

10/1977 Coll.
Regulation
of the Ministry of Forest and Water Management
of the Slovak socialist Republic
from 20 June 1977

which determines supplying water flows and their watersheds, and determines water flows, important from water management point of view

The Ministry of Forest and Water Management of the Slovak socialist Republic, after negotiating with relevant central state administration bodies and with relevant regional national committees, establishes according to the article 20 par. 2 and the article 32 par. 1 of the Act No. 138/1973 Coll. on Waters (the Water Act):

PART ONE
Supplying water flows and their watersheds

Article 1

Supplying water flows are parts of water flows, determined to be source of the water for mass water supplying for citizens, listed in the Annex No. 1 to this Regulation (hereafter "Annex"). Starting point of supplying water flow is determined by the spring of water flow. In case, that at the same place of water flow, there is another part determined for supplying water flow, then its starting point is determined by the locality, listed in the Annex. Final point of supplying water flow is determined by transverse profile of water flow at the place of withdrawal of water for mass water supplying for citizens, and if elevated water is being withdrawn, then the final point of supplying water flow is being determined by the profile of the dike or dam, by which the withdrawn water is being elevated; position of these profiles is determined in the Annex by the name of surrounding locality.

Article 2

Watershed of supplying water flow is the area, from which the ground waters naturally flow into water flow to the profile, determining final point of supplying water flow, as well as area, from which the ground waters are being artificially brought to the watershed of supplying water flow.

Article 3

Besides the buildings, facilities, respectively activities, already listed in the article 13 of the Water Act, the approval from relevant water management body for following buildings, facilities or activities in the watershed of supplying water flow, is necessary:

- a) big-capacity buildings for animal production, for which it is being considered:
 - 1 buildings for breeding the cattle, that are the buildings for milking cows with total capacity of 400 pieces and more, buildings for calf from 800 pieces, breeding places for young cattle from 500 pieces, stall objects for breeding cattle for fattening from 500 pieces,
 - 2 buildings for breeding pigs, that are the buildings for fattening pigs with total capacity from 5000 pieces and birth places for pigs and breeding places for pigs in pre-fattening, with total capacity from 700 pieces,
- b) ground silos and objects of silo facilities,
- c) buildings of hospitals, medical places and other facilities and establishments, with which, there is the possibility of formation of infection diseases danger, related
- d) mining, modification and using of radioactive materials, respectively poisons, 1)
- e) air application of manure and chemical materials for protection of plants,
- f) objects for storing and manipulation with petroleum materials, and objects for storing artificial manure and sprinkling protection materials.

1) the Governmental Decree No. 56/1967 Coll. on Poisons and other Materials, harmful to Health.

PART TWO

Water flows, important from water management point of view

Article 4

Water flows, important from water management point of view, are those water flows, respectively their water management complete parts, which are listed in the Annex No. 2 to this Regulation.

Article 5

The provisions, regulating the execution of state administration in the field of water management in reserved areas of the Czechoslovak People Army and armed security forces, 2) are not being touched by the provisions of this part.

2) E.g. the Act No. 169/1949 Coll. on military districts.

PART THREE

Common and final provisions

Article 6

Water management bodies issue the provisions in reserved areas of the Czechoslovak People Army in co-operation with military administration. 3) The protection of the waters at this area is being arranged according to the agreement between the Federal Ministry of National Defence and the Ministry of Forest and Water Management of the Slovak socialist Republic.

3) the Article 25 of the Act No. 135/1974 Coll. on State Administration in Water Management.

Article 7

This Regulation enters into force on the day of its announcement.
