UNITS:

Maximum residue levels (MRLs) are expressed in milligrammes of residue per kilogramme of food.

KEY:

[*] Level at or about the limit of determination.

FOOTNOTES:

(1) Paddy or rough rice, husked rice and semi-milled or wholly milled rice.

(2) Levels are measured on fat, except in the case of foods with a fat content of 10% or less by weight. In these cases the residue is related to the total weight of the boned foodstuff and the MRL is one tenth of the value given in the table, but must be no less than 0.01 mg/kg.

(3) These levels are for fresh raw cow's milk and fresh whole cream cow's milk expressed on the whole milk.

(4) For preserved, concentrated or sweetened cow's milk; for raw milk and whole cream milk of other animal origin; and for butter, cheese or curd.

Whether made from cow's milk or other milk or a combination, the following levels apply:

— if the fat content is less than 2% by weight, the MRL is taken as half that set for raw milk and whole cream milk;

— if the fat content is 2% or more by weight, the MRL is expressed in mg/kg of fat and is set at 25 times that set for raw milk and whole cream milk.

(5) Birds eggs in shell (other than eggs for hatching) and whole egg products and egg yolk products (whether fresh, dried or otherwise prepared).

(6) Scarole includes broad-leaf endive.

(13) Broccoli includes calabrese.

(46) The figure of 0.05 is the total MRL for Carbendazim and Thiophanate-methyl taken together and expressed as carbendazim.

## EXPLANATORY NOTE

*(This note is not part of the Regulations)*

These Regulations amend the Pesticides (Maximum Residue Levels in Crops, Food and Feeding Stuffs) (England and Wales) Regulations 2005 (S.I. 2005/3286).

The Regulations implement Commission Directives 2006/4/EC (OJ No. L23, 27.1.2006, p.69), 2006/9/EC (OJ No. L22, 26.1.2006, p.24) and 2006/30/EC (OJ No. L75, 14.3.2006, p.7).

Regulation 2, which comes into force on 27th July 2006, makes amendments which substitute certain new maximum residue levels in Schedule 2 to the Pesticides (Maximum Residue Levels in Crops, Food and Feeding Stuffs) (England and Wales) Regulations 2005 (S.I. 2005/3286) ("the Principal Regulations"). These are maximum residue levels for residues of the pesticides Carbofuran and Diquat.

Regulation 3, which comes into force on 15th September 2006, amends—

(a) Schedule 1, which identifies the substances residues of which are taken into account in the measuring of residue levels for each pesticide, by replacing the entry for the pesticide group Benomyl, Carbendazim and Thiophanate-methyl with two entries, one for Benomyl and Carbendazim, and a separate one for Thiophanate-methyl; and

(b) Schedule 2, by substituting new maximum residue levels for residues of those pesticides.

A Regulatory Impact Assessment (RIA) was prepared in respect of the Principal Regulations, which provides a basis for establishing the impact of amendments to the Principal Regulations of the kind made by these Regulations. A transposition note has been prepared in respect of these Regulations. Copies of the assessment and the transposition note can be obtained from the Pesticides Safety Directorate, Room 308, Mallard House, Kings Pool, 3 Peasholme Green, York Y01 7PX or via the website www.pesticides.gov.uk. Copies have been placed in the library of each House of Parliament.
