UNITS: Maximum residue levels (MRLs) are expressed in milligrammes of residue per kilogramme of food.

KEY: * Level at or about the limit of determination.

no MRL - refers to the particular active/commodity combination.

FOOTNOTES:

- ⁰¹ Paddy or rough rice, husked rice and semi-milled or wholly milled rice.
- ⁰² Other cereals do not include rice.
- ⁰³ Levels are measured on fat, except in the case of foods with a fat content of 10% or less by weight. In these cases the residue is related to the total weight of the boned foodstuff and the MRL is one tenth of the value given in the table, but must be no less than 0.01 mg/kg.
- ⁰⁴ These levels are for fresh raw cow's milk and fresh whole cream cow's milk expressed on the whole milk.
- ⁰⁵ For preserved, concentrated or sweetened cow's milk; for raw milk and whole cream milk of another animal origin; and for butter, cheese or curd whether made from cow's milk or other milk of a combination, the following levels apply:
- if the fat content is less than 2% by weight, the MRL is taken as half that set for raw milk and whole cream milk;
 - if the fat content is 2% or more by weight, the MRL is expressed in mg/kg of fat and is set at 25 times that set for raw milk and whole cream milk.
- ⁰⁶ Bird's eggs in shell (other than eggs for hatching) and whole egg products and egg yolk products (whether fresh, dried or otherwise prepared).
- ⁰⁷ For eggs and egg products with a fat content higher than 10%, the maximum level is expressed in mg/kg fat. In this case, the maximum level is 10 times higher than the maximum level for fresh eggs.
- ⁰⁸ All meat except poultrymeat.

- ⁰⁹ Poultrymeat only.
- ¹⁰ Chicken liver.
- ¹¹ Cattle kidney.
- ¹² Cattle liver.
- ¹³ All meat except liver and kidney.
- ¹⁴ The residue definition for this MRL is: 2-methoxyimino-2-[2-(0-tolyloxymethyl)phenyl]acetic acid.
- ¹⁵ Meat, liver, fat.
- ¹⁶ Kidney.
- ¹⁷ Other meat products.
- ¹⁸ The residue definition for this MRL is: 2-[2-(4-hydroxy-2-methylphenoxyethyl)phenyl]-2-methoxy-iminoacetic acid.
- ¹⁹ With the exception of meat and other ovine, bovine and caprine products.
- ²⁰ Footnotes 3, 5 and 6 do not apply in cases where the lower limit of analytical determination is indicated.
- ²¹ Meat of cattle, sheep and goats.
- ²² Other than meat or liver of cattle, sheep and goats, and poultrymeat.
- ²³ Liver of cattle, sheep and goats. The residue definition for this MRL is: 1, 1-bis-(parachlorophenol)-2,2-dichloroethanol(PP'-FW152), expressed as dicofol.
- ²⁴ Pig kidney.
- ²⁵ Cattle, goat and sheep kidney.
- ²⁶ Sheepmeat only.
- ²⁷ All meat except sheepmeat.
- ²⁸ For animal products MRLs relate to cyhalothrin (sum of isomers).

- ²⁹ Ruminant liver.
- ³⁰ All meat except ruminant liver.
- ³¹ Fat, liver and kidney.
- ³² Other than fat, liver and kidney.
- ³³ The residues definition for these MRLs is: sum of propyzamide and all metabolites containing the 3,5-dichlorobenzoic acid fraction expressed as propyzamide.
- ³⁴ Fenvalerate and esfenvalerate - the figure in italics set across the column refers to the MRL for fenvalerate only.
- ³⁵ Procymidone: 1 mg/kg applies to whole seeds; 0.05 mg/kg applies to seed without shell.
- ³⁶ Meat and meat products other than those at footnotes 10, 11 and 12.

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations, which extend to England and Wales only, are made under section 2(2) of the European Communities Act 1972 and amend the provisions of the Pesticides (Maximum Residue Levels in Crops, Food and Feeding Stuff) (England and Wales) Regulations 1999 S.I. 1999/3483.

The Regulations specify maximum levels of pesticide residues which crops, food and feeding stuffs may contain in implementation of Commission Directives 2000/24/EC (OJ No. L107, 4.5.00), 2000/42/EC (OJ No. L158, 30.6.00), 2000/48/EC (OJ No. L197, 3.8.00), 2000/57/EC (OJ No. L244, 29.9.00) and 2000/58/EC (OJ No. L244, 29.9.00) and amend Community maximum residue levels which have been set previously (regulations 2(1), 2(2) and 5).

Further residue definitions are also introduced (regulation 2(3)).

Additionally, the Regulations remove certain maximum levels which were included in Part 1 of Schedule 2 to the Consolidated Regulations 1999 (S.I. 1999/3483) by virtue of powers contained in the Food and Environment Protection Act 1985 and which have been replaced by the Community maximum residue levels now included in Part 2 of that Schedule (regulation 2(4)).

The Regulations also amend Schedule 3 to the Consolidated Regulations 1999 by introducing the new products 'papaya' and 'chilli peppers' to reflect the categories specified in Directives 2000/42/EC and 2000/24/EC respectively (regulation 2(6)).

A regulatory impact assessment has been prepared in respect of these Regulations. Copies of this assessment can be obtained from the Pesticides Safety Directorate of the Ministry of Agriculture, Fisheries and Food, Room 313, Mallard House, Kings Pool, 3 Peasholme Green, York YO1 7PX.
