NOTES

1. The list of food commodities subject to the quality registration is arranged in a table with three main columns, in which:

* The first column specifies four-digit code numbers as commodity group headings which may be added with 2 or 4 more numerals (more concrete guides to commodity sub-heading), corresponding to commodities specified in the second column - commodity items announced by the General Department of Statistics with a view to creating harmony and convenience for commodity exchange and State management. In case of any terminological difference between the above-said commodity names and those defined in the Vietnamese Standard, the

quality registration using the Vietnamese Standard's terminology shall be encouraged.

* Prescribed in the third column is the basis for quality registration that includes the Vietnamese standards and the commodity quality regulations issued by the specialized management ministries, in which:

2. The quality norms subject to the compulsory registration, including:

- The Vietnamese standards that must be fully applied or the compulsory norms involved in the Vietnamese standards;

- The base standards that must not be lower than Vietnam's compulsory standards (the TCVN standards and the food safety and hygiene standards of the

Ministry of Health).

3. Other criteria that may be used by production establishments for reference purpose when they make quality registration, include:

- Quality clauses in commercial contracts signed by the import enterprises with foreign exporters;
- The international standards which shall become applicable in the absence of relevant regulations of Vietnam.

4. The Ministry of Health shall uniformly manage and issue quality registration certificates for tobacco products.
