Substances prescribed as specially controlled waste.

2. (1) Subject to the following provisions of this regulation, waste of a description listed and marked with an asterisk in column 1 of Schedule 1 is prescribed as specially controlled waste for the purposes of section 37 of the Law.

(2) In determining whether or not any waste is specially controlled waste by virtue of falling within a description of waste in column 1 of Schedule 1 which is identified as a "Mirror entry", by the indication of a letter "M" in the corresponding row in column 2 of Schedule 1, the holder of the waste must consider whether the waste has any of the hazardous properties H1 to H15 listed in Schedule 2 taking into account -

- (a) the origin and composition of the waste, and
- (b) where necessary for the hazardous property in question, the limit values of concentration set out in Schedule 3.

(3) For the avoidance of doubt, waste which -

- (a) falls within a description of waste in column 1 of Schedule 1, and
- (b) is identified as an "Absolute entry" by the indication of a letter "A" in the corresponding row in column 2 of Schedule 1,

is automatically considered to be specially controlled waste without the holder of the waste having to make any determination as to whether or not the waste falls within a

description of specially controlled waste by virtue of having any of the hazardous properties H1 to H15 listed in Schedule 2.

(4) In determining whether or not any waste is specially controlled waste under the Law regard must be had to any relevant guidance issued by the Director.

Exemptions from Part V of the Ordinance.

3. (1) The following persons are exempt from the requirements in section 27 of the Ordinance in relation to the specially controlled waste described below -

- (a) the occupier of a dwelling in relation to the presence of specially controlled waste at that dwelling, which is household waste produced at that dwelling,

Note 1. For the purpose of this Schedule, PCBs will be defined as in Council Directive 96/59/EC of 16 September 1996 on the disposal of polychlorinated biphenyls and polychlorinated terphenyls^m.

Note 2. Hazardous components from electrical equipment may include accumulators and batteries mentioned in 16 06 and marked as hazardous, mercury switches, glass from cathode ray tubes and other activated glass, etc.

Note 3. For the purpose of this entry, transition metals are: scandium, vanadium, manganese, cobalt, copper, yttrium, niobium, hafnium, tungsten, titanium, chromium, iron, nickel, zinc, zirconium, molybdenum and tantalum. These metals or their compounds are dangerous if they are classified as dangerous substances. The classification of dangerous substances shall determine which among those transition metals and which transition metal compounds are hazardous.

Note 4. Stabilisation processes change the dangerousness of the constituents in the waste and thus transform specially controlled waste into waste which is not specially controlled waste. Solidification processes only change the physical state of the waste

^m O.J. L. 243, 24.9.1996, p. 31.

(e.g. liquid into solid) by using additives without changing the chemical properties of the waste.

Note 5. A waste is considered as partly stabilised if, after the stabilisation process, dangerous constituents which have not been changed completely into non-dangerous constituents could be released into the environment in the short, middle or long term.

Note 6. Hazardous components from electrical and electronic equipment may include accumulators and batteries mentioned in 16 06 and marked as hazardous, mercury switches, glass from cathode ray tubes and other activated glass, etc.

SCHEDULE 2

regulation 2(2) and (3)

HAZARDOUS PROPERTIES OF WASTE WHICH RENDER THEM SPECIALLY CONTROLLED WASTE

(This Schedule substantially reproduces Annex III to Directive 2008/98/EC of the European Parliament and of the Council, of 19th November, 2008, on waste and repealing certain Directivesⁿ)

This Schedule shall be interpreted in accordance with the notes at the end of the Schedule.

H1 "Explosive": substances and preparations which may explode under the effect of flame or which are more sensitive to shocks or friction than dinitrobenzene.

H2 "Oxidizing": substances and preparations which exhibit highly exothermic reactions when in contact with other substances, particularly flammable substances.

H3-A "Highly flammable":

— liquid substances and preparations having a flash point below 21 °C (including extremely flammable liquids),

— substances and preparations which may become hot and finally catch fire in contact with air at ambient temperature without any application of energy,

— solid substances and preparations which may readily catch fire after brief contact with a source of ignition and which continue to burn or to be consumed after removal of the source of ignition,

ⁿ O.J. L. No. L. 312, 22.11. 2008, p.3.

— gaseous substances and preparations which are flammable in air at normal pressure, or

— substances and preparations which, in contact with water or damp air, evolve highly flammable gases in dangerous quantities.

H3-B "Flammable": liquid substances and preparations having a flash point equal to or greater than 21 °C and less than or equal to 55 °C.

H4 "Irritant": non-corrosive substances and preparations which, through immediate, prolonged or repeated contact with the skin or mucous membrane, can cause inflammation.

H5 "harmful": substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may involve limited health risks.

H6 "Toxic": substances and preparations (including very toxic substances and preparations) which, if they are inhaled or ingested or if they penetrate the skin, may involve serious, acute or chronic health risks and even death.

H7 "Carcinogenic": substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce cancer or increase its incidence.

H8 "Corrosive": substances and preparations which may destroy living tissue on contact.

H9 "Infectious": substances and preparations containing viable micro-organisms or their toxins which are known or reliably believed to cause disease in man or other living organisms.

H10 "Toxic for reproduction": substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce non-hereditary congenital malformations or increase their incidence.

H11 "Mutagenic": substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce hereditary genetic defects or increase their incidence.

H12 waste which releases toxic or very toxic gases in contact with water, air or an acid.

H13 (*) "Sensitizing": substances and preparations which, if they are inhaled or if they penetrate the skin, are capable of eliciting a reaction of hypersensitization such that on further exposure to the substance or preparation, characteristic adverse effects are produced.

H14 "Ecotoxic": substances and preparations which present or may present immediate or delayed risks for one or more sectors of the environment.

H15 Waste capable by any means, after disposal, of yielding another substance, e.g. a leachate, which possesses any of the characteristics listed above.

Notes to the Schedule

1. Attribution of the hazardous properties 'toxic' (and 'very toxic'), 'harmful', 'corrosive', 'irritant', "carcinogenic", "toxic to reproduction", "mutagenic" and "ecotoxic" is made on the basis of the criteria laid down by Annex VI to Council Directive 67/548/EEC of 27 June 1967 on the approximation of laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances⁰.

⁰ O.J. No. L 196, 16. 8. 1967, p. 1.

2. Where relevant the limit values listed in Annex II and III to Directive 1999/45/EC of the European Parliament and of the Council of 31st May 1999 concerning the approximation of the laws, regulations and administrative provisions of the Member States relating to the classification and labelling of dangerous preparations shall apply^P.

3. The test methods to be used are those described in Annex V to Directive 67/548/EEC, and in other CEN-notes.

* As far as testing methods are available

^P O. J. No. L 200, 30. 7. 1999, p. 1.

EXPLANATORY NOTE

(This note is not part of the Regulations)

Regulation 2(1) and Schedule 1 to these Regulations prescribe substances, marked with an asterisk in Schedule 1, which are specially controlled waste for the purposes of section 37 of the Environmental Pollution (Guernsey) Law, 2004. This is in addition to any description of waste listed in section 26 of the Environmental Pollution (Waste Control and Disposal) Ordinance, 2010 ("the Ordinance") i.e. prescription only medicines.

Regulation 2(2) and Schedules 2 and 3 set out the matters that a holder of waste must consider in determining whether or not waste marked with a letter "M" in column 2 of Schedule 1 is specially controlled waste.

Regulation 3 provides for exemptions from requirements in Part V of the Ordinance relating to -

- (a) notification of the presence on premises of specially controlled waste on premises, and
- (b) the collection and transport of specially controlled waste (i.e. the requirements in relation to consignment notes).
