: "Mycelium silage mill-produzzjoni tal-penicillin" - Nitroġenu espress bħala proteini mhux mahduma - īrmied mhux mahdum - umditā - spċi ta' animali jew kategorija Dikjarazzjoni li għandha ssir fuq it-tikketta jew l-ippakkjjar ta' xi proddti fiex 1-ghaff, - l-isem: "Mycelium silage mill-

				produzzjoni tal- <i>penicillin</i> "
2. Komponenti tan-nitrogenu li ma-humieks proteini				Dikjarazzjonijiet li għandhom isiru fuq it-tikketta jew l-ippakkjar tal-prodotti:
2.1. Urina u d-derivati tagħha	2.1.1. Urina tekniċkament pura	CO (NH ₂) ₂	Urina: Minimu 97%	- 1-isem 'Urina' ' <i>Biuret</i> ', <i>Urcaphosphate</i> jew <i>Diureidoisobutane</i> skond il-każ-
	2.1.2. <i>Biuret</i> , tekniċkament pura	(CONH ₂) ₂ NH	<i>Biuret</i> : Minimu 97%	- livell tal-nitrogenu u addizzjonal mal-prodott 2.1.3, il-livell ta' fosforu,
	2.1.3. <i>Ureaphosphate</i> , tekniċkament pura	CO (NH ₂) ₂ H ₃ PO ₄	Nitrogenu: Minimu 16, 5% fosfu: minimu 18 %	

2.1.4. <i>Diureidoisobutane</i> , teknikament pura	$(\text{CH}_3)_2(\text{CH})_2(\text{NHCONH}_2)_2$	-	Nitrogenu: Minimu 30% <i>Isobutyraldehyde</i> : minimu 35 %	<ul style="list-style-type: none"> - l-ispeci ta' l-animali u l-kategorija - numru ta' approvazzjoni Dikjarazzjonijiet li għandhom isiru fuq it-tikketta jew l-ippakkjar ta' xi prodotti fih l-ghalf. - l-isem: 'Urina', 'Biret', 'Ureaphosphate' jew 'Diureidoisobutane' skond il-każ- - ammont tal-prodott li fih l-ghalf, - percentaġġ mit-total ta' komponenti tan-nitrogenu li ma humiex proteini - indikazzjoni, fl-istruzzjoni għall-użu, tal-livell totali ta' nitrogenu ma huwiex ġej mill-protein li ma għandux jiġi mogħbi fl-ikla ta' kuljum ta' kull speċi jew kategorija ta' animali.
2.2. <i>Ammonium salts</i>	$\text{CH}_3\text{CHOHCOONH}_4$	<i>Xgħir (Whey)</i>	Nitrogenu taħt il-forma ta' proteini mhux mahđuma: Minimu 44 %	<ul style="list-style-type: none"> Animali li jieġi mill-bidu li bdew jieġi Nitrogenu taħt il-forma ta' proteini mhux mahđuma: Minimu 44 %
2.2.1. <i>Ammonium lactate</i> , magħmul mill-fermentazzjoni ma' <i>Lactobacillus bulgaricus</i>				<ul style="list-style-type: none"> Dikjarazzjonijiet li għandhom isiru fuq it-tikketta jew l-ippakkjar tal-prodott. - l-isem tal-prodott <i>Ammonium lactate</i> minn fermentazzjoni' - Nitrogenu espress bħala proteini mhux mahđuma - iż-żgħid mhux mahđum - umditā - speci ta' animali jew

				kategorija - numru ta' approvazzjoni Dikjarazzjonijiet li ghandhom isiru fuq it- tikketta jew l-ippakkjar ta' xi proddoti fil l-ghaff: - l-isem ' <i>Ammonium lactate</i> minn fermentazzjoni', - ammont ta' prodott fl- ghaff, - perċentāġġ mit-total ta' komponenti tan-nitrogenu li ma humiex proteini - indikazzjoni, fl- istruzzjoni għall-użu, tal- livell totali ta' nitrogenu ma huwixx gej mill- proteini li ma għandux jiġi mogħi fl-ikla ta' kuljum ta' kull speċi jew kategorija ta' animali.	Dikjarazzjonijiet li ghandhom isiru fuq it- tikketta jew l-ippakkjar tal-prodott: - il-kliem: <i>Ammonium acetate</i> , - kontenut tan-nitrogenu u tal-umdità, - speci jew kategorija ta' animali - numru ta' approvazzjoni Dikjarazzjonijiet li ghandhom isiru fuq it- tikketta jew l-ippakkjar ta'
				<i>Ammonium acetate</i> min. 55 %	<i>Ammonium acetate</i> min. 55 %
2.2.2. <i>Ammonium acetate f' aqueuous solution</i>	$\text{CH}_3\text{COONH}_4$	-			

			<p>xi prodotti fih l-ghalf: -il-kliem: <i>Ammonium acetate</i> -l-ammont tal-prodott fl-ghalf, - perçentaġġ mit-total ta' komponenti tan-nitrogenu li ma humiex proteini -indikazzjoni, fl-istruzzjoni għall-użu, tal-livell totali ta' nitrogenu ma huwiex gej mill-proteini li ma għandux jidu mogħi fl-ikla ta' kuljum ta' kull speci jew kategorija ta' animali.'</p>
		<p>2.2.3 <i>Ammonium sulfate f'aqueous solution</i></p>	<p>(NH₄)₂SO₄</p> <p><i>Ammonium sulfate:</i> minimu 35%</p>
			<p>Animali li jirghu mill-bidu li bdew jirghu</p> <p><i>Ammonium sulfate,</i> - kontenut tan-nitrogenu u tal-umditā - speci ta' animali - numru ta' approvazzjoni Dikjarazzjonijiet li għandhom isiru fuq it-tikketta jew l-ippakkjjar tal-prodott: -il-kliem: <i>"Ammonium sulfate"</i>, -l-ammont tal-prodott fl-ghalf, - perçentaġġ mit-total ta' komponenti tan-nitrogenu</p>

			Li ma humiex proteini - indikazzjoni, fl- istruzzjoni ghall-užu, tal- livell totali ta' nitroġenu na huwiex ġej mill- protein li ma għandux jiġi mogħti fl-ikla ta' kuljum ta' kull speċi jew kategorija ta' animali, - fil-każ ta' animali li jirġu zgħar, l-ikla ta' kuljum ma tistax itku niżjudha b' aktar minn in 0, 5%	Dikjarazzjoni jiet li għandhom isiru fuq it- tikketta jew l-ippakkjär tal-prodott: - isem tal-prodott 'By- <i>Products</i> mill-produzzjoni ta' <i>L-glutamic acid</i> fil-każ ta' prodott 2.3.1; <i>By-Products</i> ta' <i>L-Lysine</i> ' fil-każ ta' 2.3.2, - Nitroġenu espress bħala protein mhux mahđuma - iż-żebbu mhux mahđum - umdità - speci ta' animali jew kategorija - numru ta' approvazzjoni Dikjarazzjoni jiet li għandhom isiru fuq it- tikketta jew l-ippakkjär ta' xi proddoti fih l-ghalf.
2.3. <i>By-Products</i> mill- produzzjoni ta' amino acidi bil- fermentazzjoni	2.3.1. <i>By-Products</i> likwid ikonċentrat mill-produzzjoni ta' <i>L-glutamic acid</i> bil- fermentazzjoni bil- <i>Corynebacterium</i> <i>melassecola</i>	<i>Sucrose, molasses,</i> <i>starch products u</i> <i>hydrolysates tagħhom</i>	Nitroġenu espress bħala proteini mhux mahđuma: minnu 48 % umdità: massimu 28%	Animali li jirġu mill- bidu li bdew jirġu Nitroġenu espress bħala proteini mhux mahđuma - iż-żebbu mhux mahđum - umdità - speci ta' animali jew kategorija - numru ta' approvazzjoni Dikjarazzjoni jiet li għandhom isiru fuq it- tikketta jew l-ippakkjär ta' xi proddoti fih l-ghalf.

		- l-isem 'By-Products mill-produzzjoni ta' <i>L-glutamic acid</i> fil-kaz̄ ta' prodott 2.3.1; 'By-Products mill-produzzjoni ta' <i>L-Lysine</i> ' fil-kaz̄ ta' prodott 2.3.2, - perċentāġ mii-total ta' komponenti tan-nitrogenu li ma huwix proteini - indikazzjoni, fl- istruzzjoni għall-użu, tal- livell totali ta' nitrogenu ma huwix gej mill- protein li ma għandux jigi mogħi fl-ikla ta' kuljum ta' kull speci jew kategorija ta' animali.'	
2.3.2. <i>By-Products</i> likwid konċentrati magħmlu mill- produzzjoni ta' <i>L-</i> <i>Lysine monohydrochloride</i> bil-fermentazzjoni ta' <i>vibacterium lactofermentum</i>	<i>Ammonium salts u</i> prodotti ohra magħmlu min- nitrogenu	<i>Sucrose, molasses,</i> <i>starch products u</i> <i>hydrolysates tagħhom</i>	Nitrogenu espress bhala protein mhux maha duma: minnu 45 %
3. Amino Acidi u s- <i>Salts tagħhom</i> 3.1. <i>Methionine</i>	3.1.1. <i>DL-Methionine</i> , teknikament pur	<i>CH₃S(CH₂)₂CH</i> (NH ₂)COOH	<i>DL-Methionine:</i> minnu 98 %
			Dikjarazzjonijiet li għandhom isiru fuq it- tikketta jew l-ippakkjar

	3.1.2. <i>Dihydrated calcium salt of Nhydroxy methyl DL-Methionine,</i> teknikament pur	[CH ₃ S (CH ₂) 2CH (NHH ₂ OH) COO] ₂ Ca.2H ₂ O	-	<i>DL-Methionine:</i> minimu 67% <i>Formaldehyde:</i> massimu 14% Kalcjum: minimu 9%	Animali li jirghu mill- bidu li bdew jirghu -isem tal-prodott "DL L- methionine, fil-każ ta' prodott 3.1.1, "Dihydrated calcium salt ta' Nhydroxy methylDL-Methionine" fil-każ ta' prodott 3.1.2, "Zincmethionine", fil-każ ta' prodott 3.1.3, - <i>DL-Methionine u l-</i> kontenut tal l-umdià - specij jew kategorija ta' animali fil-każ ta' prodotti 3.1.2 and 3.1.3, - numru ta' approvazzjoni Dikjarazzjoni jet li ghandhom isiru fuq it- tikketta jew l-ippakkjar tal-prodott. -isem tal-prodott 'concentrated liquid sodium DL-Methionine' - kontenut ta' <i>DL-</i> <i>Methionine</i> - kontenut ta' umdià - numru ta' approvazzjoni	tal-prodott: -isem tal-prodott "DL L- methionine, fil-każ ta' prodott 3.1.1, "Dihydrated calcium salt ta' Nhydroxy methylDL-Methionine"
	3.1.3. <i>Methioninezinc,</i> teknikament pur	[CH ₃ S (CH ₂) 2CH (NH ₂) COO] ₂ Zn	<i>DL-Methionine:</i> minimu 80% Zn: massimu 18, 5%			
	3.1.4. <i>Concentrated liquid sodium DL-Methionine,</i> teknikament pur	(CH ₃ S (CH ₂) 2CH (NH ₂) COO) Na	-	<i>DL-Methionine:</i> minimu 40, 0 % <i>Sodium:</i> minimu 6, 2 %	Kull speci ta' animali	Dikjarazzjoni jet li ghandhom isiru fuq it- tikketta jew l-ippakkjar tal-prodott. -isem tal-prodott 'concentrated liquid sodium DL-Methionine' - kontenut ta' <i>DL-</i> <i>Methionine</i> - kontenut ta' umdià - numru ta' approvazzjoni
	3.1.5 <i>DL-Methionine,</i> teknikament pur protett b' copolymer vinylpyridi nelstyrene	CH ₃ S (CH ₂) 2CH (NH ₂) COOH	-	<i>DL-Methionine:</i> Minimu 65 % <i>copolymer</i> <i>vinylpypyridine/</i> <i>styrene:</i> Massimu 3 %	Baqar li jahilbu	Dikjarazzjoni jet li ghandhom isiru fuq it- tikketta jew l-ippakkjar tal-prodott. - "Protected methionine with copolymer vinylpyridine/styrene" - <i>DL-Methionine u</i>

				kontenut ta' umdità - speci ta' animal - numru ta' approvazzjoni
3.2. <i>Lysine</i>	3.2.1. <i>L-Lysine</i> , teknikament pur	NH ₂ (CH ₂) 4CH (NH ₂) COOH	<i>L-Lysine</i> : minimu 98%	Dikjarazzjoni jet li għandhom isiru fuq it-tikketta jew l-ippakkjär tal-prodott.

L.N. 89 of 2005

**VETERINARY SERVICES ACT
(CAP. 437)**

Products Used in Animal Nutrition Rules, 2005

IN exercise of the powers conferred by articles 24 and 25 of the Veterinary Services Act, the Minister for Rural Affairs and the Environment, after consultation with the Minister of Health, the Elderly and Community Care, has made the following rules:-

Title and scope.

1. (1) The title of these rules is the Products Used in Animal Nutrition Rules, 2005.

(2) The scope of these rules is to implement the rules found under European Union Council Directive 82/471/EEC of the 30th June, 1982 on certain products which act as direct or indirect protein sources, are manufactured by certain technical processes and are put into circulation as feedingstuffs or in feedingstuffs in accordance with articles 24 and 25 of the Veterinary Services Act.

(3) These rules shall be without prejudice to other provisions concerning:

(a) additives in feedingstuffs;

(b) the fixing of maximum levels for undesirable substances and products in feedingstuffs;

(c) the fixing of maximum levels for pesticide residues on and in products intended for human or animal nutrition;

(d) the marketing of compound feedingstuffs, pathogenic micro-organisms in feedingstuffs, feedingstuffs for particular nutritional purposes, the circulation of feed materials.

Interpretation.

2. For the purpose of these rules, the following definitions shall apply:

“additives” means substances which, when incorporated in feeding-stuffs, are likely to affect their characteristics or livestock production;

“complete feeding-stuffs” means mixtures of feedingstuffs which, by reason of their composition, are sufficient for a daily ration;

“daily ration” means the average total quantity of feeding-stuffs, calculated on a moisture content of 12 %, required daily by an animal of a given species, age category and yield, to satisfy all its needs;

“feeding-stuffs” means organic or inorganic substances, used singly or in mixtures, whether or not containing additives, for oral animal feeding;

“premixtures” means additive concentrates intended for the industrial manufacture of compound animal feeding-stuffs;

“supplementary feeding-stuffs” means mixtures of feeding-stuffs which have a high content of certain substances and which, by reason of their composition, are sufficient for a daily ration only if they are used in combination with other feeding-stuffs.

3. (1) Feedingstuffs belonging to one of the product groups listed in the Schedule or containing such products may be marketed only if:

(a) the product in question appears in the Schedule.

(b) any conditions laid down therein are fulfilled.

(2) Competent authorities may, for experimental or scientific purposes, provide for derogations from the provisions of sub-rule (1), provided that an adequate official inspection is carried out.

(3) Products referred to in Chapter I. 1 (a) of Council Directive 95/69/EC of 22 December 1995 laying down the conditions and arrangements for approving and registering certain establishments and intermediaries operating in the animal feed sector may be put into circulation only by establishments or intermediaries which meet the conditions laid down in Article 2 or Article 3 of that Directive, as appropriate.

(4) Sub-rule (3) shall apply without prejudice to Article 4 (2) of Council Directive 95/69/EC.

Marketing of
feedingstuffs.

Applicable particulars to appear on label etc.

4. (1) Without prejudice to the labelling provisions applicable to straight and compound feedingstuffs, the products listed in the Schedule may not be marketed as feedingstuffs or incorporated in feedingstuffs unless any particulars laid down in the Schedule appear in the package or container or on a label attached thereto.

(2) For material marketed in bulk the particulars referred to in sub-rule (1) appear on an accompanying document.

Principles observed in Schedule.

5. (1) In the Schedule, the following principles are observed:

(a) A product shall not be included in the Schedule unless:

(i) it has nutritional value for animals because it provides nitrogen, or

(ii) when used sensibly it has no detrimental effect on human or animal health or on the environment and does not harm the consumer by impairing the distinctive features of animal products, or

(iii) it can be monitored in feedingstuffs.

(b) A product shall be deleted from the Schedule if one of the conditions listed in paragraph (A) is not satisfied.

(2) Criteria making it possible to define the products included in these rules, particularly the criteria of composition and purity and the physicochemical and biological properties, may be set in the light of scientific and technical knowledge.

Product conformity.

6. (1) In order to ensure that the products referred to in sections 1.1 and 1.2 of the Schedule comply with the principles set out in rule 5 (1), the dossier, prepared in accordance with the provisions of sub-rule (2) hereof, is sent officially to the Member States, to the relevant international organisation and, if it is requested that they be consulted, to the necessary scientific committees.

(2) The competent authorities and the other recipients of the dossier referred to in sub-rule (1) shall ensure, if requested on good grounds by an applicant, that information whose disclosure could adversely affect industrial or commercial property rights is kept confidential. Industrial and commercial secrecy shall not apply to:

(a) The names and composition of the product, and any information concerning the substrate and the micro-organism,

- (b) The physicochemical and biological properties of the product,
- (c) The interpretation of the pharmacological, toxicological and ecotoxicological data,
- (d) The analytical methods for monitoring the product in the feedingstuffs.

7. If, on the basis of detailed grounds due to new data or a new evaluation of existing data that have become evident since the adoption of the provisions in question, the competent authorities find that one of the products listed in the Schedule or its use under any conditions that have been set represents a danger to human or animal health even though it complies with the provisions of these rules, they may temporarily suspend or restrict the application of those provisions. They shall immediately inform the other Member States and the relevant international organisation thereof, giving the reasons for its decision.

Temporary suspension etc. of applications provisions.

8. With regard to marketing between Malta and other Member States, the particulars referred to in rule 4 shall be given in at least one of the official languages of the country of destination.

Particulars to be given in official language.

9. As far as the presence and labelling of the products listed in the Schedule is concerned, feedingstuffs that comply with the provisions of these rules are subject only to the marketing restrictions contained in these rules.

Marketing restrictions.

10. Animal products are not subject to any marketing restriction as a result of the application of these rules.

Animal products not subject to marketing restrictions.

11. The competent authorities shall take all necessary measures to ensure that the compliance of feedingstuffs with the requirements of these rules is officially monitored, at least by sampling during marketing.

Monitoring of compliance of feedingstuffs.

SCHEDULE						
1 Name of product group	2 Name of product	3 Designation of nutritive principle or identity of micro-organism	4 Culture substrate (specifications, if any)	5 Composition characteristics of product	6 Animal species	7 Special provisions
1. Proteins obtained from the following groups of micro-organisms						
1.1. Bacteria						
1.1.1. Bacteria cultivated on methanol	1.1.1.1. Protein product of fermentation obtained by culture of <i>Methylophilus</i> <i>Methylophilus</i> on methanol	<i>Methylophilus</i> <i>methylotrophicus</i> NCIB strain 10.515	Methanol	-Crude protein min. 68 % - Reflectance index at least 50	- Pigs - Calves - Poultry - Fish	Declarations to be made on the label or packaging of the product: - name of the product - crude protein, - crude ash, - crude fat, - moisture content, - instructions for use, - Declaration of the words 'Avoid inhalation.' Declarations to be made on the label or packaging of compound feedingstuffs: - approval number - amount of the product contained in the feedingstuff. Declarations to be made on the label or packaging of the product: - the names: "Protein product of
1.1.2 Bacteria cultivated on natural gas	1.1.2.1 protein product of fermentation from natural gas obtained by culture of:	<i>Methylococcus capsulatus</i> (Bath) NCIMB strain 11132 <i>Alcaligenes acidovorans</i> NCIMB	Natural gas: (approx. 91% methane, 5% ethane, 2% propane, 0, 5% isobutane, 0, 5% nbutane, 1% other	crude protein: min. 65%	- Pigs for fattening from 25 to 60 kg - Calves from 80 kg on - Salmon	

	Methylococcus capsulatus (Bath), Alcaligenes acidovorans, Bacillus brevis et Bacillus firmus, and the cells of which have been killed	strain 12387 Bacillus brevis NCIMB strain 13288 Bacillus firmus NCIMB strain 13280	components), ammonia mineral salts	fermentation from natural gas obtained by culture of Methylococcus capsulatus (Bath), Alcaligenes acidovorans, Bacillus brevis et Bacillus firmus" - crude protein - crude ash - crude fat - moisture content - instructions for use - maximum incorporation rate in - 8% pigs for fattening - 8% calves - 19% salmon (freshwater) - 33% salmon (seawater) - declaration of the words: "avoid inhalation". - approval number Declarations to be made on the label or packaging of compound feedingstuffs : - The name: "Protein product obtained by bacterial fermentation of natural gas" - amount of the product contained in the feedingstuff.	All animal species
1.2. Yeasts 1.2.1. Yeasts cultivated on substrates of animal	All yeasts - obtained from the micro-organisms and substrates listed in	Saccharomyces cerevisiae, Saccharomyces carlsbergiensis,	Molasses, distillery residues, cereals and products containing starch, fruit juice,	-	All animal species

or vegetable origin	columns 3 and 4 respectively - the cell of which have been killed	Kluyveromyces lactis, Kluyveromyces fragilis	whey, lactic acid, hydrolyzed vegetable fibres	
1.2.2. Yeasts cultivated on substrates other than those given in 1.2.1	-	-		
1.3. Algae				
1.4. Lower fungi				
1.4.1. Products from production of antibiotics by fermentation				
1.4.1.1. Mycelium, wet byproduct from the production of penicillin, ensiled by means of <i>Lactobacillus brevis</i> , <i>plantarum</i> , <i>sake</i> , <i>collenoïd</i> and <i>streptococcus lactis</i> to inactive the penicillin and heat treated	Nitrogenous compound Penicillium chrysogenum ATCC 48271	Different sources of carbohydrates and their hydrolysates	Nitrogen expressed as crude protein: min. 7 %	Ruminants pigs Declaration to be made on the label or packaging of the product: - the name: "Mycelium silage from the production of penicillin" - Nitrogen expressed as crude protein - crude ash - moisture - animal species or category Declaration to be made on the label or packaging of the compound feedingstuff: - the name: "Mycelium silage from the production of penicillin"

2. Non-protein nitrogenous compounds						Declarations to be made on the label or packaging of the product: - the name 'Urea', 'Biuret', 'Ureaphosphate' or 'Diureidoisobutane' as the case may be, - nitrogen level; and in addition for product 2.1.3, phosphorus level, - animal species or category, - approval number
2.1. Urea and its derivatives	2.1.1. Urea, technically pure	CO (NH ₂) ₂	-	Urea: minimum 97%	Ruminants from the beginning of rumination	Declarations to be made on the label or packaging of compound feedingstuffs: - the name 'Urea', 'Biuret', 'Ureaphosphate' or 'Diureidoisobutane' as the case may be, - amount of the product contained in the feedingstuff, - percentage of the total crude protein provided by non-protein nitrogen, - indication, in the instructions for use, of the level of total non-protein nitrogen which should not be extended in the daily ration of each animal species or category.
	2.1.2. Biuret, technically pure	(CONH ₂) ₂ NH	-	Biuret: minimum 97%		
	2.1.3. Ureaphosphate, technically pure	CO (NH ₂) ₂ H ₃ PO ₄	-	Nitrogen: minimum 16, 5% Phosphorus: minimum 18 %		
	2.1.4. Diureidoisobutane, technically pure	(CH ₃) ₂ (CH) ₂ (NHCONH ₂) ₂	-	Nitrogen: minimum 30% Isobutyraldehyd e: minimum 35 %		

	2.2. Ammonium salts	2.2.1. Ammonium lactate, produced by fermentation with Lactobacillus bulgaricus	$\text{CH}_3\text{CHOHCOONH}_4$	Whey	Nitrogen expressed as crude protein: minimum 44 %	Ruminants from the beginning of rumination	Declarations to be made on the label or packaging of the product: - the name 'Ammonium lactate from fermentation', - nitrogen expressed as crude protein, - crude ash, - moisture, - animal species or category, - approval number
		2.2.2. Ammonium acetate in aqueous solution	$\text{CH}_3\text{COONH}_4$	-	Ammonium acetate min. 55 %	Ruminants, from the start of rumination	Declarations to be made on the label or packaging of the product: - the words: Ammonium acetate,

			<ul style="list-style-type: none"> - nitrogen and moisture contents, - animal species or category, - approval number <p>Declarations to be made on the label or packaging of compound feedingstuffs:</p> <ul style="list-style-type: none"> - the words: Ammonium acetate - the amount of the product contained in the feedingstuff, - percentage of the total crude protein provided by non protein nitrogen, - indication in the instructions for use of the level of total non-protein nitrogen which should not be exceeded in the daily ration of each animal species or category.' 	<ul style="list-style-type: none"> - nitrogen and moisture contents, - animal species, - approval number <p>Declarations to be made on the label or packaging of compound</p>
2.2.3 Ammonium sulfate in aqueous solution	$(\text{NH}_4)_2\text{SO}_4$	-	<p>Ammonium sulfate: minimum 35%</p> <p>Ruminants from the start of rumination</p>	<p>Declarations to be made on the label or packaging of the product:</p> <ul style="list-style-type: none"> - the words: Ammonium sulfate, - nitrogen and moisture contents, - animal species, - approval number <p>Declarations to be made on the label or packaging of compound</p>

			<p>feedingstuffs:</p> <ul style="list-style-type: none"> - the words: "Ammonium sulfate", - the amount of the product contained in the feedingstuff, - percentage of the total crude protein provided by non protein nitrogen, - indication in the instructions for use of the level of total non-protein nitrogen which should not be exceeded in the daily ration of each animal species, - in the case of young ruminants, the incorporation rate in the daily ration may not exceed 0, 5% 	<p>Declarations to be made on the label or packaging of the product:</p> <ul style="list-style-type: none"> - the name 'By-Products from the production of L-glutamic acid' in the case of product 2.3.1; 'By-Products of L-Lysine' in the case of product 2.3.2, - nitrogen, expressed as crude protein, - crude ash, - moisture,
			<p>Nitrogen expressed as crude protein: minimum 48 % Moisture: maximum 28%</p>	<p>Ruminants from the beginning of rumination</p>
2.3. By-Products from the production of amino acids by fermentation	2.3.1. Concentrated liquid By-Products from the production of Lglutamic acid by fermentation with Corynebacterium melassecola	Ammonium salts and other nitrogenous compounds	Sucrose, molasses, starch products and their hydrolysates	

3.1.2. Dihydrated calcium salt of Nhydroxy methyl DL-Methionine, technically pure	[CH ₃ S (CH ₂) 2CH (NHH ₂ OH) COO] ₂ Ca.2H ₂ O	-	DL-Methionine: minimum 67% Formaldehyde: maximum 14% Calcium: minimum 9%	Ruminants from the beginning of rumination - the name "DL-L methionine, in the case of products 3.1.1, "Dihydrated calcium salt of Nhydroxy methyl DL-Methionine" in the case of product 3.1.2, "Zincmethionine", in the case of product 3.1.3, - DL-Methionine and moisture contents, - animal species or category in the case of products 3.1.2 and 3.1.3, - approval number
3.1.3. Methioninezinc, technically pure	[CH ₃ S (CH ₂) 2CH (NH ₂) COO] ₂ Zn	DL-Methionine: minimum 80% Zn: maximum 18, 5%		
3.1.4. Concentrated liquid sodium DL-Methionine technically pure	(CH ₃ S (CH ₂) 2CH (NH ₂) COO) Na	-	DL-Methionine: minimum 40, 0 % Sodium: minimum 6, 2 %	All animal species Declarations to be made on the label or packaging of the product: - the name 'concentrated liquid sodium DL-Methionine' - DL-Methionine content - moisture content - approval number
3.1.5 DL-Methionine, technically pure protected with copolymer vinylpyridine/nestyrene	CH ₃ S (CH ₂) 2CH (NH ₂) COOH	-	DL-Methionine: minimum 65 % copolymer vinylpyridine/styrene: maximum 3 %	Dairy cows Declarations to be made on the label or packaging of the product: - "Protected methionine with copolymer vinylpyridine/styrene" - DL-Methionine and moisture contents - animal species - approval number

3.2. Lysine	3.2.1. L-Lysine, technically pure	$\text{NH}_2(\text{CH}_2)4\text{CH}(\text{NH}_2)\text{COOH}$	-	L-Lysine: minimum 98%	All animal species	Declarations to be made on the label or packaging of the product: - the name "L-Lysine" in the case of product 3.2.1, "Concentrated liquid L-Lysine base" in the case of product 3.2.2, "L-Lysinemonohydrochloride" in the case of product 3.2.3, "Concentrated liquid L-Lysine monohydrochloride" in the case of product 3.2.4, "L-Lysine sulphate and its By-Products from fermentation", in the case of product 3.2.5, -L-Lysine and moisture contents - approval number
	3.2.2. Concentrated liquid L-Lysine (base)	$\text{NH}_2(\text{CH}_2)4\text{CH}(\text{NH}_2)\text{COOH}$	Saccharose, molasses, starch products and their hydrolysates	L-Lysine: minimum 60%		
	3.2.3. L-Lysinemonohydrochloride, technically pure	$\text{NH}_2(\text{CH}_2)4\text{CH}(\text{NH}_2)\text{COOH.HCl}$	-	L-Lysine: minimum 78%		
	3.2.4. Concentrated liquid L-Lysinemonohydrochloride	$\text{NH}_2(\text{CH}_2)4\text{CH}(\text{NH}_2)\text{COOH.HCl}$	Saccharose, molasses, starch products and their hydrolysates	L-Lysine: minimum 22, 4%		
	3.2.5. L-Lysinesulphate produced by fermentation with <i>Corynebacterium glutamicum</i>	$[\text{NH}_2(\text{CH}_2)4\text{CH}(\text{NH}_2)\text{COOH}]_2 \text{H}_2\text{SO}_4$	Sugar syrup, molasses, cereals, starch products and their hydrolysates	L-Lysine: minimum 40%	Poultry, pigs	Declarations to be made on the label or packaging of the product: - "L-Lysine and moisture content - approval number
	3.2.6. L-Lysine phosphate and its By-Products produced by fermentation with <i>Brevibacterium lactofermentum</i> NRRL B11470	$[\text{NH}_2(\text{CH}_2)4\text{CH}(\text{NH}_2)\text{COOH}]$	Sucrose ammonia and fish solubles	L-Threonine minimum 98 % L-Lysine: min. 35 % Phosphorus: min. 4, 3 %	Poultry, pigs	Declarations to be made on the label or packaging of the product: - "L-Lysine and moisture content - approval number
	3.2.7 Mixtures of: (a) L-Lysinemonohydrochloride, technically pure and, (b) DL-Methionine, technically pure	$\text{NH}_2(\text{CH}_2)4\text{CH}(\text{NH}_2)\text{COOHHC}\text{I}$ $\text{CH}_3\text{S}(\text{CH}_2)2\text{CH}(\text{NH}_2)\text{COOH}$	-	L-Lysine + DL-Methionine minimum 50 % (including DL-Methionine minimum 15 %) Copolymer	Dairy cows	Declarations to be made on the label or packaging of the product: - the name "mixture of Ulysine monohydrochloride and DL-Methionine protected

	protected with copolymer vinylpyridine/ styrene		vinylypyridine/ styrene maximum 3 %	with copolymer vinylypyridine/styrene" - L-Lysine, DLmethionine and moisture contents - animal species - approval number
3.3. Threonine	3.3.1. L-Threonine, technically pure	CH ₃ CH(OH)CH (NH ₂)COOH	-	L-Threonine: minimum 98% Declarations to be made on the label or packaging of the product: - the name "L-Threonine" - L-Threonine and moisture contents - approval number
3.4. Tryptophan	3.4.1. L-Tryptophan, technically pure	(C ₈ H ₅ NH)CH ₂ CH (NH ₂)COOH	-	L-Tryptophan: minimum 98 % Declarations to be made on the label or packaging of the product: - the name: "L-Tryptophan" - L-Tryptophan and moisture contents - approval number
	3.4.2. DL-Tryptophan, technically pure,	(C, H, NH)CH, CH (NH ₂)COOH	-	DL-Tryptophan: minimum 98 % Declarations to be made on the label or packaging of the product: - the name: "L-Tryptophan" - L-Tryptophan and moisture contents - approval number
	4. Analogues of amino acids			

4.1. Analogues of methionine	4.1.1 Hydroxy analogue of methionine	$\text{CH}_3\text{S}(\text{CH}_2)\text{2CH(OH)COOH}$	-	Total of acids: minimum 85 % Monomer acid: minimum 65 %	All animal species Declarations to be made on the label or packaging of the product: - if appropriate, the name (column 2), - monomer acid and total acids contents in the case of product 4.1.1 and monomer acid content in the case of product 4.1.2, - moisture content, - animal species - approval number
	4.1.2 Calcium salt of hydroxy analogue of methionine	$[\text{CH}_3\text{S}(\text{CH}_2)\text{2CH(OH)COO}]_2\text{Ca}$	-	Monomer acid: minimum 83 % Calcium: minimum 12 %	Declarations to be made on the label or packaging of compound feeding Stuffs : - if appropriate, the name (column 2), - monomer acid and total acids contents in the case of product 4.1.1 and monomer acid content in the case of product 4.1.2, - amount of the product contained in the feedingstuff.

The contents laid down or to be declared in accordance with columns 5 and 7 refer to the product as such.
