### 3.36 Excluded offsets projects

- (1) The following kinds of project are excluded offsets projects:
  - (a) a project that involves an activity that:
    - (i) was mandatory under a Commonwealth, State or Territory law; and
    - (ii) is no longer mandatory because the law was repealed, or amended to be less onerous, after 24 March 2011;
  - (b) the planting of a species in an area where it is a known weed species;
  - (c) the establishment of a forest under a forestry managed investment scheme for Division 394 of Part 3-45 of the *Income Tax Assessment Act 1997*;
  - (d) the cessation or avoidance of the harvest of a plantation;
  - (e) the establishment of vegetation on land that has been subject to illegal clearing of a native forest, or illegal draining of a wetland;
  - (f) the establishment of vegetation on land that has been subject to clearing of a native forest, or draining of a wetland (that was not an illegal clearing or draining), within:
    - (i) 7 years of the lodgement of an application for the project to be declared an eligible offsets project; or
    - (ii) if there is a change in ownership of the land that constitutes the project area, after the clearing or the

- draining—5 years of the lodgement of an application for the project to be declared an eligible offsets project;
- (g) a project that protects native forest on freehold or leasehold land, for which a clearing consent or harvest approval plan was granted on the basis that the clearing or harvesting of the native forest:
    - (i) would lead to an environmental improvement or benefit, or would maintain an environmental outcome; or
    - (ii) was for fire management purposes.
- (3) Subparagraph (1)(g)(i) does not apply to a project if:
- (a) the clearing consent or harvest approval plan provides options for vegetation management; and
  - (b) the project provides active and on-going management of the project area in accordance with one of those options.

### **3.37Excluded offsets projects—specified tree planting**

- (1) Specified tree planting is an excluded offsets project unless it is mentioned in subregulations (2) to (6) or subregulation (8).
- (2) Specified tree planting is not an excluded offsets project if the planting is a permanent planting that is also an environmental planting.
- (3) Specified tree planting is not an excluded offsets project if the project proponent demonstrates that the planting contributes to the mitigation of dryland salinity in accordance with the Salinity Guidelines.
- (4) Specified tree planting is not an excluded offsets project if the project area is in a region in relation to which the Water Department has determined that the commitments by the relevant State or Territory government under the National Water Initiative to manage water interception by plantations have been adequately implemented.

- (5) Specified tree planting is not an excluded offsets project if the project proponent holds a water access entitlement that:
- (a) grants or confers an entitlement to water in the project area; and
  - (b) relates to either groundwater or surface water, or both, depending on the water resource management arrangements applicable in the project area; and
  - (c) is held from the date that is no later than 2 years after the forest is first planted for the duration of the project; and
  - (d) provides a long-term average yield, per year, of at least 90% of the volume of water required as an offset, calculated in accordance with the formula in subregulation (7).
- (6) However, subregulation (5) does not apply if the water to which the water access entitlement relates is held, taken, intercepted, stored or used for any purpose other than to offset the water intercepted by the forest.
- (7) The volume of water (in megalitres) required as an offset per year for the life of the project is to be calculated using the following formula:

$$A \times 0.9 + B \times 1.2 + C \times 1.5 + D \times 1.8 + E \times 2.1$$

where:

**A** is the area (in hectares) of the project area that, according to the CFI rainfall map, receives between 600–700 mm long-term average annual rainfall;

**B** is the area (in hectares) of the project area that, according to the CFI rainfall map, receives between 700–800 mm long-term average annual rainfall;

**C** is the area (in hectares) of the project area that, according to the CFI rainfall map, receives between 800–900 mm long-term average annual rainfall;

**D** is the area (in hectares) of the project area that, according to the CFI rainfall map, receives between 900–1 000 mm long-term average annual rainfall;

Error! No text of specified style in document.**Error! No text of specified style in document.**

**Part 3** Eligible offsets project

**Division 3.12** Types of projects

### Regulation 3.37

---

*E* is the area (in hectares) of the project area that, according to the CFI rainfall map, receives more than 1 000 mm long-term average annual rainfall.

Note: The figures in the formula are based on the following volumes of water required as an offset per hectare per year in each of the areas of long-term average annual rainfall as indicated by the CFI rainfall map:

0.9 ML of water—600–700 mm of rain

1.2 ML of water—700–800 mm of rain

1.5 ML of water—800–900 mm of rain

1.8 ML of water—900–1 000 mm of rain

2.1 ML of water—greater than 1 000 mm of rain.

- (8) Specified tree planting is not an excluded offsets project if:
- (a) the project area is in a region in which it is not possible to obtain a water access entitlement; and
  - (b) the Regulator, after seeking the advice of the relevant State or Territory agency that manages the water resource and other expert advice as necessary, is satisfied that there is no material impact on water availability, or on the reliability of existing water access entitlements, in or near the project area, for the duration of the project.
- (9) However, paragraph (8)(a) does not apply to a project in relation to which it is not possible to obtain a water access entitlement because the relevant catchment is fully allocated.
