**RECOGNIZING** that many species of birds migrate between and seasonally live in both countries and that there is international concern for the protection of migratory birds;

**NOTING** the existence of bilateral and multilateral agreements for the protection of migratory birds and their habitats, and the cooperative efforts being made to conserve migratory waterbirds in the East Asian-Australasian Flyway,

**CONVINCED** that cooperation between the Parties is essential for the conservation of these birds, and

**DESIRING** to cooperate in taking measures for the management and protection of migratory birds and their habitat and the prevention of the extinction of certain birds,

Have agreed as follows:

(Australian Proposing Note)

Your Excellency,

I have the honour to refer to the discussions held by representatives of the Governments of the Republic of Korea and Australia on 22 November 2004 in Seoul, to finalise the Agreement between the Government of the Republic of Korea and the Government of Australia for the Protection of Migratory Birds (ROKAMBA).

I have the honour to inform Your Excellency that the two countries discussed the issue of “bycatches” in the context of the draft text of the ROKAMBA, and reached an agreement as set out below:

1. With regard to the inclusion of incidental bycatches of migratory birds in paragraph 1 (e) of Article 2 of the ROKAMBA as an exception to the prohibition on taking migratory birds, Australia expressed its view that the bycatch clause, proposed by the Republic of Korea, should not be included in the ROKAMBA.
2. On the other hand, the Republic of Korea insisted on the inclusion of the bycatch clause, expressing their concern that Australia might use the ROKAMBA as a legal basis to prompt legal action or to raise legal complaints against Korean fishing vessels in the high seas, given that this issue is controversial in relevant international forums such as the Commission for the Conservation of Southern Bluefin Tuna (CCSBT) and the Commission for the Conservation of Antarctic Marine Living Resources (CCAMLR).
3. In response to the concern raised by the Republic of Korea, Australia made it clear it had no intention of raising formal objections or taking legal action against incidental bycatches merely on the grounds of the ROKAMBA, emphasising that the main purpose of the ROKAMBA is to promote bilateral cooperation for the conservation of migratory birds.
4. With the understanding that the ROKAMBA only aims to pave the way for consolidating bilateral cooperation on migratory birds and that the Republic of Korea and Australia have no intentions to resort to it to raise legal complaints against the incidental catching of birds during fishing operations, the Republic of Korea stated that it would favourably consider the deletion of the bycatch clause in the ROKAMBA.
5. The Republic of Korea and Australia recognise that the ROKAMBA will be used to exchange information on methods to reduce bycatch, rather than to undertake legal action against either country on bycatch issues. However, the ROKAMBA does not relieve Australia and the Republic of Korea of their obligations under other agreements to which they are parties, such as the CCSBT and CCAMLR, to mitigate the bycatch of migratory birds, nor shall it prevent either Party from taking action under other agreements to which they are currently, or may in the future, be parties.

If the above provisions are acceptable to the Government of the Republic of Korea, I have further the honour to propose that this Note and your Note of confirmation in reply shall constitute a significant and integral part of the ROKAMBA and an agreement between our two Governments, which shall enter into force on the date of entry into force of the ROKAMBA.

Accept, Excellency, the renewed assurances of my highest consideration.

(Korean Reply Note)

Your Excellency,

I have the honour to refer to Your Excellency's Note of , 2006, which reads as follows:

".....Australian Proposing Note ....." "

I have the honour to confirm that the above provisions are acceptable to the Government of the Republic of Korea and that Your Excellency's Note together with this Note in reply to that effect shall constitute a significant and integral part of the ROKAMBA and an agreement between the two Governments on this matter, which shall enter into force on the date of entry into force of the ROKAMBA.

Accept, Excellency, the renewed assurances of my highest consideration.
