¹⁸[APPENDIX A:

I.FOOD CATEGORY SYSTEM

The food category system is a tool for assigning food additive uses in these Regulations. The food category system applies to all foodstuffs. The food category descriptors are not to be legal product designations nor are they intended for labelling purposes. The food category system is based on the following principles:

- (a) The food category system is hierarchical, meaning that when an additive is recognised for use in a general category, it is recognised for use in all its sub-categories, unless otherwise stated. Similarly, when an additive is recognised for use in a sub-category, its use is recognised in any further subcategories or individual foodstuffs mentioned in a sub-category. The food category system is based on product descriptors of foodstuffs as marketed, unless otherwise stated.
- (b) The food category system takes into consideration the carry-over principle. By doing so, the food category system does not need to specifically mention compound foodstuffs (e.g. prepared meals, such as pizza, because they may contain, pro rata, all the additives endorsed for use in their components), unless the compound foodstuff needs an additive that is not endorsed for use in any of its components.

1.0Dairy products and analogues, excluding products of food category 2.0

- 1.1 Milk and dairy-based drinks
 - 1.1.1 Milk and buttermilk (plain)
 - 1.1.1.1 Milk (plain)
 - 1.1.1.2 Buttermilk (plain)
 - 1.1.2Dairy-based drinks, flavoured and/or fermented

- 1.2 Fermented and renneted milk products (plain), excluding food category (dairy-based drinks)
 - 1.2.1 Fermented milks (plain)
 - 1.2.1.1 Fermented milks (plain), not heat-treated after fermentation
 - 1.2.1.2 Fermented milks (plain), heat-treated after fermentation
 - 1.2.2 Renneted milk (plain)
- 1.3 Condensed milk and analogues (plain)
 - 1.3.1 Condensed milk (plain)
 - 1.3.2 Beverage whiteners
 - ⁵²[1.3.2.1 Non dairy based beverage whitener]
- 1.4 Cream (plain) and the like
 - 1.4.1 Pasteurized cream (plain)
 - 1.4.2 Sterilized and UHT creams, whipping and whipped creams, and reduced fat creams(plain)
 - 1.4.3 Clotted cream (plain)
 - 1.4.4 Cream analogues
- 1.5 Milk powder and cream powder and powder analogues (plain)
 - 1.5.1 Milk powder and cream powder (plain)

 52[1.5.1.1 Dairy based dairy whitener]
 - 1.5.2 Milk and cream powder analogues

- 1.6 Cheese and analogues
 - 1.6.1 Unripened cheese
 - 1.6.2 Ripened cheese
 - 1.6.2.1 Ripened cheese, includes rind
 - 1.6.2.2 Rind of ripened cheese
 - 1.6.2.3 Cheese powder
 - 1.6.3 Whey cheese
 - 1.6.4 Processed cheese
 - 1.6.4.1 Plain processed cheese
 - 1.6.4.2 Flavoured processed cheese, including containing fruit, vegetables, meat etc.
 - 1.6.5 Cheese analogues
 - 1.6.6 Whey protein cheese
- 1.7 Dairy-based desserts
- 1.8 Whey and whey products, excluding whey cheeses
 - 1.8.1 Liquid whey and whey products, excluding whey cheeses
 - 1.8.2 Dried whey and whey products, excluding whey cheeses.
- 2.0 Fats and oils, and fat emulsions
- 2.1 Fats and oils essentially free from water
 - 2.1.1 Butter oil, anhydrous milk fat, ghee

- 2.1.2 Vegetable oils and fats
- 2.1.3 Lard, tallow, fish oil, and other animal fats
- 2.2 Fat emulsions mainly of type water-in-oil
 - 2.2.1 Butter
 - 2.2.2 Fat spreads, dairy fat spreads and blended spreads
- 2.3 Fat emulsions mainly of type oil-in-water, including mixed and/or flavoured products based on fat emulsions
- 2.4 Fat-based desserts excluding dairy-based dessert products of food category 1.7
 - 2.4.1 Coco based spreads, including fillings
- 3.0Edible ices, including sherbet and sorbet
- 4.0Fruits and vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds
- 4.1 Fruit
 - 4 1 1 Fresh fruit
 - 4.1.1.1 Untreated fresh fruit
 - 4.1.1.2 Surface-treated fresh fruit
 - ⁵²[4.1.1.3 Peeled or cut, minimally processed fruit]
 - 4.1.2 Processed fruit
 - 4.1.2.1 Frozen fruit
 - 4.1.2.2 Dried fruit, nuts and seeds
 - 4.1.2.3 Fruit in vinegar, oil, or brine

- 4.1.2.4 Canned or bottled (pasteurized) fruit
- 4.1.2.5 Jams, jellies, marmalades, fruit bar/toffee and fruit cheese
- ⁵²[4.1.2.6 Fruit-based spreads (e.g. chutney) excluding products of food-category 4.1.2.5]
- 4.1.2.7 Candied fruit
- 4.1.2.8 Fruit preparations, including pulp, purees, fruit toppings and coconut milk
- 4.1.2.9 Fruit-based desserts, including fruit-flavoured water-based desserts
- 4.1.2.10 Fermented fruit products
- 4.1.2.11 Fruit fillings for pastries
- 4.1.2.12 Cooked fruit
- 4.2 Vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloevera), seaweeds, and nuts and seeds
- 4.2.1 Fresh vegetables, (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds and nuts and seeds
 - 4.2.1.1 Untreated fresh vegetables, (including mushrooms and fungi, roots and tubers, pulses and legumes including soybeans, and aloe vera), seaweeds and nuts and seeds
 - 4.2.1.2 Surface-treated fresh vegetables, (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds and nuts and seeds
 - ⁵²[4.2.1.3 Peeled, cut or shredded minimally processed vegetables [(including mushrooms and fungi, roots and tubers, fresh

pulses and legumes, and aloe vera) sea weeds, nuts and seeds]]

- 4.2.2 Processed vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds
 - 4.2.2.1 Frozen vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds and nuts and seeds
 - 4.2.2.2 Dried vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds
 - 4.2.2.3 Vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), and seaweeds in vinegar, oil, brine, or soybean sauce
 - 4.2.2.4 Canned or bottled (pasteurized) or retort pouch vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloevera), and seaweeds
 - 4.2.2.5 Vegetable (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweed, and nut and seed purees and spreads (e.g. peanut butter)
 - 4.2.2.6 Vegetable (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweed, and nut and seed pulps and preparations (e.g. vegetable desserts and sauces, candied vegetables) other than food category 4.2.2.5
 - 4.2.2.7 Fermented vegetable (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera) and seaweed products, excluding fermented soybean products of food categories 6.8.6, 06.8.7, 12.9.1, 12.9.2.1 and 12.9.2.3

4.2.2.8 Cooked or fried vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), and seaweeds

5.0 Confectionery

- 5.1 Cocoa products and chocolate products including imitations and chocolate substitutes
 - 5.1.1 Cocoa mixes (powders) and cocoa mass/cake
 - 5.1.2 Cocoa mixes (syrups)
 - 5.1.3 Cocoa and chocolate products
 - 5.1.4 Imitation chocolate, chocolate substitute products
- 5.2 Confectionery including hard and soft candy, nougats, etc. other than food categories 5.1,5.3, and 5.4
 - 5.2.1 Hard candy
 - 5.2.2 Soft candy
 - 5.2.3 Nougats and marzipans
- 5.3Chewing gum
- 5.4 Decorations (e.g. for fine bakery wares), toppings (non-fruit), and sweet sauces
- 6.0 Cereals and cereal products, derived from cereal grains, from roots and tubers, pulses, legumes and pith or soft core of palm tree, excluding bakery wares of food category 7.0
- 6.1 Whole, broken, or flaked grain, including rice
- 6.2 Flours and starches (including soybean powder)

- **6.2.1 Flours**
- 6.2.2 Starches
- 6.3 Breakfast cereals, including rolled oats
- 6.4 Pastas and noodles and like products
 - 6.4.1 Fresh pastas and noodles and like products
 - 6.4.2 Dried pastas and noodles and like products
 - 6.4.3 Pre-cooked pastas and noodles and like products
- 6.5 Cereal and starch based desserts
- 6.6 Batters
- 6.7 Pre-cooked or processed cereal/grain/legume products
- 6.8 Soybean products (excluding soybean-based seasonings and condiments of food category12.9)
 - 6.8.1 Soybean-based beverages
 - 6.8.2 Soybean-based beverage film
 - 6.8.3 Soybean curd (tofu)
 - 6.8.4 Semi-dehydrated soybean curd
 - 6.8.4.1 Thick gravy-stewed semi-dehydrated soybean curd
 - 6.8.4.2 Deep fried semi-dehydrated soybean curd
 - 6.8.4.3Semi-dehydrated soybean curd, other than food categories 6.8.4.1 and 6.8.4.2

- 6.8.5 Dehydrated soybean curd
- 6.8.6 Fermented soybeans
- 6.8.7 Fermented soybean curd
- 6.8.8 Other soybean protein products

7.0 Bakery wares

- 7.1 Bread and ordinary bakery wares and mixes
 - 7.1.1 Breads and rolls
 - 7.1.1.1 Yeast-leavened breads and specialty breads
 - 7.1.1.2 Soda breads
 - 7.1.2 Crackers
 - 7.1.3 Other ordinary bakery products
 - 7.1.4 Bread-type products, including bread stuffing and bread crumbs
 - 7.1.5 Steamed breads and buns
 - 7.1.6 Mixes for bread and ordinary bakery wares
- 7.2 Fine bakery wares (sweet, salty, savoury) and mixes
 - 7.2.1 Cakes, cookies and pies
 - 7.2.2 Other fine bakery products
 - 7.2.3 Mixes for fine bakery wares

8.0 Meat and meat products including poultry

- 8.1 Fresh meat and poultry,
 - 8.1.1 Fresh meat and poultry whole pieces or cuts
 - 8.1.2 Fresh meat and poultry comminuted
- 8.2 Processed meat and poultry products in whole pieces or cuts
 - 8.2.1 Non-heat treated processed meat and poultry products in whole pieces or cuts
 - 8.2.1.1 Cured (including salted) non-heat treated processed meat and poultry products in whole pieces or cuts
 - 8.2.1.2 Cured (including salted) and dried non-heat treated processed meat and poultry products in whole pieces or cuts
 - 8.2.1.3 Fermented non-heat treated processed meat and poultry products in whole pieces or cuts
 - 8.2.2 Heat-treated processed meat and poultry products in whole pieces or cuts
 - 1.2.3 ⁷⁷[Frozen raw, flavoured/marinated, processed meat and poultry products in whole pieces or cuts]
- 8.3 Processed comminuted meat and poultry products
 - 8.3.1 Non-heat treated processed comminuted meat and poultry products
 - 8.3.1.1 Cured (including salted) non-heat treated processed comminuted meat and poultry products
 - 8.3.1.2 Cured (including salted) and dried non-heat treated processed comminuted meat and poultry products

- 8.3.1.3 Fermented non-heat treated processed comminuted meat and poultry products
- 8.3.2 Heat-treated processed comminuted meat and poultry products
- 8.3.3 Frozen processed comminuted meat and poultry products
- 8.4 Edible casings

9.0 Fish and fish products, including molluscs, crustaceans, and echinoderms

- 9.1 Fresh fish and fish products, including molluscs, crustaceans, and echinoderms
 - 9.1.1 Fresh fish
 - 9.1.2 Fresh molluscs, crustaceans, and echinoderms
- 9.2 Processed fish and fish products, including molluscs, crustaceans, and echinoderms
 - 9.2.1 Frozen fish, fish fillets, and fish products, including molluscs, crustaceans, and echinoderms
 - 09.2.2 Frozen battered fish, fish fillets and fish products, including molluscs, crustaceans, and echinoderms
 - 9.2.3 Frozen minced and creamed fish products, including molluscs, crustaceans, and echinoderms
 - 9.2.4 Cooked and/or fried fish and fish products, including molluscs, crustaceans, and echinoderms
 - 9.2.4.1 Cooked fish and fish products
 - 9.2.4.2 Cooked molluscs, crustaceans, and echinoderms

- 9.2.4.3 Fried fish and fish products, including molluscs, crustaceans, and Echinoderms
- 9.2.5 Smoked, dried, fermented, and/or salted fish and fish products, including molluscs, crustaceans, and echinoderms
- 9.3 Semi-preserved fish and fish products, including molluscs, crustaceans, and echinoderms
 - 9.3.1 Fish and fish products, including molluscs, crustaceans, and echinoderms, marinated and/or in jelly
 - 9.3.2 Fish and fish products, including molluscs, crustaceans and echinoderms, pickled and/or in brine
 - 9.3.3 Salmon substitutes, caviar and other fish roe products
 - 9.3.4 Semi-preserved fish and fish products, including molluscs, crustaceans and echinoderms (e.g. fish paste), excluding products of food categories 9.3.1 9.3.3
- 9.4 Fully preserved, including canned or fermented fish and fish products, including molluscs, crustaceans, and echinoderms

10.0 Eggs and egg products

- 10.1 Fresh eggs
- 10.2 Egg products
 - 10.2.1 Liquid egg products
 - 10.2.2 Frozen egg products
 - 10.2.3 Dried and/or heat coagulated egg products

- 10.3 Preserved eggs, including alkaline, salted, and canned eggs
- 10.4 Egg-based desserts

11.0 Sweeteners, including honey

- 11.1 Refined and raw sugars
 - 11.1.1 White sugar, dextrose anhydrous, dextrose monohydrate, fructose
 - 11.1.2 Powdered sugar, powdered dextrose
 - 11.1.3 Soft white sugar, soft brown sugar, glucose syrup, dried glucose syrup, raw cane sugar
 - 11.1.3.1 Dried glucose syrup used to manufacture sugar confectionery
 - 11.1.3.2 Glucose syrup used to manufacture sugar confectionery
 - 11.1.4 Lactose
 - 11.1.5 Plantation or mill white sugar
 - ⁵²[11.1.6 Gur or Jaggery
 - 11.1.6.1 Cane Jaggery or Gur
 - 11.1.6.2 Palm Jaggery or Gur
 - 11.1.6.3 Date Jaggery or Gur
- 11.2 Brown sugar excluding products of food category 11.1.3
- 11.3 Sugar solutions and syrups, also (partially) inverted, including treacle and molasses, excluding products of food category 11.1.3
- 11.4 Other sugars and syrups 11.5 Honey
- 11.6 Table-top sweeteners, including those containing high-intensity sweeteners

12.0 Salts, spices, soups, sauces, salads and protein products

- 12.1 Salt and salt substitutes
 - 12.1.1 Salt
 - 12.1.2 Salt substitutes
- 12.2 Herbs, spices, seasonings, and condiments
- ⁵²[12.2.1 Herbs, spices, masalas, spice mixtures including oleoresins or extracts/derivatives thereof]
 - 12.2.2 Seasonings and condiments
- 12.3 Vinegars
- 12.4 Mustards
- 12.5 Soups and broths
 - 12.5.1 Ready-to-eat soups and broths, including canned, bottled, and frozen
 - 12.5.2 Mixes for soups and broths
- 12.6 Sauces and like products
 - 12.6.1 Emulsified sauces and dips
 - 12.6.2 Non-emulsified sauces
 - 12.6.3 Mixes for sauces and gravies
 - 12.6.4 Clear sauces
- 12.7 Salads and sandwich spreads excluding cocoa-and nut based spreads of food categories 4.2.2.5 and 5.1.3

- 12.8 Yeast and like products
- 12.9 Soybean-based seasonings and condiments
 - 12.9.1 Fermented soybean paste
 - 12.9.2 Soybean sauce
 - 12.9.2.1 Fermented soybean sauce
 - 12.9.2.2 Non-fermented soybean sauce
 - 12.9.2.3 Other soybean sauces
- 12.10 Protein products other than from soybeans

13.0 Foodstuffs intended for particular nutritional uses

- 13.1 Infant formulae, follow-on formulae, and formulae for special medical purposes for infants
 - 13.1.1 Infant formulae
 - 13.1.2 Follow-up formulae
 - 13.1.3 Formulae for special medical purposes for infants
- 13.2 Complementary foods for infants and young children
- 13.3 Dietetic foods intended for special medical purposes (excluding products of food category 13.1)
- 13.4 Dietetic formulae for slimming purposes and weight reduction
- 13.5 Dietetic foods (e.g. supplementary foods for dietary use) excluding products of food categories 13.1-13.4 and 13.6

13.6 Food supplements

14.0 Beverages, excluding dairy products

- 14.1 Non-alcoholic ("soft") beverages
 - 14.1.1 Waters
 - 14.1.1.1 Natural mineral waters and source waters
 - 14.1.1.2 Table waters and soda waters
 - 14.1.2 Fruit and vegetable juices
 - 14.1.2.1 Fruit juices
 - 14.1.2.2 Vegetable juices
 - 14.1.2.3 Concentrates of fruit juices
 - 14.1.2.4 Concentrates of vegetable juices
 - 14.1.3 Fruit and vegetable nectars
 - 14.1.3.1 Fruit nectar
 - 14.1.3.2 Vegetable nectar
 - 14.1.3.3 Concentrates of fruit nectar
 - 14.1.3.4 Concentrates of vegetable nectar
 - 14.1.4 Water-based flavoured drinks, including "sport," "energy," or "electrolyte" drinks and articulated drinks
 - 14.1.4.1 Carbonated water-based flavoured drinks

- 14.1.4.2 Non-carbonated water-based flavoured drinks, including punches and ades
- 14.1.4.3 Concentrates (liquid or solid) for water-based flavoured drinks
- 14.1.5 Coffee, coffee substitutes, tea, herbal infusions, and other hot cereal and grain beverages, excluding cocoa
- 14.2 Alcoholic beverages, including alcohol-free and low-alcoholic counterparts
 - 14.2.1 Beer and malt beverages
 - 14.2.2 Cider and Perry
 - 14.2.3 Grape wines
 - 14.2.3.1 Still grape wine
 - 14.2.3.2 Sparkling and semi-sparkling grape wines
 - 14.2.3.3 Fortified grape wine, grape liquor wine, and sweet grape wine
 - 14.2.4 Wines (other than grape)
 - 14.2.5 Mead
 - 14.2.6 Distilled spirituous beverages containing more than 15% alcohol
 - 14.2.7 Aromatized alcoholic beverages

15.0 Ready-to-eat savouries

15.1 Snacks - potato, cereal, flour or starch based (from roots and tubers, pulses and legumes)

| 15.2 Processed nuts, including coated nuts and nu | ıt mixtures | 15.3 Snacks | - fish based |

II. FOOD CATEGORY DESCRIPTIONS

The examples wherever given below are only indicative and not exhaustive.

1.0 Dairy products and analogues, excluding products of food category 2.0

Includes all types of dairy products that are derived from the milk of healthy milch animal(s) (e.g. cow, sheep, goat, and buffalo). In this category, a "plain" product is one that is not flavoured, nor contains fruit, vegetables or other non-dairy ingredients, nor is mixed with other non-dairy ingredients, unless permitted by relevant standards. Analogues are products in which milk fat has been partially or wholly replaced by vegetable fats or oils.

1.1 Milk and dairy-based drinks

Includes all plain and flavoured fluid milk products based on skim, part-skim, low-fat and whole milk.

1.1.1Milk and buttermilk (plain)

Includes plain fluid products only. Includes reconstituted plain milk that contains only dairy ingredients.

1.1.1.1 Milk (plain)

Fluid milk obtained from milking animals (e.g. cows, sheep, goats, and buffalo). Milk is usually heat-treated by pasteurization, ultra-high temperature (UHT) treatment or sterilization. Includes skim, part-skim, low-fat and whole milk.

1.1.1.2 Buttermilk (plain)

Buttermilk is the nearly milk fat-free fluid remaining from the butter-making process (i.e. the churning fermented or non-fermented milk and cream) and buttermilk is also produced by fermentation of fluid skim milk, either by spontaneous souring by the action of lactic acid-forming or aroma-forming bacteria, or by inoculation of heated milk with pure bacterial cultures (cultured buttermilk). Buttermilk may be pasteurized or sterilized.

⁵²[1.1.2 Dairy-based drinks, flavoured or fermented

Includes all ready-to-drink flavoured and aromatised milk-based fluid beverages and their mixes, excluding mixes for cocoa (cocoa-sugar mixtures, category 5.1.1) such as hot chocolate, chocolate malt drinks, strawberry-flavoured yoghurt drink, whey

based drinks, lactic acid bacteria drinks, and lassi (liquid obtained by whipping curd from the lactic acid fermentation of milk, and mixing with sugar or synthetic sweetener)]

1.2 Fermented and renneted milk products (plain), excluding food category 1.1.2 dairy-based drinks)

Includes all plain products based on skim, part-skim, low-fat and whole milk. Flavoured products are included in 1.1.2 (beverages) and 1.7 (desserts).

1.2.1 Fermented milks (plain)

Includes all plain products, including fluid fermented milk, acidified milk and cultured milk. Plain yoghurt, which does not contain flavours or colours, may be found in one of the sub-categories of 1.2.1 depending on whether it is heat-treated after fermentation or not.

1.2.1.1 Fermented milks (plain), not heat-treated after fermentation

Includes fluid and non-fluid plain products such as yoghurt.

1.2.1.2 Fermented milks (plain), heat-treated after fermentation

Products similar to that in 1.2.1.1 except those heat-treated (e.g. sterilized or pasteurized) after fermentation.

1.2.2 Renneted milk (plain)

Plain, coagulated milk produced by the action of milk coagulating enzymes which includes curdled milk. Flavoured - renneted milk products are found in category 1.7.

1.3 Condensed milk and analogues (plain)

Includes plain and sweetened types of condensed milk, evaporated milk, and their analogues (including beverage whiteners) and products based on skim, part-skim, low-fat and whole milk, blends of evaporated skimmed milk and vegetable fat, and blends of sweetened condensed skimmed milk and vegetable fat.

1.3.1 Condensed milk (plain)

Condensed milk is obtained by partial removal of water from milk to which sugar may have been added. For evaporated milk, the water removal may be accomplished by heating. Includes partially dehydrated milk, evaporated milk, sweetened condensed milk, and khoya (cow or buffalo milk concentrated by boiling).

1.3.2 Beverage whiteners

1.3.2.1 ⁵²[Omitted]

1.3.2.2 Non-Dairy based beverage whitener

Milk or cream substitute consisting of a vegetable fat-water emulsion in water with milk protein and lactose or vegetable proteins for use in beverages such as coffee and tea and includes the same type of products in powdered form. Includes condensed milk analogues, blends of evaporated skimmed milk and vegetable fat and blends of sweetened condensed skimmed milk and vegetable fat.

1.4 Cream (plain) and the like

Cream is a fluid dairy product, relatively high in fat content in comparison to milk. Includes all plain fluid, semi-fluid and semi-solid cream and cream analogue products. Flavoured cream products are found in 1.1.2 (beverages) and 1.7 (desserts).

1.4.1 Pasteurized cream (plain)

Cream subjected to pasteurization by appropriate heat treatment or made from pasteurized milk. Includes milk cream and "half-and-half."

1.4.2 Sterilized and UHT creams, whipping and whipped creams, and reduced fat creams (plain)

Includes every cream, regardless of fat content, which has undergone a higher heat-treatment than pasteurization, pasteurized creams with a reduced fat content, as well as every cream intended for whipping or being whipped. Sterilized cream is subjected to appropriate heat-treatment in the container in which it is presented to the consumer. Ultra-heat treated (UHT) or ultra-pasteurized cream is subjected to the appropriate heat treatment (UHT or ultra-pasteurization) in a continuous flow process and aseptically packaged. Cream may also be packaged under pressure (whipped cream). Includes whipping cream, heavy cream, whipped pasteurized cream, and whipped cream-type dairy toppings and fillings. Creams or toppings with partial or total replacement of milk fat by other fats are included in sub-category 1.4.4 (cream analogues).

1.4.3 Clotted cream (plain)

Thickened, viscous cream formed from the action of milk coagulating enzymes. Includes sour cream (cream subjected to lactic acid fermentation achieved as described for buttermilk (1.1.1.2).

1.4.4 Cream analogues

Cream substitute consisting of a vegetable fat-water emulsion in liquid or powdered form for use other than as a beverage whitener (1.3.2). Includes instant whipped cream toppings and sour cream substitutes.

1.5 Milk powder and cream powder and powder analogues (plain)

Includes plain milk powders, cream powders, or combination of the two, and their analogues. Includes products based on skim, part-skim, low-fat and whole milk.

1.5.1 Milk powder and cream powder (plain)

Milk products obtained by partial removal of water from milk or cream and produced in a powdered form. Includes casein and caseinates.

⁵²[1.5.1.1 Dairy based dairy whitener

Milk or cream constituting of milk protein and lactose]

1.5.2 Milk and cream powder analogues

Products based on a fat-water emulsion and dried for use other than as a beverage whitener (1.3.2). Examples include imitation dry cream mix and blends of skimmed milk and vegetable fat in powdered form.

1.6 Cheese and analogues

Cheese and cheese analogues are products that have water and fat included within a coagulated milk protein structure. Products such as cheese sauce (12.6.2), cheese-flavoured snacks (15.1), and composite prepared foods containing cheese as an ingredient (e.g. macaroni and cheese; 16.0) are categorized elsewhere.

1.6.1 Unripened cheese

Unripened cheese, including fresh cheese, is ready for consumption soon after manufacture. Such as cottage cheese (a soft, unripened, coagulated curd cheese), creamed cottage cheese (cottage cheese covered with a creaming mixture), cream cheese (rahmfrischkase, an uncured, soft spreadable cheese) mozzarella and scamorza cheeses and paneer (milk protein coagulated by the addition of citric acid

from lemon or lime juice or of lactic acid from whey, that is strained into a solid mass, and is used in vegetarian versions of, e.g. hamburgers). Includes the whole unripened cheese and unripened cheese rind (for those unripened cheeses with a "skin" such as mozzarella). Most products are plain, however, some such as cottage cheese and cream cheese, may be flavoured or contain ingredients such as fruit, vegetables or meat. Excludes ripened cream cheese, where cream is a qualifier for a high fat content.

1.6.2 Ripened cheese

Ripened cheese is not ready for consumption soon after manufacture, but is held under such time and temperature conditions so as to allow the necessary biochemical and physical changes that characterize the specific cheese. For mould-ripened cheese, the ripening is accomplished primarily by the development of characteristic mould growth throughout the interior and/or on the surface of the cheese. Ripened cheese may be soft (e.g. camembert), firm (e.g. edam, gouda), hard (e.g. cheddar), or extrahard and includes cheese in brine, which is a ripened semi-hard to soft cheese, white to yellowish in colour with a compact texture, and Without actual rind that has been preserved in brine until presented to the consumer.

1.6.2.1 Ripened cheese, includes rind

Refers to ripened (including mould-ripened) cheese, including rind, or any part thereof, such as cut, shredded, grated or sliced cheesesuch as blue cheese, brie, gouda, havarti, hard grating cheese, and Swiss cheese.

1.6.2.2 Rind of ripened cheese

Refers to the rind only of the cheese and the rind of the cheese is the exterior portion of the cheese mass that initially has the same composition as the interior portion of the cheese, but which may dry after brining and ripening.

1.6.2.3 Cheese powder

Dehydrated product prepared from a variety or processed cheese. Does not include grated or shredded cheese (1.6.2.1 for variety cheese; 1.6.4 for processed cheese). Product is intended either to be reconstituted with milk or water to prepare a sauce, or used as-is as an ingredient (e.g. with cooked macaroni, milk and butter to prepare a macaroni and cheese casserole). Includes spray-dried cheese.

1.6.3 Whey cheese

A solid or semi-solid product obtained by concentration of whey with or without the addition of milk, cream or other materials of milk origin and moulding of the concentrated product which includes the whole cheese and the rind of the cheese and it is different from whey protein cheese (1.6.6).

1.6.4 Processed cheese

Product with a very long shelf life obtained by melting and emulsifying cheese which includes products manufactured by heating and emulsifying mixtures of cheese, milk fat, milk protein, milk powder, and water indifferent amounts. Products may contain other added ingredients, such as aromas, seasonings and fruit, vegetables and/or meat. Product may be spreadable or cut into slices and pieces. The term "processed" does not mean cutting, grating, shredding, etc. of cheese. Cheeses treated by these mechanical processes are included under food category 1.6.2 (Ripened cheese).

1.6.4.1 Plain processed cheese

Processed cheese product that does not contain added flavours, seasonings, fruit, vegetables and/or meat. Examples include American cheese, Requeson etc.

1.6.4.2 Flavoured processed cheese, including containing fruit, vegetables, meat, etc.

Processed cheese product that contains added flavours, seasonings, fruit, vegetables and/or meat such asNeufchatel cheese spread with vegetables, pepper jack cheese, cheddar cheese spread with wine, and cheese balls (formed processed cheese coated in nuts, herbs or spices).

1.6.5 Cheese analogues

Products that look like cheese, but in which milk fat has been partly or completely replaced by other fats which includes imitation cheese, imitation cheese mixes, and imitation cheese powders.

1.6.6 Whey protein cheese

Product containing the protein extracted from the whey component of milk. These products are principally made by coagulation of whey proteins. Example: ricotta cheese. It is different from whey cheese (1.6.3).

1.7 Dairy-based desserts

Includes ready-to-eat flavoured dairy dessert products and dessert mixes, frozen dairy confections and novelties, and dairy-based fillings. Includes flavoured yoghurt (a milk product obtained by fermentation of milk and milk products to which flavours and ingredients (e.g. fruit, cocoa, coffee) have been added) that may or may not be heat-treated after fermentation. Other examples include ice cream (frozen dessert that may contain whole milk, skim milk products, cream or butter, sugar, vegetable oil, egg products, and fruit,cocoa, or coffee), ice milk (product similar to ice cream with reduced whole or skim milk content, or made with non-fat milk), jellied milk, frozen flavoured yoghurt, junket (sweet custard-like dessert made from flavoured milk set with rennet), dulce de leche (cooked milk with sugar and added ingredients such as coconut or chocolate), butterscotch pudding and chocolate mousse. Includes traditional milk-based sweets prepared from milk concentrated partially, from khoya (cow or buffalo milk concentrated by boiling), or chhena(cow or buffalo milk, heat coagulated aided by acids like citric acid, lactic acid, malic acid, etc), sugar or synthetic sweetener, and other ingredients (e.g. maida (refined wheat flour), flavours and colours (e.g. peda,burfee, milk cake, gulab jamun, rasgulla, rasmalai, basundi). These products are different from those in food category 3.0 (edible ices, including sherbet and sorbet) in that the foods in category 1.7 are dairybased, while those in 3.0 are water-based and contain no dairy ingredients.

1.8 Whey and whey products, excluding whey cheeses

Includes a variety of whey-based products in liquid and powdered forms.

1.8.1 Liquid whey and whey products, excluding whey cheeses

Whey is the fluid separated from the curd after coagulation of milk, cream, skimmed milk or buttermilk with milk coagulating enzymes during the manufacture of cheese, casein or similar products. Acid whey is obtained after the coagulation of milk, cream, skimmed milk or buttermilk, mainly with acids of the type used for the manufacture of fresh cheese.

1.8.2 Dried whey and whey products, excluding whey cheeses

Whey powders are prepared by spray- or roller-drying whey or acid whey from which the major portion of the milk fat has been removed.

2.0 Fats and oils, and fat emulsions

Includes all fat-based products that are derived from vegetable, animal or marine sources, or their mixtures.

2.1 Fats and oils essentially free from water

Edible fats and oils are foods composed mainly of triglycerides of fatty acids from vegetable, animal or marine sources.

2.1.1 Butter oil, anhydrous milk fat, ghee

The milk fat products anhydrous milk fat, anhydrous butter oil and butter oil are products derived exclusively from milk and/or products obtained from milk by a process that almost completely removes water and non-fat solids. Ghee is a product obtained exclusively from milk, cream or butter by a process that almost completely removes water and non-fat solids; it has a specially developed flavour and physical structure.

2.1.2 Vegetable oils and fats

Edible fats and oils obtained from edible plant sources. Products may be from a single plant source or marketed and used as blended oils that are generally designated as edible, cooking, frying, table or salad oils. Virgin oils are obtained by mechanical means (e.g. pressing or expelling), with application of heat only so as not to alter the natural composition of the oil. Virgin oils are suitable for consumption in the natural state. Cold pressed oils are obtained by mechanical means without application of heat. Examples include virgin olive oil, cottonseed oil, peanut oil, and vanaspati.

2.1.3 Lard, tallow, fish oil, and other animal fats

All animal fats and oils should be derived from animals in good health at the time of slaughter and intended for human consumption.

2.2 Fat emulsions mainly of type water-in-oil

Include all emulsified products excluding fat-based counterparts of dairy products and dairy desserts.

2.2.1 Butter

Butter is a fatty product consisting of a primarily water-in-oil emulsion derived exclusively from milk or products obtained from milk or both.

2.2.2 Fat spreads, dairy fat spreads and blended spreads

Includes fat spreads (emulsions principally of the type water and edible fats and oils), dairy fat spreads (emulsions principally of the type water-in-milk fat), and blended

spreads (fat spreads blended with higher amounts of milk fat)such as margarine (a spreadable or fluid water-in-oil emulsion produced mainly from edible fats and oils); products derived from butter (e.g. "butterine," a spreadable butter blend with vegetable oils), blends of butter and margarine; and minarine (a spreadable water-in-oil emulsion produced principally from water and edible fats and oils that are not solely derived from milk). Also includes reduced fat-based products derived from milk fat or from animal or vegetable fats, including reduced-fat counterparts of butter, margarine, and their mixtures.

2.3 Fat emulsions mainly of type oil-in-water, including mixed and/or flavoured products based on fat emulsions

Includes fat-based counterparts of dairy-based foods excluding dessert products. The fat portion of these products are derived from sources other than milk fat (e.g. vegetable fats and oils) such as imitation milk (a fat-substituted milk produced from non-fat milk solids by addition of vegetable fats (coconut, safflower or corn oil)); non-dairy whipped cream; non-dairy toppings; and vegetable cream. Mayonnaise is included in food category 12.6.1.

2.4 Fat-based desserts excluding dairy-based dessert products of food category 1.7

Includes fat-based counterparts of dairy-based desserts, which are found in category 1.7. Includes ready-to-eat products and their mixes, cocoa based spreads including fillings. Also includes non-dairy fillings for desserts. Examples include ice creamlike products made with vegetable fats

3.0 Edible ices, including sherbet and sorbet

This category includes water-based frozen desserts, confections and novelties, such as fruit sorbet, and flavoured ice. Frozen desserts containing primarily dairy ingredients are included in food category 1.7.

4.0 Fruits and vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds

This major category is divided into two categories: 4.1(Fruit) and 4.2 (Vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds). Each of these categories is further divided into sub-categories for fresh and processed products.

4.1 Fruits

Includes all fresh (4.1.1) and processed (4.1.2) products.

4.1.1 Fresh fruits

Fresh fruit is generally free of additives.

4.1.1.1 Untreated fresh fruits

Raw fruit presented fresh from harvest.

4.1.1.2 Surface-treated fresh fruits

The surfaces of certain fresh fruit are coated with glazes or waxes or are treated with other food additives that act as protective coatings and/or help to preserve the freshness and quality of the fruit such as apples, oranges, dates, and longans.

⁵²[4.1.1.3 Peeled or cut, minimally processed fruit]

Fresh fruit that is cut or peeled and presented to the consumer, e.g. in a fruit salad and includes fresh shredded or flaked coconut.

4.1.2 Processed fruits

Includes all forms of processing other than peeling, cutting and surface treating fresh fruits.

4.1.2.1 Frozen fruits

Fruits that may or may not be blanched prior to freezing. The product may be frozen in a juice or sugar syrup. Such as frozen fruit salad and frozen strawberries.

4.1.2.2 Dried fruits, nuts and seeds

Fruit from which water is removed to prevent microbial growth which includes dried fruit leathers (fruit rolls) prepared by drying fruit purees. Such as cashew nut, almond, raisins, dried apple slices, figs, copra (dried coconut whole or cut), dried shredded or flaked coconut, prunes, dehydrated fruits etc.

4.1.2.3 Fruits in vinegar, oil, or brine

Includes pickled products such as mango pickles, lime pickles, pickled gooseberries, plums and pickled watermelon rind. Oriental pickled ("cured" or "preserved") fruit products are sometimes referred to as "candied" fruits. These are not the candied fruit products of category 4.1.2.7 (i.e. dried, sugar coated fruits).

4.1.2.4 Canned or bottled (pasteurized) fruits

Fully preserved product in which fresh fruit is cleaned and placed in cans or jars with natural juice or sugar syrup (including artificially sweetened syrup) and heat-sterilized or pasteurized. Includes products processed in retort pouches such as canned fruit salad, and applesauce in jars.

4.1.2.5 Jams, jellies, marmalades

Jams, preserves and conserves are thick, spreadable products prepared by boiling whole fruit or pieces of fruit, fruit pulp or puree, with or without fruit juice or concentrated fruit juice, and sugar to thicken, and to which pectin and fruit pieces may be added. Jelly is a clear spreadable product prepared similarly to jam, except that it is has a smoother consistency and does not contain fruit pieces. Marmalade is a thick spreadable fruit slurry prepared from whole fruit, fruit pulp or puree (usually citrus), and boiled with sugar to thicken, to which pectin and fruit pieces and fruit peel pieces may be added. Includes dietetic counterparts made with non-nutritive high-intensity sweeteners. Examples include orange marmalade, grape jelly, and strawberry jam.

4.1.2.6 Fruit-based spreads (e.g. chutney) excluding products of food category 4.1.2.5

Includes fruit based spreads, condiment-type fruit products such as mango chutney, raisinchutney, fruit and vegetables chutneys and their mixes (dry or paste form).

4.1.2.7 Candied fruits

Includes glazed fruits (fruits treated with a sugar solution and dried), candied fruits (dried glazed fruit immersed in a sugar solution and dried so that the fruit is covered by a candy-like sugar shell), and crystallized fruit is prepared (dried glazed fruit rolled in icing or granulated sugar and dried).

4.1.2.8 Fruit preparations, including pulp, purees, fruit toppings and coconut milk

Fruit pulp is not usually intended for direct consumption. It is slurry of lightly steamed and strained fresh fruit, with or without added preservatives. Fruit puree (e.g. mango puree, prune puree) is produced in the same way, but has a smoother, finer texture, and may be used as fillings for pastries, but is not limited to this use. Fruit sauce (e.g. pineapple sauce or strawberry sauce) is made from boiled fruit pulp

with or without added sweeteners and may contain fruit pieces. Fruit sauce may be used as toppings for fine bakery wares and ice cream sundaes. Fruit syrup (e.g. blueberry syrup) is a more liquid form of fruit sauce that may be used as a topping e.g. for pancakes. Non-fruit toppings are included in category 5.4 (sugar- and chocolate-based toppings) and sugar syrups (e.g. maple syrup) are included in category 11.4. Coconut milk and coconut cream are products prepared using a significant amount of separated, whole, disintegrated, macerated or comminuted fresh endosperm (kernel) of coconut palm and expelled, where most filterable fibers and residues are excluded, with or without coconut water, and/or with additional water. Coconut milk and coconut cream are treated by heat pasteurization, sterilization or ultrahigh temperature (UHT) processes. Coconut milk and coconut cream may also be produced in concentrated or skim (or "light") forms. Examples of traditional foods in this sub-category are tamarind concentrate (clean extract of tamarind fruit with not less than 65% total soluble solids), tamarind powder (tamarind paste mixed with tapioca starch), tamarind toffee (mixture of tamarind pulp, sugar, milk solids, antioxidants, flavours, stabilizers and preservatives), and fruit bars (a mixture of fruit (mango, pineapple, or guava) pulp mixed with sugar, flavours and preservatives, dried into a sheet).

4.1.2.9 Fruit-based desserts, including fruit-flavoured water-based desserts

Includes ready-to-eat products and mixes. Includes rote gruze, frutgrod, fruit compote, nata de coco, and *mitsumame* (desserts of agar jelly, fruit pieces and syrup) etc. This category does not include fine bakery wares containing fruit (categories 7.2.1 and 7.2.2), fruit-flavoured edible ices (category 3.0), or fruit-containing frozen dairy desserts (category 1.7).

4.1.2.10 Fermented fruit products

Type of pickled product produced by preservation in salt by lactic acid fermentation. Examples include fermented plums, amla/mango pickles etc.

4.1.2.11 Fruit fillings for pastries

Includes ready-to-eat products and mixes and all type of fillings excluding purees (category4.1.2.8). These fillings usually include whole fruit or fruit pieces such as cherry pie filling and raisin filling for oatmeal cookies.

4.1.2.12 Cooked fruits

Fruit that is steamed, boiled, baked, or fried, with or without a coating, for presentation to the consumer such as baked apples, fried apple rings, and peach dumplings (baked peaches with a sweet dough covering).

4.2 Vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds

Includes all fresh (4.2.1) and processed (4.2.2) products.

4.2.1 Fresh vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds

Fresh vegetables are generally free of additives.

4.2.1.1 Untreated fresh vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes (including soybeans), and aloe vera), seaweeds, and nuts and seeds

Raw vegetables presented fresh from harvest.

4.2.1.2 Surface-treated fresh vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds

The surfaces of certain fresh vegetables are coated with glazes or waxes or are treated with other food additives that act as protective coatings and/or help to preserve the freshness and quality of the vegetable such as avocados, cucumbers, green peppers and pistachio nuts.

⁵²[4.2.1.3 Peeled, cut or shredded minimally processed vegetables [(including mushrooms and fungi, roots and tubers, fresh pulses and legumes, and aloevera) sea weeds, nuts and seeds]

Fresh vegetables, e.g. peeled raw potatoes that are presented to the consumer to be cooked at home (e.g.in the preparation of hash brown potatoes).

4.2.2 Processed vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds

Includes all forms of processing other than peeling, cutting and surface treating of fresh vegetables.

4.2.2.1 Frozen vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds

Fresh vegetables are usually blanched and frozen. Examples include quick-frozen corn, quick-frozen French-fried potatoes, quick frozen peas, and quick frozen whole processed tomatoes.

4.2.2.2 Dried vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds

Products in which the natural water content has been reduced below that critical for growth of microorganisms without affecting the important nutrients. The product may or may not be intended for rehydration prior to consumption. Includes vegetable powders that are obtained from drying the juice, such as tomato powder and beet powder etc such as dried potato flakes, dehydrated carrots or peas or cabbage or mushroom or spinach leaf or lentil etc.

4.2.2.3 Vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera) and seaweeds in vinegar, oil, brine, or soybean sauce

Products prepared by treating raw vegetables with salt solution excluding fermented soybean products. Fermented vegetables, which are a type of pickled product, are classified in 4.2.2.7. Fermented soybean products are classified in 6.8.6, 6.8.7, 12.9.1, 12.9.2.1 and 12.9.2.3 such as pickled cabbage, pickled cucumber, olives, pickled onions, mushrooms in oil, marinated artichoke hearts, acharetc. Other examples include pickled ginger, pickled garlic, and chilli pickles etc.

4.2.2.4 Canned or bottled (pasteurized) or retort pouch vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), and seaweeds

⁷⁷[Fully preserved product in which fresh vegetables are cleaned, blanched, and placed in cans or jars in liquid (e.g. brine, water, oil or sauce), and heat-sterilized or pasteurized such as canned peas, canned baby corn, asparagus packed in glass jars, canned and/or cooked/baked beans, canned tomato paste/ puree and canned tomatoes (pieces, wedges or whole), canned mushrooms, canned chestnuts etc.]

4.2.2.5 Vegetable (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweed, and nut and seed purees and spreads (e.g. peanut butter)

Vegetable purees are finely dispersed slurries prepared from the concentration of vegetables, which may have been previously heat-treated (e.g. steamed). The slurries may be filtered prior to packaging. Purees contain lower amounts of solids than pastes (found in category 4.2.2.6). Examples include tomato puree, peanut butter (a spreadable paste made from roasted and ground peanuts by the addition of peanut oil) and other nut butters (e.g. cashew butter) etc.

4.2.2.6 Vegetable (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweed, and nut and seed pulps and preparations (e.g. vegetable desserts and sauces, candied vegetables) other than food category 4.2.2.5

Vegetable pastes and pulps are prepared as described for vegetable purees (category 4.2.2.5). However, pastes and pulps have a higher amount of solids, and are usually used as components of other foods (e.g. sauces) such as potato pulp, horseradish pulp, aloe extract, salsa (e.g. chopped tomato, onion, peppers, spices and herbs), sweet red bean paste (*an*), sweet coffee bean paste (filling), tomato paste, tomato pulp, tomato sauce, crystallized ginger, and bean-based vegetable dessert, sweets (vegetable based):- carrot halwa (gajar halwa/ gajrela), lauki halwa, coconut based sweets like coconut burfee, kaju based sweets etc.

4.2.2.7 Fermented vegetable (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera) and seaweed products, excluding fermented soybean products of food category 6.8.6, 6.8.7, 12.9.1, 12.9.2.1 and 12.9.2.3

Fermented vegetables are a type of pickled product, formed by the action of lactic acid bacteria, usually in the presence of salt. Traditional Oriental fermented vegetable products are prepared by air-drying vegetables and exposing them to ambient temperatures so as to allow the microorganisms to flourish; the vegetables are then sealed in an anaerobic environment and salt (to generate lactic acid), spices and seasonings are added such as achar, pickled cabbage or carrot or cauliflower, pickled cucumber, olives, pickled onions, mushrooms in oil, marinated artichoke hearts, piccalilli, lemon pickles, soybean sauce-pickled vegetables , vinegar-pickled vegetables, brine-pickled vegetables, pickled ginger, pickled garlic, and chilli pickles, red pepper paste, fermented vegetable products, kimchi and sauerkraut (fermented cabbage) etc. Excludes fermented soybean products that are found in food categories 6.8.6 (fermented soybeans (e.g. natto and tempe), 6.8.7 (fermented soybean curd), 12.9.1(fermented soybean paste e.g. miso), 12.9.2.1 (fermented soybean sauce), and 12.9.2.3 (other soybean sauce) etc.

4.2.2.8 Cooked or fried vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera) and seaweeds

Vegetables those are steamed, boiled, baked, or fried, with or without a coating, for presentation to the consumer such as simmered beans, pre-fried potatoes, fried okra, and ready-to-eat curries like paneer_makhani, kadhaipaneer, palakpaneer, baigan-kabharta, alootamatar, mixed vegetable, dal makhani, frozen curried vegetables /ready-to-eat vegetables; vegetable gravies, vegetables boiled down in soy sauceetc.

5.0 Confectionery

Includes all cocoa and chocolate products (5.1), other confectionery products that may or may not contain cocoa (5.2), chewing gum (5.3), and decorations and icings (5.4), or foods produced solely with any combination of foods conforming to these sub-categories.

5.1 Cocoa products and chocolate products including imitations and chocolate substitutes

This category is divided to reflect the variety of standardized and non-standardized cocoa- and chocolatebased products.

5.1.1 Cocoa mixes (powders) and cocoa mass/cake

Includes a variety of products that are used in the manufacture of other chocolate products or in the preparation of cocoa-based beverages. Most cocoa products have their origin in the cocoa nib, which is obtained from cocoa beans that have been cleaned and freed from the shells. Cocoa mass is obtained from the mechanical disintegration of the nib. Depending on the desired finished chocolate product, the cocoa nib or mass may be treated by an alkalinization process that mellows the flavour. Cocoa dust is the fraction of the cocoa bean produced as a product during winnowing and degerming. Cocoa powder is produced by reducing the fat content of cocoa mass or liquor by pressing (including expeller pressing) and molding into cocoa press cake. The cocoa press cake is disintegrated and ground to cocoa powder. Cocoa liquor is ahomogeneous flowing paste produced from cocoa nib, which has been roasted, dried, disintegrated and milled. Cocoa-sugar mixtures contain only cocoa powder and sugar. Chocolate powder for beverages is made from cocoa liquor or cocoa powder and sugar etc. Examples include drinking chocolate powder; breakfast cocoa; cocoa dust (fines), nibs, mass, press cake; chocolate liquor; cocoa mixes (powders for preparing the hot beverage); cocoa-sugar mixture; and dry mixes

for sugar-cocoa confectionery. Finished cocoa beverages and chocolate milk are included in category 1.1.2, and most finished chocolate products are included in category 5.1.4.

5.1.2 Cocoa mixes (syrups)

Products that may be produced by adding a bacterial amylase to cocoa liquor. The enzyme prevents the syrup from thickening or setting by solubilizing and dextrinizing cocoa starch. Includes products such as chocolate syrup used to prepare chocolate milk or hot chocolate. Chocolate syrup differs from fudge sauce (e.g. for ice cream sundaes), which is found in category 5.4.

5.1.3 Cocoa and chocolate products

Chocolate is produced from cocoa nibs, mass, press cake, powder, or liquor with or without addition of sugar, cocoa butter, aroma or flavouring substances, and optional ingredients (e.g. nuts). This category is for chocolate as defined in these regulations, and for confectionery that uses chocolate that meets the standard and may contain other ingredients, for example chocolate-covered nuts and fruit (e.g. raisins). This category includes only the chocolate portion of any confectionery within the scope of food category 5.2. Examples include cocoabutter confectionery (composed of cocoa butter, milk solids and sugar), white chocolate, chocolate chips, milk chocolate, cream chocolate, sweet chocolate, bitter chocolate, enrobing chocolate, chocolate covered in a sugar-based "shell" or with coloured decorations, filled chocolate (chocolate with a texturally distinctcentre and external coating, excluding flour confectionery and pastry products of categories 7.2.1and 7.2.2) and chocolate with added edible ingredients. This category does not include yoghurt-, cereal-, and honey-covered nuts (category 15.2).

⁵²[5.1.4 Imitation chocolate, chocolate substitute products]

Includes chocolate-like products that may or may not be cocoa-based, but have similar organoleptic properties as chocolate, such as carob chips, and cocoa-based products that contain greater than 5% vegetable fat (other than cocoa butter) that are excluded from the scope of the *Standard for Chocolate*. These chocolate-like products may contain additional optional ingredients and may include filled confectionery. This category includes only the chocolate-like portion of any confectionery within the scope of food category 5.2.

5.2 Confectionery including hard and soft candy, nougats, etc. other than food categories 5.1, 5.3, and 5.4

Includes all types of products that primarily contain sugar and their dietetic counterparts, and may or may not contain cocoa. Includes hard candy (5.2.1), soft candy (5.2.2), and nougats and marzipans (5.2.3).

⁵²[5.2.1 Hard candy

Products made from water and sugar (simple syrup), colour and flavour that may or may not have a filling, their dietetic counterparts, and products that may or may not contain cocoa. Includes: pastilles and lozenges (rolled, shaped and filled sweetened candy). These types of products may be used as fillings for chocolate products within the scope of food categories 5.1.3 and 5.1.4.

5.2.2 Soft candy

Products include soft, chewy products such as caramels (containing sugar syrup, fats, colour and flavour) and their dietetic counterparts; products that may or may not contain cocoa and milk (e.g. toffees and chocolate-flavoured caramels); jelly-based candies (e.g. jelly beans, jellied fruit paste covered in sugar, made from pectin, colour and flavour); and licorice. Also included are halwa, and oriental specialties, such as sweet bean jelly etc. These types of products may be used as fillings for chocolate products within the scope of food categories 5.1.3 and 5.1.4.

5.2.3 Nougats and Marzipans

Nougats consist of roasted ground nuts, sugar and cocoa and their dietetic counterparts, that may be consumed as is, or may be used as a filling for chocolate products within the scope of food categories 5.1.3 and 5.1.4. Marzipan consists of almond paste and sugar and their dietetic counterparts that may be shaped and coloured for direct consumption, or may be used as a filling for chocolate products within the scope of food categories 5.1.3 and 5.1.4.]

5.3 Chewing gum

Product made from natural or synthetic gum base containing flavours, sweeteners (nutritive or non-nutritive), aroma compounds, and other additives. Includes bubble gum and breath-freshener gum products.

5.4 Decorations, toppings (non-fruit) and sweet sauces

Includes ready-to-eat icings and frostings for cakes, cookies, pies and bread and flour confectionery, as well as mixes for these products. Also includes sugar- and chocolate-based coatings for baked goods. Sweet sauces and toppings include butterscotch sauce for use, e.g. on ice cream. These sweet sauces are different than the syrups (e.g. maple, caramel, and flavoured syrups for fine bakery wares and ices) included in category 11.4. Fruit-based toppings are included in 4.1.2.8. Chocolate sauce is included in 5.1.2.

6.0 Cereals and cereal products derived from cereal grains, roots and tubers, pulses, legumes and pith or soft core of palm tree, excluding bakery wares of food category 7.0

Includes unprocessed (6.1) and various processed forms of cereal and cereal-based products.

6.1 Whole, broken, or flaked grain, including rice

Includes whole, husked, unprocessed cereals and grains. Examples include rice (including enriched, instant and parboiled), wheat, corn (maize), sorghum, barley, oats, millets, dried peas or legumes etc.

6.2 Flours and starches (including soybean powder)

The basic milled products of cereal grains, roots, tubers, pulses, pith or softy core of palm tree or legumes sold as such or used as ingredients (e.g. in baked goods).

6.2.1 Flour

Flour is produced from the milling of grain, cereals and tubers (e.g. cassava) and seeds, pith or soft core of palm tree. Includes flour pastes for bread and flour confectionery, flour for bread, pastries, noodles and pasta, and flour mixes (physical mixtures of flours from different cereal or grain sources, which are different from mixes for bakery goods (dry mixes containing flour and other ingredients, categories 7.1.6 (mixes for ordinary bakery wares) and 7.2.3 (mixes for fine bakery wares) such as Atta, besan, suji, durum wheat flour, self-rising flour, enriched flour, instantized flour, corn flour, corn meal, kuttu-ka-atta, singhade-ka-atta, roasted soybean flour, konjac flour, and maida (refined wheat flour) and sago flour.

6.2.2 Starches

Starch is a glucose polymer occurring in granular form in certain plant species, notably seeds (e.g. cereals, pulses, corn, wheat, rice, beans, peas) and tubers (e.g.

tapioca, potato). The polymer consists of linkedanhydro-alpha-D-glucose units. Native starch is separated by processes that are specific for each raw material.

6.3 Breakfast cereals, including rolled oats

Includes all ready-to-eat, instant, and regular hot breakfast cereal products. Examples include granola-type breakfast cereals, instant oatmeal, corn flakes, puffed wheat or rice or other cereals (puffed, pounded, popped) like poha, kheel, popcorn, multi-grain (e.g. rice, wheat and corn) breakfast cereals, breakfast cereals made from soy or bran, and extruded-type breakfast cereals made from grain flour or powder etc.

6.4 Pastas and noodles and like products

Includes all pasta, noodles and similar products e.g. rice paper, rice vermicelli, soybean pastas and noodles.

6.4.1 Fresh pastas and noodles and like products

Products that are untreated (i.e. not heated, boiled, steamed, cooked, pre-gelatinized or frozen) and are no dehydrated. These products are intended to be consumed soon after preparation. Examples include unboiled noodles, and "skins" or crusts for spring rolls, wontons, and *shuo mai*.

6.4.2 Dried pastas and noodles and like products

Products that are untreated (i.e. not heated, boiled, steamed, cooked, pre-gelatinized or frozen) and are dehydrated. Examples include dried forms of: spaghetti, bean vermicelli, rice vermicelli, macaroni, and rice noodles.

6.4.3 Pre-cooked pastas and noodles and like products

Products that are treated (i.e. heated, boiled, steamed, cooked, pre-gelatinized or frozen). These products may be sold directly to the consumer (e.g. pre-cooked, chilled gnocchi to be heated prior to consumption), or may be the starch component of prepared meals (e.g. heat-and-serve frozen dinner entrees containing spaghetti, macaroni or noodles; canned spaghetti and meatballs entrée). Also includes instant noodles, e.g. pre-cooked ramen, udon, rice noodles, that are pre-gelatinized, heated and dried prior to sale to the consumer.

6.5 Cereal and starch based desserts

Dessert products containing cereal, starch or grain as the main ingredient. Also includes cereal- or starch based fillings for desserts such as rice pudding, semolina pudding, tapioca pudding, gujiya, balusahi, soan-papdi, patisa, malpua, and starchy pudding based desserts, cereal based desserts, suji or moong dal halwa, jalebi, boondiladdoo, motichoorladdoo, mysorepak, emarti, modak,rice flourdumplings, steamed yeast-fermented wheat flour dough desserts, starchy pudding based dessertsetc.

6.6 Batters

Products containing flaked or ground cereal or grain that when combined with other ingredients (e.g. water, milk, egg, fats, milk solids, spices, seasonings etc.) may be used as a coating for fish or poultry and includes products sold as dry mix of cereal or grain component. Examples include idli or vada or dosa batters, upma, idli or vada or dosa mixes, pongal mix, sattu, etc., batters for breading or batters for fish or poultry etc. Doughs (e.g. for bread) are found in 7.1.4, and other mixes (e.g. for bread or cakes) are found in 7.1.6 and 7.2.3, respectively.

6.7 Pre-cooked or processed cereal/grain/legume products

Fermented or non-fermented products prepared from cereals and/or pulse. Including processed cereals, cereal or malt-based food or beverage and/or pulse and enriched cereals and/or pulse products, such as poha, upma, idli, vada, dhokla, khandvi, papad etc. Products prepared from rice that is soaked, drained, steamed, kneaded and shaped into cake forms. Crisp snacks made from rice grains, also called "rice cakes" are categorized in 15.1, and dessert-type rice cakes are in 6.5. Category 6.7 would also include processed rice and enriched rice products, such as pre-cooked products that are sold canned, chilled or frozen; and processed rice products sold in retort pouches. This is to distinguish from category 6.1 (Whole, broken, or flaked grain, including rice) that is intended to include only whole, husked, unprocessed cereals and grains.

6.8 Soybean products (excluding soybean-based seasonings, and condiments of food category 12.9)

Includes dried, cooked, fried or fermented soybean products, and soybean curd products.

6.8.1 Soybean-based beverages

Products prepared from dried soybeans that are soaked in water, pureed, boiled and strained, or prepared fromsoybean flour, soybean concentrate, or soybean isolate. Also includes soybean products, such as soybean-based beverage powder.

6.8.2 Soybean-based beverage film

Film formed on the surface of boiling soybean-based beverage that is dried. It may be deep-fried or softened in water prior to use in soups or poached food.

6.8.3 Soybean curd (tofu)

Soybean curd is prepared from dried soybeans that are soaked in water, pureed, and strained to produce soybean-based beverages, which is then made into a curd with a coagulant, and placed in a mould. Soybean curds may be of a variety of textures (e.g. soft, semi-firm, firm).

6.8.4 Semi-dehydrated soybean curd

Soybean curd that has been pressed while being moulded into blocks so that some moisture has been removed, but so that it is not completely dried (see food category 6.8.5). Semi-dehydrated soybean curd typically contains 62% water, and has a chewy texture.

6.8.4.1 Thick gravy-stewed semi-dehydrated soybean curd

Partially dehydrated soybean curd that is cooked (stewed) with a thick sauce (e.g. miso sauce). The partially dehydrated soybean curd typically absorbs the sauce, and so regains its original texture.

6.8.4.2 Deep fried semi-dehydrated soybean curd

Partially dehydrated soybean curd that is deep-fried. It may be consumed as such, or cooked (e.g. stewed in sauce) after frying.

6.8.4.3 Semi-dehydrated soybean curd, other than food categories 6.8.4.1 and 6.8.4.2

Partially dehydrated soybean curd prepared other than by stewing in thick (e.g. miso) sauce or by deepfrying. Includes grilled products and mashed products that may be combined with other ingredients (e.g. to make a patty or a loaf).

6.8.5 Dehydrated soybean curd

Soybean curd from which all moisture has been removed through the process of freezing, aging, and dehydrating. It may be reconstituted with water or sauce for consumption, or is used directly in prepared dishes. It may also be deep-fried or simmered in sauce.

6.8.6 Fermented soybeans

The product is prepared from soybeans that have been steamed and fermented with certain fungi or bacteria (starter). The soft, whole beans have a distinctive aroma and taste. It includes products such as Kinema (Darjeeling hills and Sikkim), Turangbai (Meghalaya), Bekang (Mizoram), Peruyyan (Arunachal Pradesh), Hawaijar (Manipur), and Aakhuni (Nagaland) and other like Natto, and Tempe etc.

6.8.7 Fermented soybean curd

The product is prepared by forming soybean curd into a loaf during the fermentation process. It is a soft, flavoured product, either in red, rice-yellow, or grey-green.

6.8.8 Other soybean protein products

Other products from soybeans composed mainly of soybean protein such as extruded, textured, concentrated, and isolated soybean protein.

7.0 Bakery wares

Includes categories for bread and ordinary bakery wares (7.1) and for sweet, salty and savoury fine bakery wares (7.2).

7.1 Bread and ordinary bakery wares and mixes

Includes all types of non-sweet bakery products and bread-derived products.

7.1.1 Breads and rolls

Includes yeast-leavened and specialty breads like white or brown ormultigrain breadandIndian breads (like kulcha, chapatti, roti, parantha, nan, pav etc.), wheat rolls, milk rolls, challa bread, pizza-base or pizza-bread, soda bread etc.

7.1.1.1 Yeast-leavened breads and specialty breads

Includes all types of non-sweet bakery products and bread-derived products such as include white bread, rye bread, pumpernickel bread, raisin bread, whole wheat bread, pain courant français, malt bread, hamburger rolls, whole wheat rolls, and milk rolls.

7.1.1.2 Soda breads

Includes all soda breads.

7.1.2 Crackers, excluding sweet crackers

The term "cracker" refers to a thin, crisp wafer, usually dough. Flavoured crackers (e.g. cheese flavoured) that are consumed as snacks are in 15.1 such as soda crackers, rye crispsetc.

7.1.3 Other ordinary bakery products

Includes all other ordinary bakery wares, such as cornbread and biscuits, bagels, pita and muffins. The term "biscuit" in this category refers to a small cake of shortened bread, leavened with baking powder or baking soda. It does not refer tithe British "biscuit," which is a "cookie" or "sweet cracker" included in category 7.2.1.

7.1.4 Bread-type products, including bread stuffing and bread crumbs

Includes bread-based products such as croutons, bread stuffing and stuffing mixes, and prepared doughs (e.g. for biscuits, toasted bread (rusks), prepared doughs for bread/bread-type products including their frozen counterparts etc.). Bread mixes are included in category 7.1.6.

7.1.5 Steamed breads and buns

Oriental-style leavened wheat or rice products that are cooked in a steamer. Products may be made with or without fillingsuch as twisted rolls of various shapes, filled dumplings and steamed bun with meat, jam or other filling.

7.1.6 Mixes for bread and ordinary bakery wares

Includes all the mixes containing the dry ingredients to which wet ingredients (e.g. water, milk, oil, butter, and eggs) are added to prepare dough for baked goods from food categories 7.1.1 to 7.1.5 such as French bread mix, tin bread mix, panettone mix, ciabatta mix, among others. Mixes for fine bakerywares (e.g. cakes, cookies, pancakes) are found in category 7.2.3.

7.2 Fine bakery wares (sweet, salty, savoury) and mixes

Includes sub-categories for ready-to-eat products (7.2.1 and 7.2.2) as well as mixes (7.2.3) for preparing fine baked goods.

7.2.1 Cakes, cookies and pies

The term "sweet cracker" or "sweet biscuit" used in this category refers to a cookie-like product that may beaten as a dessert such as butter cake, cheesecake, fruit-filled cereal bars, pound cake, moist cake (type of starchy dessert), western cakes, moon cakes, sponge cake, fruit filled pies (e.g. apple pie), custard types, oatmeal cookies, sugar cookies and British "biscuits" (cookies or sweet crackers).

7.2.2 Other fine bakery products

Includes products that may be eaten as a dessert or as breakfast such as doughnuts, sweet rolls, muffins, pancakes, waffles, filled sweet buns, Danish pastry, wafers or cones for ice cream, flour confectionery, and trifles.

7.2.3 Mixes for fine bakery wares

Mixes containing the dry ingredients to which wet ingredients (e.g. water, milk, oil, butter, eggs) are added to prepare dough for fine baked goods such as cake mix, flour confectionery mix, pancake mix, pie-mix, and waffle mix. Prepared dough is found in category 7.1.4. Mixes for ordinary bakery wares (e.g. bread) is found in category 7.1.6.

8.0 Meat and meat products, including poultry

This category includes all types of meat and poultry products, in pieces and cuts or comminutes fresh (8.1) and processed (8.2 and 8.3).

8.1 Fresh meat and poultry

Fresh products are usually free of additives.

8.1.1 Fresh meat and poultry whole pieces or cuts

Untreated raw meat, and poultry carcasses and cuts.

8.1.2 Fresh meat and poultry comminuted

Untreated raw comminuted or mechanically deboned meat and poultry.

8.2 Processed meat, and poultry products in whole pieces or cuts

Includes various treatments for non-heat treated meat cuts (8.2.1), and heat-treated meat cuts (8.3.2).

8.2.1 Non-heat treated processed meat and poultry products in whole pieces or cuts

This category describes several treatment methods (e.g. curing, salting, drying, pickling) that preserve and extend the shelf life of meats.

8.2.1.1 Cured (including salted) non-heat treated processed meat and poultry products in whole pieces or cuts

Salted products are treated with sodium chloride. Dry cured (dry pickled) products are prepared by rubbing salt directly on the meat surface. Wet pickle cured products are prepared by submerging the meat in a brine solution. Pump cured products are prepared by injecting brine into the meat. Curing may also be achieved by addition of additives. Smoked products are also included here.

8.2.1.2 Cured (including salted) and dried non-heat treated processed meat and poultry products in whole pieces or cuts

The meat cuts may be cured or salted as described for category 8.2.1.1, and then dried, or they may only be dried. Drying is achieved either in hot air or in vacuum.

8.2.1.3 Fermented non-heat treated processed meat and poultry products in whole pieces or cuts

Fermented products are a type of pickled product produced by the action of lactic acid bacteria in the presence of salt.

8.2.2 Heat-treated processed meat and poultry products in whole pieces or cuts Includes cooked (including cured and cooked, and dried and cooked), heat-treated (including sterilized) and canned meat cuts.

77 [8.2.3 Frozen raw, flavored/marinated, processed meat and poultry products in whole pieces or cuts –

Includes raw, flavoured/marinated raw and cooked meat cuts that have been frozen.]

8.3 Processed comminuted meat and poultry products

Includes various treatments for non-heat treated products (8.3.1) and heat-treated products (8.3.2).

8.3.1 Non-heat treated processed comminuted meat and poultry products

This category describes several treatment methods (e.g. curing, salting, drying, pickling) that preserve and extend the shelf life of comminuted and mechanically deboned meat products.

8.3.1.1 Cured (including salted) non-heat treated processed comminuted meat and poultry products

Salted products are treated with sodium chloride. Dry cured (dry pickled) products are prepared by rubbing salt directly on the meat surface. Wet pickle cured products are prepared by submerging the meat in a brine solution. Pump cured products are prepared by injecting brine into the meat. Curing may also be achieved by addition of additives. Also includes smoked products.

8.3.1.2 Cured (including salted) and dried non-heat treated processed comminuted meat and poultry products

The comminuted or mechanically deboned products may be cured or salted as described for category 8.3.1.1, and then dried, or they may only be dried. Drying is achieved either in hot air or in vacuum.

8.3.1.3 Fermented non-heat treated processed comminuted meat and poultry products

Fermented products are a type of pickled product produced by the action of lactic acid bacteria in the presence of salt. Certain types of sausages may be fermented.

8.3.2 Heat-treated processed comminuted meat and poultry products

Includes cooked (including cured and cooked, and dried and cooked), heat-treated (including sterilized) and canned comminuted products.

8.3.3 Frozen processed comminuted meat and poultry products

Includes raw, partially cooked and fully cooked comminuted or mechanically deboned meat products that have been frozen.

8.4 Edible casings (e.g. sausage casings)

Casings or tubing prepared from collagen, cellulose, or food-grade synthetic material or from natural sources that contain the sausage mix.

9.0 Fish and fish products, including molluscs, crustaceans, and echinoderms

This broad category is divided into categories for fresh fish (9.1) and various processed fish products (9.2–9.4). This category includes aquatic vertebrates (e.g. fish) and aquatic invertebrates (e.g. jellyfish), as well as molluscs (e.g. clams, snails), crustaceans (e.g. shrimp, crab, lobster), and echinoderms (e.g. sea urchins, sea cucumbers). Fish products may be treated with coatings, such as glazes and spice rubs, prior to marketing to the consumer (e.g. glazed frozen fish fillets).

9.1 Fresh fish and fish products, including molluscs, crustaceans, and echinoderms

The term "fresh" refers to fish and fish products that are untreated except for refrigeration, storage on ice, or freezing upon catching at sea or in lakes or other bodies of water in order to prevent decomposition and spoilage.

9.1.1. Fresh fish

Includes fresh rohu, catla, hilsa, singhada, trout, pomphret, cod, salmon, fishroe etc

9.1.2 Fresh molluscs, crustaceans and echinoderms

Includes fresh shrimp, clams, crabs, lobster, snails etc.

9.2 Processed fish and fish products, including molluscs, crustaceans, and echinoderms

This category refers to fish products that are frozen and may require further cooking, as well as ready-to-eat cooked, smoked, dried, fermented, and salted products.

9.2.1 Frozen fish, fish fillets, and fish products, including molluscs, crustaceans, and echinoderms

Fresh, including partially cooked, fish subjected to freezing or quick-freezing at sea and on land for further processing such as frozen or deep frozen clams, cod fillets, crab, finfish, haddock, hake, lobster, minced fish, prawns and shrimp; frozen fish roe; frozen surimietc.

9.2.2 Frozen battered fish, fish fillets and fish products, including molluscs, crustaceans, and echinoderms

Uncooked product prepared from fish or fish portions, with dressing in eggs and bread crumbs or batter. Examples include frozen raw breaded or batter-coated shrimp; and frozen or quick-frozen breaded or batter coated fish fillets, fish portions and fish sticks (fish fingers) etc.

9.2.3 Frozen minced and creamed fish products, including molluscs, crustaceans, and echinoderms

Uncooked product prepared from minced fish pieces in cream-type sauce.

9.2.4 Cooked and/or fried fish and fish products, including molluscs, crustaceans, and echinoderms

Includes all ready-to-eat cooked products as described in the sub-categories.

9.2.4.1 Cooked fish and fish products

Cooked products include steamed, boiled or any other cooking method except frying (see 9.2.4.3). The fish may be whole, in portions or comminuted such as fish sausage; cooked fish products boiled down in soy sauce; cooked surimi products, cooked fish roe; cooked fish and lobster paste (surimi-like products. Other fish paste (Oriental type) is found in 9.3.4.

9.2.4.2 Cooked molluscs, crustaceans, and echinoderms

Cooked products include steamed, boiled or any other cooking method except frying (see 9.2.4.3) such as cooked *Crangon crangon* and *Crangon vulgaris* (brown shrimp; cooked shrimp), clams and crabs.

9.2.4.3 Fried fish and fish products, including molluscs, crustaceans, and echinoderms

Ready-to-eat products prepared from fish or fish portions, with or without further dressing in eggs and breadcrumbs or batter, that are fried, baked, roasted or barbecued, and then packaged or canned with or without sauce or oil. Examples include ready-to-eat fried surimi, fried calamari, and fried soft-shell crabs.

9.2.5 Smoked, dried, fermented, and/or salted fish and fish products, including molluscs, crustaceans, and echinoderms

Smoked fish are usually prepared from fresh deep frozen or frozen fish that are dried directly or after boiling, with or without salting, by exposing the fish to freshly-generated sawdust smoke. Dried fish are prepared by exposing the fish to sunlight or drying directly or after boiling in a special installation; the fish may be salted prior to drying. Salted fish are either rubbed with salt or placed in a salt solution. This manufacturing process is different from that described in food category 9.3 for marinated and pickled fish. Cured fish is prepared by salting and then smoking fish

such as salted anchovies, shrimp, and shad; smoked chub, cuttlefish and octopus; fish ham; dried and salted species of the *Gadidae* species; smoked or salted fish paste and fish roe; cured and smoked sablefish, shad, and salmon; dried shellfish, dried bonito, and boiled, dried fish.

9.3 Semi-preserved fish and fish products, including molluscs, crustaceans, and echinoderms

Includes products treated by methods such as marinating, pickling and partial cooking that have a limited shelf life.

9.3.1 Fish and fish products, including molluscs, crustaceans, and echinoderms, marinated and/or in jelly

Marinated products are manufactured by soaking the fish in vinegar or wine with or without added salt and spices. They are packaged in jars or cans and have a limited shelf life. Products in jelly may be manufactured by tenderizing fish products by cooking or steaming, adding vinegar or wine, salt and preservatives, and solidifying in a jelly such as "roll mops" (a type of marinated herring), sea eel(dogfish) in jelly and fish aspic.

9.3.2 Fish and fish products, including molluscs, crustaceans, and echinoderms, pickled and/or in brine

Pickled products are sometimes considered a type of marinated product. Pickling results from the treatment of the fish with a salt and vinegar or alcohol (e.g. wine) solution. Examples include different types of Oriental pickled productse.g. pickled fish, pickled herring and sprat.

9.3.3 Salmon substitutes, caviar, and other fish roe products

The term "caviar" refers only to the roe of the sturgeon species. Caviar substitutes are made of roe of various sea and freshwater fish (e.g. cod and herring) that are salted, spiced, dyed and may be treated with a preservative such as salted salmon roe, processed, salted salmon roe, cod roe, salted cod roe and lumpfish caviar. Occasionally, roe may be pasteurized. In this case, it is included in food category 9.4, since it is a fully preserved product. Roe products that are frozen, cooked or smoked are included in category 9.2.1, 9.2.4.1, and 9.2.5, respectively; fresh fish roe is found in category 9.1.1, 9.3.4. Semi-preserved fish and fish products, including molluscs, crustaceans, and echinoderms (e.g. fish paste), excluding products of food categories 9.3.1 – 9.3.3such as fish or crustacean pates and traditional Oriental fish paste. The

latter is produced from fresh fish or the residue from fish sauce production, which is combined with other ingredients such as wheat flour, rice or soybeans. The product may be further fermented. Cooked fish or crustacean pastes (surimi-like products) are found in 9.2.4.1 and 9.2.4.2, respectively.

9.4 Fully preserved, including canned or fermented fish and fish products, including molluscs, crustaceans, and echinoderms

Products with extended shelf life, manufactured by pasteurizing or steam retorting and packaging in vacuum sealed air-tight containers to ensure sterility. Products may be packed in their own juice or in added oil or sauce. This category excludes fully cooked products (see category 9.2.4) such as canned tuna, clams, crab, fish roe and sardines; gefilte fish balls; and surimi (heat-pasteurized).

10.0 Eggs and egg products

Includes fresh in-shell eggs (10.1), products that may substitute for fresh eggs (10.2) and other egg products (10.3 and 10.4).

10.1 Fresh eggs

Fresh in-shell eggs are free of additives.

10.2 Egg products

Products that may be used as replacement for fresh eggs in recipes or as a food (e.g. omelette). They are produced from fresh eggs by either (i) mixing and purifying the whole egg; or (ii) separating the egg white and yolk, and then mixing and purifying each separately. The purified whole egg, white or yolk is then further processed to produce liquid, frozen or dried eggs.

10.2.1 Liquid egg products

The purified whole egg, egg yolk or egg white is pasteurized and chemically preserved (e.g. by addition of salt).

10.2.2 Frozen egg products

Includes purified, pasteurized and frozen whole egg, egg yolk or egg white.

10.2.3 Dried and/or heat coagulated egg products

De-sugared purified, pasteurized and dried whole egg, egg yolk or egg white.

10.3 Preserved eggs, including alkaline, salted, and canned eggs

Includes traditional Oriental preserved products, such as salt-cured and alkaline treated eggs.

10.4 Egg-based desserts

Includes ready-to-eat products and products to be prepared from a dry mix such as flan and egg custard. Also includes custard fillings for fine bakery wares (e.g. pies).

11.0 Sweeteners, including honey

Includes all standardized sugars (11.1), non-standardized products (e.g. 11.2, 11.3, 11.4 and 11.6), and natural sweeteners (11.5 – honey).

11.1 Refined and raw sugars

Nutritive sweeteners, such as fully or partially purified sucrose (derived from sugar beet and sugar cane), glucose (derived from starch), or fructose, that are included in sub-categories 11.1.1 to 11.1.5.

11.1.1 White sugar, dextrose anhydrous, dextrose monohydrate, fructose

White sugar is purified and crystallized sucrose. Dextrose anhydrous is purified and crystallized D-glucose without water of crystallization. Dextrose monohydrate is purified and crystallized D-glucose with one molecule of water of crystallization. Fructose is purified and crystallized D-fructose. Examples include refined sugar, cube sugar, mishri etc.

11.1.2 Powdered sugar, powdered dextrose

Powdered sugar (icing sugar) is finely pulverized white sugar with or without added anti-caking agents. Powdered dextrose (icing dextrose) is finely pulverized dextrose anhydrous or dextrose monohydrate, or a mixture of the two, with or without added anti-caking agents.

11.1.3 Soft white sugar, soft brown sugar, glucose syrup, dried glucose syrup, raw cane sugar

Soft white sugar is fine grain purified, moist sugar, that is white in colour. Soft brown sugar is fine grain moist sugar that is light to dark brown in colour. Glucose syrup is a purified concentrated aqueous solution of nutritive saccharides derived from starch or inulin or both. Dried glucose syrup is glucose syrup from which water has been partially removed. Raw cane sugar is partially purified sucrose crystallized

from partially purified cane juice without further purification. Examples include Khandsari sugar.

11.1.3.1 Dried glucose syrup used to manufacture sugar confectionery

Dried glucose syrup, as described in 11.1.3, used to manufacture candy products that are included in food category 5.2 (e.g. hard or soft candies).

11.1.3.2 Glucose syrup used to manufacture sugar confectionery

Glucose syrup, as described in 11.1.3, used to manufacture candy products that are included in food category 5.2 (e.g. hard or soft candies).

11.1.4 Lactose

A natural constituent of milk normally obtained from whey. It may be anhydrous, or contain one molecule of water of crystallization, or be a mixture of both forms.

11.1.5 Plantation or mill white sugar

Purified and crystallized sucrose.

- ⁵²[**11.1.6 Gur or Jaggery** means the product obtained by boiling or processing juice pressed out of sugarcane or extracted from palmyra palm, date palm or coconut palm.
- **11.1.6.1 Cane Jaggery or Gur** means the product obtained by boiling or processing juice pressed out of or extracted from sugarcane.
- **11.1.6.2 Palm Jaggery or Gur** means the product obtained by boiling or processing juice pressed out of or extracted from palmyra palm or coconut palm.
- **11.1.6.3 Date Jaggery or Gur** means the product obtained by boiling or processing juice pressed out of or extracted from date palm.]

11.2 Brown sugar excluding products of food category 11.1.3

Includes large-grain, brown or yellow lump sugars, such as demerara sugar, gur and jaggery.

11.3 Sugar solutions and syrups, also (partially) inverted, including treacle and molasses, excluding products of food category 11.1.3

Includes co-products of the sugar refining process (e.g. treacle and molasses), invert sugar (equimolarmixture of glucose and fructose produced from the hydrolysis of sucrose), and other sweeteners, such as high fructose corn syrup, high fructose inulin syrup and corn sugar.

11.4 Other sugars and syrups

Includes all types of table syrups (e.g. xylose, maple syrup), syrups for fine bakery wares and ices (e.g. caramel syrup, flavoured syrups), and decorative sugar toppings (e.g. coloured sugar crystals for cookies).

11.5 Honey:

Honey is the natural sweet substance produced by honeybees from the nectar of blossoms or secretions of plants. Examples of honey include wild flora honey, multiflora honey, rapeseed or mustard honey, clover honey etc.

11.6 Table-top sweeteners, including those containing high-intensity sweeteners

Includes products that are preparations of high-intensity sweeteners (e.g. acesulfame potassium, steviols) and/or ofpolyols (e.g. sorbitol). These products, which are sold to the final consumer, may be in powder, solid (e.g. tablets or cubes), or liquid form.

12.0 Salts, spices, soups, sauces, salads, protein products

This is a broad category that includes substances added to food to enhance its aroma and taste (12.1 – salt and salt substitutes; 12.2 – herbs, spices, seasonings and condiments (e.g. seasoning for instant noodles);12.3 – vinegars; and 12.4 - mustards), certain prepared foods (12.5 – soups and broths; 12.6 – sauces and like products; and 12.7 – salads (e.g. macaroni salad, potato salad) and sandwich spreads, excluding cocoa and nut-based spreads of food categories 4.2.2.5 and 5.1.3)), and products composed primarily of protein that are derived from soybeans or from other sources (e.g. milk, cereal, or vegetables) (12.9 –soybean based seasonings and condiments; and 12.10 – protein products other than from soybeans).

12.1 Salt and salt substitutes

Includes salt (12.1.1) and salt substitutes (12.1.2) used as seasoning for food.

12.1.1 Salt

Primarily food-grade sodium chloride. Includes table salt, iodized and fluoride iodized salt, and dendritic salt. This category also includes similar traditional

products like black salt, rock salt (sendhanamak, kala namak, Gumma namak) sea salt etc.

12.1.2 Salt substitutes

Salt substitutes are seasonings with reduced sodium content intended to be used on food in place of salt.

⁵²[12.2 Herbs, spices, seasonings, and condiments

This category describes items intended to enhance the aroma and taste of food. Spices means any form of spice including curry powders, spice oils, oleoresins and other mixtures where spice content is predominant.]

⁵²[12.2.1 Herbs, spices, masalas, spice mixtures including oleoresins or extracts/derivatives thereof]

Herbs and spices are usually derived from botanical sources, and may be dehydrated, and either ground or whole. Examples include chilli, turmeric, pepper, asafoetida, anise, aniseed (saunf), basil, bay leaf, caraway (shiajeera), cardamom (elaichi), large cardamom, cinnamon, clove, cumin, and carom seeds (ajowain) etc. Spices may also be found as blends in powder or paste form. Examples of spice blends include chilli seasoning, chilli paste, curry paste, curry roux, and dry cures or rub that are applied to external surfaces of meat or fish. Blends of spices with other ingredients (Masalas) include curry powder, sambhar masala, rasam masala, chhole masala, pavbhaji masala etc.

12.2.2 Seasonings and condiments

Seasonings and condiments are spice mixes with other ingredients which go as toppings to sprinkle on rice and other foods, and include seasonings for noodles, Puliyogare mix, onion salt, garlic salt etc. The term "condiments" as used in the Food Category System does not include condiment sauces (e.g. ketchup, mayonnaise, mustard) or relishes.

12.3 Vinegars

Liquid produced from fermentation of ethanol from a suitable source (e.g. wine, cider). Examples include cider vinegar, wine vinegar, malt vinegar, spirit vinegar, grain vinegar, raisin vinegar, fruit (wine) vinegar and synthetic vinegar.

12.4 Mustards

Condiment sauce prepared from ground often defatted mustard seed that is mixed into slurry with water, vinegar, salt, oil and other spices and refined. Examples include Dijon mustard, and "hot" mustard (prepared from seeds with hulls).

12.5 Soups and broths

Includes ready-to-eat soups and mixes. The finished products may be water- (e.g. consommé) or milk-based (e.g. chowder).

12.5.1 Ready-to-eat soups and broths, including canned, bottled, and frozen

Water- or milk-based products consisting of vegetable, meat or fish broth with or without other ingredients (e.g. vegetables, meat, noodles) such as rasam, bouillon, broths, consommés, water- and cream-based soups, chowders, and bisques.

12.5.2 Mixes for soups and broths

Concentrated soup to be reconstituted with water and/or milk, with or without addition of other optional ingredients (e.g. vegetables, meat, noodles) such as rasam powder, bouillon powders and cubes; powdered and condensed soups; and stock cubes and powders etc.

12.6 Sauces and like products

Includes ready-to-eat sauces, gravies and dressings, and mixes to be reconstituted before consumption. The ready-to-eat products are divided into sub-categories for emulsified (12.6.1) and non-emulsified (12.6.2) products, whereas the sub-category for the mixes (12.6.3) encompasses both emulsified and non-emulsified sauce mixes.

12.6.1 Emulsified sauces and dips

Sauces, gravies, dressings based and dips, at least in part, on a fat- or oil-in water emulsion such as salad dressing (e.g. French, Italian, Greek, ranch style), fat-based sandwich spreads (e.g. mayonnaise with mustard), salad cream, and fatty sauces and snack dips (e.g. bacon and cheddar dip, onion dip).

12.6.2 Non-emulsified sauces

Include water-, coconut milk-, and milk-based sauces, gravies and dressings. Examples include barbecue sauce, tomato ketchup, cheese sauce, Worcestershire sauce, Oriental thick Worcestershire sauce, chilli sauce, sweet and sour dipping sauce, and white (cream-based) sauce (sauce consisting primarily of milk or cream, with little added fat (e.g. butter) and flour, with or without seasoning or spices).

12.6.3 Mixes for sauces and gravies

Concentrated product, usually in powdered form, to be mixed with water, milk, oil or other liquid to prepare a finished sauce or gravy such as mixes for cheese sauce, and salad dressings etc.

12.6.4 Clear sauces

Includes thin, non-emulsified clear sauces that may be water-based. These sauces may be used as condiments or ingredients rather than as finished gravy such as oyster sauce and fish sauce.

12.7 Salads and sandwich spreads excluding cocoa- and nut-based spreads of food categories 4.2.2.5 and 5.1.3

Includes prepared salads (e.g. macaroni salad, potato salad), milk-based sandwich spreads, non-standardized mayonnaise-like sandwich spreads, and dressings etc.

12.8 Yeast and like products:

Includes baker's yeast and leaven used in the manufacture of baked goods. Includes the products used in the production of alcoholic beverages.

12.9 Soybean-based seasonings and condiments

Includes products that are derived from soybeans and other ingredients intended for use as seasonings and condiments, such as fermented soybean paste and soybean sauces.

12.9.1 Fermented soybean paste

The product is made of soybeans, salt, water and other ingredients, using the process of fermentation (e.g. miso).

12.9.2 Soybean sauce

A liquid seasoning obtained by fermentation of soybeans, non-fermentation (e.g. hydrolysis) of soybeans, orby hydrolysis of vegetable protein.

12.9.2.1 Fermented soybean sauce

A clear, non-emulsified sauce made of soybeans, cereal, salt and water by the fermentation process.

12.9.2.2 Non-fermented soybean sauces

Non-fermented soybean sauce, which is also known as non-brewed soybean sauce, may be produced from vegetable proteins, such as defatted soybeans that are acid-hydrolyzed (e.g. with hydrochloric acid), neutralized (e.g. with sodium carbonate), and filtered.

12.9.2.3 Other soybean sauce

Non-emulsified sauce made from fermented soybean sauce and/or non-fermented soybean sauce, with or without sugar, with or without caramelization process.

12.10 Protein products other than from soybeans

Includes cereal or legume or vegetable protein products such as wheat gluten, vegetable protein analogues, and proteinaceous meat or milk and fish substitutes. Includes their isolates, concentrates and hydrolystes, single cell protein including Spirulina.

- 13.0 Foodstuffs intended for particular nutritional uses
- 13.1 Infant formulae, follow-up formulae, and formulae for special medical purposes for infants
- 13.1.1 Infant formulae
- 13.1.2 Follow-up formulae
- 13.2 Complementary foods for infants and young children
- 13.3 Dietetic foods intended for special medical purposes (excluding products of food category 13.1)
- 13.4 Dietetic formulae for slimming purposes and weight reduction
- 13.5 Dietetic foods (e.g., supplementary foods for dietary use) excluding products of food categories 13.1 -13.4 and 13.6
- **13.6 Food supplements**

14.0 Beverages, excluding dairy products

14.1 Non-alcoholic ("soft") beverages

This broad category includes waters and carbonated waters (14.1.1), fruit and vegetable juices (14.1.2), fruit and vegetable nectars (14.1.3), water-based flavoured carbonated and non-carbonated drinks (14.1.4), and water-based brewed or steeped beverages such as coffee and tea (14.1.5).

14.1.1 Waters

Includes natural waters (14.1.1.1) and other bottled waters (14.1.1.2), each of which may be non-carbonated or carbonated.

14.1.1.1 Natural mineral waters and source waters

Waters obtained directly at the source and packaged close to the source; are characterized by the presence of certain mineral salts in relative proportions and trace elements or other constituents. Natural mineral water may be naturally carbonated (with carbon dioxide from the source), carbonated (with added carbon dioxide of another origin), decarbonised (with less carbon dioxide than present in the water at the source so it does not spontaneously give off carbon dioxide under conditions of standard temperature and pressure), or fortified (with carbon dioxide from the source), and non-carbonated (contains no free carbon dioxide).

14.1.1.2 Table waters and soda waters

Includes waters other than natural source waters that may be carbonated by addition of carbon dioxide and may be processed by filtration, disinfection, or other suitable means. These waters may contain added mineral salts. Carbonated and non-carbonated waters containing flavours are found in category 14.1.4such as table water, bottled water with or without added minerals, purified water, seltzer water, club soda, and sparkling water.

14.1.2 Fruit and vegetable juices

This category applies only to fruit and vegetable juices. Beverages based on fruit and vegetable juices are found in food category 14.1.4.2. Fruit-vegetable juice blends have separate classifications for each component (i.e. fruit juice (14.1.2.1) and vegetable juice (14.1.2.3).

14.1.2.1 Fruit juices

Fruit juice is the unfermented but fermentable liquid obtained from the edible part of sound, appropriately mature and fresh fruit or of fruit maintained in sound condition by suitable means. The juice is prepared by suitable processes, which maintain the essential physical, chemical, organoleptical and nutritional characteristics of the juices of the fruit from which it comes. The juice may be cloudy or clear, and may have restored (to the normal level attained in the same kind of fruit) aromatic substances and volatile flavour components, all of which must be obtained by suitable physical means, and all of which must have been recovered from the same kind of fruit. Pulp and cells obtained by suitable physical means from the same kind of fruit may be added. A single juice is obtained from one kind of fruit. A mixed juice is obtained by blending two or more juices or juices and purees, from different kinds of fruit. Fruit juice may be obtained, e.g. by directly expressing the juice by mechanical extraction processes, by reconstituting concentrated fruit juice (food category 14.1.2.3) with water, or in limited situations by water extraction of the whole fruit. Examples include orange juice, apple juice, black currant juice, lemon juice, orange-mango juice and coconut water.

14.1.2.2 Vegetable juices

Vegetable juice is the liquid unfermented but fermentable product intended for direct consumption obtained by mechanical expression, crushing, grinding, and/or sieving of one or more sound fresh vegetables or vegetables preserved exclusively by physical means. The juice may be clear, turbid, or pulpy. It may have been concentrated and reconstituted with water. Products may be based on a single vegetable (e.g. carrot) or blends of vegetables (e.g. carrots, celery).

14.1.2.3 Concentrates of fruit juices

Concentrated fruit juice is the product that complies with the definition given in food category 14.1.2.1. It is prepared by the physical removal of water from fruit juice in an amount to increase the Brix level to a value at least 50% greater than that established for reconstituted juice from the same fruit. In the production of juice that is to be concentrated, suitable processes are used, and may be combined; with simultaneous diffusion of the pulp cells or fruit pulp by water, provided that the water-extracted soluble fruit solids are added in-line to the primary juice, before the concentration procedure. Fruit juice concentrates may have restored (to the normal level attained in the same kind of fruit) aromatic substances and volatile flavour components, all of which must be obtained by suitable physical means, and all of which must be recovered from the same kind of fruit. Pulp and cells obtained by

suitable physical means from the same kind of fruit may be added. Sold in liquid, syrup and frozen forms for the preparation of a ready-to-drink juice by addition of water. Examples include frozen orange juice concentrate, and lemon juice concentrate.

14.1.2.4 Concentrates of vegetable juices

Prepared by the physical removal of water from vegetable juice. Sold in liquid, syrup and frozen forms for the preparation of a ready-to-drink juice by addition of water. Includes carrot juice concentrate.

14.1.3 Fruit and vegetable nectars

Fruit and vegetable nectars are beverages produced from purees, juices, or concentrates of either, blended with water and sugar, honey, syrups, and/or sweeteners. Fruit-vegetable nectar blends are reported under their components (i.e. fruit nectar (14.1.3.1) and vegetable nectar (14.1.3.2).

14.1.3.1 Fruit nectar

Fruit nectar is the unfermented but fermentable product obtained by adding water with or without the addition of sugar, honey, syrups, and/or sweeteners to fruit juice, concentrated fruit juice, fruit purees or concentrated fruit purees, or a mixture of those products. Aromatic substances, volatile flavour components, pulp and cells, all of which must have been recovered from the same kind of fruit and obtained by suitable physical means, may be added. Products may be based on a single fruit or on fruit blends such aspear nectar and peach nectar.

14.1.3.2 Vegetable nectar

Product obtained by adding water with or without the addition of sugar, honey, syrups, and/or sweeteners to vegetable juice or concentrated vegetable juice, or a mixture of those products. Products may be based on a single vegetable or on a blend of vegetables.

14.1.3.3 Concentrates of fruit nectar

Prepared by the physical removal of water from fruit nectar or its starting materials. Sold in liquid, syrup and frozen forms for the preparation of a ready-to-drink nectar by addition of water. Examples: pear nectar concentrate and peach nectar concentrate.

14.1.3.4 Concentrates of vegetable nectar

Prepared by the physical removal of water from vegetable nectar. Sold in liquid, syrup and frozen forms forth preparation of ready-to-drink nectars by addition of water.

14.1.4 Water-based flavoured drinks, including "sport," "energy," or "electrolyte" drinks and particulateddrinks

Includes all carbonated and non-carbonated varieties and concentrates, products based on fruit and vegetable juices, coffee-, tea- and herbal-based drinks etc.

14.1.4.1 Carbonated water-based flavoured drinks

Includes water-based flavoured drinks with added carbon dioxide with nutritive, non-nutritive and/or intense sweeteners and other permitted food additives. Includes *gaseosa* (water-based drinks with added carbon dioxide, sweetener, and flavour), and sodas such as colas, pepper-types, root beer, lemon-lime, and citrus types, both diet/light and regular types. These beverages may be clear, cloudy, or may contain particulate matter (e.g. fruit pieces). Includes so-called "energy" drinks that are carbonated and contain high levels of nutrients and other ingredients.

14.1.4.2 Non-carbonated water-based flavoured drinks, including punches and Ades

Include water-based flavoured drinks without added carbon dioxide, fruit and vegetable juice-based drinks(e.g. almond, aniseed, coconut-based drinks, and ginseng drink), fruit flavoured ades (e.g. lemonade, orangeade), fruit based soft drinks, capile groselha, lactic acid beverage, ready-to-drink coffee and tea drinks with or without milk or milk solids, and herbal-based drinks (e.g. iced tea, fruit-flavoured iced tea, chilled canned cappuccino drinks) and "sports" drinks containing electrolytes. These beverages may be clear or contain particulated matter (e.g. fruit pieces), and may be unsweetened or sweetened with sugar ora non-nutritive high-intensity sweetener. Includes so-called "energy" drinks that are non-carbonated and contain high levels of nutrients and other ingredients.

14.1.4.3 Concentrates (liquid or solid) for water-based flavoured drinks

Include powder, syrup, liquid and frozen concentrates for the preparation of carbonated or non-carbonated water-based non-alcoholic beverages by addition of water or carbonated water. Examples include squashes, fountain syrups (e.g. cola

syrup), fruit syrups for soft drinks, frozen or powdered concentrate for lemonade and iced tea mixes.

14.1.5 Coffee, coffee substitutes, tea, herbal infusions, and other hot cereal and grain beverages, excluding cocoa

Includes the ready-to-drink products (e.g. canned), and their mixes and concentrates such as chicory-based hot beverages (postum), rice tea, mate tea, and mixes for hot coffee and tea beverages (e.g. instant coffee, powder for hot cappuccino beverages). Treated coffee beans for the manufacture of coffee products are also included. Ready-to-drink cocoa is included in category 1.1.2, and cocoa mixes in 5.1.1.

14.2 Alcoholic beverages, including alcohol-free and low-alcoholic counterparts

The alcohol-free and low-alcoholic counterparts are included in the same category as the alcoholic beverage.

14.2.1 Beer and malt beverages

Alcoholic beverages brewed from germinated barley (malt), hops, yeast, and water such as ale, lager, pilsner, brown beer, weiss beer, oud bruin beer, Obergariges Einfachbier, light beer, table beer, malt liquor, porter, stout, and barley wine.

14.2.2 Cider and Perry

Fruit wines made from apples (cider) and pears (Perry). Also includes cider bouche.

14.2.3 Grape wines

Alcoholic beverage obtained exclusively from the partial or complete alcoholic fermentation of fresh grapes, whether crushed or not, or of grape must (juice).

14.2.3.1 Still grape wine

Grape wine (white, red, rosé, or blush, dry or sweet) that may contain up to a maximum 0.4g/100 ml (4000mg/kg) carbon dioxide at 20°C.

14.2.3.2 Sparkling and semi-sparkling grape wines

Grape wines in which carbonation is produced during the fermentation process, either by bottle fermentation or closed tank fermentation. Also includes carbonated wine whose carbon dioxide is partially or totally of exogenous origin such as spumante, and "cold duck" wine.

14.2.3.3 Fortified grape wine, grape liquor wine, and sweet grape wine

Grape wines produced either by: (i) the fermentation of grape must (juice) of high sugar concentration; or (ii) by the blending of concentrated grape juice with wine; or (iii) the mixture of fermented must with alcohol such as grape dessert wine.

14.2.4 Wines (other than grape)

Includes wines made from fruit other than grapes, apples and pears, and from other agricultural products, including grain (e.g. rice). These wines may be still or sparkling. Examples include rice wine (*sake*), and sparkling and still fruit wines.

14.2.5 Mead

Alcoholic liquor made from fermented honey, malt and spices, or just of honey. Includes honey wine.

14.2.6 Distilled spirituous beverages containing more than 15% alcohol

Includes all distilled spirituous beverages derived from grain (e.g. corn, barley, rye, wheat), tubers (e.g. potato), fruit (e.g. grapes, berries) or sugar cane that contain greater than 15% alcohol such as aperitifs, brandy (distilled wine), cordials, liqueurs (including emulsified liqueurs), tequila, whiskey, and vodka.

14.2.7 Aromatized alcoholic beverages

Includes all non-standardized alcoholic beverage products. Although most of these products contain less than 15% alcohol, some traditional non-standardized aromatized products may contain up to 24% alcoholsuch as aromatized wine, cider and perry; aperitif wines; and prepared cocktails (mixtures of liquors, liqueurs, wines, essences, fruit and plant extracts, etc. marketed as ready-to-drink products or mixes). Cooler-type beverages are composed of beer, malt beverage, wine or spirituous beverage, low-alcoholic refreshers, fruit juice(s), and soda water (if carbonated) etc.

15.0 Ready-to-Eat savouries

Includes all types of savoury snack foods.

15.1 Snacks - potato, cereal, flour or starch based (from roots and tubers, pulses and legumes)

Includes all savoury snacks, with or without added flavourings, ⁵²[but excludes unsweetened crackers (category 7.1.2). Example includes potato chips], popcorn, pretzels, rice crackers, flavoured crackers (e.g. cheese-flavoured crackers), bhujia (namkeen; snack made of a mixture of flours, maize, potatoes, salt, dried fruit, peanuts, spices, colours, flavours, and antioxidants), and papads(prepared from soaked rice flour or from black gram or cow pea flour, mixed with salt and spices, and formed into balls or flat cakes), khari, kara, murukku, namakpara, chiwda, palakayalu, ribbon or thattupakoda, dalmoth or mixtures, soya nuts, nimki, fali (e.g. cholafali), other fried or baked snacks or savouries, uppuseedai, appam, bhel-mix, sev, gathiya, shankarpali, farsan, kurmura, murmura, papadi, crisps, chakli, etc. Also includes sweet snacks e.g. chikki, gajak, murrunda, gudchana, sugar coated dals and other sweet dal snacks (dals coated with jaggery, sugar, honey and other ingredients).

15.2 Processed nuts, including coated nuts and nut mixtures

Includes all types of whole nuts processed by, e.g. dry-roasting, roasting, marinating or boiling, either in-shellor shelled, salted or unsalted. Yoghurt-, cereal-, and honey-covered nuts, and dried fruit-nut-and-cereal snacks are classified here. ⁵²[Chocolate-covered nuts are classified in 5.1.3, and nuts covered in imitation chocolate are included in 5.1.4.]

15.3 Snacks - fish based

This describes savoury crackers with fish, fish products or fish flavouring. Dried fish per sethat may be consumed as a snack is assigned to food category 9.2.5, and dried meat snacks are assigned to food category 8.3.1.2.

16.0 Prepared foods

These foods are not included in the other food categories (1-15) and shall be considered on a case-bycasebasis. Prepared foods are mixtures of multiple components (e.g. meat, sauce, grain, cheese, vegetables); the components are included in other food categories. Prepared foods require minimal preparation by the consumer (e.g. heating, thawing, rehydrating).e.g. pav- bhaji, ready-to-eat dishes, biryani,curried rice, sandwiches (filling with egg /chicken/vegetarian sandwiches etc.), burgers, fish burgers, pizza etc. Provisions for additives will be listed in this food category in these regulations only if the additive is needed: (i) solely to have a technological function in the prepared food as sold to the consumer; or (ii) at a use

level that has an intentional technological function in the prepared food that exceeds the use level that can be accounted for by carry-over from the individual components

III FUNCTIONAL CLASSES, DEFINITIONS AND TECHNOLOGICAL PURPOSES

| Reno | Functional | Definition | Technological purpose |
|------|-----------------------|--|--|
| • | Classes | | |
| 1 | Acidity regulator | A food additive, which controls the acidity or alkalinity of a food. | Adjusting pH, acidity, alkalinity, and buffering activity. |
| 2 | Anti caking agent | A food additive, which reduces the tendency of components of food to adhere to one another. | Anticaking, anti-sticking, drying and dusting. |
| 3 | Antifoamin g agent | A food additive, which prevents or reduces foaming. | Antifoaming and de-foaming. |
| 4 | Antioxidant | A food additive, which prolongs the shelf-life of foods by protecting against deterioration caused by oxidation. | Antioxidant, antioxidant synergist, and antibrowning. |
| 5 | Bleaching | A food additive | Decolorising, and bleaching. |

| Reno | Functional | Definition | Technological purpose |
|------|-------------------|--|-------------------------------------|
| • | Classes | | |
| | agent | (non-flour use) used to decolorize food. Bleaching agents do not include pigments. | |
| 6 | Bulking agent | A food additive, which contributes to the bulk of a food without contributing significantly to its available energy value. | Bulkingand filling. |
| 7 | Carbonating agent | A food additive used to provide carbonation in a food. | Providing carbon dioxide gas. |
| 8 | Carrier | A food additive used to dissolve, dilute, disperse or otherwise physically modify a food additive or nutrient without altering its function (and without | Carrier, diluent and encapsulation. |

| Reno . | Functional Classes | Definition | Technological purpose |
|--------|------------------------------|---|---|
| | | exerting any technological effect itself) in order to facilitate its handling, application or use of the food additive or nutrient. | |
| 9 | Colour | | Colour, decorative pigment, surface colourant for eye appeal |
| 10 | Colour retention agent | A food additive, which stabilizes, retains or intensifies the colour of a food | Colour fixation/retention/ stabilization |
| 11 | Emulsifier | A food additive, which forms or maintains a uniform emulsion of two or more phases in a food. | Emulsification, plasticization, dispersion, surface action, inhibition of crystallization, density adjustment (flavouring oils in beverages), suspensionand clouding. |
| 12 | Emulsifying salt | A food additive, which, in the manufacture of processed food, rearranges | Prevention of fat separation, improving dispersion and blending/melding. |

| Reno . | Functional Classes | Definition | Technological purpose |
|--------|----------------------------|---|--|
| | | proteins in order to prevent fat separation. | |
| 13 | Firming agent | A food additive, which makes or keeps tissues of fruit or vegetables firm and crisp, or interacts with gelling agents to produce or strengthen a gel. | Texture retention and strengthening. |
| 14 | Flavour enhancer | A food additive, which enhances the existing taste and/or odour of a food. | Enhancement or potentiation of flavours. |
| 15 | Flour reatment agent | A food additive, which is added to flour or dough to improve its baking quality or colour. | Flour bleaching, improving, dough conditioning, and strengthening. |
| 16 | Foaming agent | A food additive, which makes it possible to form or maintain a uniform dispersion of a | Increased foaming, and aeration, |

| Reno . | Functional Classes | Definition | Technological purpose | | | |
|--------|-----------------------|---|--|--|--|--|
| | | gaseous phase in a liquid or solid food. | | | | |
| 17 | Gelling agent | A food additive, which gives a food texture through formation of a gel. | Gel formation | | | |
| 18 | Glazing agent | A food additive, which when applied to the external surface of a food, imparts a shiny appearance or provides a protective coating. | Glazing, sealing, coating, surface-finishing, polishing, and film-forming. | | | |
| 19 | Humectant | A food additive, which prevents food from drying out by counteracting the effect of a dry atmosphere. | Moisture retentionand wetting. | | | |
| 20 | Packaging gas | A food additive gas, which is introduced into a container before, during or after filling | Providing inert gaseous atmosphere in packages. | | | |

| Reno . | Functional Classes | Definition | Technological purpose |
|--------|-----------------------|--|------------------------------------|
| | | with food with the intention to protect the food, for example, from oxidation or spoilage. | |
| 21 | Preservative | A food additive, which prolongs the shelf-life of a food by protecting against deterioration caused by microorganisms. | |
| 22 | Propellant | A food additive gas, which expels a food from a container | Expulsion of food from a container |
| 23 | Raising agent | A food additive or a combination of food additives, which liberate(s) gas and thereby increase(s) the volume of a dough or batter. | Providing volume and body/texture. |

| Reno | Functional | Definition | Technological purpose |
|------|-------------|--|--|
| • | Classes | | |
| 24 | Sequestrant | A food additive, which controls the availability of a cation. | Chelation of ions. |
| 25 | Stabilizer | A food additive, which makes it possible to maintain a uniform dispersion of two or more components. | Stabilizing of foams/ colloids/ emulsions. |
| 26 | Sweetener | A food additive (other than a mono- or disaccharide sugar), which imparts a sweet taste to a food. | Reduction of energy as a substitute to mono or disaccharide sugars |
| 27 | Thickener | A food additive, which increases the viscosity of a food. | |

IV. USE OF FOOD ADDITIVES IN FOOD PRODUCTS

Food products may contain additives as specified in these regulations and in the following Tables. (All capital and bold additives in the Tables 1 to 15 refer to the Group of Additives listed with their INS Numbers in Annex-1)

Table 1

Dairy products and analogues, excluding products of category 2.0

Explanation I (for 11.6 Table top sweeteners): Maximum limit of artificial sweetener in the product shall be as in reconstituted beverage or food or in final beverage or food for consumption, as the case may be. The product label shall give clear instruction for reconstitution of products for making final beverage or food for consumption as the case may be.

Provided where the artificial sweetener(s) is/are used in carbonated water/ sweetened aerated water/ fruit beverage/ carbonated fruit beverage/ fruit nectar, the requirement of minimum total soluble solids shall not apply.

Provided further table top sweetener may contain the following carrier or filler articles with label declaration as provided in Regulation 2.4.5 (24, 25, 26, 27, 28 and 29) of Food Safety and Standards (Packaging and Labelling) Regulations, 2011. Namely,-

- (i) Dextrose
- (ii) Lactose
- (iii) Maltodextrin
- (iv) Mannitol
- (v) Sucrose
- (vi) Isomalt
- (vii) Citric acid
- (viii) Calcium silicate
- (ix) Carboxy methyl cellulose
- (x) Cream of tartar, IP
- (xi) Cross carmellose sodium
- (xii) Colloidal silicone dioxide
- (xiii) Glycine
- (xiv) L-leucine
- (xv) Magnesium stearate, IP
- (xvi) Purified talc
- (xvii) Poly vinyl pyrrolidone
- (xviii) Providone
- (xix) Sodium hydrogen carbonate
- (xx) Starch
- (xxi) Tartaric acid

(xxii) Erythritol

Explanation II (for preservatives)

The use of more than one preservative has been allowed in the alternative, those preservatives may be used in combination with one or more alternatives, provided the quantity of each preservative so used does not exceed such number of parts out of those specified for that preservative of the aforesaid tables as may be worked out on the basis of the proportion in which such preservatives are combined

Annexure-1
All capital and bold additives in the Table 1 to 15 refers to the group of additives as listed below

| Group Name | Additive Name | INS |
|-------------------|--------------------------------|----------|
| | | No. |
| SULFITES | Sulfur dioxide | 220 |
| | Sodium sulfite | 221 |
| | Sodium hydrogen sulfite | 222 |
| | Sodium disulfite | 223 |
| | Potassium metabisulfite | 224 |
| | Potassium sulfite | 225 |
| | Calcium hydrogen sulfite | 227 |

| | Sorbitan monostearate | 491 |
| | Sorbitan tristearate | 492] |

| Note No. | Notes to the Food Additives mentioned in the Table 1 to 15. |
|----------|---|
| 1 | As adipic acid. |
| 2 | On the dry ingredient, dry weight, dry mix or concentrate basis. |
| 3 | For use in surface treatment only. |
| 4 | For use in decoration, stamping, marking or branding the product |
| | only. |
| 5 | Excluding products conforming to the standard for jams, jellies and |
| | marmalades |
| 6 | As aluminium. |
| 7 | For use in coffee substitutes only. |
| 8 | As bixin. |
| 9 | Except for use in ready-to-drink coffee products at 10,000 mg/kg. |

| 10 | As ascorbyl stearate. |
|----|--|
| 11 | On the flour basis. |
| 12 | As a result of carryover from flavouring substances. |
| 13 | As benzoic acid. |
| 14 | For use in hydrolysed protein liquid formula only. |
| 15 | On the fat or oil basis. |
| 16 | For use in glaze, coatings or decorations for fruit, vegetables, meat or |
| | fish only. |
| 18 | As added level; residue not detected in ready-to-eat food. |
| 19 | For use in cocoa fat only. |
| 20 | Singly or in combination with other stabilizers, thickeners and/or |
| | gums. |
| 21 | As anhydrous calcium disodium ethylenediaminetetraacetate. |
| 22 | For use in smoked fish products only. |
| 23 | As iron. |
| 24 | As anhydrous sodium ferrocyanide. |
| 25 | For use at GMP in full fat soy flour only. |
| 26 | As steviol equivalents. |
| 27 | As para-hydroxybenzoic acid. |
| 28 | Except for use in wheat flour conforming to the standard for wheat |
| | flour at 2,000 mg/kg. |
| 29 | For non-standardized food only. |
| 30 | As residual NO ₃ ion. |
| 31 | On the mash used basis. |
| 32 | As residual NO ₂ ion. |
| 33 | As phosphorus. |
| 34 | On the anhydrous basis. |
| 35 | For use in cloudy juices only. |
| 36 | On the residual level basis. |
| 37 | For non-standardized food and food conforming to the standard for |
| | quick frozen blocks of fish fillets, minced fish flesh and mixtures of |
| | fillets and minced fish flesh. |
| 38 | On the creaming mixture basis. |
| 39 | For use in products containing butter or other fats and oils only. |
| 40 | Pentasodium triphosphate (INS 451(i)) only, to enhance the |
| | effectiveness of benzoates and sorbates. |

| 41 | For use in breading or batter coatings only. |
|----|---|
| 42 | As sorbic acid. |
| 43 | As tin. |
| 44 | As residual SO ₂ . |
| 45 | As tartaric acid. |
| 46 | As thiodipropionic acid. |
| 47 | On the dry egg yolk weight basis. |
| 48 | For use in olives only. |
| 49 | For use on citrus fruits only. |
| 50 | For use in fish roe only. |
| 51 | For use in herbs only. |
| 52 | Excluding chocolate milk. |
| 53 | For use in coatings only. |
| 54 | For use in cocktail cherries and candied cherries only. |
| 55 | Within the limits for sodium, calcium, and potassium specified in the |
| | standard for infant formulaand formula for special dietary purposes |
| | intended for infants: singly or in combination with other sodium, |
| | calcium, and/or potassium salts. |
| 56 | Excluding products where starch is present. |
| 57 | GMP is 1 part benzoyl peroxide and not more than 6 parts of the |
| | subject additive by weight. |
| 58 | As calcium. |
| 59 | For use as a packaging gas only. |
| 60 | Except for use as a carbonating agent: the CO ₂ in the finished wine |
| | shall not exceed 39.2 mg/kg. |
| 61 | For use in minced fish only. |
| 62 | As copper. |
| 63 | For non-standardized food and breaded or batter coatings in food |
| | conforming to the standard for quick frozen fish sticks (fish fingers), |
| | fish portions and fish fillets – breaded or in batter |
| 64 | For use in dry beans only. |
| 65 | As a result of carryover from nutrient preparations. |
| 66 | As formaldehyde. |
| 67 | Except for use in liquid egg whites at 8,800 mg/kg as phosphorus, |
| | and in liquid whole eggs at 14,700 mg/kg as phosphorus. |
| 68 | For use in products with no added sugar only. |

| As the acid. Calcium, potassium and sodium salts only. On the ready-to-eat basis. Excluding whole fish. Excluding whole fish. Excluding liquid whey and whey products used as ingredients in infant formula. For use in milk powder for vending machines only. For use in potatoes only. For special nutritional uses only. Except for use in pickling and balsamic vinegars at 50,000 mg/kg. For use on nuts only. Equivalent to 2 mg/dm² surface application to a maximum depth of 5 mm. Equivalent to 1 mg/dm² surface application to a maximum depth of 5 mm. Equivalent to 1 mg/dm² surface application to a maximum depth of 5 mm. Except for use in shrimp (Crangon crangon and Crangon vulgaris) at 6,000 mg/kg. Except for use in shrimp (Crangon crangon and Crangon vulgaris) at 6,000 mg/kg. Use level in sausage casings; residue in sausage prepared with such casings should not exceed 100 mg/kg. For use in whipped dessert toppings other than cream only. On the treatment level basis. As a result of carryover from the ingredient. For use in sandwich spreads only. For use in in sandwich spreads only. For use in milk-sucrose mixtures used in the finished product only. Singly or in combination: benzoates and sorbates. Excluding tomato-based sauces. Excluding tomato-based sauces. Excluding natural wine produced from Vitis vinifera grapes. For use in loganiza (fresh, uncured sausage) only. For use in surimi and fish roe products only. On the dried weight basis of the high intensity sweetener. On the final cocoa and chocolate product basis. | 69 | For use as a carbonating agent only. |
|--|----|--|
| 72 On the ready-to-eat basis. 73 Excluding whole fish. 74 Excluding liquid whey and whey products used as ingredients in infant formula. 75 For use in milk powder for vending machines only. 76 For use in potatoes only. 77 For special nutritional uses only. 78 Except for use in pickling and balsamic vinegars at 50,000 mg/kg. 79 For use on nuts only. 80 Equivalent to 2 mg/dm² surface application to a maximum depth of 5 mm. 81 Equivalent to 1 mg/dm² surface application to a maximum depth of 5 mm. 82 Except for use in shrimp (Crangon crangon and Crangon vulgaris) at 6,000 mg/kg. 83 L(+)-form only. 84 For use in products for infants over 1 year of age only. 85 Use level in sausage casings; residue in sausage prepared with such casings should not exceed 100 mg/kg. 86 For use in whipped dessert toppings other than cream only. 87 On the treatment level basis. 88 As a result of carryover from the ingredient. 89 For use in sandwich spreads only. 90 For use in milk-sucrose mixtures used in the finished product only. 91 Singly or in combination: benzoates and sorbates. 92 Excluding tomato-based sauces. 93 Excluding tomato-based sauces. 94 For use in loganiza (fresh, uncured sausage) only. 95 For use in surimi and fish roe products only. 96 On the dried weight basis of the high intensity sweetener. 97 On the final cocoa and chocolate product basis. 98 For use in dust control only. | 70 | As the acid. |
| Excluding whole fish. Excluding liquid whey and whey products used as ingredients in infant formula. For use in milk powder for vending machines only. For use in potatoes only. For special nutritional uses only. Except for use in pickling and balsamic vinegars at 50,000 mg/kg. For use on nuts only. Equivalent to 2 mg/dm² surface application to a maximum depth of 5 mm. Equivalent to 1 mg/dm² surface application to a maximum depth of 5 mm. Equivalent to 1 mg/dm² surface application to a maximum depth of 5 mm. Except for use in shrimp (Crangon crangon and Crangon vulgaris) at 6,000 mg/kg. Except for use in froducts for infants over 1 year of age only. Use level in sausage casings; residue in sausage prepared with such casings should not exceed 100 mg/kg. For use in whipped dessert toppings other than cream only. On the treatment level basis. As a result of carryover from the ingredient. For use in sandwich spreads only. For use in milk-sucrose mixtures used in the finished product only. Singly or in combination: benzoates and sorbates. | | products covered by the standard for desiccated coconut. |
| 219 | Except for use in non-alcoholic aniseed-based, coconut-based, and |
| | almond-based drinks at 5,000 mg/kg. |
| 220 | For use in flavoured products heat treated after fermentation only. |
| 221 | For use in potato dough and pre-fried potato slices only. |
| 222 | For use in collagen-based casings with a water activity greater than |
| | 0.6 only. |
| 223 | Except for use in products containing added fruits, vegetables, or |
| | meats at 3,000 mg/kg. |
| 224 | Excluding aromatized beer. |
| 225 | Except for use in self-raising flour at 12,000 mg/kg. |
| 226 | Except for use as a meat tenderizer at 35,000 mg/kg. |
| 227 | For use in sterilized and UHT treated milks only. |
| 228 | Except for use to stabilize higher protein liquid whey used for further |
| | processing into whey protein concentrates at 1,320 mg/kg. |
| 229 | For use as a flour treatment agent, raising agent or leavening agent |
| | only. |
| 230 | For use as an acidity regulator only. |
| 231 | For use in flavoured fermented milks and flavoured fermented milks |
| | heat treated after fermentation only. |
| 232 | For use in vegetable fats conforming to the standard for edible fats |
| | and oils not covered by individual standards only. |
| 233 | As nisin. |
| 234 | For use as a stabilizer or thickener only. |
| 235 | For use in reconstituted and recombined products only. |
| 236 | Excluding products conforming to the standard for cream and |
| | prepared creams (reconstituted cream, recombined cream, |
| | prepackaged liquid cream). |
| 237 | Excluding products conforming to the standard for processed cereal- |
| | based foods for infants and young children |
| 238 | Except for use in products corresponding to the standard for |
| | processed cereal-based foods for infants and young children) at |
| | GMP. |

| 239 | Excluding products conforming to the standard for canned baby foods. |
|-----|---|
| 240 | The use level is within the limit for sodium listed in the standard for |
| | canned baby foods |
| 241 | For use in surimi products only. |
| 242 | For use as an antioxidant only. |
| 243 | For use in products conforming to the standard for processed cereal- |
| | based foods for infants and young children only, as a raising agent. |
| 244 | For use in biscuit dough only. |
| 245 | For use in pickled vegetables only. |
| 246 | Singly or in combination: aluminium ammonium hydrolys (INS 523) |
| | and sodium aluminium phosphates (acidic and basic; (INS |
| | 541(i),(ii)). |
| 247 | For use in kuzukiri and harusame (starch based products) only. |
| 248 | For use as a raising agent only. |
| 249 | For use as a raising agent in mixes for steamed breads and buns only. |
| 250 | For use in boiled mollusks and tsukudani only. |
| 251 | For use in processed hydrolys cheese only. |
| 252 | For use in self-rising flour and self-rising corn meal only. |
| 253 | For use in dry mix hot chocolate only. |
| 254 | For use in salt applied to dry salted cheeses during manufacturing |
| | only. |
| 255 | Except for use in seasonings applied to foods in food category 15.1 |
| | at 1,700 mg/kg. |
| 256 | For use in noodles, gluten-free pasta and pasta intended for |
| | hypoproteic diets only. |
| 257 | For use in shrimps and prawns only. |
| 258 | Excluding maple syrup. |
| 259 | Singly or in combination: sodium aluminosilicate (INS 554) and |
| | calcium aluminium silicate (INS 556). |
| 260 | For use in powdered beverage whiteners only. |
| 261 | For use in heat-treated buttermilk only. |
| 262 | For use in edible fungi and fungus products only. |
| 263 | Except for use in pickled fungi at 20,000 mg/kg. |
| 264 | Except for use in sterilized fungi at 5,000 mg/kg: citric acid (INS |
| | 330) and lactic acid (INS 270), singly or in combination. |

| 265 | For use in quick frozen French fried potatoes only, as a sequestrant. |
|-----|---|
| 266 | Excluding salted atlantic herring and sprat. |
| 267 | Excluding products conforming to the standard for salted fish and dried salted fish of the gadidae family of fishes, the standard for dried shark fins, the standard for crackers from marine and freshwater fish, crustaceans and molluscan shellfish, and the standard for boiled dried salted anchovies. |
| 268 | Singly or in combination: ins 471, 472a, 472b and 472c in products conforming to the standard forprocessed cereal-based foods for infants and young children. |
| 269 | Singly or in combination with other modified starches used as thickeners in products conforming to the standard for processed cereal-based foods for infants and young children. |
| 270 | For use at 60,000 mg/kg, singly or in combination with other starch thickeners in products conforming to the standard for canned baby foods. |
| 271 | For use in products conforming to the standard for canned baby foods. |
| 272 | Singly or in combination: ins 410, 412, 414, 415 and 440 at 20,000 mg/kg in gluten-free cereal based foods, and 10,000 mg/kg in other products conforming to the standard for processed cereal- based foods for infants and young children. |
| 273 | Singly or in combination: ins 410, 412, 414, 415 and 440 except for use at 20,000 mg/kg in glutenfree cereal based foods in products conforming to the standard for processed cereal-based foods for infants and young children . |
| 274 | For use at 15,000 mg/kg in products conforming to the standard for processed cereal-based foods for infants and young children. |
| 275 | For use at 1,500 mg/kg in products conforming to the standard for canned baby foods. |
| 276 | Singly or in combination with other modified starches used as thickeners in products conforming to the standard for canned baby foods. |
| 277 | Excluding virgin and cold pressed oils and products conforming to the standard for olive oils and olive pomace oils. |
| 278 | For use in whipped cream and cream packed under pressure only. |

| 279 | Except for products conforming to the standard for edible fungi and |
|-----|---|
| | fungus products. |
| 280 | For use in pickled radish only. |
| 281 | For use in fresh minced meat which contains other ingredients apart |
| | from comminuted meat only. |
| 282 | Only non-amidated pectins may be used in the standard for canned |
| | baby foods |
| 283 | For use in canned fruit-based baby foods conforming to the standard |
| | for canned baby foods only. |
| 284 | Singly or in combination: INS 1412, 1413, 1414 and 1440 in |
| | products conforming to the standard for infant formula and formulas |
| | for special medical purposes intended for infants. |
| 285 | Singly or in combination: INS 1412, 1413, 1414 and 1422 in |
| | products conforming to the standardfor follow-up formula. |
| 286 | For use in products conforming to the standard for luncheon meat |
| | andthe standard for cooked cured chopped meat. |
| 288 | For use in products conforming to the standard for cooked cured ham |
| | and cooked cured pork shoulder. |
| 289 | For use of sodium dihydrogen phosphate (INS 339(i)), disodium |
| | hydrogen phosphate (INS 339(ii)),trisodium phosphate (INS |
| | 339(iii)), potassium dihydrogen phosphate (INS 340(i)), dipotassium |
| | hydrogen phosphate (INS 340(ii)), tripotassium phosphate (INS |
| | 340(iii)), calcium dihydrogen phosphate (INS 341(i)), calcium |
| | hydrogen phosphate (INS 341(ii)), tricalcium phosphate (INS |
| | 341(iii), disodium diphosphate (INS 450(i)), trisodium diphosphate |
| | (INS 450(ii)), tetrasodium diphosphate (INS 450(iii)), tetrapotassium |
| | diphosphate (INS 450(v)), calcium dihydrogen diphosphate (INS |
| | 450(vii)), pentasodium triphosphate (INS 451(i)), pentapotassium |
| | triphosphate (INS 451(ii)), sodium polyphosphate (INS 452(i)), |
| | potassium polyphosphate (INS 452(ii)), sodium calcium |
| | polyphosphate (INS 452(iii)), calcium polyphosphate (INS 452(iv)), |
| | ammonium polyphosphate (INS 452(v)), and bone phosphate (INS |
| | 542) as humectants in products conforming to the standard for |
| | cooked cured ham and cooked cured pork shoulder. The total |
| | amount of phosphates (naturally present and added) shall not exceed |
| | 3,520 mg/kg as phosphorus. |

| 290 | For use in products conforming to the standard for luncheon meat and cooked cured chopped meat at 15 mg/kg to replace loss of colour in product with binders only. |
|-----|--|
| 291 | Except for use of beta-apo-8'-carotenal (INS 160e) and beta-apo-8'- |
| | carotenoic acid, methyl or ethyl ester (INS 160f) at 35 mg/kg. |
| 292 | Except for use in hydrolysed protein and/or amino acid-based |
| | formula at 25,000 mg/kg. |
| 293 | On the saponin basis. |
| 294 | Except for use in liquid products at 600 mg/kg as steviol equivalents. |
| 295 | For use in products conforming to the standard for canned baby |
| | foods only, as an acidity regulator. |
| 296 | Except for use in perilla in brine at 780 mg/kg. |
| 297 | The level in the ready-to-eat food shall not exceed 200 mg/kg on the |
| | anhydrous basis. |
| 298 | For use in provolone cheese only. |
| 299 | For use at 400 mg/kg as phosphorous singly or in combination in |
| | breaded or batter coating inaccordance with standard for quick |
| | frozen fish sticks (fish fingers), fish portions and fish fillets- breaded |
| | or in batter. |
| 300 | For use in salted squid only. |
| 301 | Interim maximum level. |
| 302 | For use of sodium dihydrogen phosphate (INS 339(i)), disodium |
| | hydrogen phosphate (INS 339(ii),trisodium phosphate (INS 339(iii)), |
| | potassium dihydrogen phosphate (INS 340(i)), dipotassium hydrogen |
| | phosphate (INS 340(ii)), tripotassium phosphate (INS 340(iii)), |
| | calcium dihydrogen phosphate (341(i)), calcium hydrogen phosphate |
| | (INS 341(ii)), tricalcium phosphate (INS 341(iii)), disodium |
| | diphosphate (INS 450(i)), trisodium diphosphate (INS 450(ii)), |
| | tetrasodium diphosphate(INS 450(iii)), tetrapotassium diphosphate |
| | (INS 450(v)), calcium dihydrogen diphosphate (INS 450(vii)), |
| | pentasodium triphosphate (INS 451(i)), pentapotassium triphosphate |
| | (INS 451(ii)), sodium polyphosphate (INS 452(i)), potassium |
| | polyphosphate (INS 452(ii)), sodium calcium polyphosphate (INS |
| | 452(iii)), calcium polyphosphate (INS 452(iv)), ammonium |
| | polyphosphate (INS 452(v)), and bone phosphate (INS 542) as |
| | humectants in products conforming to the standard for luncheon |

| | meat and cooked cured chopped meat at 1320 mg/kg as phosphorous. The total amount of phosphates (naturally present and added) shall not exceed 3,520 mg/kg as phosphorous. |
|----------------------|--|
| 303 | For use as a pH stabilizer in soured cream butter only. |
| 321 | For use in powdered mixes only. |
| 327 | For use in fish products cooked in soy sauce. |
| 330 | Except for use in canned products. |
| 340 | Except for products not conforming to the Codex standard for bouillons and consommés (CODEX STAN 117-1981) at 100 mg/kg. |
| ⁶⁹ [408 | Only for bakery shortening] |
| FS01 | Glucose oxidase from Aspergillus niger, A. oryzae, Penicillium chrysogenum |
| FS02 | Lipase from Aspergillus niger, A. oryzae, A. flavus, Rhizopus arrhizus, R. delemar, R. nigricans, R. niveus, Mucor javanicus, M. miehei, M. pusillus, Brevibacterium lineus, Candida lipolytica |
| FS03 | Xylanase from Aspergillus niger, Sporotrichum dimorphosporum, Streptomyces sp., Trichoderma reesei, Humicola insolens, Bacillus licheniformis |
| ³¹ [FS04a | Lactic acids, L(-) or DL malic acid and L(+) tartaric and citric acids can be only be added to musts under condition that the initial acidity content is not raised by more than 54 meq/l (i.e. 4 gm/l expressed in tartaric acid)]. |
| ⁷⁰ [FS04b | For use in pre-packed coconut water only.] |
| XS89 | Excluding products conforming to standard for luncheon meat. |
| XS96 | Excluding products conforming to the standard for cooked cured ham. |
| XS97 | Excluding products conforming to the standard for cooked cured pork shoulder. |
| XS98 | Excluding products conforming to the standard for cooked cured chopped meat. |

| ⁷³ [XS243 | Excluding products conforming to the standard for fermented milks] |
|----------------------|--|
| XT99 | In case of thermally processed fruit beverages/ fruit drinks/ready-to- |
| | serve fruit beverages, half of the recommended maxiumum level is |
| | permitted |
| XT100 | 70 mg/kg for thermally processed fruit beverages/ fruit drinks/ready- |
| | to- serve fruit beverages |
| XT101 | 300 mg/kg for thermally processed fruit beverages/ fruit |
| | drinks/ready-to- serve fruit beverages |
| XT102 | On dilution except in cordial and barley water |
| ⁵² [323 | For use as firming agent |
| 348 | Singly or in combination: Sucrose esters of fatty acids (INS 473), |
| | sucrose oligoesters, type and type II (INS 473a) and sucroglycerides |
| | (INS 474) |
| ⁸¹ [358 | Except for use in fish oils at 6,000 mg/kg, singly or in combination] |
| 359 | Excluding dairy fat spreads with ≥ 70% milk fat content |
| 360 | In dairy fat spreads limited to products with < 70% fat content or |
| | baking purposes only. |
| 363 | For use at 50,000 mg/kg for emulsified oils used in the production of |
| | noodles or bakery products. |
| 366 | 10,000 mg/kg in imitation chocolate with >5% water content. |
| 367 | For use at 10,000 mg/kg in candy containing not less than 10% oil |
| 368 | For use at 10,000 mg/kg in whipped decorations |
| 389 | Except for use at 500 mg/kg in products containing nut paste |
| XS 86 | Excluding products conforming to the Standard for Cocoa Butter |
| XS 87 | Excluding products conforming to the Standard for Chocolate and |
| | Chocolate Products |
| XS 105 | Excluding products conforming to the Standard for Cocoa Powders |
| | (Cocoas) and Dry Mixtures of Cocoa and Sugars |
| XS141 | Excluding products conforming to the Standard for Cocoa (Cacao) |
| | Mass (Cocoa/chocolate liquor) and Cocoa Cake |
| XS240 | Excluding products conforming to the Standard for Aqueous |
| | Coconut Products |
| XS314R | Excluding products conforming to the Standard for Date Paste] |

GMP Table Provisions For all Food Categories

The following additives, as indicated may be used in all food categories (except those categories listed in the 'Annex to GMP' list) under the conditions of Good Manufacturing Practice (GMP) as outlined in the 3.1(8)

| INS No. | Food Additive |
|-----------|--|
| 260 | Acetic acid, glacial |
| 472a | Acetic and fatty acid esters of glycerol |
| 1422 | Acetylated distarch adipate |
| 1414 | Acetylated distarch phosphate |
| 1451 | Acetylated oxidized starch |
| 1401 | Acid-treated starch |
| 406 | Agar |
| 400 | Alginic acid |
| 1402 | Alkaline treated starch |
| 403 | Ammonium alginate |
| 503(i) | Ammonium carbonate |
| 510 | Ammonium chloride |
| 503(ii) | Ammonium hydrogen carbonate |
| 527 | Ammonium hydroxide |
| 1100(i) | alpha-Amylase from Aspergillus oryzae var. |
| 1100(iv) | alpha-Amylase from Bacillus megaterium expressed in Bacillus |
| | subtilis |
| 1100(v) | alpha-Amylase from Bacillus stearothermophilus expressed in |
| | Bacillus subtilis |
| 1100(ii) | alpha-Amylase from Bacillus stearothermophilus |
| 1100(iii) | alpha-Amylase from Bacillus subtilis |
| 300 | Ascorbic acid, L- |
| 162 | Beet red |
| 1403 | Bleached starch |
| 1101(iii) | Bromelain |
| 629 | Calcium 5'-guanylate |
| 633 | Calcium 5'-inosinate |
| 634 | Calcium 5'-ribonucleotides |
| 263 | Calcium acetate |
| 404 | Calcium alginate |

| 302 | Calcium ascorbate |
|----------|--|
| 170(i) | Calcium carbonate |
| 509 | Calcium chloride |
| 623 | Calcium di-L-glutamate |
| 578 | Calcium gluconate |
| 526 | Calcium hydroxide |
| 327 | Calcium lactate |
| 352(ii) | Calcium malate, DL- |
| 529 | Calcium oxide |
| 282 | Calcium propionate |
| 552 | Calcium silicate |
| 516 | Calcium sulfate |
| 150a | Caramel I – plain caramel |
| 1100(vi) | Carbohydrase from Bacillus licheniformis |
| 290 | Carbon dioxide |
| 410 | Carob bean gum |
| 407 | Carrageenan |
| 427 | Cassia gum |
| 140 | Chlorophylls |
| 330 | Citric acid |
| 472c | Citric and fatty acid esters of glycerol |
| 468 | Cross-linked sodium carboxymethyl cellulose (Cross-linked- |
| | cellulose gum) |
| 424 | Curdlan |
| 457 | Cyclodextrin, alpha- |
| 458 | Cyclodextrin, gamma- |
| 1504(i) | Cyclotetraglucose |
| 1504(ii) | Cyclotetraglucose syrup |
| 1400 | Dextrins, roasted starch |
| 628 | Dipotassium 5'-guanylate |
| 627 | Disodium 5'-guanylate |
| 631 | Disodium 5'-inosinate |
| 635 | Disodium 5'-ribonucleotides |
| 1412 | Distarch phosphate |
| 315 | Erythorbic acid (Isoascorbic acid) |
| 968 | Erythritol |

| 462 | Ethyl cellulose | | | | |
|--------------|--|--|--|--|--|
| 467 | Ethyl hydroxyethyl cellulose | | | | |
| 297 | Fumaric acid | | | | |
| 418 | Gellan gum | | | | |
| 575 | Glucono delta-lactone | | | | |
| 1102 | Glucose oxidase (Note FS01) Glutamic acid L(+)- | | | | |
| 620 | Glutamic acid, L(+)- | | | | |
| 422 | Glycerol Glycerol | | | | |
| 626 | Guanylic acid, 5'- | | | | |
| 412 | Guar gum | | | | |
| 414 | Gum arabic (Acacia gum) | | | | |
| 507 | Hydrochloric acid | | | | |
| 463 | Hydroxypropyl cellulose | | | | |
| 1442 | Hydroxypropyl distarch phosphate | | | | |
| 464 | Hydroxypropyl methyl cellulose | | | | |
| 1440 | Hydroxypropyl starch | | | | |
| 630 | Inosinic acid, 5'- | | | | |
| 953 | Isomalt (Hydrogenated isomaltulose) | | | | |
| 416 | Karaya gum | | | | |
| 425 | Konjac flour | | | | |
| 270 | Lactic acid, L-, D- and DL- | | | | |
| 472b | Lactic and fatty acid esters of glycerol | | | | |
| 966 | Lactitol | | | | |
| 322(i), (ii) | Lecithins | | | | |
| 1104 | Lipases (Note FS02) | | | | |
| 160d(iii) | Lycopene, Blakeslea trispora | | | | |
| 160d(i) | Lycopene, synthetic | | | | |
| 160d(ii) | Lycopene, tomato | | | | |
| 504(i) | Magnesium carbonate | | | | |
| 511 | Magnesium chloride | | | | |
| 625 | Magnesium di-L-glutamate | | | | |
| 580 | Magnesium gluconate | | | | |
| 528 | Magnesium hydroxide | | | | |
| 504(ii) | Magnesium hydroxide carbonate | | | | |
| 329 | Magnesium lactate, DL- | | | | |
| 530 | Magnesium oxide | | | | |

| 82[470 (iii) Magnesium stearate] 518 Magnesium sulfate 296 Malic acid, DL- 965(i) Maltitol 965(ii) Maltitol syrup 421 Mannitol 461 Methyl cellulose 465 Methyl ethyl cellulose 460(i) Microcrystalline cellulose (Cellulose gel) 471 Mono- and di-glycerides of fatty acids 624 Monoammonium L-glutamate 622 Monopotassium L-glutamate 621 Monosodium L-glutamate 621 Monosodium L-glutamate 1410 Monostarch phosphate 941 Nitrogen 942 Nitrous oxide 1101(ii) Papain 440 Pectins 11101(ii) Papain 1413 Phosphated distarch phosphate 1200 Polydextroses 964 Polyglycitol syrup 1202 Polyvinylpyrrolidone, insoluble 632 Potassium 5'-inosinate 261 Potassium acetates 402 Potassium acetates 402 Potassium alginate 303 Potassium carbonate 501(i) Potassium carbonate 508 Potassium carbonate 577 Potassium gluconate 501(ii) Potassium hydrogen carbonate 515(ii) Potassium hydrogen sulfate 525 Potassium hydrogen sulfate | 553(i) | Magnesium silicate, synthetic | | | | |

ANNEX TO GMP Table

Food Categories or Individual Food Items where GMP Table shall not apply

| Sr. | Category | Food category | | | | | |
|-----|----------|--|--|--|--|--|--|
| No | number | | | | | | |
| 1. | 1.1.1 | Milk and buttermilk (plain) (excluding heat-treated buttermilk) | | | | | |
| 2. | 1.1.1.1 | Milk (plain) | | | | | |
| 3. | 1.1.1.2 | Buttermilk (plain) | | | | | |
| 4. | 1.2 | Fermented and renneted milk products (plain) excluding food category 1.1.2 (dairy based drinks) | | | | | |
| 5. | 1.2.1 | Fermented and renneted milk products (plain), excluding food category 1.1.2 (dairy-based drinks) | | | | | |
| 6. | 1.2.1.1 | Fermented milks (plain), not heat-treated after fermentation | | | | | |
| 7. | 1.2.1.2 | Fermented milks (plain), heat-treated after fermentation | | | | | |
| 8. | 1.2.2 | Renneted milk (plain) | | | | | |
| 9. | 1.4.1 | Pasteurized cream (plain) | | | | | |
| 10. | 1.4.2 | Sterilized and UHT creams, whipping or whipped creams, and reduced fat creams (plain) | | | | | |
| 11. | 1.6.3 | Whey Cheese | | | | | |
| 12. | 1.6.6 | Whey protein cheese | | | | | |
| 13. | 1.8.2 | Dried whey and whey products, excluding whey cheese | | | | | |
| 14. | 2.1 | Fats and oils essentially free from water | | | | | |
| 15. | 2.1.1 | Butter oil, anhydrous milkfat, ghee | | | | | |
| 16. | 2.1.2 | Vegetable oils and fats | | | | | |

| Sr. | Category | Food category | | | | |
|-----|----------|---|--|--|--|--|
| No | number | | | | | |
| 17. | 2.1.3 | Lard, tallow, fish oil, and other animal fats | | | | |
| 18. | 2.2.1 | Butter | | | | |
| 19. | 4.1.1 | Fresh fruit | | | | |
| 20. | 4.1.1.1 | Untreated fresh fruit | | | | |
| 21. | 4.1.1.2 | Surface-treated fresh fruit | | | | |
| 22. | 4.1.1.3 | ⁵² [Peeled or cut, minimally processed fruit] | | | | |
| 23. | 4.2.1 | Fresh vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds | | | | |
| 24. | 4.2.1.1 | Untreated fresh vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes [(including soybeans)], and aloe vera), seaweeds, and nuts and seeds | | | | |
| 25. | 4.2.1.2 | Surface-treated fresh vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds | | | | |
| 26. | 4.2.1.3 | 52[Peeled, cut or shredded minimally processed vegetables ((including mushrooms and fungi, roots and tubers, fresh pulses and legumes, and aloe vera) sea weeds, nuts and seeds)] | | | | |
| 27. | 4.2.2.1 | Frozen vegetables (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), seaweeds, and nuts and seeds | | | | |
| 28. | 4.2.2.7 | Fermented vegetable (including mushrooms and fungi, roots and tubers, pulses and legumes, and aloe vera), and seaweed products, excluding fermented soybean products of food categories 6.8.6, 6.8.7, 12.9.1, 12.9.2.1 and 12.9.2.3 | | | | |

| Sr. | Category | Food category | | | |
|-----|----------|---|--|--|--|
| No | number | | | | |
| 29. | 6.1 | Whole, broken or flaked grain, including rice | | | |
| 30. | 6.2 | Flours and starches (including soybean powder) | | | |
| 31. | 6.2.1 | Flours | | | |
| 32. | 6.2.2 | Starches | | | |
| 33. | 6.4.1 | Fresh pastas and noodles and like products | | | |
| 34. | 6.4.2 | Dried pastas and noodles and like products | | | |
| 35. | 8.1 | Fresh meat, poultry, and game | | | |
| 36. | 8.1.1 | Fresh meat, poultry, and game, whole pieces or cuts | | | |
| 37. | 8.1.2 | Fresh meat, poultry, and game, comminuted | | | |
| 38. | 9.1 | Fresh fish and fish products, including molluscs, crustaceans and echinoderms | | | |
| 39. | 9.1.1 | Fresh fish | | | |
| 40. | 9.1.2 | Fresh mollusks, crustaceans, and echinoderms | | | |
| 41. | 9.2 | Processed fish and fish products, including molluscs, crustaceans and echinoderms | | | |
| 42. | 9.2.1 | Frozen fish, fish fillets, and fish products, including mollusks, crustaceans, and echinoderms | | | |
| 43. | 9.2.2 | Frozen battered fish, fish fillets, and fish products, including mollusks, crustaceans, and echinoderms | | | |
| 44. | 9.2.3 | Frozen minced and creamed fish products, including mollusks, crustaceans, and echinoderms | | | |
| 45. | 9.2.4 | Cooked and/or fried fish and fish products, including mollusks, crustaceans, and echinoderms | | | |
| 46. | 9.2.4.1 | Cooked fish and fish products | | | |

| Sr. | Category | Food category | | | | | |

Sampling Plan:

The terms n, c, m and M used in this standard have the following meaning:

n = Number of units comprising a sample.

c = Maximum allowable number of units having microbiological counts above m.

m = Microbiological limit that may be exceeded number of units c.

7 | Version 1 (01.09.2023)

Product Definitions:

- (1) Chilled/Frozen Finfish includes clean and wholesome finfish, which are either in raw, chilled or frozen condition and handled in accordance with good manufacturing practices. Chilling is the process of cooling fish or fish products to a temperature approaching that of melting ice. Chilling can be achieved either by using ice, chilled water, ice slurries of both seawater and freshwater or refrigerated seawater. Similarly, freezing is the process which is sufficient enough to reduce the temperature of the whole product to a level low enough to preserve the inherent quality of the fish and that have been maintained at this low temperature during transportation, storage and distribution up to and including the time of final sale. Freezing process that is carried out in appropriate equipment in such a way that the range of temperature of maximum crystallization is passed quickly. The quick freezing process shall not be regarded as complete unless and until the product temperature reached –18°C (0°F) or lower at the thermal centre after thermal stabilization.
- (2) Chilled/Frozen Crustaceans includes clean, whole or peeled crustaceans (shrimp/prawn, crabs and lobster) which are either in raw, chilled or frozen condition and handled in accordance with good manufacturing practices.
- (3) Chilled/Frozen Cephalopods includes cleaned, whole or de-skinned cephalopods (squid, cuttlefish and octopus) which are either in raw, chilled or frozen condition and handled in accordance with good manufacturing practices.
- (4) Live Bivalve Molluscs includes Oyster, Clam, Mussel, Scallop, Abalone which are alive immediately prior to consumption. Presentation includes the shell. Live bivalve molluscs are harvested alive from a harvesting area either approved for direct human consumption or classified to permit harvesting for an approved method of purification, like relaying or depuration, prior to human consumption. Both relaying and depuration must be subject to appropriate controls implemented by the official agency having jurisdiction.
- (5) Chilled/Frozen Bivalves includes clean, whole or shucked bivalves, which are live either in chilled or frozen condition and handled in accordance with good manufacturing practices. This product category includes filter feeding aquatic animals such as oysters, mussels, clams, cockles and scallops.

- (6) Frozen cooked Crustaceans or Frozen heat shucked Mollusca means clean, whole or peeled crustaceans, which are cooked at a defined temperature and time and subsequently frozen. Cooking of crustaceans must be designed to eliminate six log reduction of most heat resistant vegetative bacteria i.e. *Listeria monocytogenes*. Frozen heat shucked mollusca includes bivalves where meat is removed from the shell by subjecting the animals to mild heat before shucking to relax the adductor muscle and subsequently frozen.
- (7) Dried or Salted and Dried fishery Products means the product prepared from fresh or wholesome finfish or shellfish after drying with or without addition of salt. The fish shall be bled, gutted, beheaded, split or filleted and washed prior to salting and drying. Salt used to produce salted fish shall be clean, free from foreign matter, and has no visible signs of contamination with dirt, oil, bilge or other extraneous materials.
- (8) Thermally Processed Fishery Products means the product obtained by application of heat or temperature for sufficient time to achieve commercial sterility in hermetically sealed containers.
- (9) Fermented Fishery Products includes any fish product that has undergone degradative changes through enzymatic or microbiological activity either in presence or absence of salt. Non-traditional products manufactured by accelerated fermentation, acid ensilage and chemical hydrolysis also belong to this category.
- (10) Smoked Fishery Products means fish or fishery product subjected to a process of treatment with smoke generated from smouldering wood or plant materials. Here the product category refers to hot smoked fish where fish is smoked at an appropriate combination of temperature and time sufficient to cause the complete coagulation of the proteins in the fish flesh.
- (11) Accelerated Freeze dried Fishery Products means fish, shrimp or any fishery product subjected to rapid freezing, followed by drying under high vacuum so as to remove the water by sublimation to a final moisture content of less than two percent.
- (12) Fish Mince/Surimi and analogues means comminuted, mechanically removed meat which have been separated from and are essentially free from bones, viscera and skin. Surimi is the stabilized myofibrillar proteins obtained from mechanically deboned fish flesh that is washed with water and blended with cryoprotectants. Surimi analogues are variety of imitation products produced from surimi with addition of ingredients and flavor.
- (13) Fish Pickle means an oily, semi-solid product with spices and acidic taste obtained from maturation of partially fried fish with vinegar. It is produced by frying edible portions of fish, shrimp or mollusc, followed by partial cooking with spices, salt and oil and maturing for 1-3 days with added organic acids. The product is intended for direct human consumption as a seasoning, or condiment for food.

- (14) Battered and Breaded Fishery Products include fish portions, fillets or mince coated with batter and/or breading. Batter means liquid preparation from ground cereals, spices, salt, sugar and other ingredients and/or additives for coating. Typical batter types are non-leavened batter and leavened batter. Breading means dry breadcrumbs or other dry preparations mainly from cereals with colourants and other ingredients used for the final coating of fishery products.
- (15) Convenience Fishery Products are tertiary food products made of fish, which are in ready to eat form and also includes snack based items prepared from fish and fishery products meant for direct human consumption such as extruded fishery products, fried items namely fish wafers, crackers, fish cutlets, fish burgers and other such products. These products can be consumed directly after minimal handling and processing. This category includes Sous-vide cooked products, surimi-based products cooked (in-pack), pasteurized crab meat, pasteurized molluscs which are distributed as refrigerated, but meant for direct human consumption with minimal or no cooking.
- (16) Powdered Fish based Products include the products which are prepared from finfish/shellfish or parts thereof, with or without other edible ingredients in powdered form, suitable for human consumption. These may be consumed directly or as supplements and also after hydration and this category includes powdered and dried fish products generally used as ingredients in food preparations such as fish soup powder, fish chutney powder, ready to use fish-mix, and such other food.]

NA- Not Applicable

¹Microbiological standards shall also be applicable for proprietary dairy foods depending on their analogy as determined by FSSAI with the product categories specified in **Table 2A and 2 B**

²The microbiological specifications for ripened butter are the same as for pasteurized butter excluding the requirements of Aerobic Plate Count.

Stage where the Microbiological Standards shall apply:

The Microbiological Standards in **Table-2A** (Process Hygiene Criteria) indicate the acceptable functioning of the production process. These are not to be used as requirements for releasing the products in the market. These are indicative contamination values above which corrective actions are required in order to maintain the hygiene of the process in compliance with food law. These shall be applicable at the end of the manufacturing process.

^{63[}The Microbiological Standards in **Table-2B** (Food Safety Criteria) define the acceptability of a batch or lot and shall be met in respect of the product at the end of the manufacturing process and the products in the market during their shelf- life.]

Action in case of unsatisfactory result:

In case of non-compliance in respect of process hygiene criteria specified in **Table-2A**, the FBO shall:

- check and improve process hygiene by implementation of guidelines in Schedule 4 (Part III) of FSS (Licensing and Registration of Food Businesses) Regulations; and,
- ⁶³[Ensure that all food safety criteria as specified in Table-2B are complied with.]

The Microbiological Standards in **Table-2B** (Food Safety Criteria) define the acceptability of a batch/lot and shall be met in respect of the product for releasing it in the market. These shall be applicable to the products at the end of the manufacturing process and the products in the market during their shelf- life.

Sampling Plans and Guidelines;

<u>For Regulator</u>: The sampling for different microbiological standards with respect to the products specified in <u>Table-2A and 2B</u> shall be ensured aseptically at manufacturing units and/or at retail points, as applicable, by a trained person with specialized knowledge in the field of microbiology following guidelines in the Food Safety and Standards (Food Products and Food Additives) Regulations, 2011 and ISO: 707 (Latest version). The samples

³The yeast and mold count of 50/g as specified in dried product categories shall be applicable only to casein powder

⁴For products in this category (Infant Milk Food, Infant Formulae, Infant Milk Substitute), the *enterobacteriaceae* shall be tested. The microbiological criteria applicable is n=10; c=2; m= Absent/10g; M=Not Applicable. Method of analysis is ISO 21528-1 and 21528-2, as appropriate.

⁵The yeast and mold counts is not applicable in mold ripened cheeses

⁶The Sweetened condensed milk product shall comply accelerated storage test as per IS: 1166 (latest version)

shall be stored and transported at a temperature below 5°C (but not frozen), except the products that are recommended to be stored at room temperature by the manufacturer, to enable initiation of analysis within 24 hours of sampling. Preservatives shall not be added to sample units intended for microbiological examination. The desired number of sample units as per sampling plan given in <u>Table-2A & 2B</u> shall be taken from same batch/lot and shall be submitted to the notified laboratory. The testing in laboratory shall be ensured as per reference test methods given below in reference test methods for regulatory compliance. ⁶³[A set (n) of five samples shall be tested from three different accredited laboratories and the final decision shall be drawn based on three test results. There will be no provision for retesting or re-sampling for microbiological testing]. The final decision shall be drawn based on results with no provision for retesting for microbiological parameters.

For FBO: Food Business Operator (FBO) shall perform testing as appropriate as per the microbiological standards with respect to the products specified in **Table-2A & 2B** to ensure validation and verification of compliance with the microbiological requirements. FBO shall decide themselves the necessary sampling and testing frequencies to ensure compliance with the specified microbiological requirements. FBO may use analytical methods other than those described in reference test methods given below for in-house testing only. However, these methods shall not be applicable for regulatory compliance purpose.

Sampling Plan:

The terms n,c,m and M used in this standard have the following meaning:

- n = Number of units comprising a sample.
- c = Maximum allowable number of units h

aving microbiological counts above m for 2- class sampling plan and between m and M for 3- class sampling plan.

m = Microbiological limit that separates unsatisfactory from satisfactory in a 2- class sampling plan or acceptable from satisfactory in a 3-class sampling plan.

M = Microbiological limit that separates unsatisfactor y from satisfactory in a 3-class sampling plan.

Interpretation of Results:

| 2-Class Sampling Plan (where n, c and m are specified) | 3-Class Sampling Plan (where n, c, m and M are specified) |
|---|---|
| | 1. Satisfactory, if all the values observed are \leq m |
| Satisfactory, if all the values observed are ≤ m Unsatisfactory, if one or more of the values observed | 2. Acceptable, if a maximum of c values are between m and M and the rest of the values are observed as \leq m |
| are >m or more than c values are > m | 3. Unsatisfactory, if one or more of the values observed are >M or more than c values are > m |

Reference test methods: The following test methods shall be applied as reference methods.

Reference test methods- latest version shall apply. In case where an ISO method adopted by the BIS is specified (e.g IS XXXX / ISO YYYY), latest version of the ISO method (or its BIS equivalent, if available) shall apply. ⁶³[Test methods prescribed in FSSAI Manual of Methods of Analysis of Foods (Microbiological Testing) may also be referred along with the IS/ISO methods specified for Process Hygiene Criteria and Food Safety Criteria].

NA-Not applicable

i.Definitions:

a. **Fresh**: The spices and herbs that are consumed fresh.

- b. **Dried or dehydrated**: The product obtained by drying/ removal of most of the moisture by any suitable method which ensures characteristics of fresh spices on rehydration or pre-cooking.
- c. **Ground or powdered**: Ground or powdered product obtained by grinding or crushing of clean dried/dehydrated fruits, capsules, buds, seeds, rhizomes, aril, kernel, berries and stigmas etc.
- d. Extracted: Products of the spices and herbs which are produced by extracting in a concentrated form including oleoresins.
- **e.** Wet ground (paste)/preserved or pickled: Semi solid, preserved product using brine, vinegar and other permitted preservatives or physical methods.

For detailed product definition, refer to Food Safety & Standards (Food Product Standards & Food Additives) Regulations, 2011.

ii. The category "Fresh" shall be regulated in accordance with the Good Manufacturing Practices and Code of Good Hygiene Practices notified under Schedule 4 of FSS (Licensing and Registration of Food Businesses) Regulations, 2011.

Stage where the Microbiological Standards shall apply:

The microbiological standards with respect to the product categories specified in **Table-3A** (Process Hygiene Criteria) indicate the acceptable functioning of the production process. These are not to be used as requirements for releasing the products in the market. These are indicative values above which corrective actions are required in order to maintain the hygiene of the process in compliance with food law. These shall be applicable at the end of the manufacturing process. The Microbiological Standards in **Table-3B** (Food Safety Criteria) define the acceptability of a batch/lot and shall be met in respect of the products at the end of manufacturing process and the products in the market during their shelf-life.

Action in case of unsatisfactory result:

In case of non-compliance in respect of Process Hygiene Criteria specified in **Table-3A**, the FBO shall:

- check and improve process hygiene by implementation of guidelines in Schedule 4 of FSS (Licensing and Registration of Food Businesses) Regulations; and,
- Ensure that all food safety criteria as specified in **Table -3B** are complied with.

Sampling Plans and Guidelines;

For Regulator: The sampling for different microbiological standards specified in <u>Table-3A and 3B</u> shall be ensured aseptically at manufacturing units and/or at retail points, as applicable, by a trained person with specialized knowledge in the field of microbiology following guidelines in the Food Safety and Standards (Food Products and Food Additives) Regulations, 2011 and ISO: 707 (Latest version). The samples shall be stored and transported in frozen condition at -18°C(±2°C) or under refrigerated conditions at 2-5°C as applicable except the products that are recommended to be stored at room temperature by the manufacturer to enable initiation of analysis within 24 hours of sampling. Preservatives shall not be added to sample units intended for microbiological examination. The desired number of sample units as per sampling plan given in <u>Table-3A & 3B</u> shall be taken from same batch/lot and shall be submitted to the notified laboratory. Three sets, each containing 'n' number of samples (n as defined in the sampling planeg if n=5, then total no. of samples to be drawn is 15) shall be drawn. Each of these three sets shall be tested in three different accredited laboratories. The final decision shall be based on the results of three accredited laboratories. In the case of food safety criteria (Table 8B), results from all the three laboratories should indicate compliance with specified criteria. There will be no provision for retesting or resampling for microbiological testing. The testing in laboratory shall be ensured as per reference test methods given below in reference test methods for regulatory compliance.

<u>For FBO</u>: Food Business Operator (FBO) shall perform testing as appropriate as per the microbiological standards in <u>Table-3A & 3B</u> to ensure validation and verification of compliance with the microbiological requirements. FBO shall decide themselves subject to minimum prescribed under FSSR (Licensing and Registration of Food Businesses), the necessary sampling and testing frequencies to ensure compliance with the specified microbiological requirements. FBO may use analytical methods other than those described in reference test methods given below for in-house testing only. However, these methods shall not be applicable for regulatory compliance purpose.

Sampling Plan:

The terms n, c, m and M used in this standard have the following meaning:

- n = Number of units comprising a sample.
- c = Maximum allowable number of units having microbiological counts above m for 2- class sampling plan and between m and M for 3- class sampling plan.
- m = Microbiological limit that separates unsatisfactory from satisfactory in a 2- class sampling plan or acceptable from satisfactory in a 3-class sampling plan.
- M = Microbiological limit that separates unsatisfactory from satisfactory in a 3-class sampling plan.

Interpretation of Results:

| 2-Class Sampling Plan (where n,c and m are specified) | 3-Class Sampling Plan (where n,c,m and M are specified) |
|---|---|
| | |

| 1. Satisfactory, if all the values observed are \leq m | 1. Satisfactory, if all the values observed are \leq m |
|---|--|
| 2. Unsatisfactory, if one or more of the values observed are >m. | 2. Acceptable, if a maximum of c values are between m and M. |
| | 3. Unsatisfactory, if one or more of the values observed are > M or more |
| | than prescribed c values are >m |

iii. Reference test methods: The following test methods shall be applied as reference methods. Test methods prescribed in FSSAI Manual of Method of Analysis of Foods (Microbiological Testing) may also be referred along with the IS/ISO methods specified for Process Hygiene Criteria and Food Safety Criteria. Latest version of test methods shall apply. In case where an ISO method adopted by the BIS is specified (e.g IS XXXX / ISO YYYY), latest version of the ISO method (or its BIS equivalent, if available) shall apply.

¹ Definitions of fruits and vegetables and their products

- (a) Fresh: The whole fruits and vegetables that are sold fresh.
- (b) **Cut or minimally processed and packaged including juices**: Fruits and vegetables which are washed or sanitized or peeled or cut up and made in to juice and packed.
- (c) **Fermented or pickled or acidified or with preservatives**: Fruits and vegetables including their products which are preserved using living ferments like yeast, bacterium, mold, enzyme or in brine to produce lactic acid or marinating and storing it in an acid solution, usually vinegar (acetic acid), salt and sugar.
- (d) Pasteurized Juices: Fruit and vegetable juices that are subjected to pasteurization to destroy or inactivate harmful microorganisms.

- (e) Carbonated fruit beverages (and fruit drinks): Any beverage or drink which is prepared from fruit juice and water or carbonated water and containing sugar, dextrose, invert sugar or liquid glucose either in single or in combination which may contain peel oil and fruit essences. It may also contain any other ingredients appropriate to the products.
- (f) **Frozen**: Fruits and vegetables including their products which are subjected to a freezing process and maintained at temperature of -18°C.
- (g) **Dehydrated or dried**: Fruits and vegetables including their products which are preserved by removing most of their water content following an appropriate dehydrating process.
- (h) **Thermally processed (other than pasteurization at less than 100°C)**: Fruits and vegetables including their products which are processed by heat in an appropriate manner before or after being sealed in a container so as to prevent spoilage.
- (i) **Retort processed**: Fruits and vegetables including their products which are canned or flexible packaged, processed by retorting.

For detailed product description, refer to regulation 2.3 related to Fruit & Vegetable Products of these regulations.

²The category "Fresh" shall be regulated in accordance with the Good Manufacturing Practices and Good Hygiene Practices specified under Schedule 4 of Food Safety and Standards (Licensing and Registration of Food Businesses) Regulations, 2011.

³In case of fermentation process involving yeast/ mold the respective standard for yeast and mold count does not apply.

⁴Carbonated fruit beverages and pasteurized fruit juices can be excluded for testing of *Listeria*, where the pH is below 4.4.

⁵The retort processed foods shall be tested after incubation at 37°C for 10 days and at 55°C for 7 days.

Stage where the Microbiological Standards shall apply:

The microbiological standards with respect to the products categories specified in Table-4A (Process Hygiene Criteria) indicate the acceptable functioning of the production process. These are not to be used as requirements for releasing the products in the market. These are indicative values above which corrective actions are required in order to maintain the hygiene of the process in compliance with food law. These shall be applicable at the end of the manufacturing process.

⁶³[The Microbiological Standards in Table-4B (Food Safety Criteria) define the acceptability of a batch/lot and shall be met in respect of the product at the end of the manufacturing process and the products in the market during their shelf- life.]

Action in case of unsatisfactory result:

In case of non-compliance in respect of process hygiene criteria specified in Table- 4A, the FBO shall:

- check and improve process hygiene by implementation of guidelines in Schedule 4 of FSS (Licensing and Registration of Food Businesses) Regulations; and,
- Ensure that all food safety criteria as specified in Table -4B (Food Safety Criteria) are complied with.

⁶³[Omitted]

Sampling Plans and Guidelines;

For Regulator: The sampling for different microbiological standards specified in Table-4A and 4B shall be ensured aseptically at manufacturing units and/or at retail points, as applicable, by a trained person with specialized knowledge in the field of microbiology following guidelines in the Food Safety and Standards (Food Products and Food Additives) Regulations, 2011 and ISO: 707 (Latest version). The samples shall be stored and transported in frozen condition at -18°C (±2°C) or under refrigerated conditions at 2-5°C as applicable except the products that are recommended to be stored at room temperature by the manufacturer to enable initiation of analysis within 24 hours of sampling. Preservatives shall not be added to sample units intended for microbiological examination. The desired number of sample units as per sampling plan given in Table-4A & 4B shall be taken from same batch/lot and shall be submitted to the notified laboratory. ⁶³[A set (n) of five samples shall be tested from three different accredited laboratories and the final decision shall be drawn based on three test results. There will be no provision for retesting or re-sampling for microbiological testing.] The testing in laboratory shall be ensured as per reference test methods given below in reference test methods for regulatory compliance.

For FBO: Food Business Operator (FBO) shall perform testing as appropriate as per the microbiological standards in <u>Table-4A & 4B</u> to ensure validation and verification of compliance with the microbiological requirements. FBO shall decide themselves the necessary sampling and testing frequencies to ensure compliance with the specified microbiological requirements. FBO may use analytical methods other than those described in reference test methods given below for in-house testing only. However, these methods shall not be applicable for regulatory compliance purpose.

Sampling Plan:

The terms n, c, m and M used in this standard have the following meaning:

n = Number of units comprising a sample.

- c = Maximum allowable number of units having microbiological counts above m for 2- class sampling plan and between m and M for 3- class sampling plan.
- m = Microbiological limit that separates unsatisfactory from satisfactory in a 2- class sampling plan or acceptable from satisfactory in a 3-class sampling plan.
- M = Microbiological limit that separates unsatisfactory from satisfactory in a 3-class sampling plan.

Interpretation of Results:

| 2-Class Sampling Plan (where n, c and m are specified) | 3-Class Sampling Plan (where n, c, m and M are specified) |
|--|--|
| 3. Satisfactory, if all the values observed are ≤ m | 4. Satisfactory, if all the values observed are ≤ m |
| 4. Unsatisfactory, if one or more of the values observed are >m or more than c values are >m | 5. Acceptable, if a maximum of c values are between m and M and the rest of the values are observed as ≤m 6. Unsatisfactory, if one or more of the values observed are > M or more than c values are >m |

Reference test methods: The following test methods shall be applied as reference methods.

⁶Reference test methods- latest version shall apply. In case where an ISO method adopted by the BIS is specified (e.g IS XXXX / ISO YYYY), latest version of the ISO method (or its BIS equivalent, if available) shall apply. ⁶³[Test methods prescribed in FSSAI Manual of Methods of Analysis of Foods (Microbiological Testing) may also be referred along with the IS/ISO methods specified for Process Hygiene Criteria and Food Safety Criteria.]

¹ Definition of meat and meat products:

Definition of animal, carcass, meat food product and slaughter house are the same as provided in FSS (Food Products Standards and Food Additives) Regulations 2011. Additionally, the following definitions apply for the purpose of this regulation.

- Canned/Retorted meat product: Meat product packed in hermetically sealed containers which have been heat treated after sealing to such an extent that the product is shelf stable.
- **Chilled meat**: Fresh meat which has been washed with potable water and kept between 0-7°C.
- Cooked Meat/meat product: Meat/meat product that is subjected to heat treatment, wherein minimum thermal core temperature of 75 °C is achieved.
- Cured/pickled meat products: Product prepared after curing/pickling meat in solution containing salt, nitrate/nitrite and adjuncts for the purpose of preservation and obtaining desirable colour, flavour and shelf life.
- **Dried/Dehydrated meat/meat products**: Meat/meat products in which part of free water has been removed by evaporation or sublimation.

⁶³[\$For poultry meat the requirement shall be applicable for *Salmonella enterica* serovars Typhi, Typhimurium and Entritidis.]

- **Fermented meat product:** Chopped or ground meat products that have under gone ageing process and developed characteristics low pH, unique flavour, taste, texture and long shelf life through action of desirable microorganisms.
- **Fresh meat**: Meat that has not been treated in any way to ensure its preservation.
- **Frozen meat**: Fresh meat which has been washed with potable water, chilled and subjected to freezing in an appropriate equipment in such a way that product attains a temperature of -18°C or colder at the thermal centre after thermal stabilization.
- Raw marinated/minced/comminuted meat: meat with or without bones which has been reduced to fragments by cutting/grinding/dicing/chopping/milling and/or marinated and with or without additives.
- Semi-cooked /Smoked Meat/meat food Product: Partially heat treated and/ or smoked meat and meat product, that will require additional heat treatment before consumption.
- **Slaughter:** Means killing of an animal for food employing a human method not inconsistent with the provisions of the prevention of cruelty to Animal act, 1960 (54 of 1960) in an authorized slaughter house or abattoir where the animal is subjected to through ante- mortem and post-mortem examination".
- Raw processed whole, cut pieces or comminuted meat Products: Raw processed, whole, cut pieces bone/ boneless and comminuted meat products with or without addition of other ingredients and additives as per specified in FSSAI standards.

Stage where the Microbiological Standards shall apply:

The Microbiological Standards with respect to the product categories specified in **Table-5A** (Process Hygiene Criteria) indicate the acceptable functioning of the production process. These are not to be used as requirements for releasing the products in the market. These are indicative contamination values above which corrective actions are required in order to maintain the hygiene of the process in compliance with food law. These shall be applicable at the end of the manufacturing process.

⁶³[The Microbiological Standards in Table-5B (Food Safety Criteria) define the acceptability of a batch/lot and shall be met in respect of the product at the end of the manufacturing process and the products in the market during their shelf- life.]

Action in case of unsatisfactory result:

In case of non-compliance in respect of process hygiene criteria specified in **Table- 5A**, the FBO shall:

- check and improve process hygiene by implementation of guidelines in Schedule 4 (Part IV) of FSS (Licensing and Registration of Food Businesses) Regulations; and,
- 63[Ensure that all food safety criteria's as specified in **Table -5B** are complied with.]

² Products under categories 1-5 to be cooked to make safe before consumption.

The Microbiological Standards in **Table-5B** (Food Safety Criteria) define the acceptability of a batch/lot and shall be met in respect of the product for releasing it in the market. These shall be applicable to the products at the end of the manufacturing process and the products in the market during their shelf- life.

Sampling Plans and Guidelines;

For Regulator: The sampling for different microbiological standards with respect to the product categories specified in <u>Table-5A and 5B</u> shall be ensured aseptically at manufacturing units and/or at retail points, as applicable, by a trained person with specialized knowledge in the field of microbiology following guidelines in Food Safety and Standards (Food Products and Food Additives) Regulations, 2011 and ISO: 707 (<u>Latest version</u>). The samples shall be stored and transported at a temperature below 5°C (but not frozen), except the products that are recommended to be stored at room temperature by the manufacturer, to enable initiation of analysis within 24 hours of sampling. Preservatives shall not be added to sample units intended for microbiological examination. The desired number of samples as per sampling plan given in <u>Table-5A & 5B</u> shall be taken from same batch/lot and shall be submitted to the notified laboratory. The testing in laboratory shall be ensured as per reference test methods given below in reference test methods for regulatory compliance. ^{63[A]} Set (n) of five samples shall be tested from three different accredited laboratories and the final decision shall be drawn based on three test results. There will be no provision for retesting or re-sampling for microbiological testing.] The final decision shall be drawn based on results with no provision for retesting for microbiological parameters.

<u>For FBO</u>: Food Business Operator (FBO) shall perform testing as appropriate as per the microbiological standards in <u>Table-5A & 5B</u> to ensure validation and verification of compliance with the microbiological requirements. FBO shall decide themselves the necessary sampling and testing frequencies to ensure compliance with the specified microbiological requirements. FBO may use analytical methods other than those described in reference test methods given below for in-house testing only. However, these methods shall not be applicable for regulatory compliance purpose.

Sampling Plan:

The terms n,c,m and M used in this standard have the following meaning:

- n = Number of units comprising a sample.
- c = Maximum allowable number of units having microbiological counts above m for 2- class sampling plan and between m and M for 3- class sampling plan.
- m = Microbiological limit that separates unsatisfactory from satisfactory in a 2- class sampling plan or acceptable from satisfactory in a 3-class sampling plan.

M = Microbiological limit that separates unsatisfactory from satisfactory in a 3-class sampling plan.

Interpretation of Results:

| 2-Class Sampling Plan (where n, c and m are specified) | 3-Class Sampling Plan (where n, c, m and M are specified) |
|---|--|
| | 1. Satisfactory, if all the values observed are \leq m |
| 1. Satisfactory, if all the values observed are \leq m | 2. Acceptable, if a maximum of c values are between m and M and the rest |
| 2. Unsatisfactory, if one or more of the values observed are >m | of the values are observed as \leq m |
| or more than c values are > m | 3. Unsatisfactory, if one or more of the values observed are >M or more |
| | than c values are > m |

Reference test methods- latest version shall apply. In case where an ISO method adopted by the BIS is specified (e.g IS XXXX / ISO YYYY), latest version of the ISO method (or its BIS equivalent, if available) shall apply. ⁶³[Test methods prescribed in FSSAI Manual of Methods of Analysis of Foods (Microbiological Testing) may also be referred along with the IS/ISO methods specified for Process Hygiene Criteria and Food Safety Criteria.]

Definition.- Definition related to egg and egg products are the same as provided in Food Safety and Standards (Food Products Standards and Food Additives) Regulations 2011. The category "Table egg" shall be regulated in accordance with the good manufacturing practices and code of good hygiene practices notified under Schedule 4 of Food Safety and Standards (Licensing and Registration of Food Businesses) Regulations, 2011.

Stage where the Microbiological Standards shall apply.- The microbiological standards with respect to the products categories specified in **Table-8A** (Process Hygiene Criteria) indicate the acceptable functioning of the production process. These are not to be used as requirements for releasing the products in the market. These are indicative values above which corrective actions are required in order to maintain the hygiene of the process in compliance with food law. These shall be applicable at the end of the manufacturing process. The microbiological standards in Table-8B (Food Safety Criteria) define the acceptability of a batch/lot and shall be met in respect of the products at the end of the manufacturing process and the products in the market during their shelf- life.

Action in case of unsatisfactory result:

In case of non-compliance in respect of process hygiene criteria specified in **Table-8A**, the FBO shall:

- check and improve process hygiene by implementation of guidelines in Schedule 4 of Food Safety and Standards (Licensing and Registration of Food Businesses) Regulations; and,
- Ensure that all food safety criteria as specified in **Table -8B** (Food Safety Criteria) are complied with.

Sampling Plans and Guidelines

For Regulator.- The sampling for different microbiological standards specified in Table-8A and 8B shall be ensured aseptically at manufacturing units and/or at retail points, as applicable, by a trained person with specialized knowledge in the field of microbiology following guidelines in the Food Safety and Standards (Food Products and Food Additives) Regulations, 2011 and ISO:707 (Latest version). The samples shall be stored and transported in frozen condition at -18°C(±2°C) or under refrigerated conditions at 2-5°C as applicable except the products that are recommended to be stored at room temperature by the manufacturer to enable initiation of analysis within 24 hours of sampling. Preservatives shall not be added to sample units intended for microbiological examination. The desired number of sample units as per sampling plan given in Table-8A and 8B shall be taken from same batch/lot and shall be submitted to the notified laboratory. Three sets, each containing 'n' number of samples (n as defined in the sampling plan eg if n=5, then total number of samples to be drawn is 15) shall be drawn. Each of these three sets shall be tested in three different accredited laboratories. The final decision shall be based on the results of three accredited laboratories. In the case of food safety criteria (Table 8B), results from all the three laboratories should indicate compliance with specified criteria. There will be no provision for retesting or resampling for microbiological testing. The testing in laboratory shall be ensured as per reference test methods given below in reference test methods for regulatory compliance.

For FBO.- Food Business Operator (FBO) shall perform testing as appropriate as per the microbiological standards in <u>Table-8A and 8B</u> to ensure validation and verification of compliance with the microbiological requirements. FBO shall decide themselves subject to minimum prescribed under FSSR (Licensing and Registration of Food Businesses), the necessary sampling and testing frequencies to ensure compliance with the specified microbiological requirements. FBO may use analytical methods other than those described in reference test methods given below for in-house testing only. However, these methods shall not be applicable for regulatory compliance purpose.

Sampling Plan.-

The terms n, c, m and M used in this standard have the following meaning:

- n = Number of units comprising a sample.
- c = Maximum allowable number of units having microbiological counts above m for 2- class sampling plan and between m and M for 3- class sampling plan.
- m = Microbiological limit that separates unsatisfactory from satisfactory in a 2- class sampling plan or acceptable from satisfactory in a 3-class sampling plan.

M = Microbiological limit that separates unsatisfactory from satisfactory in a 3-class sampling plan.

Interpretation of Results:

| 2-Class Sampling Plan (where n,c and m are specified) | 3-Class Sampling Plan (where n,c,m and M are specified) |
|---|---|
| Satisfactory, if all the values observed are ≤ m Unsatisfactory, if one or more of the values observed are >m | Satisfactory, if all the values observed are ≤ m Acceptable, if a maximum of c values are between m and M and the rest of the values are observed as ≤m Unsatisfactory, if one or more of the values observed are > M or more than prescribed c values are >m |

Reference test methods: The following test methods shall be applied as reference methods. Test methods prescribed in FSSAI Manual of Method of Analysis of Foods (Microbiological Testing) may also be referred along with the IS/ISO methods specified for Process Hygiene Criteria and Food Safety Criteria. Latest version of test methods shall apply. In case where an ISO method adopted by the BIS is specified (e.g. IS XXXX / ISO YYYY), latest version of the ISO method (or its BIS equivalent, if available) shall apply.

Definitions

Definitions related to Cereal and Cereal Products are as provided in FSS (Food Products Standards and Food Additives) Regulations 2011.

Stage where the Microbiological Standards shall apply:

The microbiological standards with respect to the product categories specified in **Table-9A** (Process Hygiene Criteria) indicate the acceptable functioning of the production process. These are not to be used as requirements for releasing the products in the market. These are indicative values above which corrective actions are required in order to maintain the hygiene of the process in compliance with the food law. These shall be applicable at the end of the manufacturing process. The Microbiological Standards in **Table-9B** (Food Safety Criteria) define the acceptability of a batch/lot and shall be met in respect of the products at the end of the manufacturing process and the products in the market during their shelf- life.

Action in case of unsatisfactory result:

In case of non-compliance in respect of process hygiene criteria specified in **Table-9A**, the FBO shall:

• check and improve process hygiene by implementation of guidelines in Schedule 4 of FSS (Licensing and Registration of Food Businesses) Regulations; and,

• ensure that all food safety criteria as specified in **Table -9B** (Food Safety Criteria) are complied with

Sampling Plan and Guidelines:

For Regulator: The sampling for different microbiological standards specified in Table-9A and 9B shall be ensured aseptically at manufacturing units and/or at retail points, as applicable, by a trained person with specialized knowledge in the field of microbiology following guidelines in the Food Safety and Standards (Food Products and Food Additives) Regulations, 2011 and ISO: 707 (Latest version). The samples shall be stored and transported in frozen condition at -18°C (±2°C) or under refrigerated conditions at 2-5°C as applicable except the products that are recommended to be stored at room temperature by the manufacturer to enable initiation of analysis within 24 hours of sampling. Preservatives shall not be added to sample units intended for microbiological examination. The desired number of sample units as per sampling plan given in Table-9A & 9B shall be taken from same batch/lot and shall be submitted to the notified laboratory. Three sets, each containing 'n' number of samples (n as defined in the sampling plan eg if n=5, then total no. of samples is 15) shall be drawn. Each of these three sets shall be tested in three different accredited laboratories. The final decision shall be based on the results of three accredited laboratories. In the case of food safety criteria (Table 9B), results from all the three laboratories should indicate compliance with specified criteria. There will be no provision for retesting or resampling for microbiological testing. The testing in laboratory shall be done as per the methods given in the Table "Reference Test Methods"

<u>For FBO</u>: Food Business Operator (FBO) shall perform testing as appropriate as per the microbiological standards in <u>Table-9A & 9B</u> to ensure verification of compliance with the microbiological requirements. FBO shall decide themselves, subject to the minimum prescribed under FSSR (Licensing and Registration of Food Businesses), the necessary sampling and testing frequencies, to ensure compliance with the specified microbiological requirements. FBO may use analytical methods other than those described in reference test methods for in-house testing only. However, these methods shall not be applicable for regulatory compliance purpose.

Sampling Plan:

The terms n, c, m and M used in this standard have the following meaning:

n = Number of units comprising a sample.

c = Maximum allowable number of units having microbiological counts above m for 2- class sampling plan and between m and M for 3- class sampling plan.

m = Microbiological limit that separates unsatisfactory from satisfactory in a 2- class sampling plan or acceptable from satisfactory in a 3-class sampling plan.

M = Microbiological limit that separates unsatisfactory from satisfactory in a 3-class sampling plan.

Interpretation of Results:

| 2-Class Sampling Plan (where n,c and m are specified) | 3-Class Sampling Plan (where n,c,m and M are specified) |
|---|--|
| Satisfactory, if all the values observed are ≤ m Unsatisfactory, if one or more of the values observed are >m | Satisfactory, if all the values observed are ≤ m Acceptable, if a maximum of c values are between m and M Unsatisfactory, if one or more of the values observed are > M or more than prescribed c values are > m |

Reference Test Methods: The following test methods shall be applied as Reference Test Methods. Test methods prescribed in FSSAI Manual of Method of Analysis of Foods (Microbiological Testing) may also be referred along with the IS/ISO methods specified for Process Hygiene Criteria and Food Safety Criteria.

Reference test methods- latest version shall apply. In case where an ISO method adopted by the BIS is specified (e.g IS XXXX / ISO YYYY), latest version of the ISO method (or its BIS equivalent, if available) shall apply.

Note: In high value low volume (less than 100 g) and large retail pack (pack more than 1 kg) sizes, the sample plan may be modified (e.g. absence of Salmonella in 10 g or 5 g in the case of former or n number of samples to be taken from different sites of one large pack) accordingly on case to case basis with the prior approval of Food Safety and Standards Authority of India (FSSAI).

Definition

Definition related to Nutraceutical Products are the same as provided in Food Safety and Standards (Health Supplements, Nutraceuticals, Food for Special Dietary Use, Food for Special Medical Purpose, Functional Food and Novel Food) Regulations, 2016.

Stage where the Microbiological Standards shall apply:

The microbiological standards with respect to the products categories specified in **Table-10A** (Process Hygiene Criteria) indicate the acceptable functioning of the production process. These are not to be used as requirements for releasing the products in the market. These are indicative values above which corrective actions are required in order to maintain the hygiene of the process in compliance with food law. These shall be applicable at the end of the manufacturing process. The Microbiological Standards in **Table-10B** (Food Safety Criteria) define the acceptability of a batch or lot and shall be met in respect of the products at the end of the manufacturing process and the products in the market during their shelf- life.

Action in case of unsatisfactory result:

In case of non-compliance in respect of process hygiene criteria specified in Table- 10A, the Food Business Operator (FBO) shall-

- check and improve process hygiene by implementation of guidelines in Schedule 4 of Food Safety and Standards (Licensing and Registration of Food Businesses) Regulations, 2011; and
- ensure that all food safety criteria as specified in **Table -10B** (Food Safety Criteria) are complied with.

Sampling Plan and Guidelines

For Regulator: The sampling for different microbiological standards specified in <u>Table-10A and 10B</u> shall be ensured aseptically at manufacturing units and/or at retail points, as applicable, by a trained person with specialised knowledge in the field of microbiology following guidelines in the Food Safety and Standards (Food Products Standards and Food Additives) Regulations, 2011 and ISO: 17728:2015 (confirmed in 2019). The samples shall be stored and transported in frozen condition at -18° C ($\pm 2^{\circ}$ C) or under refrigerated conditions at $2-5^{\circ}$ C as applicable

except for the products that are recommended to be stored at room temperature by the manufacturer to enable initiation of analysis within 24 hours of sampling. Preservatives shall not be added to sample units intended for microbiological examination. The desired number of sample units as per sampling plan given in <u>Table-10A and 10B</u> shall be taken from same batch or lot and shall be submitted to the notified laboratories. Three sets, each containing 'n' number of samples (n as defined in the sampling plan e.g. if n=5, then total no. of samples to be drawn is 15) shall be drawn. Each of these three sets shall be tested in three different accredited laboratories. The final decision shall be based on the results of three accredited laboratories. In the case of Food Safety Criteria (Table 10B), the results from all the three laboratories should indicate compliance with the specified criteria. There will be no provision for retesting or resampling for microbiological testing. The testing in laboratory shall be ensured as per the methods given in the table "reference test methods".

<u>For FBO</u>: Food Business Operator (FBO) shall perform testing as appropriate as per the microbiological standards in <u>Table-10A & 10B</u> to ensure verification of compliance with the microbiological requirements. FBO shall decide themselves subject to minimum prescribed under Food Safety and Standards (Licensing and Registration of Food Businesses) Regulations, 2011, the necessary sampling and testing frequencies to ensure compliance with the specified microbiological requirements. FBO may use analytical methods other than those described in "reference test methods" given below for in-house testing only. However, these methods shall not be applicable for regulatory compliance purpose.

Sampling Plan:

The terms n, c, m and M used in this standard have the following meaning:

n = Number of units comprising a sample.

c = Maximum allowable number of units having microbiological counts above m for 2- class sampling plan and between m and M for 3- class sampling plan.

m = Microbiological limit that separates unsatisfactory from satisfactory in a 2- class sampling plan or acceptable from satisfactory in a 3-class sampling plan.

M = Microbiological limit that separates unsatisfactory from satisfactory in a 3-class sampling plan.

Interpretation of Results:

| 2-Class Sampling Plan (where n, c and m are specified) | 3-Class Sampling Plan (where n, c, m and M are specified) |
|---|---|
| 1. Satisfactory, if all the values observed are ≤ m | 7. Satisfactory, if all the values observed are \leq m |
| 2. Unsatisfactory, if one or more of the values observed are >m | 8. Acceptable, if a maximum of c values are between m and M. |
| | 9. Unsatisfactory, if one or more of the values observed are > M or more than |
| | prescribed c values are >m |

Reference Test Methods: The following test methods shall be applied as reference methods. Test methods prescribed in FSSAI Manual of Methods of Analysis of Foods (Microbiological Testing) may also be referred along with the IS/ISO methods specified for Process Hygiene Criteria and Food Safety Criteria. Latest version of test methods shall apply. In case where an ISO method adopted by the BIS is specified (e.g IS XXXX / ISO YYYY), latest version of the ISO method (or its BIS equivalent, if available) shall apply.

⁷¹[APPENDIX C

I. PROCESSING AIDS CATEGORIES:

- (1) Antifoaming Agents: Substances that reduce and hinder the formation of foam during processing of liquid food products.
- (2) Catalyst: Substances that increase the rate of a chemical reaction without itself undergoing any permanent chemical change.
- (3) Clarifying Agents and Filtration Agents: Substances that are used to remove suspended solids from liquids by inducing flocculation and those substances which aid in the process of filtration.
- (4) Lubricants, Release and Antistick Agents: Substances which help to reduce friction between food contact surfaces and substances that provide critical barrier between molding surface and the substrate facilitating separation of cured part from the mold.

(5) Microbial Control Agents, Microbial Nutrients and Microbial Nutrient Adjuncts

- (a) Microbial Control Agents: Substances that can be used to inactivate target organisms in the processing of foods.
- **(b) Microbial Nutrients and Microbial Nutrient Adjuncts:** Substances that can be used to enhance the growth of the microbial culture intended to be used in food processing.
- **(6) Solvent for Extraction and Processing:** Processing aids that help in the separation of a particular substance from a mixture by dissolving that substance in a solvent that will dissolve it, but which will not dissolve any other substance in the mixture.
- (7) Bleaching, Washing, Peeling and Denuding Agents: Substances that can be used in making food products white or colorless and substances that aid in surface treatment (washing, denuding and peeling) of food specified in these regulations.
- (8) Flocculating Agents: Substances that promote flocculation by forming colloids and other suspended particles in liquids to aggregate and forming a floc. Flocculants are used to improve the sedimentation or filterability of small particles.
- (9) Contact Freezing and Cooling Agents: Substances that can cause rapid freezing on contact with food.
- (10) **Desiccating Agent:** Substances that extract water and prevent the formation of lumps during manufacturing of food products. They are either soluble or insoluble substances that adsorb water due to their chemical properties.
- (11) Enzymes: These are macromolecular biological catalysts which accelerate chemical reactions in the treatment or processing of raw materials, foods, or ingredients. The enzymes may be used as a

processing aid to perform any technological purpose if the enzyme is derived from the corresponding source specified in the table.

(12) Generally permitted processing aids

This category includes processing aids which have different technological functions. They shall be used as per the conditions specified in the corresponding table under these regulations.

II. USE OF PROCESSING AIDS IN FOOD PRODUCTS:

The processing aids listed in Table 1 to Table 12 may be used in the course of manufacture of food specified in the corresponding table, provided the final food contains not more than the corresponding residue level specified in the Table.

TABLE 1: ANTIFOAMING AGENTS

| S. No. | Name of the processing aid | Product Category | Residual level (mg/kg) (Not more than) |

| 34. | Liquid paraffin (INS 905 e) | Polishing agent | Confectionery | GMP |
| 35. | Magnesium hydroxide (INS 528) | pH control agent | All foods | GMP |
| 36. | Magnesium stearate (INS 470(iii)) | Polishing agent | Confectionery | GMP |
| 37. | Mono and diglycerides of fatty acids (INS 471) | Emulsifier in extrusion | Extruded foods | GMP |
| 38. | Nicotinamide | Microbial nutrient | All foods | GMP |
| 39. | Nitrogen gas (INS 941) | Foaming agent | All foods | GMP |
| 40. | Oak dust/chips | Ageing agent | Alcoholic beverages including low alcoholic and alcohol free counterparts | GMP |
| 41. | Oxygen | Propellant | All foods | GMP |
| | (INS 948) | Aerating agent | Alcoholic beverages including low alcoholic and alcohol free counterparts | GMP |

| 42. | Paraffin | Coating agent | Cheese and cheese products | GMP |
|-----|---|--|---|-----|
| 43. | Phospholipids (INS 322 (i)) | Emulsifier, antioxidant | All foods | GMP |
| 44. | Phosphoric acid (INS 338) | Acidulant, sequestrant, synergist for antioxidants | All foods | GMP |
| | | Buffering agent | Alcoholic beverages including low alcoholic and alcohol free counterparts | GMP |
| 45. | Polyethylene glycols (INS 1521) | Carrier solvent, excipient | All foods | GMP |
| 46. | Polyglycerol esters of interesterifiedricinoleic acid (INS 476) | Emulsifier | All foods | GMP |
| 47. | Polyoxyethylene 40 stearate (INS 431) | Emulsifier | All foods | GMP |
| 48. | Polyvinyl acetate | Preparation of waxes | Cheese and cheese products | GMP |
| 49. | Potassium carbonate (INS 501(i)) | pH control agent | Cocoa mixes (powders) and cocoa mass/cake | GMP |
| 50. | Potassium dihydrogen phosphate (INS 340) | pH control agent | All foods | GMP |
| 51. | Potassium hydroxide | pH control agent | All foods | GMP |

| | (INS 525) | | | |
|-----|--|---|---|---|
| 52. | Potassium metabisulphite (INS 224) | Antioxidant | Alcoholic beverages including low alcoholic and alcohol free counterparts | Maximum usage level shall not be more than 50 mg/kg |
| 53. | Propylene glycol alginate | Stabilizer, thickener, emulsifier | All foods | GMP |
| | (INS 405) | Foam stabilizer | Alcoholic beverages including low alcoholic and alcohol free counterparts | GMP |
| 54. | Rice starch | Polishing agent | Confectionery | GMP |
| 55. | Salt (NaCl) | Ion exchange | Alcoholic beverages including low alcoholic and alcohol free counterparts | GMP |
| 56. | Silica | Anticaking agent | All foods | GMP |
| | (INS 551) | Soap absorbing agent | Edible vegetable oils | GMP |
| | | Free flowing agent | All foods | GMP |
| 57. | Sodium acid pyrophosphate (SAPP) | Prevention of darkening of frozen uncooked French fries | Frozen vegetables | GMP |
| 58. | Sodium bicarbonate (INS 500 (ii)) | pH control agent | All foods | GMP |
| 59. | Sodium calcium polyphosphate silicate | Stabilizer, leavening agent, emulsifier, | All foods | GMP |

| | (INS 452 (i)) | nutrient | | |
|-----|---------------------------------------|---------------------------------|---|---------------------------|
| 60. | Sodium carbonate (INS 500(i)) | pH control agent | All foods | GMP |
| 61. | Sodium dihydrogen phosphate (INS 339) | pH control agent | All foods | GMP |
| 62. | Sodium Hydroxide (INS 524) | pH control agent | All foods | GMP |
| 63. | Sodium Hypochlorite | Water treatment | Alcoholic beverages including low alcoholic and alcohol free counterparts | 1 (as available chlorine) |
| 64. | Sodium metabisulphite | Dough conditioner | Flour products | 60 |
| | (INS 223) | Softening agent | Corn kernel | 60 |
| | | Reducing agent | Alcoholic beverages including low alcoholic and alcohol free counterparts | GMP |
| 65. | Sodium silicate (INS 550 (i)) | Anticaking agent | All foods | GMP |
| 66. | Sodium sulphite | Dough conditioner | Flour products | 60 |
| 67. | Sulphuric Acid (INS 513) | pH control agent | All foods | GMP |
| 68. | Sulphurous acid | Softening agent | Corn kernel | GMP |
| 69. | Sulphur dioxide | Control of nitrosodimethylamine | Malting | 750 |

| | (INS 220) | in malting | | |
|-------------------|--------------------------|---|---|----------------------------------|
| 70. | Tannic Acid (INS 181) | Clarifying agent, flavouring agent, flavour adjunct | Juices | GMP |
| 71. | Vitamin B12 | Microbial nutrient | All foods | |
| 72. | Vitamin C | Microbial nutrient | All foods | |
| 73. | Yeast | Fermenting Agent | Alcoholic beverages | GMP.] |
| 74. | Zinc sulphate | Mineral Salt | including low alcoholic and alcohol free counterparts | |
| ⁸¹ [75 | Calcium hypochlorite | Disinfectant | Water treatment | 1 (as available chlorine)] |

International Numbering System (INS) for Food Additives-

The following list is only for identifying the food additive and their synonyms as published by the Codex on 23.11.2005 Codex. For the latest updates, JECFA/Codex website may be referred to (www.codexalimentarius.net, www.codexalimentarius.net/web/jecfa.jsp)

A. List sorted by INS number

| Sl. | INS | Food Additive Name | Technical functions |
|-----|---------|---------------------------------|---------------------|
| No. | Number | Food Additive Name | Technical functions |
| 1 | 2 | 3 | 4 |
| 1. | 100 | Curcumins | Colour |
| 2. | 100(i) | Curcumin | Colour |
| 3. | 100(ii) | Turmeric | Colour |
| 4. | 101 | Riboflavins | Colour |
| 5. | 101(i) | Riboflavin | Colour |
| 6. | 101(ii) | Riboflavin 5'-phosphate, sodium | Colour |
| 7. | 102 | Tartrazine | Colour |

| 8. | 103 | Alkanet | Colour |
|-----|---------|-------------------------------|--------|
| 9. | 104 | Quinoline yellow | Colour |
| 10. | 107 | Yellow 2G | Colour |
| 11. | 110 | Sunset yellow FCF | Colour |
| 12. | 120 | Carmines | Colour |
| 13. | 121 | Citrus red 2 | Colour |
| 14. | 122 | Azorubine / Carmoisine | Colour |
| 15. | 123 | Amaranth | Colour |
| 16. | 124 | Ponceau 4R | Colour |
| 17. | 125 | Ponceau SX | Colour |
| 18. | 127 | Erythrosine | Colour |
| 19. | 128 | Red 2G | Colour |
| 20. | 129 | Allurared AC/Fast Red E | Colour |
| 21. | 130 | Manascorubin | Colour |
| 22. | 131 | Patent blue V | Colour |
| 23. | 132 | Indigotine | Colour |
| 24. | 133 | Brilliant blue FCF | Colour |
| 25. | 140 | Chlorophyll | Colour |
| 26. | 141 | Copper chlorophylls | Colour |
| 27. | 141(i) | Chlorophyll copper complex, | Colour |
| 20 | 141(;;) | Chlorophyll copper complex, | Colour |
| 28. | 141(ii) | sodium and potassium Salts | Colour |
| 29. | 142 | Green S | Colour |
| 30. | 143 | Fast green FCF | Colour |
| 31. | 150a | Caramel I-plain | Colour |
| 32. | 150b | Caramel II – caustic sulphite | Colour |

| | | process | |
|-----|----------|------------------------------------|--------|
| 33. | 150c | Caramel III – ammonia process | Colour |
| | | Caramel IV-ammonia sulphite | |
| 34. | 150d | Process | Colour |
| 35. | 151 | Brilliant black PN | Colour |
| 36. | 152 | Carbon black (hydrocarbon) | Colour |
| 37. | 153 | Vegetable carbon | Colour |
| 38. | 154 | Brown FK | Colour |
| 39. | 155 | Brown HT | Colour |
| 40. | 160a | Carotenes | Colour |
| 41. | 160a(i) | Beta-carotene (synthetic) | Colour |
| 42. | 160a(ii) | Natural extracts | Colour |
| 43. | 160b | Annatto extracts | Colour |
| 44. | 160c | Paprika Oleoresins | Colour |
| 45. | 160d | Lycopene | Colour |
| 46. | 160e | Beta-apo-carotental | Colour |
| | | Beta-apo-8'-carotenic acid, methyl | |
| 47. | 160f | or ethyl ester | Colour |
| 48. | 161a | Flavoxanthin | Colour |
| 49. | 161b | Lutein | Colour |
| 50. | 161c | Krytoxanthin | Colour |
| 51. | 161d | Rubixanthin | Colour |
| 52. | 161e | Violoxanthin | Colour |
| 53. | 161f | Rhodoxanthin | Colour |
| 54. | 161g | Canthaxanthin | Colour |
| 55. | 162 | Beet red | Colour |

| 56. | 163 | Anthocyanins | Colour |
|-----|----------|----------------------------|---|
| 57. | 163(i) | Anthocyanins | Colour |
| 58. | 163(ii) | Grape skin extract | Colour |
| 59. | 163(iii) | Blackcurrant extract | Colour |
| 60. | 164 | Gardenia yellow | Colour |
| 61. | 166 | Sandalwood | Colour |
| 62. | 170 | Calcium carbonates | Surface colourant, anticaking agent, stabilizer |
| 63. | 170(i) | Calcium carbonate | anticaking agent |
| 64. | 170(ii) | Calcium hydrogen carbonate | anticaking agent |
| 65. | 171 | Titanium dioxide | Colour |
| 66. | 172 | Iron oxides | Colour |
| 67. | 172(i) | Iron oxide, black | Colour |
| 68. | 172(ii) | Iron oxide, red | Colour |
| 69. | 172(iii) | Iron oxide, yellow | Colour |
| 70. | 173 | Aluminium | Colour |
| 71. | 174 | Silver | Colour |
| 72. | 175 | Gold | Colour |
| 73. | 180 | Lithol rubine BK | Colour |
| 74. | 181 | Tannins, food grade | Colour, emulsifier, stabilizer, thickener |
| 75. | 182 | Orchil | Colour |
| 76. | 200 | Sorbic acid | Preservative |
| 77. | 201 | Sodium sorbate | Preservative |
| 78. | 202 | Potassium sorbate | Preservative |
| 79. | 203 | Calcium sorbate | Preservative |
| 80. | 209 | Heptyl p-hydroxybenzoate | Preservative |

| 81. | 210 | Benzoic acid | Preservative |
|------|-----|---------------------------------|--|
| 82. | 211 | Sodium benzoate | Preservative |
| 83. | 212 | Potassium benzoate | Preservative |
| 84. | 213 | Calcium benzoate | Preservative |
| 85. | 214 | Ethyl p-hydroxybenzoate | Preservative |
| 86. | 215 | Sodium ethyl p-hydroxybenzoate | Preservative |
| 87. | 216 | Propyl p-hydroxybenzoate | Preservative |
| 88. | 217 | Sodium propyl p-hydroxybenzoate | Preservative |
| 89. | 218 | Methyl p-hydroxybenzoate | Preservative |
| 90. | 219 | Sodium methyl p-hydroxybenzoate | Preservative |
| 91. | 220 | Sulphur dioxide | Preservative, antioxidant |
| 92. | 221 | Sodium sulphite | Preservative, antioxidant |
| 93. | 222 | Sodium hydrogen sulphite | Preservative, antioxidant |
| 94. | 223 | Sodium metabisulphite | Preservative, bleaching agent, antioxidant |
| 95. | 224 | Potassium metabisulphite | Preservative, antioxidant |
| 96. | 225 | Potassium sulphite | Preservative, antioxidant |
| 97. | 226 | Calcium sulphite | Preservative, antioxidant |
| 98. | 227 | Calcium hydrogen sulphite | Preservative, antioxidant |
| 99. | 228 | Potassium bisulphate | Preservative, antioxidant |
| 100. | 230 | Diphenyl | Preservative |
| 101. | 231 | Ortho-phenylphenol | Preservative |
| 102. | 232 | Sodium o-phenylphenol | Preservative |
| 103. | 233 | Thiabendazole | Preservative |
| 104. | 234 | Nisin | Preservative |
| 105. | 235 | Pimaricin (natamycin) | Preservative |

| 106. | 236 | Formic acid | Preservative |
|------|---------|-----------------------------|---|
| 107. | 237 | Sodium formate | Preservative |
| 108. | 238 | Calcium formate | Preservative |
| 109. | 239 | Hexamethylene tetramine | Preservative |
| 110. | 240 | Formaldehyde | Preservative |
| 111. | 241 | Gum guaicum | Preservative |
| 112. | 242 | Dimethyl dicarbonate | Preservative |
| 113. | 249 | Potassium nitrite | Preservative, colour fixative |
| 114. | 250 | Sodium nitrite | Preservative, colour fixative |
| 115. | 251 | Sodium nitrate | Preservative, colour fixative |
| 116. | 252 | Potassium nitrate | Preservative, colour fixative |
| 117. | 260 | Acetic acid, glacial | Preservative, acidity regulator |
| 118. | 261 | Potassium acetates | Preservative, acidity regulator |
| 119. | 261(i) | Potassium acetate | Preservative, acidity regulator |
| 120. | 261(ii) | Potassium diacetate | Preservative, acidity regulator |
| 121. | 262 | Sodium acetates | Preservative, acidity regulator, Sequestrant |
| 122. | 262(i) | Sodium acetate | Preservative, acidity regulator, Sequestrant |
| 123. | 262(ii) | Sodium diacetate | Preservative, acidity regulator, Sequestrant |
| 124. | 263 | Calcium acetate | Preservative, stabilizer, acidity Regulator |
| 125. | 264 | Ammonium acetate | Acidity regulator |
| 126. | 265 | Dehydroacetic acid | Preservative |
| 127. | 266 | Sodium dehydroacetate | Preservative |
| 128. | 270 | Lactic acid (L-, D—and Dl-) | Acidity regulator |

| 129. | 280 | Propionic acid | Preservative |
|------|-----|----------------------------|--------------------------------------|
| 130. | 281 | Sodium propionate | Preservative |
| 131. | 282 | Calcium propionate | Preservative |
| 132. | 283 | Potassium propionate | Preservative |
| 133. | 290 | Carbon dioxide | Carbonating agent, Packing agent |
| 134. | 296 | Malic acid (DL-L-) | Acidity regulator, flavouring agent. |
| 135. | 297 | Fumaric acid | acidity regulator |
| 136. | 300 | Ascorbic acid (L) | Antioxidant |
| 137. | 301 | Sodium ascorbate | Antioxidant |
| 138. | 302 | Calcium ascorbate | Antioxidant |
| 139. | 303 | Potassium ascorbate | Antioxidant |
| 140. | 304 | Ascorbyl palmitate | Antioxidant |
| 141. | 305 | Ascorbyl stearate | Antioxidant |
| 142. | 306 | Mixed tocopherols | Antioxidant |
| 143. | 307 | Alpha-tocopherol | Antioxidant |
| 144. | 308 | Synthetic gamma-tocopherol | Antioxidant |
| 145. | 309 | Synthetic delta-tocopherol | Antioxidant |
| 146. | 310 | Propyl gallate | Antioxidant |
| 147. | 311 | Octyl gallate | Antioxidant |
| 148. | 312 | Dodecyl gallate | Antioxidant |
| 149. | 313 | Ethyl gallate | Antioxidant |
| 150. | 314 | Guaiac resin | Antioxidant |
| 151. | 315 | Isoascorbic acid | Antioxidant |
| 152. | 316 | Sodium isoascorbate | Antioxidant |
| 153. | 317 | Potassium isoascorbate | Antioxidant |

| 154. | 318 | Calcium isoascrobate | Antioxidant |
|------|----------|-------------------------------|--|
| 155. | 319 | Tertiary butylhydroquinone | Antioxidant |
| 156. | 320 | Butylated hydroxyanisole | Antioxidant |
| 157. | 321 | Butylated hydroxytoluene | Antioxidant |
| 158. | 322 | Lecithins | Antioxidant, emulsifier |
| 159. | 323 | Anoxomer | Antioxidant |
| 160. | 324 | Ethoxyquin | Antioxidant |
| 161. | 325 | Sodium lactate | antioxidant, synergist, humectant, bulking agent |
| 162. | 326 | Potassium lactate | antioxidant, synergist, acidity Regulator |
| 163. | 327 | Calcium lactate | acidity regulator, flour treatment agent |
| 164. | 328 | Ammonium lactate | acidity regulator, flour treatment agent |
| 165. | 329 | Magnesium lactate (D-,L-) | acidity regulator, flour treatment agent |
| 166. | 330 | Citric acid | acidity regulator, synergist for Sequestrant |
| 167. | 331 | Sodium citrates | acidity regulator, sequestrant emulsifier stabilizer |
| 168. | 331(i) | Sodium dihydrogen citrate | acidity regulator, sequestrant emulsifer, stabilizer |
| 169. | 331(ii) | Disodium monohydrogen citrate | acidity regulator, stabilizer, sequestrant, emulsifier |
| 170. | 331(iii) | Trisodium citrate | acidity regulator, sequestrant, emulsifier, Stabilizer |
| 171. | 332 | Potassium citrates | acidity regulator, sequestrant, Stabilizer |
| 172. | 332(i) | Potassium dihydrogen citrate | acidity regulator, sequestrant, Stabilizer |
| 173. | 332(ii) | Tripotassium citrate | acidity regulator, sequestrant, Stabilizer |
| 174. | 333 | calcium citrates | acidity regulator, firming agent, Sequestrant |
| | | | |

| | | | acidity regulator, sequestrant, |
|------|----------|------------------------------|---|
| 175. | 334 | Tartaric acid [L(+)-] | antioxidant synergist |
| 176. | 335 | Sodium tartrates | Stabilizer, sequestrant, |
| 177. | 335(i) | Monosodium tartrate | Stabilizer, sequestrant |
| 178. | 335(ii) | Disodium tartrate | Stabilizer, sequestrant |
| 179. | 336 | Potassium tartrate | Stabilizer, sequestrant |
| 180. | 336(i) | Monopotassium tartrate | Stabilizer, sequestrant |
| 181. | 336(ii) | Dipotassium tartrate | Stabilizer, sequestrant |
| 182. | 337 | Potassium sodium tartrate | Stabilizer, sequestrant |
| 183. | 338 | Orthophosphoric acid | acidity regulator, antioxidant Synergist |
| 184. | 339 | Sodium phosphates | acidity regulator, texturizer, sequestrant, stabilizer Emulsifier, water retention agent |
| 185. | 339(i) | Monosodium orthophosphate | Acidity regulator, texturizer, Sequestrant, stabilizer, Emulsifier, water retention agent |
| 186. | 339(ii) | Disodium orthophosphate | acidity regulator, texturizer, sequestrant, stabilizer Emulsifier, water retention agent |
| 187. | 339(iii) | Trisodium orthophosphate | sequestrant, stabilizer, Emulsifier, water retention agent, acidity regulator, Texturizer |
| 188. | 340 | Potassium Phosphates | acidity regulator, texturizer, sequestrant, stabilizer, Emulsifier, water retention Agent |
| | | | acidity regulator, texturizer, |
| 189. | 340(i) | Monopotassium orthophosphate | sequestrant, stabilizer Emulsifier, water retention Agent |
| 190. | 340(ii) | Dipotassium orthophosphate | acidity regulator, texturizer, sequestrant, stabilizer, Emulsifier, water retention Agent |

| 191. | 340(iii) | Tripotassium orthophosphate | acidity regulator, texturizer, sequestrant, stabilizer, Emulsifier, water retention Agent |
|------|----------|------------------------------|---|
| 192. | 341 | Calcium phosphates | acidity regulator, texturizer, water retention agent, flour treatment agent, raising agent, firming agent, anticaking agent |
| 193. | 341(i) | Monocalcium orthophosphate | acidity regulator, texturizer, water retention agent, flour treatment agent, firming agent, anticaking agent |
| 194. | 341(ii) | Dicalcium orthophosphate | acidity regulator, texturizer, flour treatment agent, raising agent, firming agent, anticaking Agent |
| | | | acidity regulator, texturizer, water retention agent, flour |
| | | | treatment agent, firming agent, |
| 195. | 341(iii) | Tricalcium orthophosphate | anticaking agent |
| | | | acidity regulator, flour |
| 196. | 342 | Ammonium phosphates | treatment agent |
| | | | acidity regulator, flour |
| 197. | 342(i) | Monoamonium orthophosphate | treatment agent |
| | | | acidity regulator, flour |
| 198. | 342(ii) | Diammonium orthophosphate | treatment agent |
| | | | acidity regulator, anticaking |
| 199. | 343 | Magnesium phosphates | Agent |
| | | | acidity regulator, anticaking |
| 200. | 343(i) | Monomagnesium orthophosphate | Agent |
| | | | acidity regluator, anticaking |
| 201. | 343(ii) | Dimagnesium orthophosphate | Agent |

| | | | acidity regulator, anticaking |
|------|----------|-----------------------------|-------------------------------|
| 202. | 343(iii) | Trimagnesium orthophosphate | Agent |
| 203. | 344 | Lecithin citrate | Preservative |
| 204. | 345 | Magnesium citrate | acidity regulator |
| 205. | 349 | Ammonium malate | acidity regulator |
| 206. | 350 | Sodium malates | acidity regulator, humectant |
| 207. | 350(i) | Sodium hydrogen malate | acidity regulator, humectant |
| 208. | 350(ii) | Sodium malate | acidity regulator, humectant |
| 209. | 351 | Potassium malates. | acidity regulator |
| 210. | 351(i) | Potassium hydrogen malate | acidity regulator |
| 211. | 351(ii) | Potassium malate | acidity regulator |
| 212. | 352 | Calcium malates | acidity regulator |
| 213. | 352(i) | Calcium hydrogen malate | acidity regulator |
| 214. | 352(ii) | Calcium malate | acidity regulator |
| 215. | 353 | Metatartaric acid | acidity regulator |
| 216. | 354 | Calcium tartrate | acidity regulator |
| 217. | 355 | Adipic acid | acidity regulator |
| 218. | 356 | Sodium adipates | acidity regulator |
| 219. | 357 | Potassium adipates | acidity regulator |
| 220. | 359 | Ammonium adipates | acidity regulator |
| 221. | 363 | Succinic acid | acidity regulator |
| | | | acidity regulator, flavour |
| 222. | 364(i) | Monosodium succinate | Enhancer |
| | | | acidity regulator, flavour |
| 223. | 364(ii) | Disodium succinate | Enhancer |

| 224. | 365 | Sodium fumarates | acidity regulator |
|------|-----|----------------------------------|--------------------------------|
| 225. | 366 | Potassium fumarates | acidity regulator |
| 226. | 367 | Calcium fumarates | acidity regulator |
| 227. | 368 | Ammonium fumarates | acidity regulator |
| 228. | 370 | 1, 4-Heptonolactone | acidity regulator, sequestrant |
| 229. | 375 | Nicotinic acid | Colour retention agent |
| 230. | 380 | Ammonium citrates | acidity regulator |
| 231. | 381 | Ferric ammonium citrate | anticaking agent |
| | | | Thickener, gelling agent, |
| 232. | 383 | Calcium glycerophosphate | Stabilizer |
| | | | Antioxidant, Preservative, |
| 233. | 384 | Isopropyl citrates | Sequestrant |
| | | Calcium disodium ethylene- | Antioxidant, Preservative, |
| 234. | 385 | diamine-tetra-acetate | Sequestrant |
| | | Disodium ethylene-diamine-tetra- | Antioxidant, Preservative, |
| 235. | 386 | acetate | Sequestrant |
| 236. | 387 | Oxy stearin | Antioxidant, sequestrant |
| 237. | 388 | Thiodipropionic acid | Antioxidant |
| 238. | 389 | Dilauryl thiodipropionate | Antioxidant |
| 239. | 390 | Distearyl thiodipropionate | Antioxidant |
| 240. | 391 | Phytic acid | Antioxidant |
| 241. | 399 | Calcium lactobionate | Stabilizer |
| 242. | 400 | Alginic acid | Thickener, stabilizer |
| | | | Thickener, stabilizer, gelling |
| 243. | 401 | Sodium alginate | Agent |

| 244. | 402 | Potassium alginate | Thickener, stabilizer |
|------|------|----------------------------------|--------------------------------------|
| 245. | 403 | Ammonium alginate | Thickener, stabilizer |
| | | | Thickener, stabilizer, gelling |
| 246. | 404 | Calcium alginate | Agent, antifoaming agent |
| 247. | 405 | Propylene glycol alginate | Thickener, emulsifier |
| 248. | 406 | Agar | Thickener, gelling agent, Stabilizer |
| | | Carrageenan and its Na, K, | Thickener, gelling agent, |
| 249. | 407 | NH4 salts (includes furcellaran) | Stabilizer |
| 250. | 407a | Processed Euchema Seaweed (PES) | Thickener, stabilizer |
| | | | Thickener, gelling agent, |
| 251. | 408 | Bakers yeast glycan | Stabilizer |
| | | | Thickener, gelling agent, |
| 252. | 409 | Arabinogalactan | Stabilizer |
| 253. | 410 | Carob bean gum | Thickener, Stabilizer |
| 254. | 411 | Oat gum | Thickener, Stabilizer |
| | | | Thickener, Stabilizer, |
| 255. | 412 | Guar gum | Emulsifier |
| | | | Thickener, Stabilizer, |
| 256. | 413 | Tragacanth gum | Emulsifier |
| 257. | 414 | Gum arabic (acacia gum) | Thickener, Stabilizer |
| | | | Thickener, Stabilizer, |
| 258. | 415 | Xanthan gum | emulsifier, foaming agent |
| 259. | 416 | Karaya gum | Thickener, Stabilizer |
| 260. | 417 | Tara gum | Thickener, Stabilizer |
| 261. | 418 | Gellan gum | Thickener, Stabilizer, gelling |

| | | | Agent |
|------|-----|--------------------------------|------------------------------|
| | | | Thickener, Stabilizer, |
| 262. | 419 | Gum ghatti | Emulsifier |
| | | | Sweetener, Humectant, |
| | | | sequestrant, Texturizer, |
| 263. | 420 | Sorbitol and sorbitol syrup | Emulsifier |
| 264. | 421 | Mannitol | Sweetener, anticaking agent |
| 265. | 422 | Glycerol | Humectant, bodying agent |
| 266. | 424 | Curd lan | Thickener, Stabilizer |
| 267. | 425 | Konjac flour | Thickener |
| 268. | 429 | Peptones | Emulsifier |
| 269. | 430 | Polyoxyethylene (8) stearate | Emulsifier |
| 270. | 431 | Polyoxyethylene (40) stearate | Emulsifier |
| | | Polyoxyethylene (20) sorbitan | |
| 271. | 432 | Monolaurate | Emulsifier, dispersing agent |
| | | Polyoxyethylene (20) sorbitan | |
| 272. | 433 | Monoleate | Emulsifier, dispersing agent |
| | | Polyoxyethylene (20) sorbitan | |
| 273. | 434 | Monopalmitate | Emulsifier, dispersing agent |
| | | Polyoxyethylene (20) sorbitan | |
| 274. | 435 | Monostearate | Emulsifier, dispersing agent |
| | | Polyoxyethylene (20) sorbitan | |
| 275. | 436 | Tristearate | Emulsifier, dispersing agent |
| | | | Thickener, emulsifier, |
| 276. | 440 | Pectins | Stabilizer, gelling agent |
| 277. | 441 | Superglycerinated hydrogenated | Emulsifier |

| | | rapeseed oil | |
|------|----------|--------------------------------|--------------------------------|
| | | Ammonium salts of phosphatidic | |
| 278. | 442 | Acid | Emulsifier |
| 279. | 443 | Brominated vegetable oil | Emulsifier, stabilizer |
| 280. | 444 | Sucrose acetate isobutyrate | Emulsifier, stabilizer |
| 281. | 445 | Glycerol esters of wood resin | Emulsifier, stabilizer |
| 282. | 446 | Succistearin | Emulsifier |
| | | | acidity regulator, texturizer, |
| | | | sequestrant, stabilizer, |
| | | | Emulsifier, water retention |
| 283. | 450 | Diphosphates | Agent |
| | | | acidity regulator, texturizer, |
| | | | sequestrant, stabilizer, |
| | | | Emulsifier, water retention |
| 284. | 450(i) | Disodium diphosphate | Agent |
| | | | acidity regulator, texturizer, |
| | | | sequestrant, stabilizer, |
| | | | Emulsifier, water retention |
| 285. | 450(ii) | Trisodium diphosphate | Agent |
| | | | acidity regulator, texturizer, |
| | | | sequestrant, stabilizer, |
| | | | Emulsifier, water retention |
| 286. | 450(iii) | Tetrasodium diphosphate | Agent |
| | | | acidity regulator, texturizer, |
| | | | sequestrant, stabilizer, |
| 287. | 450(iv) | Dipotassium diphosphate | Emulsifier, water retention |

| | | | Agent |
|------|------------|--------------------------------|-----------------------------------|
| | | | Emulsifier, Stabilizer, acidity |

| 523 | 1101(iii) | Bromelain | tenderizer, flavour enhancer |
| | | | flour treatment agent, stabilizer, |
| 524 | 1101(iv) | Ficin | tenderizer, flavour enhancer |
| 525 | 1102 | Glucose oxidase | Antioxidant |
| 526 | 1103 | Invertases | Stabilizer |
| 527 | 1104 | Lipases | flavour enhancer |
| 528 | 1105 | Lysozyme | Preservative |
| | | | bulking agent, stabilizer, |
| 529 | 1200 | Polydextroses A and N | thickener, Humectant texturizer |
| | | | bodying agent, stabilizer, |
| | | | clarifying agent, dispersing |
| 530 | 1201 | Polyvinylpyrrolidone | Agent |
| | | | colour stabilizer, colloidal, |
| 531 | 1202 | Polyvinylpolypyrrolidone | Stabilizer |
| 532 | 1503 | Castor oil | release agent |
| 533 | 1505 | Triethyl citrate | foam stabilizer |
| 534 | 1518 | Triacetin | Humectant |
| | | | Humectant, Wetting agent, |
| 535 | 1520 | Propylene glycol | dispersing agent |
| 536 | 1521 | Polyethylene glycol | antifoaming agent |
| Supplementary List-Modified Starches | | | |
| | | Dextrins, roasted starch white | |
| 537 | 1400 | and yellow | Stabilizer, thickener, binder |
| 538 | 1401 | Acid-treated starch | Stabilizer, thickener, binder |

| 539 | 1402 | Alkaline treated starch | Stabilizer, thickener, binder | |
|-----|------|------------------------------------|--------------------------------|--|
| 540 | 1403 | Bleached starch | Stabilizer, thickener, binder | |
| 541 | 1404 | Oxidised starch | Stabilizer, thickener, binder | |
| 542 | 1405 | Starches, enzyme-treated | Thickener | |
| 543 | 1410 | Monostarch phosphate | Stabilizer, thickener, binder | |
| 544 | 1411 | Distarch glycerol | Stabilizer, thickener, binder | |
| | | Distarch phosphate esterified with | | |
| 545 | 1412 | sodium trimetaphosphate; | Stabilizer, thickener, binder | |
| 546 | 1413 | Phosphated distarch phosphate | Stabilizer, thickener, binder | |
| 547 | 1414 | Acetylated distarch phosphate | Emulsifier, thickener, binder | |
| | | Starch acetate esterified with | | |
| 548 | 1420 | Acetic anhydride | Stabilizer, thickener | |
| | | Starch acetate esterified with | | |
| 549 | 1421 | vinyl acetate | Stabilizer, thickener | |
| | | | Stabilizer, thickener, binder, | |
| 550 | 1422 | Acetylated distarch adipate | Emulsifier | |
| 551 | 1423 | Acetylated distarch glycord | Stabilizer, thickener | |
| | | | Stabilizer, thickener, binder, | |
| 552 | 1440 | Hydroxypropyl starch | Emulsifier | |
| 553 | 1442 | Hydroxypropyl distarch phosphate | Stabilizer, thickener | |
| 554 | 1443 | Hydroxypropyl distarch | Stabilizer, thickener | |
| 555 | 1450 | Starch sodium octenyl succinate | Stabilizer, thickener, binder | |

B.List sorted in alphabetical Order-

| Sl. No. | INS Number | Food Additive Name | Technical functions |
|---------|------------|--------------------|--------------------------------|
| 1. | 370 | 1,4-Heptonolactone | acidity regulator, sequestrant |

| | | | colour retention agent, |
|-----|------------------|---------------------------------|---------------------------------|
| 2. | 586 | 4-Hexylresorcinol | Antioxidant |
| 3. | 950 | Acesulfame potassium | Sweetener, flavour enhancer |
| 4. | 260 | Acetic acid, glacial | Preservative, acidity regulator |
| | | Acetic and fatty acid esters of | Emulsifier, Stabilizer, |
| 5. | 472a | Glycerol | Sequestrant |
| 6. | 929 | Acetone peroxide | flour treatment agent |
| 7. | 355 | Adipic acid | Acidity regulator |
| | | | Thickener, gelling agent, |
| 8. | 406 | Agar | Stabilizer |

| 86. | 450 (vii) | Calcium dihydrogen diphosphate | regulator water retention agent |
| | | Calcium disodium ethylene- | Antioxidant, Preservative, |
| 87. | 385 | diamine-tetra-acetate | Sequestrant |
| 88. | 538 | Calcium ferrocyanide | anticaking agent |
| 89. | 238 | Calcium formate | Preservative |
| 90. | 367 | Calcium fumarates | Acidity regulator |
| 91. | 578 | Calcium gluconate | acidity regulator, firming agent |
| 92. | 623 | Calcium glutamate | flavour enhancer |
| | | | Thickener, gelling agent, |
| 93. | 383 | Calcium | Stabilizer |
| 94. | 170 (ii) | Calcium hydrogen carbonate | anticaking agent |
| 95. | 352 (i) | Calcium hydrogen malate | Acidity regulator |
| 96. | 227 | Calcium hydrogen | Preservative, antioxidant |
| 97. | 526 | Calcium hydroxide | acidity regulator, firming agent |
| | | - | |
| 98. | 916 | Calcium iodate | flour treatment agent |
| 99. | 318 | Calcium isoascorbate | Antioxidant |
| | | | acidity regulator, flour |
| 100. | 327 | Calcium lactate | treatment agent |
| 101. | 399 | Calcium lactobionate | Stabilizer |

| 102. | 482 | Calcium lactylates | Emulsifier, stabilizer |
|------|----------|----------------------------|---------------------------------|
| 103. | 352 (ii) | Calcium malate | Acidity regulator |
| 104. | 352 | Calcium malates | Acidity regulator |
| 105. | 482 (ii) | Calcium oleyl lactylate | Emulsifier, stabilizer |
| | | | acidity regulator, colour |
| 106. | 529 | Calcium oxide | retention agent |
| 107. | 930 | Calcium peroxide | flour treatment agent |
| | | | acidity regulator, flour |
| | | | treatment agent, firming agent, |
| | | | Texturizer, raising agent, |
| | | | anticaking agent, water |
| 108. | 341 | Calcium phosphates | retention agent |
| | | | Emulsifier, Stabilizer, acidity |
| | | | regulator, raising agent, |
| | | | Sequestrant, water retention |
| 109. | 452 (iv) | Calcium polyphosphates | Agent |
| 110. | 282 | Calcium propionate | Preservative |
| 111. | 552 | Calcium silicate | anticaking agent |
| 112. | 203 | Calcium sorbate | Preservative |
| 113. | 486 | Calcium stearoyl fumarate | Emulsifier |
| 114. | 482 (i) | Calcium stearoyl lactylate | Emulsifier, stabilizer |
| | | | flour treatment agent, |
| 115. | 516 | Calcium sulphate | Sequestrant, firming agent |
| 116. | 226 | Calcium sulphite | preservative, antioxidant |
| 117. | 354 | Calcium tartrate | Acidity regulator |
| 118. | 902 | Candelilla wax | glazing agent |

| 119. | 161 g | Canthaxanthin | Colour |

| 393. | 515 | Potassium sulphates | Acidity regulator |
|------|----------|----------------------------------|---------------------------------|
| 394. | 225 | Potassium sulphite | Preservative, antioxidant |
| 395. | 336 | Potassium tartrates | Stabilizer, sequestrant |
| | | | Emulsifier, anticaking agent, |
| 396. | 460 (ii) | Powdered cellulose | texturizer, dispersing agent |
| 397. | 407 a | Processed Euchema seaweed | Thickener, stabilizer |
| 398. | 944 | Propane | Propellant |
| 399. | 280 | Propionic acid | Preservative |
| 400. | 310 | Propyl gallate | Antioxidant |
| 401. | 216 | Propyl p-hydroxybenzoate | Preservative |
| | | | Humectant, wetting agent, |
| 402. | 1520 | Propylene glycol | dispersing agent |
| 403. | 405 | Propylene glycol alginate | Thickener, emulsifier |
| | | Propylene glycol esters of fatty | |
| 404. | 477 | acids | Emulsifier |
| | | | flour treatment agent, |
| | | | Stabilizer, tenderizer, flavour |
| 405. | 1101 (i) | Protease | Enhancer |
| | | | flour treatment agent, |
| | | | Stabilizer, tenderizer, flavour |
| 406. | 1101 | Proteases | Enhancer |
| 407. | 999 | Quillaia extracts | foaming agent |
| 408. | 104 | Quinoline yellow | Colour |
| 409. | 128 | Red 2G | Colour |
| 410. | 161 f | Rhodoxanthin | Colour |

| 411. | 101 (i) | Riboflavin | Colour |
|------|----------|-------------------------------------|----------------------------------|
| 412. | 101 (ii) | Riboflavin 5' -phosphate, sodium | Colour |
| 413. | 101 | Riboflavins | Colour |
| 414. | 908 | Rice bran wax | glazing agent |
| 415. | 161 d | Rubixanthin | Colour |
| 416. | 954 | Saccharin (and Na, K, Ca salts) | Sweetener |
| | | Salts of fatty acids (with base Al, | Emulsifier, Stabilizer, anti |
| 417. | 470 | Ca, Na, Mg, K and NH4) | caking agent |
| 418. | 166 | Sandalwood | Colour |
| 419. | 904 | Shellac | glazing agent |
| 420. | 551 | Silicon dioxide, amorphous | anticaking agent |
| 421. | 174 | Silver | Colour |
| | | | Preservative, acidity regulator, |
| 422. | 262 (i) | Sodium acetate | Sequestrant |
| | | | Preservative, acidity regulator, |
| 423. | 262 | Sodium acetates | Sequestrant |
| 424. | 356 | Sodium adipates | Acidity regulator |
| | | | Thickener, Stabilizer, gelling |
| 425. | 401 | Sodium alginate | Agent |
| 426. | 541 | Sodium aluminium phosphate | acidity regulator, emulsifier |
| | | Sodium aluminium phosphate- | |
| 427. | 541 (i) | acidic | acidity regulator, emulsifier |
| 428. | 541 (ii) | Sodium aluminium phosphate-basic | acidity regulator, emulsifier |
| 429. | 554 | Sodium alumino-silicate | anticaking agent |
| 430. | 301 | Sodium ascorbate | Antioxidant |

| 431. | 211 | Sodium benzoate | Preservative |
|------|-----------|----------------------------------|-----------------------------------|
| | | | Emulsifier, Stabilizer, acidity |
| | | | regulator, raising agent, |
| | | | Sequestrant, water retention |
| 432. | 452 (iii) | Sodium calcium polyphosphate | Agent |
| | | | acidity regulator, raising agent, |
| 433. | 500(i) | Sodium carbonate | anticaking agent |
| | | | acidity regulator, raising agent, |
| 434. | 500 | Sodium carbonates | anticaking agent |
| | | | Thickener, Emulsifier, |
| 435. | 466 | Sodium carboxymethyl cellulose | Stabilizer |
| | | Sodium carboxymethyl, cellulose, | |
| 436. | 469 | enzymatically, hydrolysed | Thickener, stabilizer |
| | | | acidity regulator, Sequestrant, |
| 437. | 331 | Sodium citrates | emulsifier, stabilizer |
| 438. | 266 | Sodium dehydroacetate | Preservative |
| | | | Preservative, acidity regulator, |
| 439. | 262 (ii) | Sodium diacetate | Sequestrant |
| | | | acidity regulator, Sequestrant, |
| 440. | 331 (i) | Sodium dihydrogen citrate | emulsifier, stabilizer |
| 441. | 215 | Sodium ethyl p-hydroxybenzoate | Preservative |
| 442. | 535 | Sodium ferrocyanide | anticaking agent |
| 443. | 237 | Sodium formate | Preservative |
| 444. | 365 | Sodium fumarates | Acidity regulator |

| 445. | 576 | Sodium gluconate | Sequestrant |
|------|----------|---------------------------------|-----------------------------------|
| | | | acidity regulator, raising agent, |
| 446. | 500 (ii) | Sodium hydrogen carbonate | anticaking agent |
| 447. | 350 (i) | Sodium hydrogen malate | acidity regulator, humectant |
| 448. | 222 | Sodium hydrogen sulphite | Preservative, antioxidant |
| 449. | 524 | Sodium hydroxide | Acidity regulator |
| 450. | 316 | Sodium isoascorbate | Antioxidant |
| 451. | 638 | Sodium L-Aspartate | flavour enhancer |
| | | | antioxidant synergist, |
| 452. | 325 | Sodium lactate | Humectant, bulking agent |
| 453. | 481 | Sodium lactylates | Emulsifier, stabilizer |
| 454. | 487 | Sodium laurylsulphate | Emulsifier |
| 455. | 350 (ii) | Sodium malate | acidity regulator, humectant |
| 456. | 350 | Sodium malates | acidity regulator, humectant |
| | | | Preservative, bleaching agent, |
| 457. | 223 | Sodium metabisulphite | Antioxidant |
| 458. | 550 (ii) | Sodium metasilicate | anticaking agent |
| 459. | 219 | Sodium methyl p-hydroxybenzoate | Preservative |
| 460. | 251 | Sodium nitrate | Preservative, colour fixative |
| 461. | 250 | Sodium nitrite | Preservative, colour fixative |
| 462. | 232 | Sodium o-phenylphenol | Preservative |
| 463. | 481 (ii) | Sodium oleyl lactylate | Emulsifier, stabilizer |
| | | | acidity regulator, Sequestrant, |
| 164 | 220 | | emulsifier, Texturizer, |
| 464. | 339 | Sodium phosphates | Stabilizer, water retention |

| | | | agent |
|------|-----------|---------------------------------|-----------------------------------|
| | | | Emulsifier, Stabilizer, acidity |
| | | | regulator, raising agent, |
| | | | Sequestrant, water retention |
| 465. | 452 (i) | Sodium polyphosphate | Agent |
| 466. | 281 | Sodium propionate | Preservative |
| 467. | 217 | Sodium propyl p-hydroxybenzoate | Preservative |
| | | | acidity regulator, raising agent, |
| 468. | 500 (iii) | Sodium sesquicarbonate | anticaking agent |
| 469. | 550 (i) | Sodium silicate | anticaking agent |
| 470. | 550 | Sodium silicates | anticaking agent |
| 471. | 201 | Sodium sorbate | Preservative |
| 472. | 485 | Sodium stearoyl fumarate | Emulsifier |
| 473. | 481 (i) | Sodium stearoyl lactylate | Emulsifier, stabilizer |
| 474. | 514 | Sodium sulphates | Acidity regulator |
| 475. | 221 | Sodium sulphite | Preservative, antioxidant |
| 476. | 335 | Sodium tartrates | Stabilizer, sequestrant |
| 477. | 539 | Sodium thiosulphate | Antioxidant, sequestrant |
| 478. | 200 | Sorbic acid | Preservative |
| 479. | 493 | Sorbitan monolaurate | Emulsifier |
| 480. | 494 | Sorbitan mono-oleate | Emulsifier |
| 481. | 495 | Sorbitan monopalmitate | Emulsifier |
| 482. | 491 | Sorbitan monostearate | Emulsifier |
| 483. | 496 | Sorbitan trioleate | Stabilizer, emulsifier |
| 484. | 492 | Sorbitan tristearate | Emulsifier |

| | | | Sweetener, Humectant, |
|------|-----------|--------------------------------|-------------------------------------|
| | | | sequestrant, Texturizer, |
| 485. | 420 | Sorbitol and sorbitol syrup | Emulsifier |
| 486. | 909 | Spermacetic wax | glazing agent |
| 487. | 512 | Stannous chloride | Antioxidant, colour retention agent |
| 488. | 484 | Stearyl citrate | Emulsifier, sequestrant |
| 489. | 483 | Stearyl tartrate | flour treatment agent |
| 490. | 960 | Stevioside | Sweetener |
| 491. | 363 | Succinic acid | Acidity regulator |
| | | | Emulsifier, Stabilizer, |
| 492. | 472g | Succinylated monoglycerides | Sequestrant |
| 493. | 446 | Succi stearin | Emulsifier |
| 494. | 955 | Sucralose | Sweetener |
| 495. | 474 | Sucroglycerides | Emulsifier |
| 496. | 444 | Sucrose acetate isobutyrate | Emulsifier, stabilizer |
| 497. | 473 | Sucrose esters of fatty acids | Emulsifier |
| 498. | 220 | Sulphur dioxide | Preservative, antioxidant |
| 499. | 513 | Sulphuric acid | acidity regulator |
| 500. | 110 | Sunset yellow FCF | colour |
| | | Superglycerinated hydrogenated | |
| 501. | 441 | rapeseed oil | Emulsifier |
| 502. | 309 | Synthetic delta-tocopherol | Antioxidant |
| 503. | 308 | Synthetic gamma-tocopherol | Antioxidant |
| 504. | 553 (iii) | Talc | anticaking agent, dusting powder |

| 505. | 181 | Tannins, food grade | Colour, Emulsifier, Stabilizer, thickener |
|------|-----------|---|--|
| 506. | 417 | Tara gum | Thickener, stabilizer |
| 507. | 334 | Tartaric acid (L(+)-) | acidity regulator, Sequestrant, antioxidant synergist |
| 508. | 472 d | Tartaric acid esters of mono and di-glycerides of fatty acids | Emulsifier, Stabilizer, sequestrant |
| 509. | 102 | Tartrazine | Colour |
| 510. | 319 | Tertiary butylhydroquinone | antioxidant |
| 511. | 450(v) | Tetrapotassium diphosphate | emulsifier, raising agent, stabilizer sequestrant, acidity regulator, water retention agent |
| 512 | 450 (iii) | Tetrasodium diphosphate | Emulsifier, Stabilizer, acidity regulator, raising agent, Seque-strant, water retention agent |
| 513. | 957 | Thaumatin | Sweetener, flavour enhancer emulsifier |
| | | Thermally oxidized soya bean oil | |
| | | with mono-and di-glycerides of | |
| 514. | 479 | fatty acids | Emulsifier |
| 515. | 233 | Thiabendazole | Preservative |
| 516. | 388 | Thiodipropionic acid | antioxidant |
| 517. | 171 | Titanium dioxide | Colour |
| 518. | 413 | Tragacanth gum | Thickener, Stabilizer, emulsifier |
| 519. | 1518 | Triacetin | Humectant |
| 520. | 341 (iii) | Tricalcium orthophosphate | acidity regulator, texturizer, flour treatment agent, raising agent, firming agent, |

| | | | anticaking agent, water retention agent |
|------|-----------|-----------------------------|---|
| 521. | 1505 | Triethyl citrate | foam stabilizer |
| | | | acidity regulator, anticaking |
| 522. | 343 (iii) | Trimagnesium orthophosphate | Agent |
| | | | Sequestrant, acidity regulator, |
| 523. | 451 | Tri phosphates | Texturizer |
| | | | acidity regulator, Sequestrant, |
| 524. | 332 (ii) | Tripotassium citrate | Stabilizer |
| | | | acidity regulator, texturizer, |
| | | | sequestrant stabilizer, |
| | | | Emulsifier, water retention |
| 525. | 340 (iii) | Tripotassium orthophosphate | Agent |
| | | | acidity regulator, Sequestrant, |
| 526. | 331 (ii) | Trisodium citrate | emulsifier, Stabilizer |
| | | | Emulsifier, Stabilizer, acidity |
| | | | regulator, raising agent, |
| | | | Sequestrant, water retention |
| 527. | 450 (ii) | Trisodium diphosphate | Agent |
| | | | acidity regulator, Sequestrant, |
| | | | emulsifier, Texturizer, |
| | | | Stabilizer, water retention |
| 528. | 339 (iii) | Trisodium orthophosphate | agent |
| 529. | 100 (ii) | Turmeric | Colour |
| 530. | 153 | Vegetable carbon | Colour |
| 531. | 161 e | Violoxanthin | Colour |

| 532. | 910 | Wax esters | glazing agent | | |
|--------------------------------------|------|-------------------------------------|-------------------------------|--|--|
| 533. | 415 | Xanthan gum | Thickener, stabilizer | | |
| | | | Sweetener, Humectant, | | |
| | | | stabilizer, Emulsifier, | | |
| 534. | 967 | Xylitol | thickener | | |
| 535. | 107 | Yellow 2G | Colour | | |
| 536. | 557 | Zinc silicate | anticaking agent | | |
| Supplementary List-Modified Starches | | | | | |
| 537. | 1422 | Acetylated di-starch adipate | Stabilizer, thickener, binder | | |
| 538. | 1423 | Acetylated distarch glycerol | Stabilizer, thickener | | |
| 539. | 1414 | Acetylated distarch phosphate | Emulsifier, thickener | | |
| 540. | 1401 | Acid-treated starch | Stabilizer, thickener, binder | | |
| 541. | 1402 | Alkaline treated starch | Stabilizer, thickener, binder | | |
| 542. | 1403 | Bleached starch | Stabilizer, thickener, binder | | |
| | | Dextrins roasted starch white | | | |
| 543. | 1400 | and yellow | Stabilizer, thickener, binder | | |
| 544. | 1411 | Di-starch glycerol | Stabilizer, thickener, binder | | |
| | | Di-starch phosphate esterified with | | | |
| | | sodium trimetaphosphate; esterified | | | |
| 545. | 1412 | with phosphorus oxychloride | Stabilizer, thickener, binder | | |
| 546. | 1443 | Hydroxypropyl di-starch glycerol | Stabilizer, thickener | | |
| 547. | 1442 | Hydroxypropyl di-starch phosphate | Stabilizer, thickener | | |
| 548. | 1440 | Hydroxypropyl starch | Emulsifier, thickener, binder | | |
| 549. | 1410 | Monostarch phosphate | Stabilizer, thickener, binder | | |
| 550. | 1404 | Oxidized starch | Emulsifier, thickener, binder | | |
| 551. | 1413 | Phosphated di-starch phosphate | Stabilizer, thickener, binder | | |

| | | Starch acetate esterified with | |
|------|------|---------------------------------|--------------------------------|
| 552. | 1420 | acetic anhydride | Stabilizer, thickener |
| | | Starch acetate esterified with | |
| 553. | 1421 | vinyl acetate | Stabilizer, thickener |
| 554. | 1450 | Starch sodium octenyl succinate | Stabilizer, thickener, binder, |
| 555. | 1405 | Starches, enzyme-treated | thickener |

Note: The principal regulations were published in the Gazette of India, Extraordinary, Part-III, Section 4 *vide* notification number F. No. 2-15015/30/2010, dated the 1st August, 2011 and subsequently amended *vide* notification numbers:
