*Article 6***TACs to be determined by Member States**

1. The TACs set out in Annex I shall, where specified in that Annex, be determined by the Member State concerned.

2. The TACs to be determined by a Member State referred to in paragraph 1 shall:

(a) be consistent with the objectives and rules set out in Regulation (EU) No 1380/2013 and in Regulations (EU) 2018/973 and 2019/472, in particular the objective of sustainable exploitation of the stock; and

(b) result in an exploitation of the stock that is:

(i) if an analytical assessment is available, in line with maximum sustainable yield (MSY), with as high a probability as possible; or

(ii) if an analytical assessment is unavailable or incomplete, consistent with the precautionary approach to fisheries management.

3. By 15 March 2025 each Member State concerned shall submit the following information to the Commission:

(a) the TACs that it has determined;

(b) the data that it has collected, assessed and used as a basis for the determination of those TACs;

(c) details as to how the TACs that it has determined comply with paragraph 2.

4. For the TAC for black scabbardfish (*Aphanopus carbo*) in CECAF area 34.1.2, Portugal shall submit the information referred to in paragraph 3 for that TAC for 2025 by 1 February 2025 and for that TAC for 2026 by 1 February 2026.

5. Where appropriate, the Commission may request the Scientific, Technical and Economic Committee for Fisheries (STECF):

(a) to assess the information referred to in paragraph 3, points (b) and (c); and

(b) to assess whether the TACs determined by Member States comply with paragraph 2.

▼B

6. If, according to the advice of STECF, the information referred to in paragraph 3, points (b) and (c), is deemed insufficient, the Member States concerned shall submit to the Commission additional information in line with the STECF advice, together with supporting documents justifying that additional information in relation to the STECF advice, no later than 1 month after the publication of the STECF advice.

7. If, according to the advice of STECF, the methodology followed for determining the TAC by the Member States does not fully comply with the conditions laid down in paragraph 2, the Member States concerned shall revise the methodology followed for determining the TAC for the following year, in line with that STECF advice.

*Article 7***Conditions for landing catches and by-catches**

1. Catches that are not subject to the landing obligation under Article 15 of Regulation (EU) No 1380/2013 shall be retained on board or landed only if they:

- (a) have been taken by fishing vessels flying the flag of a Member State that has a quota and that quota has not been exhausted; or
- (b) make up a share of a Union quota that has not been allocated among Member States and that has not been exhausted.

2. For the purposes of the derogation from the obligation to count catches against the relevant quotas, as provided for in Article 15(8) of Regulation (EU) No 1380/2013, the stocks of non-target species within safe biological limits referred to in that Article are identified in Annex I to this Regulation.

*Article 8***Quota exchange mechanism for TACs for unavoidable by-catches**

1. In order to take account of the landing obligation and to make quotas for certain by-catches available to Member States without a quota, the quota exchange mechanism set out in paragraphs 2 to 5 of this Article shall apply to the TACs identified in Annex IA.

2. 6 % of each quota from the TACs for cod (*Gadus morhua*) in the Celtic Sea (COD/7XAD34), cod in the West of Scotland (COD/5BE6A), whiting in the Irish Sea (WHG/07A.) and plaice (*Pleuronectes platessa*) in ICES divisions 7h, 7j and 7k (PLE/7HJK.), and 3 % of each quota from the TAC for whiting (*Merlangius merlangus*) in the West of Scotland (WHG/56-14), allocated to each Member State, shall be made available for a pool for quota exchanges ('the pool'), which shall open on 1 January 2025. Member States without a quota shall have exclusive access to the pool until 31 March 2025.

▼B

3. The quantities drawn from the pool may not be exchanged or transferred to the following year. After 31 March 2025, any unused quantities shall be returned to the Member States that initially contributed to the pool.

4. Member States without a quota shall provide in return quotas for stocks listed in Annex IA, Part C, unless the Member State without a quota and the Member State contributing to the pool agree otherwise.

5. The quotas referred to in paragraph 4 shall be of equivalent commercial value, determined on the basis of a market exchange rate or other mutually acceptable exchange rates. In the absence of alternatives, the equivalent commercial value shall be determined on the basis of average Union prices from the previous year, as provided by the European Market Observatory for Fisheries and Aquaculture Products.

6. Where the quota exchange mechanism set out in paragraphs 2 to 5 of this Article does not allow Member States to cover their unavoidable by-catches to a similar extent, Member States shall endeavour to agree on quota exchanges pursuant to Article 16(8) of Regulation (EU) No 1380/2013, ensuring that quotas exchanged are of equivalent commercial value.

Article 9

Fishing effort limits in ICES division 7e

1. For the period referred to in Article 1(2), point (b), of this Regulation fishing effort limitations for sole (*Solea solea*) in ICES division 7e are set out in Annex II.

2. At the request of a Member State in accordance with point 7.4 of Annex II, the Commission may adopt an implementing act by means of which it allocates to that Member State a number of days at sea in addition to those referred to in point 5 of Annex II, on which it may authorise a fishing vessel flying its flag to be present in ICES division 7e when carrying on board any regulated gear. The Commission shall adopt that implementing act in accordance with the examination procedure referred to in Article 61(2) of this Regulation.

3. At the request of a Member State, the Commission may adopt an implementing act by means of which it allocates to that Member State a maximum of 3 days between 1 February 2025 and 31 January 2026, in addition to those referred to in point 5 of Annex II, on which a fishing vessel may be present in ICES division 7e on the basis of an enhanced programme of scientific observer coverage, as referred to in point 8.1 of Annex II. It shall make such an allocation on the basis of the description submitted by that Member State in accordance with point 8.3 of Annex II and following consultation with the STECF. That implementing act shall be adopted in accordance with the examination procedure referred to in Article 61(2) of this Regulation.

Article 10

Measures on European seabass fisheries in ICES divisions 4b, 4c and 6a and ICES subarea 7

2. The prohibition set out in paragraph 1 shall not apply to by-catches of European seabass in shore-based commercial netting activities. This exemption applies to historic numbers of beach nets set at pre-2017 levels. Shore-based commercial netting activities shall not target European seabass, and only unavoidable by-catches of European seabass may be landed.

3. By way of derogation from paragraph 1, in January 2025 and from 1 April to 31 December 2025, Union fishing vessels in ICES divisions 4b, 4c, 7d, 7e, 7f and 7h may fish for, retain on board, tranship, relocate or land European seabass caught in that area with the following gear and within the following limits:

*Article 13***Measures on European eel fisheries in Union waters of ICES subareas 3, 4, 6, 7, 8 and 9**

1. This Article applies to Union marine and brackish waters of ICES subareas 3, 4, 6, 7, 8 and 9, and to adjacent Union brackish waters, including estuaries, coastal lagoons and transitional waters.

2. This Article does not apply to commercial fishing operations conducted for the exclusive purpose of scientific investigations with or without a fishing vessel, provided that those investigations are carried out in compliance with the conditions set out in Article 25 of Regulation (EU) 2019/1241 and that the STECF has confirmed to the Commission and the Member States concerned that such scientific investigations are justified on scientific grounds.

3. It shall be prohibited to engage in commercial fishing activities for European eel (*Anguilla anguilla*) at all life stages for a period of at least 6 months between 1 April 2025 and 31 March 2026. In addition, Members States and fishers shall undertake all reasonable efforts to minimise and where possible eliminate incidental by-catch of European eel. When accidentally caught, specimens of European eel shall not be harmed and shall be promptly released. To that effect, the Member State concerned, either individually or jointly, shall determine one or more closure periods subject to the following conditions:

▼B

- (a) where appropriate, the closure period or periods may differ between Member States or within one Member State from one fishing area to another in order to take account of the geographical and temporal migration pattern of European eel at its different life stages;
- (b) the closure period or periods shall last for a consecutive or non-consecutive time span of at least 6 months, which shall apply to all fishers concerned in the relevant fishing area;
- (c) the closure period or periods shall be consistent with the conservation objectives set out in Regulation (EC) No 1100/2007, and with national management plans established pursuant to Article 2 of that Regulation; and
- (d) the closure period or periods shall cover the main migration period or periods, including the respective peak, of European eel at the respective life stage in the Member State concerned.

4. By way of derogation from paragraph 3, point (d), for European eel of an overall length of 12 cm or more, the Member States concerned may allow fishing activities for up to a total of 30 consecutive or non-consecutive days, which shall apply to all fishers concerned in the relevant fishing area, during the main migration period. In that case, the Member States concerned shall determine an additional closure of an equivalent period of time during the main migration period or, subsidiarily, just before or after it. In cases where a Member State allows fishing for non-consecutive days, the fishing gear shall be taken out of the water between any period of non-consecutive days.

5. For European eel of an overall length of 12 cm or more in ICES subarea 3, the closure period or periods referred to in paragraph 3 and the derogation thereof referred to in paragraph 4 shall be agreed by all the Member States concerned so as to ensure an effective protection of European eel on its migration from the Baltic Sea into the North Sea. In the absence of such an agreement by 1 April 2025, the closure period shall be 15 September 2025 to 15 March 2026 in Denmark, Germany, Estonia, Latvia, Lithuania, Poland, Finland and Sweden, and without the possibility of the derogation referred to in paragraph 4.

6. By way of further derogation from paragraph 3, point (d), for European eel of an overall length of less than 12 cm, the Member States concerned may allow fishing activities for up to a total of 30 consecutive or non-consecutive days, which shall apply to all fishers concerned in the relevant fishing area, during the main migration period. In addition, the Member States concerned may allow fishing exclusively for restocking for up to an additional 50 days during the main migration period. In both cases, the Member States concerned shall determine an additional closure of an equivalent period of time during the main migration period or, subsidiarily, just before or after it. In cases where a Member State allows fishing for non-consecutive days, the fishing gear shall be taken out of the water between any period of non-consecutive days.

⁽¹⁾ No vessel may fish for squid between 00:00 UTC on 1 January to 24:00 UTC on 30 June.

⁽²⁾ Between 1 July to 31 December, during a maximum 2-week exemption period, up to a total of three hauls in which any other species for which this Regulation establishes fishing opportunities in the NAFO Convention area and other than squid comprises the largest percentage by weight of the total catch in the haul shall not be considered a directed fishery, provided that the fishing vessel carries on board a control observer, uses a mesh size no smaller than 60mm, and complies with the NAFO notification and reporting requirements to make use of that 2-week exemption period. After each such haul, the fishing vessel shall immediately move a minimum of 10 nautical miles from any position of the previous haul throughout the subsequent haul.

⁽³⁾ This quantity is available to Canada and the Member States except Estonia, Latvia, Lithuania and Poland. Catches to be counted against this shared quota shall be reported separately (SQI/N34_AMS).

⁽⁴⁾ Corresponds to the sum of the quotas of Estonia, Latvia, Lithuania and Poland and the unspecified share available to Canada and the Member States except Estonia, Latvia, Lithuania and Poland.

However, if the Union is assigned an 'Others' quota, once the 'Others' quota is exhausted, the by-catch limits shall be as follows: a maximum of 1 250 kg or 5 %, whichever is greater. If, however, following quota transfers or exchanges or charter, directed fisheries are conducted, the following shall apply:
- (a) a by-catch of 15 % of American plaice is permitted. However, if a fishing vessel is carrying an observer:
 - (i) this maxima shall be 2 900 kg or 15 % of American plaice, whichever the greater; and
 - (ii) a vessel may exceed the maxima referred to in point (i) for by-catches of American plaice retained on board during the first 9 fishing days in the NAFO Regulatory Area, provided that American plaice by-catch represents 15 % or less by the end of that period or when the vessel leaves the NAFO Regulatory Area, whichever occurs first;
 - (b) the first two times that catches of American plaice comprise the largest percentage by weight of the total catch in a haul, such catches shall be considered as incidental catch, but the vessel shall immediately move a minimum of 10 nautical miles from any position of the previous haul throughout the subsequent haul.

ANNEX II

FISHING EFFORT FOR FISHING VESSELS IN THE CONTEXT OF THE MANAGEMENT OF WESTERN CHANNEL SOLE STOCKS IN ICES DIVISION 7e

Chapter I

General provisions

1. SCOPE

1.1. This Annex shall apply to Union fishing vessels of 10 metres length overall or more carrying on board or deploying beam trawls of mesh size equal to or greater than 80 mm as well as static nets, including gillnets, trammel nets and tangle nets, with mesh size equal to or less than 220 mm in accordance with Article 12(2) of Regulation (EU) 2019/472, and present in ICES division 7e.

1.2. Fishing vessels fishing with static nets with mesh size equal to or greater than 120 mm and with track records of less than 300 kg live weight of sole per year during the 3 previous years, according to their fishing records, shall be exempt from the application of this Annex subject to the following conditions:

- (a) such fishing vessels caught less than 300 kg live weight of sole during the 2023 management period;
- (b) such fishing vessels do not tranship any fish at sea to another vessel;
- (c) by 31 July 2025 and by 31 January 2026 each Member State concerned submits a report to the Commission on those fishing vessels' catch records for sole in the 3 previous years as well as on catches of sole in 2025.

Where any of those conditions is not met, the fishing vessels concerned shall cease to be exempt from the application of this Annex, with immediate effect.

2. DEFINITIONS

For the purposes of this Annex, the following definitions apply:

- (a) 'gear grouping' means the grouping consisting of the following two gear categories:
 - (i) beam trawls of mesh size equal to or greater than 80 mm; and
 - (ii) static nets, including gillnets, trammel nets and tangle nets, with mesh size equal to or less than 220 mm;
- (b) 'regulated gear' means any of the two gear categories belonging to the gear grouping;
- (c) 'the area' means ICES division 7e;
- (d) 'current management period' means the period from 1 February 2025 to 31 January 2026.

3. LIMITATION IN ACTIVITY

Without prejudice to Article 29 of Regulation (EC) No 1224/2009, each Member State shall ensure that, when carrying on board any regulated gear, Union fishing vessels flying its flag and registered in the Union are present within the area for no more than the number of days set out in Chapter III of this Annex.

Chapter II

Authorisations

4. AUTHORISED FISHING VESSELS

- 4.1. A Member State shall not authorise fishing with regulated gear in the area by any fishing vessel flying its flag which has no record of such fishing activity in the area in the period from 2003 to 2023, excluding the record of fishing activities as a result of transfer of days between fishing vessels, unless it ensures that the equivalent capacity, measured in kilowatts, is prevented from fishing in the area.
- 4.2. However, a fishing vessel with a track record of using a regulated gear may be authorised to use a different fishing gear, provided that the number of days allocated to the different fishing gear is equal to or greater than the number of days allocated to the regulated gear.
- 4.3. A fishing vessel flying the flag of a Member State which has no quotas in the area shall not be authorised to fish in the area with regulated gear unless the fishing vessel is allocated a quota following a transfer carried out in accordance with Article 16(8) of Regulation (EU) No 1380/2013 and is allocated days at sea in accordance with point 10 or 11 of this Annex.

Chapter III

Number of days present within the area allocated to Union fishing vessels

5. MAXIMUM NUMBER OF DAYS

During the current management period, the maximum number of days at sea for which a Member State may authorise a fishing vessel flying its flag to be present within the area when carrying on board any regulated gear is set out in Table I.

Table I

Maximum number of days a fishing vessel may be present within the area by category of regulated gear during the current management period

Regulated gear	Maximum number of days	
Beam trawls of mesh size ≥ 80 mm	Belgium	176
	France	188
Static nets with mesh size ≤ 220 mm	Belgium	176
	France	191

6. KILOWATT DAYS SYSTEM

- 6.1. During the current management period, a Member State may manage its fishing effort allocations in accordance with a kilowatt day system. Through that system, it may authorise any fishing vessel concerned by any regulated gear set out in Table I to be present within the area for a maximum number of days that is different from the number set out in that table, provided that the overall amount of kilowatt days corresponding to the regulated gear is respected.
- 6.2. The overall amount of kilowatt days shall be the sum of all individual fishing efforts allocated to the fishing vessels flying the flag of the Member State concerned and qualified for the regulated gear. Such individual fishing efforts shall be calculated in kilowatt days by multiplying the engine power of each fishing vessel by the number of days at sea it would be granted, according to Table I, if point 6.1 were not applied.

▼B

6.3. Any Member State wishing to benefit from the system referred to in point 6.1 shall submit a request to the Commission, for the regulated gear set out in Table I, with reports in electronic format containing the details of the calculation based on:

(a) the list of fishing vessels authorised to fish by indicating their Union fishing fleet register number (CFR) and their engine power;

(b) the number of days at sea for which each fishing vessel would have initially been authorised to fish according to Table I and the number of days at sea from which each fishing vessel would benefit in application of point 6.1.

6.4. On the basis of that request, the Commission shall assess whether the conditions referred to in point 6 are complied with and, where that is the case, may authorise the Member State concerned to benefit from the system referred to in point 6.1.

7. ALLOCATION OF ADDITIONAL DAYS FOR PERMANENT CESSATION OF FISHING ACTIVITIES

7.1. An additional number of days at sea on which a fishing vessel may be authorised by its flag Member State to be present within the area when carrying on board any regulated gear may be allocated to a Member State by the Commission on the basis of permanent cessations of fishing activities that have taken place during the preceding management period in accordance with either Article 34 of Regulation (EU) No 508/2014 of the European Parliament and of the Council ⁽¹⁾ or with Council Regulation (EC) No 744/2008 ⁽²⁾. The Commission may consider permanent cessations resulting from any other circumstances on a case by case basis, following a written and duly reasoned request from the Member State concerned. Such a request shall identify the fishing vessels concerned and confirm, for each of them, that they shall never resume fishing activities.

7.2. The effort expended in 2003, measured in kilowatt days, of the withdrawn fishing vessels using a given gear grouping shall be divided by the effort expended by all fishing vessels using that gear grouping in 2003. The additional number of days at sea shall be calculated by multiplying the ratio so obtained by the number of days that would have been allocated according to Table I. Any part of a day resulting from that calculation shall be rounded to the nearest whole day.

7.3. Points 7.1 and 7.2 shall not apply where a fishing vessel has been replaced in accordance with point 4.2, or when the withdrawal has already been used in previous years to obtain additional days at sea.

⁽¹⁾ Regulation (EU) No 508/2014 of the European Parliament and of the Council of 15 May 2014 on the European Maritime and Fisheries Fund and repealing Council Regulations (EC) No 2328/2003, (EC) No 861/2006, (EC) No 1198/2006 and (EC) No 791/2007 and Regulation (EU) No 1255/2011 of the European Parliament and of the Council (OJ L 149, 20.5.2014, p. 1, ELI: <http://data.europa.eu/eli/reg/2014/508/oj>).

⁽²⁾ Council Regulation (EC) No 744/2008 of 24 July 2008 instituting a temporary specific action aiming to promote the restructuring of the European Community fishing fleets affected by the economic crisis (OJ L 202, 31.7.2008, p. 1, ELI: <http://data.europa.eu/eli/reg/2008/744/oj>).

▼B

- 7.4. A Member State wishing to benefit from the allocations referred to in point 7.1 shall submit a request to the Commission by 15 June 2025 with reports in electronic format containing, for the gear grouping as set out in Table I, the details of the calculation based on:
- (a) lists of withdrawn fishing vessels with their Union fishing fleet register number (CFR) and their engine power;
 - (b) the fishing activity deployed by such fishing vessels in 2003 calculated in days at sea according to the grouping of fishing gear.
- 7.5. During the current management period, a Member State may reallocate any additionally granted days at sea to all or part of the fishing vessels remaining in its fleet and qualified for the regulated gear.
- 7.6. When the Commission allocates additional days at sea due to a permanent cessation of fishing activities during the preceding management period, the maximum number of days per Member State and gear set out in Table I shall be adjusted accordingly for the current management period.
8. ALLOCATION OF ADDITIONAL DAYS FOR ENHANCED SCIENTIFIC OBSERVER COVERAGE
- 8.1. Three additional days on which a fishing vessel may be present within the area when carrying on board any regulated gear may be allocated between 1 February 2025 and 31 January 2026 to a Member State by the Commission on the basis of an enhanced programme of scientific observer coverage in partnership between scientists and the fishing industry. Such a programme shall focus in particular on levels of discarding and on catch composition and go beyond the requirements on data collection laid down in Regulation (EU) 2017/1004 of the European Parliament and of the Council ⁽³⁾ and its implementing rules concerning national programmes.
- 8.2. Scientific observers shall be independent from the owner, the master of the fishing vessel and any crew member.
- 8.3. A Member State wishing to benefit from the allocations referred to in point 8.1 shall submit a description of its enhanced scientific observer coverage programme to the Commission for approval.
- 8.4. If an enhanced scientific observer coverage programme submitted by a Member State has been approved by the Commission in the past and the Member State concerned wishes to continue its programme without changes, it shall inform the Commission of the continuation of that programme 4 weeks before the beginning of the period for which the programme applies.

Chapter IV**Management**

9. GENERAL OBLIGATION
- Member States shall manage the maximum allowable effort in accordance with Articles 26 to 35 of Regulation (EC) No 1224/2009.
10. MANAGEMENT PERIODS
- 10.1. A Member State may divide the days present within the area set out in Table I into management periods of durations of 1 or more calendar months.

⁽³⁾ Regulation (EU) 2017/1004 of the European Parliament and of the Council of 17 May 2017 on the establishment of a Union framework for the collection, management and use of data in the fisheries sector and support for scientific advice regarding the common fisheries policy and repealing Council Regulation (EC) No 199/2008 (OJ L 157, 20.6.2017, p. 1, ELI: <http://data.europa.eu/eli/reg/2017/1004/oj>).

▼B

- 10.2. The number of days or hours for which a fishing vessel may be present within the area during a management period shall be fixed by the Member State concerned.
- 10.3. Where a Member State authorises fishing vessels flying its flag to be present within the area for a given number of hours, the Member State shall continue measuring the consumption of days as specified in point 9. Upon request by the Commission, the Member State concerned shall demonstrate that it has taken precautionary measures to avoid an excessive consumption of days within the area due to a fishing vessel terminating presences in the area before the end of a 24-hour period.

Chapter V**Exchanges of fishing effort allocations**

- 11. TRANSFER OF DAYS BETWEEN FISHING VESSELS FLYING THE FLAG OF A MEMBER STATE
 - 11.1. A Member State may permit any fishing vessel flying its flag to transfer days present within the area for which it has been authorised to another fishing vessel flying its flag within that area, provided that the product of the number of days received by a fishing vessel and its engine power in kilowatts (kilowatt days) is equal to or less than the product of the number of days transferred by the donor fishing vessel and its engine power in kilowatts. The engine power in kilowatts of the fishing vessels shall be that recorded for each vessel in the Union fishing fleet register.
 - 11.2. The total number of days present within the area transferred in accordance with point 11.1, multiplied by the engine power in kilowatts of the donor fishing vessel, shall not be higher than the donor fishing vessel's average annual days track record in the area as verified by the fishing logbook in the years 2001, 2002, 2003, 2004 and 2005 multiplied by the engine power in kilowatts of that fishing vessel.
 - 11.3. The transfer of days in accordance with point 11.1 shall be permitted between fishing vessels operating with any regulated gear and during the same management period.
 - 11.4. Upon request by the Commission, Member States shall provide information on the transfers that have taken place. The Commission may adopt implementing acts establishing spreadsheet formats for the collection and transmission of that information. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 61(2) of this Regulation.
- 12. TRANSFER OF DAYS BETWEEN FISHING VESSELS FLYING THE FLAG OF DIFFERENT MEMBER STATES

Member States may permit transfer of days present within the area for the same management period and within the area between any fishing vessels flying their flags provided that points 4.1, 4.3, 5, 6 and 10 apply. Where Member States decide to authorise such a transfer, they shall notify the Commission, before the transfer takes place, of the details of the transfer, including the number of days to be transferred, the fishing effort and, where applicable, the fishing quotas relating thereto.

Chapter VI**Reporting obligations**

- 13. FISHING EFFORT REPORT

Article 28 of Regulation (EC) No 1224/2009 shall apply to fishing vessels falling within the scope of this Annex. The geographical area referred to in that Article shall be understood as the area defined in point 2 of this Annex.

▼B**14. COLLECTION OF RELEVANT DATA**

Member States shall collect on a quarterly basis information about total fishing effort deployed within the area by fishing vessels using towed gear and static gear, effort deployed within the area by fishing vessels using different types of gear, and the engine power of those fishing vessels in kilowatt days, on the basis of information used for the management of fishing days present within the area as set out in this Annex.

15. COMMUNICATION OF RELEVANT DATA

Upon request by the Commission, Member States shall make available to the Commission a spreadsheet with the data specified in point 14 and in the format specified in Tables II and III by sending it to the appropriate electronic mailbox address, which shall be communicated to the Member States by the Commission. Member States shall, upon request by the Commission, send detailed information to the Commission on the effort allocated and consumed, covering all or parts of the 2023 and 2024 management periods and using the data format specified in Tables IV and V.

Flag State	Fishery	Number of fishing authorisations	Maximum number of vessels present at any time
Venezuela ⁽¹⁾ ⁽²⁾ ⁽³⁾	Snappers (French Guiana waters)	45	45

⁽¹⁾ To issue those fishing authorisations, proof must be produced that a valid contract exists between the fishing vessel owner applying for the fishing authorisation and a processing undertaking situated in the Department of French Guiana, and that it includes an obligation to land at least 75 % of all snapper catches from the fishing vessel concerned in that department so that they may be processed in that undertaking's premises. Such a contract must be endorsed by the French authorities, which shall ensure that it is consistent both with the actual capacity of the contracting processing undertaking and with the objectives for the development of the Guianese economy. A copy of the endorsed contract shall be appended to the fishing authorisation application. Where such an endorsement is refused, the French authorities shall notify that refusal, and state the reasons therefor, to the parties concerned and to the Commission.

⁽²⁾ Fishing activities are authorised on an annual calendar basis. However, a fishing vessel can continue its fishing activities up to 3 months after expiry of its fishing authorisation, provided that the operator:

- initiated the process to renew its fishing authorisation,
- fulfilled all its contractual and information communication obligations.

This extension expires upon the entry into force of the Commission decision for a new fishing authorisation or notification of the refusal of the new fishing authorisation.

⁽³⁾ Fishing activities by fishing vessels holding those fishing authorisations may only occur in the period from 16 February 2025 to 14 December 2025.

Net diagram(s):

For each net used, or any change in net configuration, refer to the relevant net diagram in the CCAMLR fishing gear library if available (www.ccamlr.org/node/74407), or submit a detailed diagram and description to the next meeting of the Working Group on Ecosystem Monitoring and Management (WG-EMM). Net diagram(s) must include:

1. Length and width of each trawl panel (in sufficient detail to allow calculation of the angle of each panel with respect to water flow).
2. Mesh size (inside measurement of stretched mesh based on the procedure in CCAMLR Conservation Measure 22-01 (2019)), shape (e.g. diamond shape) and material (e.g. polypropylene).

Observation steps and frequency

Holding tank volume

At the start of fishing	Measure the width and length of the holding tank (if the tank is not rectangular in shape, then additional measurements may be required; precision $\pm 0,05$ m)
Every month ⁽¹⁾	Estimate the volume-to-mass conversion derived from the drained mass of krill in a known volume (e.g. 10 litres) taken from the holding tank
Every haul	Measure the depth of krill in the tank (if krill are held in the tank between hauls, then measure the difference in depth; precision $\pm 0,1$ m) Estimate the green weight of krill caught (using equation)

Flow meter ⁽¹⁾

Prior to fishing	Ensure that the flow meter is measuring whole krill (i.e. prior to processing)
More than once per month ⁽¹⁾	Estimate the volume-to-mass conversion (ρ) derived from the drained mass of krill in a known volume (e.g. 10 litres) taken from the flow meter
Every haul ⁽²⁾	Obtain a sample from the flow meter and: <ul style="list-style-type: none"> — measure the volume (e.g. 10 litres) of krill and water combined, — estimate the flow meter volume correction derived from the drained volume of krill Estimate the green weight of krill caught (using equation)

Flow meter ⁽²⁾

Prior to fishing	Ensure that both flow meters (one for the krill product and one for the water added) are calibrated (i.e. show the same, correct reading)
Every week ⁽¹⁾	Estimate the density (ρ) of the krill product (ground krill paste) by measuring the mass of a known volume of krill product (e.g. 10 litres) taken from the corresponding flow meter
Every haul ⁽²⁾	Read both flow meters, and calculate the total volumes of the krill product (ground krill paste) and that of the water added; density of the water is assumed to be 1 kg/litre Estimate the green weight of krill caught (using equation)

Flow scale	
Prior to fishing	Ensure that the flow scale is measuring whole krill (i.e. prior to processing)
Every haul ⁽²⁾	<p>Obtain a sample from the flow scale and:</p> <ul style="list-style-type: none"> — measure the mass of krill and water combined, — estimate the flow scale mass correction derived from the drained mass of krill <p>Estimate the green weight of krill caught (using equation)</p>
Plate tray

Every haul	<p>Measure the mass of krill and tray combined (precision $\pm 0,1$ kg)</p> <p>Count the number of trays used (if trays vary in design, then count the number of trays of each type)</p> <p>Estimate the green weight of krill caught (using equation)</p>

At the start of fishing	Measure the width and height of the cod-end (precision $\pm 0,1$ m)
Every month ⁽¹⁾	Estimate the volume-to-mass conversion derived from the drained mass of krill in a known volume (e.g. 10 litres) taken from the cod-end
Every haul	<p>Measure the length of cod-end containing krill (precision $\pm 0,1$ m)</p> <p>Estimate the green weight of krill caught (using equation)</p>

⁽¹⁾ A new period will commence when the vessel moves to a new subarea or division.
