KENYA
VISION 2030

FOREWORD

It is with great enthusiasm that I present the Ministry of Environment, Climate Change and Forestry's 2023 - 2027 Strategic Plan. Through this 5-year Strategic Plan, the Ministry recognizes the critical role played by the environment, climate action and forestry sector in sustaining life, supporting livelihoods, and driving Kenya's economic transformation agenda.

As a Ministry, we are cognizant of the enormity of the task ahead. We have identified the opportunities available to enable the sector to undertake the broad constitutional and social mandate of safeguarding sustainable and resilient environment, healthy ecosystems and sustained biodiversity. This is in line with the various multilateral and bilateral regulatory & Policy frameworks including the Kenya Vision 2030 and the Kenya Kwanza Government's Bottom-up Economic Transformation Agenda (BETA).

At the core of this Strategic Plan is the BETA framework which seeks to, among other priorities, open up the environment, climate action and forestry value chains for wealth and job creation. As a Ministry, we endeavor to ensure that, this Strategic Plan will be able to deliver tangible livelihood benefits to Kenyans across the country alongside raising the sectors contribution to Kenya's GDP.

Climate change, land degradation, biodiversity loss, pollution, depletion of natural resources and sustainable waste management are some of the environmental, climate action and forestry issues that we have identified and prioritized as being urgent and requiring targeted interventions for inter and intra generational equity.

This Strategic Plan underscores our deep commitment to addressing identified challenges through a 3-P approach where the People, Planet and Profit will be centerboard of our interventions. Further, this Plan outlines the Ministry's priorities and actions that we will take to achieve our goals and mandate over the next 5 years.

To achieve objectives set out in this Strategic Plan, the Ministry has taken a people centered approach in implementation of programmes, plans and policies. The Ministry will leverage on collaborative efforts with partners and enhanced public participation as well as the BETA principles of bottom-up approach in service delivery to ensure the whole-of-society involvement in the implementation of our broad mandate and related government priority programmes that may be assigned to the Ministry.

Going forward, we are confident that the 2023 - 2027 Strategic Plan will serve as a road map to guide the Ministry, its development partners and Kenyans actions that lead towards a resilient and sustainable environment. We look forward to working with all stakeholders to realize our Ministerial vision and national constitutional aspiration of a clean, safe, healthy, sustainably managed resilient environment and natural resources for the benefit of present and future generations.

Hon. Soipan Tuya, CBS
Cabinet Secretary

A handwritten signature in blue ink, consisting of several loops and a long horizontal stroke, positioned to the right of the name.

PREFACE AND ACKNOWLEDGEMENT

This 2023 -2027 Strategic Plan provides a solid base upon which the Ministry will accomplish its broad mandate of management and protection of Kenya’s environment and forests; sustainable utilization of natural resources; and climate action that covers climate change mitigation and adaptation to ensure a healthy and sustainable environment for present and future generations.

The Strategic Plan details strategies and activities that will enable the Ministry to achieve its goals as identified through participation of all stakeholders in a process that included a review of the 2018 to 2022 Strategic Plan and several national and international performance and Policy instruments among them the Vision 2030 and the Kenya Kwanza Government Bottom-up Economic Transformation Agenda (BETA).

A review of the 2018 - 2022 Strategic Plan revealed gaps issues that require attention, in particular, high rates of deforestation; growing severity of climate change impacts; rising levels of pollution; and increasing threat of biodiversity loss due to human activities such as land use changes, poaching, and over-exploitation of natural resources.

Based on this analysis, in the period 2023 to 2027, the Ministry will focus on pursuing five key result areas namely Environment, Climate Change and Forestry Governance and Coordination; Conservation, Protection, Restoration and Management of Environment and Forest Ecosystems; Climate Change Adaptation and Mitigation; Agroforestry and Commercial Forestry Development; and Resource Mobilization and Partnerships.

In each of these key result areas, strategic objectives and strategies have been formulated, and relevant activities identified to guide implementation of the plan over the planned period.

While the achievement of the planned objectives will require adequate resource allocation – human and financial resources – frequent evaluation of available resources will be necessary to ensure that a balance is maintained between achieving the key priorities for each year progressively and the available resources.

To ensure that the 2023 to 2027 is owned, relevant and easily adopted by all stakeholders during implementation, a consultative approach was used to gather insights, views, and expert opinions from all key stakeholders of the Ministry through a variety of forums.

Most importantly, this Strategic Plan provides a clear direction, clarity of purpose and resourcing framework to enable the Ministry to deliver on its mandate as expected by Kenyans. It is therefore our hope and belief that through the initiatives outlined in this Strategic Plan, the Ministry will be able to guarantee Kenyans a healthy and sustainable environment.

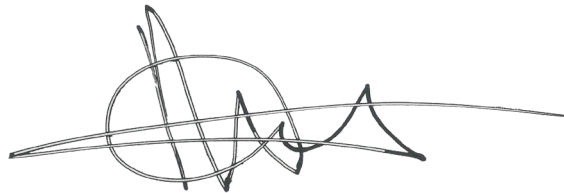

We wish to extend our special gratitude to our Cabinet Secretary, Hon Soipan Tuya, CBS for playing a leading role in giving strategic direction and guidance throughout the development of this Strategic Plan. We also appreciate Heads of Directorates, SAGAs and the Ministry staff for their and stewardship of the process. Equally critical is the contribution of technical staff who worked tirelessly and within strict timelines to ensure that this strategic conforms to the aspirations of the Ministry, the Government and the People of Kenya.

In a special way, we thank our stakeholders and development partners, more so the United Nations Development Program (UNDP) who not only gave valuable input but also invested time, human and financial resources towards development of this Strategic Plan. Their deep insights helped enrich the process and outcomes documented in this comprehensive and progressive plan. We look forward to their continued partnership and support in the implementation phase.

Finally, the implementation of this Strategic Plan will require focus, dedication and collaboration by all stakeholders, and we look forward to walking the journey together. We remain committed to the full realization of our aspirations as outlined in this Strategic Plan by leveraging on our people, partnerships and technology.

Eng. Festus K. Ng'eno

EXECUTIVE SUMMARY

The Ministry of Environment, Climate Change and Forestry was created vide Executive order No. 1 of 2023 on the Organization of Government of Kenya. It is mandated to undertake Climate Change/Action Policy; Promotion of low carbon technologies to reduce emissions; Restoration and Protection of Strategic Water Towers; Protection and Conservation of the Natural Environment; Pollution Control; Lake Victoria Environmental Management Programme; Restoration of Lake Naivasha Basin; Meteorological Services; Conservation and Protection of Wetlands; Forestry Development Policy; Forestry Management; Support in Climate Change/Action Policy; and Development of Forests, Re-forestation, and Agro-forestry.

According to the Executive Order, the Ministry also provides policy guidance, capacity building, resource mobilization, coordination and oversight for the following statutory institutions: National Environment Management Authority (NEMA); National Climate Change Council (NCCC); National Environment Trust Fund (NETFUND); Kenya Water Towers Agency (KWTA); Kenya Forest Service (KFS); Kenya Forestry Research Institute (KEFRI); National Environmental Complaints Committee (NECC); Kenya Meteorological Department (KMD); Kenya Meteorological Training College and National Environment Tribunal (NET).

The Ministry's Strategic Plan (2023-2027) provides a roadmap that the Ministry will pursue within the five years. The plan builds on the achievements of the previous plans, the First-Generation Strategic Plan (2004-2007), the Second-Generation Strategic Plan (2008-2012) the Third- Generation Strategic Plan (2013-2017) and the Fourth-Generation Strategic Plan (2018-2022). The plan takes cognizance of the risks and challenges identified during the implementation of the previous plans and considers the country's aspirations and commitments to excel regionally and globally in environment and natural resources conservation and management as well as delivery of quality services to all citizens.

Some of the Key achievements during the implementation of the Fourth-Generation Strategic Plan (2018-2022) include: forest cover Increased to 8.83%, tree cover increased to 12.13%, 11 seed centers were constructed, 514,031,272 tree seedlings produced and the Jaza-miti app launched to monitor tree growing, 158,336 Kgs of tree seeds were produced and distributed, and 288 Ha of seed orchards and seed stands were established.

The Ministry reclaimed 55,884.5 Ha of public forest land that was illegally encroached, protected 2.6 million Ha of gazetted forests, fenced a total of 258km of the Mau ecosystem, Mount Kenya, Eburu and Marsabit forest and Supported community groups by providing 1,620 beehives as nature-based enterprises. 2,600 inspections were undertaken which led to 87% reduction of banned single-use plastic.

To enhance access to weather information, 3 Automatic Weather Observing Systems were Installed at Moi Airport, Laikipia and Moi Airbase, 120 Automatic Weather Stations were also installed and a cluster system for climate diagnostic laboratory acquired.

The Ministry initiated the review of the Environmental Management and Coordination Act, 1999, developed the Solid Waste Management Act 2022, Water Towers Bill and Policy, and Meteorological Bill and Policy. The Ministry also revised & submitted updated Kenya's Nationally Determined Contributions targets of GHG reduction to 32% by 2030, developed National Climate Change Learning & Awareness Strategy, National Long Term-Low Emission Development Strategy for 2050, and established Integrated Measurement Reporting & Verification System for Kenya. Submitted sixth National report (6NR) and revised NBSAP 2019-2030 to UNCBD and LDN targets report to UNCCD,

Some of the challenges that the Ministry experienced during the implementation of the plan 2018-2022 include: The COVID-19 pandemic which hampered effective and timely implementation of most planned activities, plans, programmes and policies; increased invasive species that affected ecosystems services and loss of biodiversity leading to environmental degradation; natural calamities such as forest fires, floods, rising water levels in lakes, drought among others, hampered the progress made in natural forest conservation and restoration of degraded landscapes; and inadequate resources to replace staff who exited the service and inadequate technical officers.

Riding on the successes of the Fourth-Generation Strategic Plan, and in order to provide clean and health environment, The Ministry's vision is provision of "Clean, safe, healthy, sustainably managed resilient environment and natural resources", while the mission is "To Conserve, protect, sustainably manage the environment and natural resources to support biodiversity and socio-economic transformation.

The Ministry will be guided by the following core values; Efficiency, Professionalism, Innovativeness, Integrity, Teamwork, Customer oriented Focus, Inclusivity, Clean environment and Job creation & Improved livelihood. The plan also outlines the guiding principles and enablers that will be critical for the delivery of this plan.

This Strategic Plan (2023-2027) identifies five (5) Key Results Areas (KRA's) and strategic objectives that will be critical to the implementation of the plan as follows:

- 1. Environment, Climate Change and Forestry Governance and Coordination-** Strengthen environmental governance; strengthen climate change governance; and strengthen forestry governance.
- 2. Conservation, Protection, Restoration and Management of Environment and Forest Ecosystems-** Protect, conserve and manage the environment for sustainable development; conservation and protection of wetlands for enhanced ecosystem benefits; enhance sustainable waste management and pollution control; mainstream circular economy in national development; conserve and manage Lake Victoria and Lake Naivasha basins for enhanced socio-economic benefits of the water resource; restore ecological functions of forests ecosystems; enhance sustainable forest plantation management; increase forest and tree cover for enhanced economic and social and environmental benefits; coordinate research and education in forestry and allied natural resources.
- 3. Climate Change Adaptation and Mitigation-** Coordinate national climate action and reporting; awareness creation and capacity building of stakeholders for effective

implementation of local climate action; enhance access to means of implementation for local climate action; strengthen multilateral engagements and obligations on climate change; strengthen human, infrastructural, technological and innovative capacities for meteorological services.

4. Agro-forestry and Commercial Forestry Development - Coordinate development of agroforestry and commercial forestry in private and community lands; development of non-timber forest products value chains; agroforestry and commercial forestry enterprises and value chain development.

5. Resource Mobilization and Partnerships - Sustainable financing for environment, climate change and forestry conservation.

This Strategic Plan is outlined into eight chapters as follows:

Chapter One: The chapter gives an overview of the Ministry's background, its mandate/functions as per the Executive Order No. 1 of 2023 on the Organization of the National Government. In addition, the chapter describes the key guiding policies that support National Development Agenda, - the Vision 2030, the Fourth Medium Term Plan (2023-2027), the Bottom-up Economic Transformation Agenda (**BETA**), the UN Agenda 2030 on Sustainable Development Goals (SDGs), AU Agenda 2063, and EAC vision 2050. The Chapter further describes the process the Ministry undertook to develop its 2023 – 2027 Strategic Plan

Chapter Two: This chapter outlines the Vision and Mission statements which provide the Ministry's aspirations over the medium term (2023-2027). The key result areas and objectives are in line with the Vision and Mission statement of the Ministry and are also applicable within the context of the core values, guiding principles, enablers and quality statement. This chapter establishes the framework and context for the Ministry of Environment and Natural Resources in its efforts to conserve and manage Kenya's environment and natural resources.

Chapter Three: This chapter gives a review of the previous Strategic Plan (2018-2022). It outlines the key achievements, challenges, emerging issues and the lessons learnt during the implementation of the plan. It analyses the environmental scan using the SWOT and PESTEL analytical tools. The chapter further identifies stakeholders, their roles and responsibilities and highlights emerging strategic issues for the next planning period. The budgetary need for the implementation of the previous Strategic Plan was KShs. 41.9 billion while the Ministry raised KShs. 37.9b through the exchequer and development partners, occasioning a budget deficit of KShs. 4 billion

Chapter Four: This chapter outlines the Strategic Issues, Strategic Goals as well as the key result areas, which provide the Ministry's aspirations over the medium term (2023-2027). The key result areas are in line with the Vision and Mission statement of the Ministry and are also applicable within the context of the core values, guiding principles and enablers.

Chapter Five: This chapter outlines the strategic objectives and strategic choices, which provide the Ministry's aspirations over the medium term (2023-2027).

Chapter Six: This Chapter highlights the how the Strategic Plan will be operationalized through the development of implementation plan, action, plan and performance contracting. It also highlights the

principles of the organization structure, Staff Establishment, Business Process Re-engineering and Risk Analysis & Mitigation Measures.

Chapter Seven: This chapter highlights the financial Resource Requirements, Resource Gaps, Resource Mobilization Strategies and the Resource Management Strategies for the Strategic Plan period.

Chapter Eight: This Chapter describes how the Ministry of Environment, Climate Change and Forestry will undertake monitoring, evaluation and reporting of the implementation process of the Strategic Plan 2023-2027. The main objective of the exercise is to measure progress towards planned outputs and outcomes of strategies in the key results areas. The exercise therefore, tracks the implementation of policies, programmes and projects in the plan period. Monitoring and Evaluation (M&E) is a tool that will assist the management realize the achievement of stated organizational goals and objectives

CHAPTER 1. INTRODUCTION

INTRODUCTION

1.1. Overview

The chapter gives an overview of the Ministry's background, its mandate/functions as per the Executive Order No. 1 of 2023 on the Organization of the National Government. In addition, the chapter describes the key guiding policies that support National Development Agenda, - the Vision 2030, the Fourth Medium Term Plan (2023-2027), the Bottom-up Economic Transformation Agenda (**BETA**), the UN agenda 2030 on Sustainable Development Goals (SDGs), AU Agenda 2063, and EAC vision 2050. The Chapter further describes the process the Ministry undertook to develop its 2023 – 2027 Strategic Plan.

1.2. Strategy as imperative for organizational success

1.2.1. Background

The Ministry of Environment, Climate Change and Forestry's history can be traced back to the Ministry of Lands, Game, Fisheries and Natural Resources which was first established in 1963. Increased attention to environmental matters after the Stockholm Conference of 1972 led to the creation of the Ministry of Environment and Natural resources in 1982. The Ministry has evolved through the years with different names. In 2018, it was named as the Ministry of Environment and Forestry which later changed to the Ministry of Environment, Climate Change and Forestry as per the Executive Order No. 1 of 2023.

The Ministry is tasked to oversee the management and protection of the environment, the sustainable use of natural resources and the mitigation and adaptation to climate change. The Ministry aims at ensuring a healthy and sustainable environment for present and future generations in Kenya. The Country continues to face significant environmental and climate challenges. However, the Ministry remains committed to addressing these issues and promoting sustainable development. The Ministry takes cognizance and works to support the National Development Agenda.

This Strategic Plan is aligned to Vision 2030, which is the country's development blueprint that aims to transform Kenya into a newly industrialized middle-income country by the year 2030, the Fourth Medium Term Plan (2023-2027), the Bottom-Up Economic Transformation Agenda, the Sustainable Development Goals (SDGs) and Africa Agenda 2063.

The development of this Strategic Plan 2023-2027 was informed by the change of the Ministry's mandate via the Executive Order No.1 of 2023, and the Bottom-up Economic Transformation Agenda which is the National Development Agenda. The plan addresses the challenges identified during the mid-term review of the Strategic Plan 2018-2022 and incorporates the lessons learnt to inform the planning phase 2023-27 as well as the feedback received from various public institutions and other stakeholders. In addition, the Strategic Plan will guide the Ministry in the implementation of its programme and projects. The Strategic Plan also considers the strong commitment the country

has shown to environmental conservation and sustainability and the various initiatives and policies towards achieving the goals.

In order to effectively undertake its functions, the Ministry has two State Departments i.e. State Department for Environment and Climate Change and State Department for Forestry with thirteen technical directorates each headed by a director, and 5 Technical Secretaries to coordinate the technical functions of the Ministry. There are two (2) Administrative Services directorates headed by Administrative Secretaries for each state department. The Ministry is complemented by ten Semi-Autonomous Government Agencies (SAGAs) with distinct functions that cut across and support the achievements of the Key Result areas.

1.2.2. Mandate /Function of the Ministry

The Executive Order No. 1 of 2023 on the Organization of the National Government assigns the functions of the Ministry as follows:

- i. National Environment Policy and Management;
- ii. Climate Change/Action Policy
- iii. Promotion of Low Carbon Technologies to Reduce Emissions
- iv. Restoration and Protection of Strategic Water Towers
- v. Protection and Conservation of the Natural Environment
- vi. Pollution Control
- vii. Lake Victoria Environmental Management Programme
- viii. Restoration of Lake Naivasha Basin
- ix. Meteorological Services
- x. Conservation and Protection of Wetlands
- xi. Forestry Development Policy
- xii. Forestry Management
- xiii. Support in Climate Change/Action Policy
- xiv. Development of Forests, Re-afforestation, and Agro-forestry

1.2.3. Institutions

According to the Executive Order No.1 of 2023, the Ministry provides policy guidance, capacity building, resource mobilization, coordination and oversight to the following Semi-Autonomous Government Agencies (SAGAs) under the Ministry:

National Environment Management Authority (NEMA) (Environmental Management Coordination Act, No.8 of 1999): The Authority is mandated to ensure sustainable management of the environment through exercising general supervision and coordination over matters relating to the environment.

National Climate Change Council (NCCC) (Climate Change Act, No. 11 of 2016): The Council provides an overarching national climate change coordination mechanism and ensures climate change functions are mainstreamed in both levels of governments.

Kenya Water Towers Agency (KWTA) (Executive Legal Notice No. 27 of 2012): The Agency's mandate is to coordinate and oversee the protection, rehabilitation, conservation and sustainable management of all the critical water towers in Kenya.

National Environment Trust Fund (NETFUND) (Environmental Management Coordination Act, No.8 of 1999): The Fund's mandate is to facilitate research intended to further the requirements of environmental management, capacity building, environmental awards, environmental publications, scholarships and grants. To fulfill its mandate, NETFUND mobilizes, avails and manages resources for environmental protection and conservation in the country.

National Environmental Complaints Committee (NECC) (Environmental Management Coordination Act, No.8 of 1999): The Complaints Committee is charged with the task of investigating complaints or allegations regarding the condition of the environment in Kenya and suspected cases of environmental degradation. NECC also undertakes public interest litigation on behalf of the citizens in environmental matters.

Kenya Meteorological Department (KMD) The mandate of the KMD is to provide timely early warning weather and climate information essential for safety of life, protection of property and conservation of the natural environment. Contributing to socio-economic planning and sustainable national development, promoting long term observation and collection of meteorological, hydrological and climatological data, including related environmental data. The Department has additional mandate from the World Meteorological Organization Convention (WMO) which recognizes the KMD as the National Meteorological Service.

Kenya Meteorological Training College: The Institute is mandated with the responsibility of training personnel in Meteorology, Operational Hydrology and related geo-sciences in the country. The institute has additional mandate as a designated World Meteorological Organization Regional Training Centre (WMO - RTC) with the responsibility to organize and host specialized training courses in the English-speaking countries in Africa and parts of Asia due to its existing infrastructure, manpower and collaboration with other institutions both locally, regionally and internationally. The Institute offers regular courses as prescribed by WMO and tailor- made courses depending on the training needs.

National Environment Tribunal (NET): (EMCA 1999 Section 125) The National Environment Tribunal is mandated to hear and determine disputes arising from licensing decisions of NEMA, disputes arising in respect to forest conservation, management, utilization or conservation. The Tribunal is also mandated to determine disputes arising out of award of compensation by either the County Wildlife Conservation and Compensation Committee or KWS under section 25(6) of the Wildlife Conservation and Management Act 2013.

Kenya Forest Service (KFS) (Forest Conservation and Management Act, No. 34 of 2016): KFS mandate is to enhance development, conservation and management of Kenya's forest resources base in all public forests and assist County Governments to develop and manage forest resources on community and private lands for the equitable benefit of present and future generations.

Kenya Forestry Research Institute (KEFRI) (Science, Technology and innovation Act, No. 28 of 2013): KEFRI is mandated to conduct research in forestry and allied natural resources, disseminate research findings to stakeholders, build capacity of stakeholders and establish partnerships and cooperate with other research organizations and institutions of higher learning in joint research and training.

1.3. The Context of Strategic Planning

1.3.1. Policy and Legislative Framework Guiding the Ministry

There are various policies and legislations that guide the Ministry. The notable policies and legislations include:

i. Constitution of Kenya

The Constitution of Kenya is very particular on environmental issues which are articulated in Article 42, 43, 69, 70. The Constitution accords every person a right to a clean and healthy environment which should be protected for the benefit of present and future generations.

ii. Kenya Vision 2030

Kenya's Vision 2030 is a long-term development blueprint for the country, that aims to transform Kenya into a newly industrializing, middle-income country providing a high quality of life to all its citizens by 2030 in a clean and secure environment. The vision is anchored on three pillars; economic, social, and political, and recognizes the critical role the environment sector plays in achieving sustainable development. The Ministry of Environment, Climate Change and Forestry is supported in the social pillar, with the theme of building a just and cohesive society that enjoys equitable social development in a clean and secure environment.

iii. Fourth Medium Term Plan (MTP) (2023-2027)

The MTP is a successive five-year plan that implements the Kenya Vision 2030 which is a development blueprint. The MTP IV contains five sectors namely: Finance and Production Economy; Infrastructure; Environment and Natural Resource; Social Sector; and Governance and Public Administration.

Over the medium term, the Ministry through the Fourth Medium-Term Plan (2023-2027) has prioritized implementation of economic recovery strategies to re-position the economy on a steady and sustainable growth trajectory. The Ministry will focus on the Environment conservation and management, forest conservation and management, protection and conservation of wetlands, restoration and protection of water towers among others to ensure that the Fourth Medium Term Plan is achieved.

iv. Bottom-up Economic Transformation Agenda

The Strategic Plan 2023-2027 is anchored and aligned to the Bottom-Up Economic Transformation Agenda (BETA) which outlines the government priority focus areas for development. The Bottom-Up Economic Transformation Agenda is geared towards economic turnaround and inclusive growth, the agenda aims at increasing investments in the five sectors that form the core pillars, these include: Agricultural Transformation; Micro, Small and Medium Enterprise (MSME); Housing and Settlement; Healthcare; Digital Superhighway and Creative Industry. The agenda also includes the following key enablers: Infrastructure; Manufacturing; Blue Economy; the Services Economy, Environment and Climate Change; Education and Training; Women Agenda; Youth Empowerment and Development Agenda; Social Protection; Sports, Culture and Arts; and Governance.

The objective of providing a clean, healthy, safe and sustainably managed environment is consistent with Chapter Five of the Constitution of Kenya. The BETA aims at mainstreaming issues of environment conservation, climate change mitigation and adaptation, halt and reversal of deforestation, biodiversity loss and land degradation, in all Government programmes and in both levels of Government.

The Strategic Plan as guided by the Bottom-Up Economic Transformation Agenda is committed to reduce greenhouse gas emissions by 32 percent by 2030 as contained in Kenya's Nationally Determined Contribution (NDC). In addition, the Plan adopts a Bottom-Up 3P solutions with greater focus on the people, planet and profit through prioritizations of biomass energy (wood fuel), agroforestry and solid waste management value chains.

The Strategic Plan also considers the strategy involving modernizing and commercializing the charcoal value chain by adopting modern kilns, decriminalize the charcoal trade, supporting scaling up of clean cooking technologies and promoting youth-owned and operated briquette-making enterprises. To support the solid waste management value chain, the Strategic Plan will focus on adopting the Extended Producer Responsibility (EPR) model based on household level separation, organize waste collectors into cooperatives and provide circular economy waste separation sites/infrastructure. Under the agroforestry value chain, the focus is on development of a policy and regulatory framework to attract climate finance funds to facilitate establishment of 5 million acres (20,000 km²) agroforestry woodlots in drylands.

The Ministry will also develop and implement policies and strategies to tap into the global carbon market opportunities, green and climate financing mechanisms such as Green Climate Fund, promote green bonds and debt for climate swaps among others.

v. East Africa Community Agenda 2050

The Vision 2050 lays out a broad East Africa's perspective in which the region optimizes the utility of its resources to narrow the gap in terms of social wellbeing and productivity. The EAC Vision 2050 emphasizes harnessing natural resources for value addition and transformation of the economy to the benefit of the EAC, and for sustainable environment management. The vision also underscores the importance of a strengthened institutional framework for sustainable development which responds

coherently and effectively to current and future use of natural resources, and efficiently bridges gaps in the implementation of the sustainable development agenda. The Ministerial Strategic Plan seeks to harness Climate change adaptation and mitigation, promote green growth /green economy and Sustainable use of natural resources as guided by the EAC Vision 2050.

vi. Africa Union Agenda 2063

The plan is aligned to the Africa's Agenda 2063 which is the blueprint and master plan for transforming Africa into the global powerhouse by 2063. The Ministry is committed to the achievement of the AU Agenda 2063 by Aspiring a prosperous Africa based on inclusive growth and sustainable development on promoting environmentally sustainable and climate resilient economies and communities. Aspiration 1 of the AU Agenda 2063 is to have a prosperous Africa based on inclusive growth and sustainable development.

vii. United Nations agenda 2030 on Sustainable Development Goals

The Ministry is committed to the achievement of the SDGs and will focus on the following goals:

Goal 6: Clean Water and Sanitation: seeks to improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals and materials, halving the proportion of untreated wastewater and substantially increasing recycling and safe reuse globally. The goal also targets to Protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers and Lakes which the Ministry will undertake in the plan period.

Goal 11: Making cities and human settlements inclusive, safe, resilient and sustainable with a target of reducing the adverse per capita environmental impact of cities, including by paying special attention to air quality and municipal and other waste management.

Goal 12: Ensuring sustainable consumption and production patterns with a target of achieving the environmentally sound management of chemicals and all wastes throughout their life cycle, in accordance with agreed international frameworks, and significantly reduce their release to air, water and soil in order to minimize their adverse impacts on human health and the environment.

Goal 13: Taking urgent action to combat climate change and its impacts with targets of: strengthening resilience and adaptive capacity to climate-related hazards and natural disasters in all countries; integrating climate change measures into national policies, strategies and planning and improving education, awareness- raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning.

Goal 15: Protecting, restoring and promoting sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss. The targets are: ensuring the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and drylands, in line with obligations under international agreements; promoting the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation globally and; combating desertification, restore degraded land and soil, including land affected by desertification, drought and floods, and strive to achieve a land- degradation-neutral world.

The environmental, forest and natural resources legislation and policies are summarized in Table 1.1

Table 1.1: Legislation and policies.

Policy/Legislation	Key environment, forestry and natural resources issues
The Constitution of Kenya	<ul style="list-style-type: none"> • Accords every person a right to a clean and healthy environment and the environment should be protected for the benefit of present and future generations. • Ensures sustainable exploitation, utilization, management and conservation of the environment and natural resources. • Aspired to achieve and maintain a tree cover of at least ten per cent, which has been achieved. The Ministry seeks to increase the tree cover to 30 percent of the land area of Kenya by 2030. • Protects genetic resources and biological diversity; eliminate processes and activities that are likely to endanger the environment. • Utilizes the environment and natural resources for the benefit of the people of Kenya.
Kenya Vision 2030	<ul style="list-style-type: none"> • Aims to transform Kenya into a newly industrializing, middle-income country providing a high quality of life to all its citizens by 2030 in a clean and secure environment. • Environment, Climate Change and Forestry is supported in the social pillar, with the theme of building a just and cohesive society that enjoys equitable social development in a clean and secure environment.
Fourth Medium Term Plan (MTP) (2023-2027)	<ul style="list-style-type: none"> • Focus on the environment conservation and management, forest conservation and management, protection and conservation of wetlands, restoration and protection of water towers among others.

Policy/Legislation	Key environment, forestry and natural resources issues
Bottom-up Economic Transformation Agenda (BETA)	<ul style="list-style-type: none"> • Climate commitment to reduce emissions by 32 percent relative to “business as usual” by 2030. • Climate change impact mitigation, adaptation and resilience. Increase the tree cover to 30 percent by 2030. • Mainstreaming ecological sustainable development. • Priority value chains: biomass energy (wood fuel), agroforestry and solid waste management. • Establish 5M acres (20,000 km²) agroforestry woodlots in drylands. • 1/3 reduction of emissions from residential cooking • Commitment to (a) modernize and commercialize the charcoal value chain specifically the adoption of modern kilns (b) decriminalizes the charcoal trade (c) support scaling up of clean cooking technologies (e) promote youth owned and operated briquetting enterprises where agricultural waste is available in commercially viable quantities (coffee waste, rice husks, maize cobs, coconut husks). • Complement Extended Producer Responsibility (EPR) with a “bottom up” community based/owned value chain. Organize waste collectors into cooperatives. Provide “circular economy” waste separation sites/ infrastructure.
East Africa Community Agenda 2050	<ul style="list-style-type: none"> • Emphasizes harnessing natural resources for value addition and transformation of the economy to the benefit of the EAC, and for sustainable environment management. • Underscores the importance of a strengthened institutional framework for sustainable development which responds coherently and effectively to current and future use of natural resources.
Africa Union Agenda 2063	<ul style="list-style-type: none"> • Aspires to have a prosperous Africa based on inclusive growth and sustainable development. • Goal 7 is on environmentally sustainable and climate resilient economies and communities, with various targets, including: sustainable natural resource management and biodiversity conservation; climate resilience and natural disasters preparedness and prevention.

Policy/Legislation	Key environment, forestry and natural resources issues
<p>United Nations Agenda 2030 on Sustainable Development Goals</p>	<ul style="list-style-type: none"> • <u>Goal 6</u>: Clean Water and sanitation - seeks to improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals and materials, halving the proportion of untreated wastewater and substantially increasing recycling and safe reuse globally. • targets to protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers and lakes. • <u>Goal 11</u>: Making cities and human settlements inclusive, safe, resilient and sustainable with a target of reducing the adverse per capita environmental impact of cities including air quality and waste management. • <u>Goal 12</u>: Ensuring sustainable consumption and production patterns with a target of achieving the environmentally sound management of chemicals and all wastes throughout their life cycle. • <u>Goal 13</u>: Taking urgent action to combat climate change and its impacts with a target of strengthening resilience and adaptive capacity to climate-related hazards and natural disasters in all countries; integrating climate change measures into national policies, strategies and planning; and improving education, awareness- raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning. • <u>Goal 15</u>: Protecting, restoring and promoting sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss. The goal had a targets of; Ensuring the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and drylands, in line with obligations under international agreements; Promoting the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation globally; and combating desertification, restore degraded land and soil, including land affected by desertification, drought and floods, and strive to achieve a land - degradation - neutral world.

1.4. Strategic Planning Process

The development of this Strategic Plan (2023 – 2027) started on 21st February, 2023 vide a letter **Ref: NO: MEF /CS/028/2018** signed by the Cabinet Secretary, Ministry of Environment Climate Change, and Forestry **Hon. Soipan Tuya, CBS**. In the letter the Cabinet Secretary expressed her concerns that the Ministry was operating without a Strategic Plan since the current plan lapsed in **June, 2022**. She therefore, directed that, the process of developing a new plan start immediately with a clear road map and timelines.

Consequently, the Principal Secretary State Department for Environment and Climate Change, **Eng. Festus K. Ng'eno vide a letter Ref: MEF/ADM/41/2 dated 7th March, 2023** appointed Strategic Plan development technical committee comprising 37 officers to undertake the work. The Terms of Reference (ToRs) for the team included:

- i. Conducting a review of past Strategic Plans/policy documents related to the functions of the new two State Departments;
- ii. Conducting a situation analysis by undertaking internal and external environmental scan, stakeholder analysis, identifying challenges and opportunities and lessons learnt in previous implementation of related strategies;
- iii. Developing the **2023-27** strategic direction as guided by the two State Departments top management in line with issues identified in the situational analysis and determine the necessary strategies, key result areas, and budgets;
- iv. Preparing an implementation matrix for the plan as well as the derived matrices for the constituent Departments and Agencies with key performance indicators, targets and indicative budgets;
- v. Undertaking costing of activities as derived from the strategies to inform resource requirement;
- vi. Reviewing existing organizational structure and developing a new one where necessary for the Two State Departments;
- vii. Assessing the human resource capacity including staffing, skills and terms of service necessary to implement the mandate of the two State Departments;
- viii. Identifying financial resource requirements and gaps and proposing measures to address resource gaps;
- ix. Conducting a risk analysis and proposing mitigation measures to ensure successful implementation of the Strategic Plan;
- x. Developing a monitoring, evaluation and learning framework for the Strategic Plan;
- xi. Coordination/Stakeholders' engagement on the Strategic Plan; and
- xii. Developing a schedule for the Strategic Plan validation, finalization, and dissemination.

The technical team developed a template to gather information from all the relevant institutions and departments. The Strategic Plan development process was consultative, firstly, the technical team engaged all the heads of departments (HoDs) and Chief Executives Officers (CEOs) of Semi-Autonomous Government Agencies (**SAGAs**) in the Ministry to gather and analyze information from their institutions and departments using a prescribed template. The technical team held two (2) working retreats to draft the Ministry Strategic Plan. The first workshop was used by the team to put into context the information gathered as guided by the fifth-generation guidelines for preparation of the Strategic Plan 2023 – 2027. The first draft was shared with the stakeholders immediately after the workshop for comments and inputs using a prescribed template.

The technical team held a second workshop between 20/05/2023 and 27/05/2023 that culminated to a validation workshop on 24/05/2023 purposely to factor in inputs and comments received from the stakeholders. The validation workshop was held under the stewardship of the Cabinet Secretary, Ministry of Environment Climate Change, and Forestry and the two Principal Secretaries (Principal Secretary, State Department for Environment and Climate Change and the Principal Secretary for Forestry). Similarly, a number of stakeholders were invited and attended the validation workshop meeting. The comments received during the validation workshop were factored in the document. The draft plan was shared again with the stakeholders for further comments and inputs. The document was also shared in the Ministry website URL <https://www.environment.go.ke>. The second validation meeting was held on 29/06/2023 in the Ministry Board room still under the stewardship of the Cabinet Secretary and the two Principal Secretaries. The meeting unanimously agreed that the plan was good and would be launched for implementation.

CHAPTER 2. STRATEGIC DIRECTIONS

Impacts of climate change

STRATEGIC DIRECTIONS

2.1. Overview

This chapter outlines the Vision and Mission statements which provide the Ministry's aspirations over the medium term (2023-2027). The key result areas and objectives are in line with the Vision and Mission statement of the Ministry and are also applicable within the context of the core values, guiding principles, enablers and quality statement. This chapter establishes the framework and context for the Ministry of Environment, Climate Change and Forestry in its efforts to conserve and manage Kenya's environment and natural resources.

2.2. Mandate/Functions of The Ministry

The Executive Order No. 1 of 2023 on the Organization of the National Government assigns the functions of the Ministry as follows:

- i. National Environment Policy and Management;
- ii. Climate Change/Action Policy;
- iii. Promotion of Low Carbon Technologies to Reduce Emissions;
- iv. Restoration and Protection of Strategic Water Towers;
- v. Protection and Conservation of the Natural Environment;
- vi. Pollution Control ;
- vii. Lake Victoria Environmental Management Programme ;
- viii. Restoration of Lake Naivasha Basin;
- ix. Meteorological Services;
- x. Conservation and Protection of Wetlands;
- xi. Forestry Development Policy;
- xii. Forestry Management;
- xiii. Support in Climate Change/Action Policy; and
- xiv. Development of Forests, Re-forestation, and Agro-forestry.

2.3. Vision Statement

Clean, Safe, Healthy,
Sustainably Managed
Resilient Environment and
Natural Resources

2.4. Mission statement

To Conserve, protect, sustainably
manage the environment and
natural resources to support
Biodiversity and Socio-Economic
transformation

2.5. Core values

Efficiency	Teamwork
Professionalism	Customer Focus
Innovativeness	Improved livelihood
Integrity	Inclusivity

ENABLERS

- i. Legal, Policy & Institutional Frameworks
- ii. Sustainable Financing
- iii. Infrastructural Development
- iv. Technological Innovations

GUIDING PRINCIPLES

1. A right to a clean, safe and healthy environment.
2. An ecosystem approach to conserving, protecting and sustainably managed environment, forests and natural resources.
3. A coordinated, participatory and inclusive approach to conservation, protection and management of the environment, forests and natural resources.
4. Adoption of the User Pay Principle in the use and management of environment, forests and natural resources.
5. Response and adaptation to changing environmental needs and climatic risks.
6. Coordination and collaboration with stakeholders in the financing and management of environment, forests and natural resources.

2.6. Strategic Goals

- i. Enhance environmental, climate change and forestry governance.
- ii. Sustainably managed and resilient environment and forest ecosystems.
- iii. Mitigate climate change impacts.
- iv. Expand agroforestry and commercial forestry.
- v. Ensure adequate and sustainable resources.

2.7. Quality Policy Statement

The Ministry of Environment, Climate Change and Forestry is committed to promoting a Clean, Safe, Healthy, Sustainably Managed Resilient Environment and Natural Resources, through conserving, protecting and sustainably managing the environment and natural resources to support biodiversity and social economic transformation in order to secure livelihood and economic prosperity for the people of Kenya as envisaged in the Constitution, National Development Strategies, including Kenya Vision 2030.

To ensure that the Quality Policy is successfully implemented, staff will be responsible for identifying customer requirements, and ensuring that the correct procedures are followed to meet those requirements.

The objectives will ensure that the requirements of this Quality Policy are met and that continual improvement is maintained in line with the spirit of this Quality Policy.

CHAPTER 3. SITUATIONAL AND STAKEHOLDER ANALYSIS

Aberdare forest ecosystem

SITUATIONAL AND STAKEHOLDER ANALYSIS

3.1. Overview

This chapter gives a review of the previous Strategic Plan (2018-2022). It outlines the key achievements, challenges, emerging issues and the lessons learnt during the implementation of the plan. It analyses the environmental scan using the SWOT and PESTEL analytical tools. The chapter further identifies stakeholders, their roles and responsibilities and highlights lessons learnt for the purpose of improving future performance.

3.2. Situational Analysis

3.2.1. Macro-environment

Climate change: Kenya is experiencing the effects of climate change, including rising temperatures, changing rainfall patterns, and increased frequency and intensity of extreme weather events such as droughts and floods. The Ministry is working to reduce greenhouse gas emissions and adapt to the changing climate to protect the country's ecosystem and biodiversity.

Biodiversity Loss: Biodiversity loss is a critical global issue that has been described as the sixth mass extinction in the history of the planet. It refers to the gradual or rapid reduction of the variety of living species on earth as well as the loss of genetic diversity within species and ecosystems that support them. Biodiversity loss is a global issue that requires coordinated action at local, national, and international levels. The Ministry will protect biodiversity through the establishment of protected areas, the promotion of sustainable land use practices, and the development of policies and programs to address the root causes of biodiversity loss.

Land Degradation: Land degradation is a major global challenge, and Kenya is not exempt from this problem. Land degradation refers to the reduction or loss of the productive capacity of land, which can be caused by a range of factors, including human activities, climate change, and natural disasters. In Kenya, land degradation is a significant issue that affects both rural and urban areas. According to a report by the World Bank (2018), over 80 percent of the land in Kenya is classified as arid and semi-arid, making it particularly susceptible to degradation. The Ministry will ensure there are sustainable land management practices, such as agroforestry, conservation agriculture, and the restoration of degraded lands. These practices will help to improve soil fertility, reduce erosion, and increase the productivity of the land. Additionally, there is a need for policy interventions to support sustainable land management practices and ensure the protection of natural resources in Kenya.

Pollution: Pollution is a significant global challenge that affects various aspects of human life and the environment, and Kenya is not immune to its effects. Kenya is facing several pollution challenges that have detrimental impacts on the country's natural resources, public health, and economic development. Air pollution, water pollution and Land pollution are the forms of pollution in Kenya. The Ministry and relevant stakeholders will take appropriate measures such as enforcing environmental

regulations, promoting sustainable waste management practices, and raising public awareness to combat pollution in the country.

Technological Changes: Technology has revolutionized the way people live, work and interact with each other, but it has also created new challenges for the environment. While technology has the potential to help address environmental issues, it also contributes to environmental problems such as climate change, pollution and depletion of natural resources. Some of the ways technology poses challenges are through E-waste, Carbon footprint among others. To address these challenges the Ministry will develop and implement sustainable technologies and practices that minimize the environmental impact of technology while still meeting the needs for connectivity and information.

Global Economic Crisis: The Global Economic Crisis presents a significant challenge to the Ministry such as budget cuts, increased poverty, reduced or lack of investments on projects and initiatives, and reduced international cooperation. The Ministry will employ careful planning and strategic thinking to continue making progress on environmental issues in such times.

Post Covid-19 Pandemic: Economies world over are taking advantage of the opportunity provided by the need to redefine their growth projections post- Covid 19 by choosing to adopt greener growth paths.

3.2.2. Summary of Opportunities and Threats

Table 3.1: Summaries of opportunities and threats

Environmental Factors	Opportunities	Threats
Political	<ul style="list-style-type: none"> Provides a framework to devolve and decentralize environmental, climate change and forestry issues. Increased demand for Ministry service(s) at the county level Increased awareness in environmental sustainability. More efficient & effective utilization of resources. Clear mandate in management of environment and forestry resources. Enhanced support for environmental and forestry conservation The Presidential directive of accelerating to 30% National Tree cover by 2032. 	<ul style="list-style-type: none"> Challenge in the implementation of the intergovernmental coordination mechanisms. Emerging challenges during political transition pose a threat to the continuity of service provision. Politicization of conservation issues Relatively low funding for the environment and forestry sector.

Environmental Factors	Opportunities	Threats
Economic	<ul style="list-style-type: none"> • Promotion of value chain for nature-based enterprises. • Globalization • Efficiency and minimization of wastage • Carbon trading. • Kenya is a signatory to various regional and international treaties, protocols and conventions. 	<ul style="list-style-type: none"> • There is an increase in demand for environmental goods and services, hence more pressure on natural resources. • Increase cost for implementation of MEA's • Risk for further degradation in prospecting, explorations, mining and extraction • Competition for scarce resources • Increased poverty, hence increased reliance on environmental goods and services such as firewood and charcoal • Taxation on green technology imports.
Social	<ul style="list-style-type: none"> • The existence of diverse cultural values that promote conservation. • Need for more involvement of young people in conservation and management of environment and forestry resources. • Promoting youth-owned green enterprises. • Need to respond to public demands on environment and forestry resources management issues. • Need to ensure clean healthy and safe environment as a human right as outlined in the constitution. • Need to mainstream cross-cutting issues in the environment and forestry resource sector. • Availability of skilled and unskilled labour force in the market to support the Bottom-up approach to provide Environmental Solutions 	<ul style="list-style-type: none"> • Increased pollution, environmental degradation and challenges on waste management. • Change in land use. • High population leads to overdependence on limited natural resources. • Rapid manifestation of Climate change effects, Biodiversity loss and pollution impacting on Environment and Forestry sector.

Environmental Factors	Opportunities	Threats
Technological	<ul style="list-style-type: none"> • Existence of appropriate technology and innovations. • Cost-effective in data acquisition, processing and dissemination. • Timely, accurate and reliable analyses of data. • Increased capability in management of environmental data. • Achievement of evidence-based decision-making. • Transparent, reliable, efficient, cost-effective and predictable services. • Increased demand for timely services. • Easier communication with the public. • Increased public participation. • Reduction of use of paper for communications and hence reduced pressure on forests. • Improved service delivery. • Environmental sustainability. 	<ul style="list-style-type: none"> • Increased e-waste generation. • Skills redundancy and possible layoffs.
Ecological		<ul style="list-style-type: none"> • Depletion, degradation of land and biological resources. • Increased frequency of extreme weather events causing difficulty in the prediction of weather patterns and decreased production of natural resources.

Environmental Factors	Opportunities	Threats
Legal & Regulatory	<ul style="list-style-type: none"> • Constitution of Kenya 	
	<ul style="list-style-type: none"> • Existence of legal framework for protecting Traditional intellectual property rights. 	<ul style="list-style-type: none"> • Low compliance with environmental laws and regulations
	<ul style="list-style-type: none"> • International treaties, conventions, protocols and agreements 	<ul style="list-style-type: none"> • Delays in ratification of treaties, conventions, protocols and agreements

3.2.3. Internal Environment

3.2.3.1. Governance and Administrative Structures

Executive Order No. 1 of 2023 on Organization of the Government of the Republic of Kenya created two State Departments in the Ministry, namely the State Department for Environment and Climate Change, and State Department for Forestry. The Environment, Meteorological Services and Climate Change functions formed the State Department for Environment and Climate Change while the Forestry Conservation and Ecological Restoration Function was combined with Agroforestry to form the State Department for Forestry.

The Institutions / SAGAs under the State Department for Environment and Climate Change include the National Environmental Management Authority, National Environment Trust Fund, National Environment Complaints Committee, National Environment Tribunal, National Climate Change Council and Kenya Water Towers Agency while those under the State Department for Forestry include Kenya Forestry Service and Kenya Forest Research Institute.

3.2.4. Internal Business Processes

Table 3.2: Summary of strengths and weaknesses

Factor	Strengths	Weaknesses
Governance and Administrative Structures	<ul style="list-style-type: none"> • The Ministry has a clear mandate as per the Constitution of Kenya and the Executive order No. 1 of 2023. • Existence of legal framework for protecting traditional intellectual property rights. • Existence of enabling policies and legal framework for the bottom up approach in providing environmental solutions. 	<ul style="list-style-type: none"> • Weak enforcement of environmental, climate change and forest laws and regulations. • Slow implementation of MEAs and Cooperative Framework Agreements (CFAs).

Factor	Strengths	Weaknesses
Internal Business Processes	<ul style="list-style-type: none"> • Strong partnership with stakeholders. • Existence of enabling policies and legal framework for the bottom up approach in providing environmental solutions. 	<ul style="list-style-type: none"> • Inadequate human capital and financial resources.
Resources and Capabilities	<ul style="list-style-type: none"> • Enhanced effectiveness and efficiency in operations through two (2) State Departments created under the Ministry. 	<ul style="list-style-type: none"> • Inadequate data. • Slow adoption capacity to new technologies.

3.3. Stakeholder Analysis

Stakeholders are people who have vested interest in the issues and activities of the Ministry. The undertaking of Stakeholder analysis is imperative in identification and needs assessment. The Strategic Plan recognizes various stakeholders in environment and forestry management.

Table 3.3: Stakeholder analysis

S/ No.	Stakeholder	Role	Expectation of the Stakeholder	Expectation of the Organization
1.	Public/ citizenry	Seek services and provide feedback	<ul style="list-style-type: none"> • Active participation • Enhanced awareness in the sector • Efficient and effective services • Transparency and accountability in the service delivery 	<ul style="list-style-type: none"> • Regular feedback on services. • Responsive citizenry. • Compliance with laws and regulations. • Ownership and sustainability of projects.

S/ No.	Stakeholder	Role	Expectation of the Stakeholder	Expectation of the Organization
2.	Staff	Provide timely services Receive feedback	<ul style="list-style-type: none"> • Commitment to their welfare • Excellent performance to be rewarded. • Favorable terms & conditions of service and good work environment. • Skills development and Job progression • Efficient and effective Human Resource services. • Participatory and fair appraisal • Capacity development through the required training 	<ul style="list-style-type: none"> • Improved productivity. • Provide necessary skills and manpower. • Exhibit good image of the Ministry. • Efficient and timely services to the citizens and stakeholders. • Adherence to policies, rules, & regulations of the Ministry. • Efficient utilization of resources allocated.
3.	Researchers and academic institutions	Undertake research and dissemination of results on various topical areas	<ul style="list-style-type: none"> • Provide internships to their students. • Share the generated data and information. • Partnership and collaboration in research and policy formulation 	<ul style="list-style-type: none"> • Training of Staff who are competent to deliver on the Ministry's mandate.
4.	Ministries Department and Agencies (MDAs)	Collaborative partnerships in service delivery	<ul style="list-style-type: none"> • Effective coordination and formulation of Government policies, plans and budgets. 	<ul style="list-style-type: none"> • Implementation of policies, plans and budgets that have been formulated. • Timely reporting.

S/ No.	Stakeholder	Role	Expectation of the Stakeholder	Expectation of the Organization
5.	Contractors, Suppliers and Merchants	Supply goods and services	<ul style="list-style-type: none"> • Timely payments for goods and services supplied. • Procurement process which is transparent and accountable as well as Fair competition. 	<ul style="list-style-type: none"> • Efficient, effective and timely delivery of goods and services. • High standards of technical works undertaken, goods and services supplied that meet contractual obligations. • Competitive pricing.
6.	Professional bodies	<p>Provide necessary professional guidance</p> <p>Enforce regulations and standards</p>	<ul style="list-style-type: none"> • Compliance by staff through registration, renewal and continuous professional development. 	<ul style="list-style-type: none"> • Improved standards of technical expertise and professional management in the sector. • Partner in the implementation of development projects and programmes. • Improved innovation, research and development; and policy analysis. • Capacity building of staff.

S/ No.	Stakeholder	Role	Expectation of the Stakeholder	Expectation of the Organization
7.	Non-State Actors such as NGOs, civil societies, CBOs and Others	Provide advocacy services	<ul style="list-style-type: none"> • Participation in the Ministry policies, projects and programmes development • Provision of quality services in the environment and forestry resources sector 	<ul style="list-style-type: none"> • Active participation and collaboration. • Positive engagement.
8.	Development partners and international organizations	Provide financial and technical support	<ul style="list-style-type: none"> • Efficient use of Resources • Achievement of planned outcomes of projects implemented. • Involvement in planning for the sector • Policy direction on development planning. 	<ul style="list-style-type: none"> • Support specific programmes whose implementation is coordinated by the Ministry. • Timely disbursement of committed resources. • Technical assistance to strengthen institutional capacity.
9.	Parliament	Enact laws, regulations on policy frameworks	<ul style="list-style-type: none"> • Timely submission of draft policies and bills for legislation. • Timely response to parliamentary questions. • Efficient utilization of allocated resources. 	<ul style="list-style-type: none"> • Timely legislation of policies and bills on environment and forestry. • Adequate funding. • Oversight.

S/ No.	Stakeholder	Role	Expectation of the Stakeholder	Expectation of the Organization
10.	Media	Provide publicity	<ul style="list-style-type: none"> • Provision of timely, accurate and reliable information. • Collaboration and partnerships. 	<ul style="list-style-type: none"> • Enhanced awareness on environment and forestry. • Fair and responsible coverage and reporting.
11.	County Governments	Partnerships with National Government to implement policies on projects and programmes	<ul style="list-style-type: none"> • Policy guidance on environment and forestry • Partnership in implementation of devolved and devolved functions in environment and forestry. • Capacity building on environment and forestry. • Technical assistance and support. 	<ul style="list-style-type: none"> • Proper implementation of policies, legislation and regulations for both levels of Government. • Partnership in implementation of national programmes and projects. • Timely and quality provision of environment and forestry services to the public.
12.	Private sector	Undertake Public Private Partnerships (PPPs) on projects and programmes	<ul style="list-style-type: none"> • Increased involvement of Public Private Partnership (PPPs) for environment and forestry. • Provide an enabling environment and incentives for business. • Involvement in policy formulation in the sector. 	<ul style="list-style-type: none"> • Increased funding for prioritized PPPs projects in environmental and natural forestry activities. • Support implementation of the national government agenda. • Compliance with laws, regulations and best business practices.

S/ No.	Stakeholder	Role	Expectation of the Stakeholder	Expectation of the Organization
13.	Women and Youth	Public participations	<ul style="list-style-type: none"> Active participation in environment conservation and management Enhanced awareness in the sector Job and wealth creation through environment and forestry related activities 	<ul style="list-style-type: none"> Planting and growing of trees Responsive citizenry. Compliance with laws and regulations. Ownership and sustainability of projects.
14.	Judiciary	Interpret and provide advisory on legal matters	<ul style="list-style-type: none"> Abide by the law. Support to programmes on conservation on environment and forestry Awareness creation on environmental justice 	<ul style="list-style-type: none"> Fair and prompt dispensation of environmental justice.

3.4. Analysis of Past Performance

3.4.1. Key Achievements

The Strategic Plan under review (2018-2022) had four (4) key result areas and eighteen (18) strategic objectives. The Key Result Areas were:

1. Environmental Conservation and Management;
2. Forest and Biodiversity Conservation and Management;
3. Climate Change and Weather Information; and
4. Governance, Research and Institutional Framework.

Under Environmental conservation and management, the Ministry continuously undertook annual ambient air quality monitoring in three (3) major urban centres (Nairobi, Mombasa, Kisumu), Two thousand six hundred (2600) inspections were also undertaken in all counties on enforcement of single-use plastic ban leading to 87 percent reduction of the banned single-use plastic in the

environment. Four (4) integrated management plans were launched, 28,649 Environmental Impact assessment reports were received and processed while 26,707 licenses were issued, 100 percent environmental audits were targeted and achieved, two (2) cases of significant environmental importance and precedent setting on the protection and management of the environment were heard and determined. The cases enhanced environmental management and protection through the requirement for climate baseline studies and outlining effective public participation in environmental governance.

Awareness creation on environmental management and protection was enhanced through the publication and distribution of one hundred and sixty (160) scientific journal papers, book chapters, guidelines, policy briefs, technical and research notes. Through climate change guidelines and curriculum development for schools, the Ministry set the stage for cultural transformation by inculcating desirable skills and knowledge through education in learners.

The Ministry's mandate and strategic objectives were also achieved through adoption of 72,890 Ha of land under climate resilient management resulting in 38,923 households benefiting from project services. High quality tree seeds totaling 158,336 kilograms were produced and distributed, 288 Ha of seed orchards and seed stands were established in all eco-regions. An additional 11 seed centers were constructed, and 144 technologies developed to support establishment and management of forest plantations and farm forestry.

Through enhanced partnerships and resource mobilization, KShs. 6.6 billion was raised through development partners to support environmental management including restoration and sustainable management of forest ecosystem. The Ministry supported green technologies in waste management, renewable energy, forestry, climate smart agriculture and air pollution control through 185 projects to transition to green businesses and nature-based enterprises. Additionally, prioritized measures such as the automation of environmental licensing systems, e-registration of saw millers and installation of weather stations were successfully implemented to enhance timely and effective service delivery.

Under forest and biodiversity conservation and management, the Ministry increased forest cover from 6.99 percent in 2010 to 8.83 percent in 2021 equivalent to 5,226,191.79 Ha of forested area. National Tree Cover was determined to be 12.13 percent equivalent to 7,180,000.66 Ha. A total of 514,031,272 tree seedlings were produced. Trees planted over the period were 106,282,091 in an area of 85,982 Ha while Aerial seeding and the Jaza Miti APP were employed in the sector.

In collaboration with other state agencies, the Ministry reclaimed and sustained surveillance operations on 55,884.5 Ha of public forest land that was illegally encroached and settled on, 2.6 million Ha of gazetted forests were protected. Natural regeneration of forest and water tower ecosystems was also enhanced through reduced anthropogenic factors as a result of the fencing of 30km of the Mau ecosystem, 120 km Mount Kenya, 54 km of Eburu forest, and 54KM of Marsabit forest. To support community interventions around water towers, 1,620 beehives were provided to community groups to set nature-based enterprises around water towers. In addition, 18 water towers were assessed.

Under climate change and weather information, the Ministry installed 3 Automatic Weather Observing Systems for Moi Airport, Laikipia airbase and Moi Airbase and 120 Automatic Weather Stations.

Through automation, data for early warning systems was generated. A cluster system for climate diagnostic laboratory was also acquired.

Under governance, research and institutional framework, the Ministry initiated the review of the Environmental Management and Coordination Act 1999. It also developed the Solid Waste Management Act 2022, Water Towers Bill and Policy, and Meteorological Bill and Policy. The Ministry revised and submitted updated Kenya's Nationally Determined Contributions targets of Greenhouse Gas emissions reductions to 32 percent by 2030 relative to the BAU scenario of 143 MtCO₂eq. It also coordinated the implementation of the National Climate Change Action Plan II (2018-2022) which resulted into the development of National Climate Change Learning and Awareness Strategy, National Long Term-Low Emission Development Strategy for 2050, and establishment of the Integrated Measurement Reporting and verification System for Kenya.

As part of its commitments to fostering partnerships and compliance at the international and regional level, the Ministry met its obligations to Multilateral Environmental Agreements through the submission of the sixth National Report (6NR) to UNCBD, the LDN targets report to UNCCD, and the revised NBSAP 2019-2030 to UNCBD secretariat.

3.4.2. Challenges

During the implementation of the previous Strategic Plan (2018-2022), the Ministry and her agencies experienced the following key challenges:

- a. Global Pandemic:** The COVID-19 pandemic hampered effective and timely implementation of most planned activities, plans, programmes and policies across the sector;
- b. Litigation:** Court cases hindered implementation and operationalization of projects, programmes, plans and policies in the Ministry;
- c. Technical capacity:** Inadequate number of technical officers due to inadequate resources to replace staff who exited the service
- d. Invasive species:** Affected ecosystems and loss of biodiversity lead to environmental degradation;
- e. Natural calamities:** such as forest fires, floods, rising water levels in lakes, drought among others, hampered the progress made in natural forest conservation and restoration of degraded landscapes;
- f. Operationalization of intergovernmental collaboration framework:** Inadequate collaboration between the Ministry, its agencies and County governments hampered implementation of devolved environmental and forestry functions;
- g. Inadequate Legislative Capacity:** existing legislative framework had various gaps which limited the capability of various sector institutions to effectively perform their mandates;

- h. Inadequate Funds:** Inadequate funding for natural resources conservation and management as well as late release of funds and austerity measures affected programmes and projects implementation; and
- i. Insecurity:** limited performance of functions due to insecurity in parts of the country.

3.4.3. Emerging Issues

a. Rising waters

Rising water levels in lakes, oceans, rivers and dams resulted in negative socio-economic impacts in many regions in the country thus requiring urgent intervention. Understanding hydro-meteorological drivers of this scenario is important in designing short- and long-term measures/interventions.

b. Big data

Big data is the emergence of the study and application of data sets that are complex for traditional processing application software. A data fusion platform is required to generate information to develop a unique and large set of meteorological and environmental data. This introduces aspects of complex technology to handle large volume data sets and will be useful in the following areas:

- i. Blue economy.
- ii. WMO Global Framework for Climate Services (GFCS).
- iii. WMO Integrated Global Observation System (WIGOS).
- iv. Transboundary initiatives; and
- v. Free trade agreement (multilateral) discussions with the USA, the UK and others with implications to consumer sensitivity to green practices.

c. Carbon Markets

There is Lack of clear carbon benefit sharing mechanisms, this call for development of the carbon market framework to support the carbon markets.

d. Artificial Intelligence

The emergence of the artificial intelligence lead to environmental monitoring and data analysis, climate modelling and prediction which led to tracking of endangered species and informed decision making.

3.4.4. Lessons Learnt

During the implementation of the previous Strategic Plan (2018-2022), various lessons were learnt and will inform the implementation of the Strategic Plan (2023 – 2027). These lessons include:

- i. The need for enhanced effective public participation through capacity building;
- ii. Timely mid-term review of Strategic Plan gives time for feedback and corrective mechanism;
- iii. There is a need for mainstreaming climate change in forest conservation and management programs;
- iv. Collaborative framework between the National and County governments is essential for sustainable forest resources management;
- v. Use of digital platform enhance revenue collection and service delivery;
- vi. There is need for proper preparedness for natural calamities and global pandemics;
- vii. There is need for holistic approach, strategic partnerships and active engagement with partners and collaborators in Environmental and Forestry projects;
- viii. Species diversification with appropriate site matching in tree growing increase chances of tree survival contributing to forest cover at faster rate; and
- ix. Promoting the growing of bamboo across different landscapes offers opportunities for the development of bamboo-based enterprises.

CHAPTER 4. STRATEGIC ISSUES, GOALS AND KEY RESULT AREAS

Karura-Forest-Nairobi

STRATEGIC ISSUES, GOALS AND KEY RESULT AREAS

4.1. Overview

This chapter outlines the strategic issues, strategic goals as well as the key result areas, which provide the Ministry's aspirations over the medium term (2023-2027). The Plan has five Key Results Areas (KRAs) which are in line with the Vision and Mission statement of the Ministry.

4.2. Strategic Issues

1. Environmental, Climate Change and Forestry Governance.
2. Biodiversity loss.
3. Climate Change.
4. Land Degradation and Deforestation.
5. Inadequate resources for service delivery.

4.3. Strategic Goals

1. Enhance environmental, climate change and forestry governance.
2. Sustainably managed and resilient environment and forest ecosystems.
3. Mitigate climate change impacts.
4. Expand agroforestry and commercial forestry.
5. Ensure adequate and sustainable resources.

4.4. Key Result Areas

The Ministry will implement five key result areas namely:

1. Environment, climate change and forestry governance and coordination;
2. Conservation, protection, restoration and management of environment and forest ecosystems;
3. Climate change adaptation and mitigation;
4. Agroforestry and commercial forestry development; and
5. Resource mobilization and partnerships.

Table 4.1: Strategic issues, goals and key result areas

S/ No.	Strategic Issue	Goal	KRAs
1	Environmental, climate change and forestry governance	Enhance environmental, climate change and forestry governance	Environment, climate change and forestry governance and coordination
2	Biodiversity loss	Sustainably managed and resilient environment and forest ecosystems	Conservation, protection, restoration and management of environment and forest ecosystems
3	Climate change	Mitigate climate change impacts	Climate change adaptation and mitigation
4	Land degradation and deforestation	Expand agroforestry and commercial forestry	Agroforestry and commercial forestry development
5	Inadequate resources for service delivery	Ensure adequate and sustainable resources	Resource mobilization and partnerships

*Degraded Lake Olbolosat ecosystem
in Nyandarua County*

A group of people, including men and women, are working in a tea plantation. They are bent over, tending to the tea bushes. The scene is outdoors, with a dirt path and dense greenery in the background. The image is framed by green decorative borders at the top and bottom, with white curved lines separating the green sections.

CHAPTER 5. STRATEGIC OBJECTIVES AND STRATEGIES

STRATEGIC OBJECTIVES AND STRATEGIES

5.1. Overview

This chapter outlines the strategic objectives and strategic choices, which provide the Ministry's aspirations over the medium term (2023-2027). The Plan has 15 strategic objectives and 66 strategies. The strategic objectives and strategies align with the Ministry's Vision, Mission and Core Values.

5.2. Strategic Objectives

The Strategic Objectives serve as a roadmap to achieve the Ministry's mission and vision. The Ministry will focus on the following strategic objectives:

1. To strengthen environment, climate change and forestry governance;
2. To reduce environmental and land degradation;
3. To improve waste management;
4. To improve functioning of aquatic and terrestrial ecosystems;
5. To increase forest and tree cover towards the 30 percent target by 2032;
6. To strengthen research in environment and natural resources;
7. To strengthen national climate change actions and responses;
8. To enhance access to means of implementation for local climate action;
9. To strengthen multilateral engagements and obligations on climate change;
10. To strengthen early warning and early action through meteorological services;
11. To enhance agroforestry development;
12. To strengthen commercial forestry development;
13. To strengthen wood and non-wood forest products value chain;
14. To enhance enterprise development for agroforestry and commercial forestry; and
15. To increase sustainable resources for environment, climate change and forestry sector.

5.3. Strategic Choices

The Key Results Areas (KRAs), strategic objectives and strategies that will deliver the 2023-2027 Strategic Plan are outlined in table 5.1

Environment and Forestry Governance

Table 5.1: Strategic objectives and strategies

S/ NO	KRA	STRATEGIC OBJECTIVES	STRATEGIES
1	Environment, Climate Change and Forestry Governance and Coordination.	To strengthen environment, climate change and forestry governance.	<ul style="list-style-type: none"> i. Develop and review policies, legislations and regulations on Environment, Climate Change and Forestry. ii. Coordinate the implementation of policies, legislations and regulations on Environment, Climate Change and Forestry. iii. Enforce laws and foster compliance of regulations. iv. Provide linkages between policy, planning, budgeting and budget execution. v. Strengthen institutional capacity for environmental, climate change and forestry management. vi. Strengthen natural resource governance through coordinating negotiations and ratification of Multilateral Environmental Agreements and Partnerships. vii. Develop subsidiary legislation under the Forest Act to operationalize public private partnerships in forestry.
2	Conservation, Protection, Restoration and Management of Environment and Forest Ecosystems.	To reduce environmental and land degradation.	<ul style="list-style-type: none"> i. Coordinate natural resource protection and management. ii. Promote biodiversity conservation and equitable benefit sharing. iii. Mainstream Multilateral Environmental Agreements in national and county governments development plans. iv. Foster compliance and enforcement of laws and regulations in the environmental and natural resource sector. v. Promote adoption of green technologies.

Waste Management

Wetlands

Our Forests

S/ NO	KRA	STRATEGIC OBJECTIVES	STRATEGIES
		To improve waste management.	<ul style="list-style-type: none"> i. Foster education and public awareness on waste management and pollution control. ii. Coordinate development of waste management infrastructure. iii. Coordinate monitoring of water and air quality. iv. Mainstream circular economy in national development.
		To improve functioning of aquatic and terrestrial ecosystems.	<ul style="list-style-type: none"> i. Promote afforestation and reforestation of degraded forests and landscapes. ii. Promote actions to reverse forest degradation and biodiversity loss. iii. Coordinate conservation of lakes, river basins, coastal and marine ecosystems. iv. Coordinate conservation and protection of wetlands. v. Coordinate information and knowledge management on environment and natural resources.
		To increase forest and tree cover towards the 30% target by 2032.	<ul style="list-style-type: none"> i. Coordinate the implementation of the National tree growing and restoration campaign. ii. Enhance production of tree seeds and seedlings. iii. Establish synergies for joint tree growing through partnerships. iv. Provide incentive framework for Investment in carbon markets, natural capital accounting, and PES schemes. v. Promote participatory forest management.

S/ NO	KRA	STRATEGIC OBJECTIVES	STRATEGIES
		To strengthen research in environment and natural resources.	<ul style="list-style-type: none"> i. Promote research, innovation and adoption of appropriate technologies. ii. Coordinate production of appropriate tree germplasms for agroforestry and reforestation programmes. iii. Coordinate research in technological development for conservation and sustainable use of mangroves and coastal resources. iv. Promote research in ecosystem productivity and biodiversity Improvement. v. Provide framework for enhancing bioprospecting and utilization of indigenous knowledge in natural resource products.
3	Climate Change Adaptation and Mitigation	To strengthen national climate change actions and responses.	<ul style="list-style-type: none"> i. Strengthening adaptation and mitigation actions across sectors. ii. Strengthen institutional capacities for realization of climate action. iii. Mainstream transparency, monitoring, review and verification of climate actions.
		To enhance access to means of implementation for local climate action.	<ul style="list-style-type: none"> i. Promote, adopt and transfer appropriate climate technologies and innovations. ii. Co-ordinate capacity development and awareness for locally led climate action.
		To strengthen Multilateral engagements and obligations on climate change	<ul style="list-style-type: none"> i. Coordinate national engagement in global and regional climate change fora. ii. Enhance compliance to international and regional climate change obligations and commitments. iii. Strengthen MRV reporting.

Impacts of Climate Change

S/ NO	KRA	STRATEGIC OBJECTIVES	STRATEGIES
		To strengthen early warning and early action through meteorological services.	<ul style="list-style-type: none"> i. Integrate emerging technologies in the provision of meteorological services and products. ii. Enhance research, innovation and training. iii. Enhance capacity for production and delivery of tailored weather products. iv. Improve service delivery mechanisms for early warning systems and weather modification initiatives.
4	Agroforestry and Commercial Forestry development.	To enhance agroforestry development.	<ul style="list-style-type: none"> i. Promote adoption of agroforestry in private and community lands. ii. Coordinate implementation of the national strategy for agroforestry. iii. Coordinate Implementation of the 30% tree cover strategy through Agroforestry.
		To strengthen commercial forestry development.	<ul style="list-style-type: none"> i. Foster commercial forest plantation establishment and management. ii. Promote technologies for processing and value addition in timber products.
		To strengthen wood and non-wood forest products value chain.	<ul style="list-style-type: none"> i. Increase efficiency of the forestry value chains. ii. Develop and implement incentive schemes in agroforestry and commercial forestry. iii. Promote sustainable production and utilization of non-timber forest products. iv. Promote market development for wood and non-wood forest products. v. Promote production and utilization of alternative energy sources. vi. Promote efficient charcoal production and utilization technologies. vii. Promote adoption of high value agroforestry and commercial trees on private and community lands. viii. Building the capacity of actors on agroforestry and commercial forestry.

Agroforestry and commercial forestry

S/ NO	KRA	STRATEGIC OBJECTIVES	STRATEGIES
		To enhance enterprise development for agroforestry and commercial forestry.	<ul style="list-style-type: none"> i. Develop and promote adoption of superior agroforestry and commercial forestry germplasm. ii. Create and enhance linkages between commercial forestry and agroforestry actors. iii. Support development and operationalization of commercial forestry and agroforestry incubation and innovation centres.
5	Resource Mobilization and Partnerships	To increase sustainable resources for environment, climate change and forestry sector.	<ul style="list-style-type: none"> i. Strengthening institutional capacity on resources mobilization. ii. Increase government funding allocation for the sector. iii. Strengthen development of a common Programme Framework as a basket of programmes and projects for the sector. iv. Promote innovative financing mechanisms. v. Enhance public private partnership investment in environment, climate change and forestry. vi. Increase access to global funding for accelerated local environmental and climate actions. vii. Strengthen strategic engagement with bilateral and multilateral development partners.

Resource Mobilization

**CHAPTER 6. IMPLEMENTATION AND
COORDINATION FRAMEWORK**

IMPLEMENTATION AND COORDINATION FRAMEWORK

6.1. Overview

This Chapter highlights how the Strategic Plan will be implemented through the operationalization of the implementation plan, action plan, annual workplans, budgeting and performance contracting. It also highlights the principles of the organization structure, staff establishment, business process re-engineering and risk analysis & mitigation measures.

6.2. Implementation Plan

The Ministry will implement the Strategic Plan through the development of an elaborate action plan. The action plan gives the strategic objectives of each Key Result Area with well-defined annual targets, annual budgets and responsibility for execution of the activities. The concept of performance contracting will also be deployed in operationalizing of the Strategic Plan.

Table 6.1: Implementation matrix

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility	
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support
Strategic Issue: Environmental, Climate Change and Forestry Governance																
Strategic Goal: Enhance environmental, Climate Change and Forestry governance																
KRA 1: Environment, Climate Change and Forestry Governance and Coordination																
Outcome: Improved service delivery																
Strategic Objective: To strengthen environmental, Climate Change and Forestry governance																
Develop and review policies, regulations and on environment, Climate Change and Forestry	Develop and Review legislations and policies (as shown in annex 1)	Laws and Policies developed and reviewed	No. of laws and policies developed	29	17	7	5	0	0	46	27	25	20	0	MECC&F,	KFS, KEFRI, NEMA, KWITA

	Undertake awareness creation on laws and regulations	Awareness forums held	No. of awareness forums held	84	10	10	10	7	55	55	56	57	62	NEMA, NECC, NET	MECC&F,	
	Develop and apply technology in case management	Case management system established	No. of Case management system in place	7	1	1	1	1	6	6	6	6	6	6	NEMA, NECC, NET	MECCF
	Undertake intelligence led information gathering for environment and natural resources crime hotspots	Database developed	Database	1	1	1	1	1	10	10	10	10	10	10	KFS, NEMA, KWTA	MECCF
Deploy use of UAVs, Interpol, NIS and other surveillance technologies	Surveillance technologies deployed	No. of technologies	25	5	5	5	5	5	150	150	150	150	150	KFS, KEFRI, NEMA, KWTA	MECCF	
	Prepare Standard Operating Procedures for enforcement officers	Standard Operating Procedures developed	No. of Standard Operating Procedures	10	2	2	2	2	20	20	20	20	20	KFS, KEFRI, NEMA, KWTA	MECCF	
Conduct continuous skills improvement training for officers	Trainings conducted	No. of trainings	10	2	2	2	2	2	20	20	20	20	20	KFS, KEFRI, NEMA, KWTA	MECCF	

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility			
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support		
	Establish community alliances networks for reporting crimes	Community alliances established	No. of alliances	100	40	20	20	10	10	10	20	20	10	10	10	10	KFS, KEFRI, NEMA, KWTA	MECCF
	Conduct regular audits monitoring and reporting on law enforcement, occurrences or activities	Status of compliance determined	No. of reports/ audits	100	20	20	20	20	20	100	100	100	100	100	100	100	KFS, KEFRI, NEMA, KWTA	MECCF
	Undertake inspections and enforcement of environmental and natural resource laws and regulations	Status of compliance	Level of compliance (%)	100	100	100	100	100	100	100	100	100	100	100	100	100	KFS, KEFRI, NEMA, KWTA	MECCF
Promote adoption of green technologies	Build capacity for communities to adopt green technologies (solar, jikos, electric cars)	Capacity building forums conducted	No. of forums	100	20	20	20	20	20	20	20	20	20	20	20	20	MECCF,	KFS, KEFRI, NEMA, KWTA
	Initiate waste to energy programmes	Waste to energy programmes initiated	No. of programmes	10	2	2	2	2	2	2	2	2	2	2	2	2	NEMA	MECCF
Strategic objective 2: To improve waste management																		
Foster education and public awareness on waste management and pollution control	Develop and disseminate awareness materials	Awareness materials developed & disseminated	No. of awareness material developed & disseminated	10	2	2	2	2	2	2	2	2	2	2	2	2	DWM&PC	MECCF

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility		
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support	
	Mainstream waste management and pollution control in curricula	Waste management and pollution control mainstreamed	No. of curricula	1	1						4	4				DWM&PC	
	Sensitize informal waste collectors on the Sustainable Waste Management and link them to disposal facilities/ secondary markets recyclers	Informal waste collectors sensitized	No. of informal waste collectors sensitized	141	94	47	0	0	0	5	5	0	0	0	0	MECCF	NEMA/ COUNTY GOVERNMENTS
	Develop joint program for waste management and pollution control	Joint programmes developed	No. of joint programmes	10	2	2	2	2	2	2	10	10	10	10	10	MECCF/ NEMA	COUNTY GOVERNMENTS
Coordinate development of waste management infrastructure	Establish material recovery facilities (MRF) for income generation	MRFs established	No. of MRFs	250	5	20	50	75	100	500	500	500	500	500	500	NEMA/ COUNTY GOVERNMENTS	MECCF
Coordinate monitoring of water and air quality	Undertake ambient air quality monitoring in 5 major urban Centres (Nairobi, Mombasa, Kisumu, Nakuru and Eldoret)	Air quality monitoring reports	No. of reports	25	5	5	5	5	5	5	5	5	5	5	5	NEMA	MECCF
	Coordinate monitoring of water and soil quality parameters	Pollution status established	No. of pollution status reports developed	36	20	4	4	4	4	10	10	10	10	10	10	MECCF	NEMA

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility	
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support
	Establish a knowledge management system on pollution prevention and control	Knowledge Management System established	No. of knowledge management system in place	5	1	1	1	1	1	3	5	2	2	2	MECCF	NEMA
Mainstream circular economy in national development	Build capacity to youth and women groups on development of Circular economy business models and infrastructure	Groups Capacity built	No. of groups	50	20	10	10	10	10	60	30	30	30	30	MECCF/ NEMA	COUNTY GOVERNMENTS
	Establish demonstration centres for best circular economy practices	Demonstration centres established	No. of demonstration centres	50	20	10	10	10	10	100	50	50	50	50	MECCF/ NEMA	COUNTY GOVERNMENTS
	Coordinate formation of waste Service providers into cooperatives	Cooperatives formed	No. of cooperatives	94	20	20	20	20	14	20	20	20	20	14	MECCF	COUNTY GOVERNMENTS
Strategic Objective 3: To improve functioning of aquatic and terrestrial ecosystems																
Promote afforestation and reforestation of degraded forests and landscapes	Recruit youth and women (Green Army) to undertake afforestation of degraded forest landscapes	Youth and Women recruited	No. of youth and women recruited	100,000	20000	20000	20000	20000	20000	2500	2500	2500	2500	2500	KFS, KEFRI	MECCF
	Carry out mapping of degraded hotspots areas in forest landscapes	Ha. of Hotspot areas mapped	No. hectares mapped	3500000	175000	-	-	-	-	200	200				SDF	KFS/ KEFRI

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility	
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support
	Undertake conservation of mangroves	Mangroves areas conserved	No. of Hectares	60000	12000	12000	12000	12000	12000	10	10	10	10	10	KFS	KEFRI
	Carry out surveys for biodiversity conservation and sustainable use of natural forests	Biodiversity surveys in natural forests undertaken	No. of surveys undertaken	10	2	2	2	2	2	20	20	20	20	20	KFS	KEFRI
	Promote actions to reverse forest degradation and biodiversity loss	Livelihood alternative options developed	No. of alternative livelihoods developed	10	10	10	10	10	10	100	100	100	100	100	MECCF/ KFS, KEFRI	KWT A
Coordinate Conservation of lakes, river basins, coastal and marine ecosystems	Review of a Basin wide Restoration Plans for the two water basins (Naivasha and Lake Victoria)	Basin wide Restoration plans developed	No. of Basin Wide restoration plan in place	2	1	0	0	0	0	7	3	0	0	0	MECCF, KFS, KEFRI, NEMA, KWTA	NETF UND
	Implement strategies in the Plan (soil conservation, protection of springs, water harvesting structures)	Restoration activities undertaken	No. of activities	36	4	4	4	4	4	150	200	200	300	150	MECCF, KFS, KEFRI, NEMA, KWTA	NETF UND
	Develop partnership for joint implementation of conservation actions	Partnerships developed	No. of Partnerships	9	2	1	0	0	0	2	2	2	2	2	MECCF, KFS, KEFRI, NEMA, KWTA	NETF UND

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility	
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support
	Build resilience of the households displaced or affected by the floods	Households resilience built	No. of affected persons reached by targeted interventions	310000	120000	20000	50000	20000	100000	30	40	50	40	30	MECCF, KFS, KEFRI, NEMA	KWTA, NETF UND
	Restore degraded farmland areas affected by lake and river water intrusion	Degraded farmlands restored	Ha of farmlands	280000	150000	30000	50000	30000	20000	50	60	100	60	50	MECCF, KFS, KEFRI, NEMA	KWTA, NETF UND
	Undertake soil conservation measures	Conservation measures established	No. of conservation measures	475	250	50	100	50	25	50	100	50	25	MECCF	KFS, KEFRI, NEMA, KWTA, NETF UND	
	Establish water harvesting infrastructure	Water harvesting structures established	No of water harvesting structures	415	220	35	100	35	25	100	150	200	150	100	MECCF, KFS, KEFRI, NEMA, KWTA, NETF UND	KFS, KEFRI, NEMA, KWTA, NETF UND
Coordinate Conservation and Protection of wetlands.	Build capacity to counties to develop the wetlands management plans	Counties capacity built on development of management plans	No of counties capacity built	84	47	10	10	10	7	200	200	200	200	140	MECCF	NEMA/ COUNTY GOVERNMENTS
	Mapping and pegging of Public/community wetlands in counties	Wetlands mapped and pegged	No of wetlands mapped and pegged	84	47	10	10	10	7	40	20	20	20	14	MECCF/ NEMA	COUNTY GOVERNMENTS
	Develop incentive schemes for collaborative management and partnerships on wetlands	Schemes developed	No. of schemes	1	1	1	1	1	1	5					MECCF	NEMA, CGs

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility			
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support		
Coordinate information and knowledge management on environment and natural resources	Develop database for environment and natural resources	Database developed	No. of database	1	1												MECCF	KFS, KEFRI, NEMA, KWTA, NETF, UND
	Develop data sharing protocols	Sharing protocols developed	No. of sharing protocols	1	1												MECCF	KFS, KEFRI, NEMA, KWTA, NETF, UND
Strategic Objective 4: To increase Forest and tree cover towards the 30% target by 2032																		
Coordinate the implementation of the National tree growing and restoration campaign	Undertake afforestation and reforestation campaigns of the National Strategy towards the achievement of 30% tree cover	Afforestation and reforestation campaigns conducted	No. of Campaigns	480	96	96	96	96	96	96	208	208	208	208	208	208	MECCF	KFS, KEFRI
	Map and rehabilitate degraded rangelands / ASALS	Dryland forest landscapes and community forests rehabilitated	Ha rehabilitated	2,595,278	519,055.60	519,055.60	519,055.60	519,055.60	519,055.60	519,055.60	200	200	200	200	200	200	KFS	MECCF / KEFRI
		Land degradation neutrality levels determined	% improvement	15	6	9	12	15	15	50	50	50	50	50	50	50	KFS	MECCF/ KEFRI

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility		
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support	
	Rehabilitate degraded water towers, wetlands, and riparian areas outside gazetted forests	Water towers, wetlands, and riparian areas gazetted	Area in Ha.	250,000	50,000	50,000	50,000	50,000	50,000	50,000	200	200	200	200	200	MECCF/	KFS, KEFRI, NEMA
	Rehabilitate degraded natural forests in gazetted forests and water towers	Natural forests in gazetted forests and water towers rehabilitated	Area in Ha.	175,250	35,050	35,050	35,050	35,050	35,050	35,050	200	200	200	200	200	MECCF	KFS, KEFRI
	Establish bamboo forests	Bamboo forests established	Area in Ha.	75,000	15,000	15,000	15,000	15,000	15,000	15,000	100	100	100	100	100	KFS, KEFRI	MECCF
	Restock forest plantation areas in gazetted forests	Forest plantation areas in gazetted forests restocked	Area in Ha.	27,000	5,400	5,400	5,400	5,400	5,400	5,400	100	100	100	100	100	KFS	MECCF / KEFRI
	Establish green spaces (urban forests, arboretum, and roadside plantings)	Green spaces established	Area in Ha.	25,000	5,000	5,000	5,000	5,000	5,000	5,000	50	50	50	50	50	KFS	MECCF / KEFRI
	Promote growing of fruit trees and woodlots in schools, colleges, universities and other institutions	Fruit trees and woodlots established	Area in Ha.	35,000	7,000	7,000	7,000	7,000	7,000	7,000	100	100	100	100	100	KFS	MECCF/ KEFRI
	Greening of infrastructure (Roads, railway lines, dams) and tree planting by corporates and MDAs	Infrastructure greened	Area in Ha.	225,000	45,000	45,000	45,000	45,000	45,000	45,000	50	50	50	50	50	KFS, KEFRI	MECCF/

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility	
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support
Enhance production of tree seeds and seedlings	Coordinate allocation of seedlings production to various stakeholders	Seedlings allocated to stakeholders	No. of seedlings allocated (Millions)	7,500	1,500	1,500	1,500	1,500	1,500	4	4	4	4	4	MECCF	KFS, KEFRI
	Seedlings produced	Seedlings produced	No. of seedlings	13,500	2,700	2,700	2,700	2,700	2,700	2,700	2,700	2,700	2,700	2,700	MECCF,	KFS, KEFRI, KWTA
	Facilitate production, packaging and distribution of seeds to nurseries	Seeds produced, packaged and distributed	No. of seeds (in tons)	500	100	100	100	100	100	500	500	500	500	500	KFS	KEFRI
	Undertake tree growing across the landscapes	Tree growing across the landscapes	No. of trees grown (Millions)	7,500	920	1600	1600	1600	1600	1,600	1780	4500	4500	4500	SDF-	MECCF; KFS and KEFRI
Undertake monitoring and evaluation towards the 30% tree growing campaign	Status of the tree growing campaign	% increase	9	1.8	3.6	5.4	7.2	9	100	100	100	100	100	SDF-	MECCF; KFS and KEFRI	
Map potential sites for adopt a forest campaign	Sites for adopt a forest mapped	Area Ha. mapped	150,000	30,000	30,000	30,000	30,000	30,000	30,000	50	50	50	50	20	KFS	MECCF

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility	
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support
Establish synergies for joint tree growing through partnerships	Establish partnership to support tree growing initiatives	Partnerships established	No. of partnerships frameworks	100	20	20	20	20	20	5	-	-	-	-	NETFUND	MECCF
	Conduct national tree planting campaigns at National and County level	Tree planting campaigns held	No. of tree planting events	1450	290	290	290	290	290	-	10	-	-	-	KFS	MECCF
	Publicize tree planting campaign (e.g. social, print media & roadshows)	Tree growing awareness created	No. of publicity events	500	100	100	100	100	100	6	6	6	6	6	SDF	KFS and KEFRI
Provide incentive framework for investment in carbon markets, natural capital accounting, and PES schemes	Mainstream framework for natural capital accounting in the country	Frameworks developed	No. of frameworks	1	1					3					MECCF	KFS, KEFRI
	Develop forest accounts for the country	Forest accounts developed	No. of accounts developed	1	-	1				-	20				MECCF	KFS, KEFRI
Promote participatory forest management	Develop Payment for Ecosystem Services (PES) schemes for forestry	PES schemes developed	No. of schemes	2	1	1				100	-	100			MECCF	KFS, KEFRI
	Develop/ review rules for participatory forest management instruments	Participatory Forest Management rules developed/ reviewed	No. of PFM rules developed.	300	60	60	60	60	60	180	180	180	180	180	MECCF	KFS, KEFRI

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility		
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support	
	Develop grievance address mechanism for the parties to the PFM agreements	Grievance Address Mechanism Developed	No. of grievance address mechanism	1	1	-	-	-	-	-	-	30	-	-	-	MECCF	KFS, KEFRI
	Monitor and evaluate annually the performance of implementation of Participatory Forest Management Agreements in Public forests	Annual M&E reports	No. of M&E reports	20	4	4	4	4	4	10	10	10	10	10	MECCF	KFS, KEFRI	
	Promote enterprise development of Community Forest Associations	Community Forest Association enterprise promoted	No. of CFA enterprise promoted	300	60	60	60	60	60	20	20	20	20	20	MECCF,	KFS, KEFRI	
Strategic Objective 5: To strengthen research in environment and natural resources																	
Promote research, innovation and adoption of appropriate technologies	Facilitate development of silvicultural standards and Technical notes for plantation species and emerging timber species	Plantation management silvicultural standards	No. of silvicultural standards and technical Notes	8	1	2	2	2	2	20	4	4	4	4	MECCF,	KFS, KEFRI	
	Undertake research of alternative to plastic packaging	Alternative packaging materials identified	No. of packaging materials	10	2	2	2	2	2	2	2	2	2	2	MECCF,	KFS, KEFRI, NEMA	

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility	
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support
Coordinate production of appropriate tree germplasm for agroforestry and reforestation programmes	Undertake environmental research to develop compliance standards	Compliance Standards developed	No. of compliance standards	10	2	2	2	2	2	50	50	50	50	50	MECCF,	KFS, KEFRI, NEMA
	Develop technologies for Improved timber harvesting, processing, value addition and non-timber products development	Appropriate technologies developed	No. of technologies developed	20	4	4	4	4	4	10	10	10	10	10	KEFRI	MECCF
	Develop technologies in forest restoration and rehabilitation and control and management of invasive species	Appropriate technologies developed	No. of technologies developed	30	6	6	6	6	6	20	20	20	20	20	KEFRI	MECCF, KFS
Coordinate production of appropriate tree germplasm for agroforestry and reforestation programmes	Identify superior trees species for seed sources	Superior tree sources identified	No. of selected trees for seeds production	250	50	50	50	50	50	25	5	5	5	5	KEFRI	MECCF, KFS
	Collect, process and test seeds for quality assurance	Collected seeds tested for quality seed assurance	No. of seed batches testes for quality assurance	60 species	60	60	60	60	60	20	5	5	5	5	KEFRI	MECCF, KFS
	Distribute seeds to registered nurseries	Requested amount for seeds distributed to nurseries	No. of seed quantities in tonnes supplied to client's nurseries	500	100	100	100	100	100	125	25	25	25	25	KFS	MECCF, KEFRI

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility		
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support	
Coordinate research in technological development for conservation and sustainable use of mangroves and coastal resources	Promote technologies for mangrove degraded landscape restoration and rehabilitation	Technologies for mangrove propagation and rehabilitation	No. of technologies promoted	5	1	1	1	1	1	6	6	6	6	6	6	KEFRI	MECCF, KFS
	Build capacity of stakeholders in seedling production and restoration methods	Stakeholders trained on mangrove propagation	No. of stakeholders trained	500	2	100	100	100	100	10	2	2	2	2	2	KFS, KEFRI	MECCF
	Undertake species productivity improvement through selection, clones & provenances testing and application of silvicultural practices	Increased productivity of timber species by 10%	% increase in productivity	10	2	2	2	2	2	25	5	5	5	5	5	KEFRI	MECCF, KFS
Promote research in ecosystem productivity and biodiversity Improve-ment	Establish, maintain and secure seed sources	Quality & secured Seed sources established	No. of quality seed sources established	15	3	3	3	3	3	50	10	10	10	10	KEFRI	MECCF, KFS	
	Undertake monitoring of pests and diseases, and forest fires in sample plantations	Maintained healthy forest plantations	No. of Monitored plantations for control of pests and diseases	100	20	20	20	20	20	50	10	10	10	10	KFS, KEFRI	MECCF	
	Establish data bank for high yielding tree species	Data bank established	Report on data bank established	1	-	1	-	-	-	-	10	-	-	-	KEFRI	MECCF, KFS	

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility	
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support
	Undertake research for species selection and provenance trials for productivity improvement	Species productivity improved	No. of species	5	1	1	1	1	1	100	-	100	-	100	KEFRI	MECCF, KFS
Provide framework for enhancing Bioprospecting and utilization of indigenous knowledge in natural resource products	Document indigenous traditional knowledge on natural products and candidate species	ITK for bio enterprise documented	No. of documented ITK for bio enterprise	20	4	4	4	4	4	20	5	5	5	5	KEFRI	MECCF, KFS
	Determine propagation technologies for domestication of the candidate species for multiplication in ex-situ e.g. on-farms or grooves.	Propagation protocol for candidate ITK trees developed	No. of protocols developed	5	1	1	1	1	1	4	4	4	4	4	KEFRI	MECCF, KFS
	Develop mechanism for benefit sharing for commercially feasible tree-based products	Benefit sharing mechanism developed	No. of strategies developed	2	1	-	-	-	-	4	-	4	-	-	MECCF, KFS	KEFRI
Strategic Issue: Climate Change																
Strategic Goal: Mitigate Climate Change impacts																
KRA 3: Climate Change Adaptation and Mitigation																

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility		
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support	
Outcome: Climate Change resilience and low emission development																	
Strategic Objective 1: To strengthen national climate change actions and responses.																	
Strengthening adaptation and mitigation actions across sectors	Undertake comprehensive national climate vulnerability and risk assessment	Vulnerability and risk assessment	Report	1	-	-	-	-	-	10	0	0	0	0	0	Ministry/ CCD	MECCF
	Undertake a study on the economic impacts of climate change in Kenya	Economic impacts study undertaken	Report	1	1	-	-	-	-	0	15	0	0	0	0	CCD	MECCF
Strengthen institutional capacities for realization of climate action.	Develop the National Climate change Learning and Awareness Strategy	National climate Change Learning and Awareness Strategy developed	No.	5	1	1	1	1	1	20	20	20	20	20	20	CCD	MECCF
	Undertake capacity building of stakeholder institutions on climate actions	Capacity building of stakeholder institutions done	No. of Institutions	100	20	20	20	20	20	20	20	20	20	20	20	CCD	MECCF

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility	
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support
Mainstream transparency, monitoring, review and verification of climate actions.	Equip the National Resource Centre	National Resource Centre equipped	% of completion	1	0	0	0	-	-	5	8	10	10	10	CCD	MECCF
	Undertake transparency, monitoring, review and verification of climate actions.	Transparency and MRV mainstreamed in countries and sectors	No. of institutions mainstreaming transparency and MRV	60	60	60	60	60	20	20	20	20	20	20	CCD	MECCF
Strategic Objective 2: To enhance access to means of implementation for local climate action																
Promote, transfer appropriate climate technologies and innovations	Adopt and transfer appropriate climate technologies and innovations.	Adoption and transfer of appropriate climate technologies promoted	No. of technologies No. of innovations	50 50	10 10	10 10	10 10	10 10	10 10	4	4	4	4	4	CCD	MECCF
	2. Co-ordinate capacity development and awareness for locally led climate action.	Capacity enhancement of experts undertaken	No. of experts	60	10	10	10	20	10	8	8	8	8	8	CCD	MECCF
Strategic Objective 3: To strengthen Multilateral engagements and obligations on climate change																

Strategy	Key Activities	Expected Output	Output Indicator	Target for 5 years	Target					Budget (in Kshs. Million)					Responsibility	
					Y1	Y2	Y3	Y4	Y5	Y1	Y2	Y3	Y4	Y5	Lead	Support
Coordinate national engagement in global and regional climate change fora.	Undertake national engagement in global and regional climate change fora.	National Engagements in Global and Regional climate change fora undertaken	No. of country position papers developed	18	18	18	18	18	18	140	140	140	140	140	CCD	MECCF
Enhance compliance to international and regional climate change obligations and commitments.	Undertake compliance to international and regional climate change obligations and commitments.	Compliance to international and regional climate change obligations and commitments enhanced.	No. of reports	5	5	5	5	5	5	10	10	10	10	10	CCD	MECCF
Strengthen MRV reporting.	Undertake MRV reporting	MRV Sector reports done	No. of reports	8	8	8	8	8	8	5	5	5	5	5	CCD	MECCF
Strategic Objective 4: To strengthen early warning and early action through meteorological services.																
Integrate emerging technologies in the provision of meteorological services and products.	Upgrade technologies on high performance computing systems	Technologies upgraded	No. of technologies	10	2	2	2	2	2	222	214	130	198	210	KMD	MECCF
	Expand weather and climate monitoring infrastructure (observation networks)	Weather and climate monitoring infrastructure expanded	No. of new infrastructure	600	80	120	150	130	120	683	617	354	664	539	KMD	MECCF

6.2.1. Annual Workplan and Budget

The Ministry will develop annual workplan for each financial year of the plan period. It will further be cascaded to departmental and individual workplans. The workplans will be costed based on corresponding activities and available budget.

6.2.2. Performance Contracting

The Ministry will develop performance contract for the Cabinet Secretary for each financial year of the plan period as a key accountability tool to ensure efficient service delivery. The performance contract will then be cascaded to the two Principal Secretaries of the State Departments and further to State Corporations, Departments & Directorates in the Ministry.

6.3. Coordination Framework

Executive Order No. 1 of 2023 on Organization of the Government of the Republic of Kenya created two State Departments in the Ministry, namely the State Department for Environment and Climate Change, and State Department for Forestry. The Environment, Meteorological Services and Climate Change functions formed the State Department for Environment and Climate Change while the Forest Conservation and Ecological Restoration Function was combined with Agroforestry to form the State Department for Forestry.

The Institutions / SAGAs under the State Department for Environment and Climate Change include the National Environmental Management Authority, National Environment Trust Fund, National Environment Complaints Committee, National Environment Tribunal, National Climate Change Council and Kenya Water Towers Agency while those under the State Department for Forestry include Kenya Forest Service and Kenya Forestry Research Institute.

6.3.1. Institutional Framework

DEPARTMENTS/ DIRECTORATES/UNITS

i. Waste Management and Pollution Control Directorate

The Directorate is mandated to: Coordinate development and review of policy, legislation, standards and guidelines for addressing waste management, land, water and air pollution; develop and promote programmes on waste management and cleaner production; coordinate development and implementation of an incentives framework to enhance private sector investment in building and operating sustainable waste management infrastructure; Coordinate formalization of the waste picker sector and ensure safe working conditions through training; oversee monitoring of waste management practices and infrastructure to establish gaps that require extra policy interventions; and oversee compliance with national standards of effluent discharge for environmental safety.

ii. Multilateral Environmental Agreements Directorate

The Directorate is mandated to: Spearhead the development, implementation and review of policies, strategies and guidelines related to chemical and biological agreements; coordinate domestication and

implementation of biological and chemical Multilateral Environmental Agreements; provide leadership in negotiation and engagement in International, regional and national environmental governance and related processes; coordinate mainstreaming of international biological and chemical protocols and environmental agreements in the national environment agenda; coordinate preparation of status reports on ratification of chemical and biological MEAs; spearhead resource mobilization and capacity building for funding under the multi-lateral frameworks; coordinate consultations and cooperation with County governments to support domestication of chemical and biological MEAs; coordinate resource mobilization initiatives to support MEAs; and coordinate monitoring of domestication and implementation of biological and chemical MEAs.

iii. Programs, Projects and Strategic Initiatives Directorate

The Directorate is mandated to: Coordinate the development and implementation of national, regional and intergovernmental environmental programs, projects and strategic initiatives; coordinate the restoration and protection of water towers of strategic importance to the country; coordinate the conservation and protection of wetlands; spearhead monitoring, evaluation and review of environmental programs, projects and strategic initiatives; coordinate capacity building initiatives for the environment sector; promote collaborations and partnerships with Development Partners and private sector players on environmental matters; promote environmental education and awareness initiatives to inform public participation on matters environment; promote intergovernmental consultation and cooperation between national and county governments on environment sector issues; and coordinate development and implementation of Global Environment Facility National Programmes.

iv. Climate Change Adaptation, Negotiations and Resource Mobilization Directorate

The Directorate is mandated to: Coordinate development and implementation of climate change Adaptation policy by both state and non-state actors; coordinate Kenya's engagement in international climate change negotiations making direct and indirect decisions for Kenya; spearhead optimization of the country's opportunities to mobilize climate finance; coordinate establishment and management of a national registry for appropriate adaptation actions by public and private entities; guide national and county governments on development of strategies and actions for building resilience to Climate Change; coordinate technical assistance on adaptation based on needs identified by county governments; and coordinate Climate Change related adaptation programmes and projects.

v. Climate Change Mitigation and Knowledge Management Directorate

The Directorate is mandated to: Coordinate development and implementation of climate change mitigation policies; coordinate establishment and management of a national registry for appropriate mitigation actions by public and private entities; identify low carbon strategies and coordinate related measurement, reporting and verification in collaboration with other agencies; coordinate national knowledge and information system on Climate Change; assessment and Reporting of the status of the country's adherence to the international obligations; guide implementation of the gender and intergenerational climate change education, consultation and learning; coordinate development and

implementation of guidelines on carbon market mechanisms and policies; and coordinate Climate Change mitigation programmes and projects.

vi. Directorate of Meteorological Services

The Directorate is mandated to: Spearhead the development, implementation and review of Meteorological Services policies, regulations and guidelines; coordinate the development and generation of weather and climate forecasts; Facilitate access to weather and climate information; guide on the development of meteorological observational and communication network designs; facilitate the development and maintenance of Standard Operating Procedures; oversee the operations of the observatories, National Telecommunications Centre, Regional Telecommunications Hub and World Weather Watch; coordinate public education and awareness campaigns on meteorological services and products; spearhead the science of climate change that will guide the provision of advice on mitigation and adaptation strategies; and oversee county meteorological services.

vii. Directorate of Meteorological Training and Research

The Directorate is mandated to: Spearhead the development, implementation and review of meteorological training and research policies, regulations and guidelines; coordinate the provision of effective educational programs in the Institute and promote the improvement of teaching and learning; spearhead the development of training and research programs; oversee capacity building and skill development in the field of Meteorology and related applied sciences; facilitate advancement of the science of meteorology, weather and climate modelling and technology through research and development; facilitate collaboration with training and research institutions and stakeholders; and guide the preparation, assessment and evaluation of the Meteorological Training and Research curricula in accordance with the WMO's programmes on Education and Training and Government guidelines; and guide the development of project proposals for resource mobilization to support projects and programmes.

viii. Policy, Regulations and Research Directorate

The Directorate is mandated to: Coordinate formulation and review of relevant policies and Acts that affect environment and natural resources to align them to the current and emerging environmental changes; spearhead mainstreaming of environmental issues into sectoral policies; coordinate development of a framework to monitor the implementation of environmental and natural resources policies; coordinate collaborative research and surveys on environmental policy issues; coordinate partnerships and collaboration to undertake policy reviews and development; spearhead capacity building to stakeholders on environmental policy issues and; coordinate resource mobilization initiatives for policy development and review.

ix. Directorate of Forest Conservation

The Directorate is mandated to: Formulate and review policy and legislation of forests ecosystems; Coordinate the development and implementation of the National Forest Programme; facilitate the protection, management and conservation of forests ecosystem in collaboration with stakeholders; promote conservation and education programs for youth and women in relation to forest ecosystem; monitor exploitation and utilization of forest products to ensure sustainability; coordinate the

development, review and monitor implementation of guidelines and regulations for payment for Ecosystem Services; coordinate the implementation strategy to increase forest and tree cover; strengthen inter-governmental relationships and capacity building of County Governments and other stakeholders in implementation of forest functions.

x. Directorate of Ecological Restoration and Biodiversity

The Directorate is mandated to: Coordinate stakeholders for holistic and integrated approach to cross-cutting issues of restoration; develop policy and guidelines on restoration; develop and implement programs on restoration of degraded landscapes in the environment; coordinate mapping and assessments to determine the status of landscapes and ecosystems; coordinate generation of a data base for monitoring ecological integrity; build capacity to counties and other stakeholders on matters of ecological integrity; coordinate stakeholders to restore ecological integrity of landscapes; coordinate citizens education and awareness programmes on the importance of ecological restoration; establish partnership with relevant county governments on designing and implementation of ecological restoration programmes and initiatives; and develop proposals for funding programmes and projects for restoration.

xi. Directorate of Agroforestry

The Directorate is mandated to; Develop, review and coordinate implementation of policies, strategies, projects and programs on agroforestry; coordinate programs within agroforestry towards realization of the National Strategy for achieving 30% tree cover by 2032; domesticate and monitor compliance of MEAs and other regional instruments and protocols and coordinate integration of their provisions into agroforestry programs strategies and plans; coordinate mainstreaming of agroforestry extension services in County Integrated Development Plans (CIDPs); coordinate infrastructure development for agroforestry training; coordinate and promote development of affordable financial products for agroforestry value chain players; coordinate development of strategies for promotion of nature-based enterprises for communities' economic livelihoods; and develop strategies and promote initiatives to enhance competitiveness of agroforestry products and services in the global and regional markets.

xii. Directorate of Commercial Forestry

The Directorate is mandated to; Develop, review and coordinate implementation of policies, strategies and programs on commercial forestry; mainstream commercial forestry in existing and relevant policies, strategies and Acts; coordinate the integration of Carbon Trading System (CTS) into commercial forestry; promote development of commercial private forest investments, innovative land and tree tenure arrangements for long-term commercial forestry; and promote commercial forestry, technologies and innovations.

xiii. Research and Strategic Initiatives Directorate

The Directorate is mandated to; Oversee development, review and implementation of policies, strategies, projects, programs, regulations and plans on forest conservation, ecological restoration, agroforestry and commercial forestry; coordinate national, regional and international in resource mobilization; coordinate implementation of programmes, projects and strategic initiatives for forest conservation, ecological restoration, commercial forestry and agroforestry; coordinate research,

knowledge management and training; and coordinate natural resource accounting and ecosystem valuation.

xiv. Administrative Support Services

Administration and Support Services comprises of: General Administration Division; Records Management Unit; and Information Communication Technology Unit; Public Communications Unit, Legal Unit, Internal Audit Unit, Human Resource Management and Development Division; Finance Division; Accounts Division; Central Planning and Project Monitoring Department; and Supply Chain Management Division.

SEMI-AUTONOMOUS GOVERNMENT AGENCIES (SAGAS)

Kenya Water Towers Agency (KWTA) is a State Corporation mandated to coordinate and oversee the protection, rehabilitation, conservation and sustainable management of water towers in Kenya.

National Environment Trust Fund (NETFUND) was established by the Environmental Management and Coordination Act of 1999 and charged with the responsibility of mobilizing resources for environmental financing in Kenya.

Kenya Forestry Research Institute (KEFRI) undertakes research and provides technologies and information for sustainable management, conservation and development of forests and allied natural resources.

National Environment Management Authority (NEMA) was established under the Environmental Management and Co-ordination Act, 1999 as the principal instrument of Government for the implementation of all policies relating to environment.

National Environmental Complaints Committee (NECC) is the body charged with the task of investigating complaints or allegations regarding the condition of the environment in Kenya and suspected cases of environmental degradation.

Kenya Forest Service (KFS) was established by the Forest Conservation and Management Act, 2016 and is tasked with development, conservation and management of Kenya's forest resources base in all public forests.

National Environment Tribunal (NET) is mandated to hear and determine disputes arising from licensing decisions of NEMA and disputes arising in respect to forest conservation, management, utilization or conservation.

National Climate Change Council (NCCC) was established under the Climate Change Act, 2016 to provide an overarching national climate change coordination mechanism and ensures climate change functions are mainstreamed in both levels of governments.

6.3.2. Staff Establishment

The Ministry's authorized staff establishment is 999 against an in-post of 774. The shortfall of staff for the Ministry is 225. The proposed optimal staffing levels to facilitate effective and efficient service delivery in the Ministry is 1195 staff for State Department for Environment and Climate Change and 183 for State Department for Forestry.

6.3.3. Systems and Procedures

1. Business Process Re-Engineering

The Ministry will undertake the following measures to ensure re-engineering of business processes:

- i. Digitization and automation of the Ministry’s processes, data and information in line with Government’s commitment to make all public services available online: The Ministry will;
 - a. Develop an integrated comprehensive environment and forestry information system relating to the national government environmental functions to address information use, big data, innovations, monitoring and reporting and Artificial Intelligence,
 - b. Develop and update website and public portals for effective information dissemination, public access and service delivery,
 - c. Adopt and maintain the government records system for efficient and effective paperless management of Ministry’s records,
 - d. Develop an administration and HR information system to ensure effective management of HR and Ministry’s administration functions,
 - e. Establish a mechanism for ensuring inter-connectivity between each county and SAGAs ICT infrastructure through National Optic Fiber Backbone Infrastructure (NOFBI) and other alternative connectivity sources,
 - f. Establish a data center for systems hosting and collaboration with other government agencies,
 - g. Equip staff with the necessary ICT equipment for efficient service delivery, and
 - h. Development and initiating of inter-governmental collaborations frameworks, standards and guidelines for cascading national government policies and strategies.

The Ministry will develop standards and guidelines for;

- a. Administration of environment information banks, interoperability framework, data interchange, geo mapping and security,
 - b. Collection, management and disclosure of personal information in compliance with Data Protection Act, 2019,
 - c. Business continuity, emergency and disaster preparedness to ensure services are not interrupted in the event of a crisis,
 - d. Consolidation, harmonization and dissemination of environment and forestry information obtained for effective planning, research and awareness creation, and
 - e. Maintenance of websites, systems and databases to ensure they up to date with technological changes and advancements.
- ii. Oversee mainstreaming of communication in all Ministry programmes, initiatives and interventions to enhance visibility and public understanding leading to behavior change;
 - a. Create social media platforms for information dissemination,
 - b. Acquiring bulk messaging services for broadcast messaging and awareness creation, and
 - c. Develop communication standards and guidelines.

2. Human Resource/Capital Management and Development Strategies

In order to enhance the capacity development and productivity of the employees, the Ministry will endeavor to undertake the following during the plan period:

- a. Recruitment** – The Ministry will undertake recruitment of technical staff to fill the vacant positions;
- b. Career progression Guidelines** – The Ministry will develop career progression guidelines for the various cadres in the technical services for the Ministry as a basis for career advancement;
- c. Human Resource planning (HRP)** – The Ministry will develop a Human Resource planning (HRP) Strategy to address succession Management and Human resource needs;
- d. Training** – The Ministry will undertake Training Need Assessment (TNA) to identify the critical of training needs and how the needs will be addressed;
- e. Skills Inventory** – The Ministry will develop a database for available skills in the Ministry as basis for ensuring effective deployment/optimal utilization of available skills and optimal utilization of HR capacity and to address inadequate skill;
- f. Staff Performance Appraisal** – The Ministry will use the online Staff Performance Appraisal System (SPAS/GP 247) to link individual performance to organizational goals and objectives, through evaluating staff performance against agreed targets;

g. Human Resource Policies and Procedures – The Ministry will implement the prevailing Human Resource Policies and Procedure Manual under Public Service to address various Human Resource issues and to ensure compliance; and

h. Organization Structure and Staff Establishment – Seek approval for the proposed organizational Structure and the staff Establishment and implement.

6.4. Risk Management Framework

Table 6.4: Risk Management Framework

S/ No	Risk class/ category	Risk & Description	Likelihood (L/H/M)	Impact (L/H/M)	Overall Risk level (L/H/M)	Mitigation Measure(s)
1	Strategic	Inadequate Stakeholder participation	Low	High	Medium	Communicate and encourage stakeholder participation
		Litigation from citizenry on their violated rights	High	High	High	Ensure compliance with laws and regulations Stakeholder consensus and awareness creation
2	Operational	Loss of natural capital	High	High	High	Conservation and awareness creation
		Weak legal and regulatory environment	Medium	High	High	Strengthen enforcement of laws and regulations.
3	Financial	Limited resources	High	High	Medium	Develop and implement resource mobilization strategies
		Budgetary cuts.	Medium	Medium	Medium	Prioritization of programmes

S/ No	Risk class/ category	Risk & Description	Likelihood (L/H/M)	Impact (L/H/M)	Overall Risk level (L/H/M)	Mitigation Measure(s)
4	Information Management	Limited IT infrastructure	Medium	Medium	Medium	Increase investments in ICT.
		Weak information management	Low	Low	Medium	Build capacity for information sharing and management.
5	Environmental	Natural disasters	Medium	Medium	Medium	Early warning systems. Sensitization and awareness creation on preparedness.
6	Policy/ Structural Changes	Weak capacity on enforcement of environmental laws	Medium	High	High	Building capacity and increase human resources. Apply multi agency approach or whole government approach

CHAPTER 7. RESOURCE REQUIREMENTS AND MOBILIZATION STRATEGIES

Our environment, our wealth

RESOURCE REQUIREMENTS AND MOBILIZATION STRATEGIES

7.1. Overview

This chapter highlights the financial resource requirements, resource gaps, resource mobilization strategies and the resource management strategies for the Strategic Plan period.

7.2. Financial Requirements

The total estimated financial resource requirement for the plan period is KShs. **230,030 Million** against an estimated allocation of KShs. **85,652 Million**, hence a gap of KShs. **144,378 Million**.

Table 7.2 summarizes the resource requirement for the Ministry for the plan period 2023/24-2027/28.

Table 7.1 Financial Requirements for Implementing the Strategic Plan

KRA	Thematic Area	Projected Resource Requirements per FY in (KShs. Million)					Total
		2023/ 2024	2024/ 2025	2025/ 2026	2026/ 2027	2027/ 2028	
KRA 1	Environment, Climate Change and Forestry Governance and Coordination	2,598	2,701	2,648	2,530	2,439	12,916
KRA2	Conservation, Protection, restoration and Management of Environment and Forest Ecosystems	23,681	22,621	23,663	23,837	25,088	118,890
KRA 3	Climate Change Adaptation and Mitigation	2,842	2,632	1,779	2,587	2,602	12,442
KRA 4	Agro-forestry and Commercial Forestry Development	4,138	4,795	6,704	4,097	3,823	23,557
KRA 5	Resource Mobilization and Partnerships.	339	227	174	154	152	1,046

Projected Resource Requirements per FY in (KShs. Million)							
KRA	Thematic Area	2023/ 2024	2024/ 2025	2025/ 2026	2026/ 2027	2027/ 2028	Total
Others	Other (O &M and other Recurrent)	11,504	12,105	12,155	12,520	12,895	61,179
Total		45,102	45,081	47,123	45,725	46,999	230,030

Table 7.2 Financial resource gaps for the period 2023-2027.

Resource Gaps. (Financial Year)	Requirement (Ksh. Million)	Estimated Resource Allocations (Ksh. Million)	Variance (Ksh. Million)
2023/2024	45,102	15,256	29,846
2024/2025	45,081	17,476	27,605
2025/2026	47,123	17,461	29,662
2026/2027	45,725	17,439	28,286
2027/2028	46,999	18,020	28,979
TOTAL	230,030	85,652	144,378

Table 7.3 Source and utilization of Funds

Source	Source of funding (Ksh. Million)					
	2023/ 2024	2024/ 2025	2025/ 2026	2026/ 2027	2027/ 2028	Total
AIA	5,500	6,000	6,500	7,000	7,500	32,500
GoK	15,256	17,476	17,461	17,439	18,020	85,652
Donors	3,228	2,275	1,805	1,805	1,859	10,972
Gap/ Others	29,846	27,605	29,662	28,286	28,979	144,378
Total	53,830	53,356	55,428	54,530	56,358	273,502

7.3. Resource Mobilization Strategies

The funding of the programmes will be sought from the Government of Kenya through the exchequer releases, Public Private Partnerships (PPPs), Development Partners, Bonds and Carbon Market.

7.3.1. Government Financing

The Ministry will effectively bid for allocation of more resources through the Medium-Term Expenditure Framework Budgets, focusing on priority programmes in line with the Kenya Vision 2030, Medium Term Plan IV, the Bottom-up Economic Transformation Agenda and other Policy documents. In addition, it will explore opportunities for generating A-In-A from the existing programmes, implement cost reduction through "e-technology" and outsource services to improve its financial status.

7.3.2. Public Private Partnerships

The Ministry will seek Public Private Partnerships to undertake the implementation of the various programmes and projects.

7.3.3. Development Partners

The Ministry has a resource mobilization mechanism for marketing for project proposals on socio-economic development and investment opportunities for donor funding. This is done in collaboration with Kenya Investment Authority and other Government Agencies. Some of the Development Partners include; World Bank, KFW, KIDDP, Italy, KOICA, China, UNEP, UNDP, AfDB, DANIDA, GIZ, JICA, UNESCO, SIDA, USAID and UNICEF.

7.3.4. Other Resources

The other available resource opportunities that the Ministry will explore include: the partnerships with other government departments and agencies, Public Private Partnerships, Development Partners and other sources such as iNGOs, Foundations, Green Bonds, and Carbon Market.

7.4. Resource Management

The following measures will be put in place to ensure prudent and efficient utilization of resources:

- i. Pooling of common user resources: The Ministry will endeavor to centralize common services e.g., printing services and pool transport for officers;
- ii. Ensure adherence to approved budget and use of the Integrated Financial Management System (IFMIS);
- iii. Ensure quarterly, bi- annual and annual monitoring of policies, programs and projects and submission of quarterly Expenditure Budget reports to the Controller of Budget and the National Treasury;
- iv. Use Domain email to ensure security of information and data; and

- v. Ensure that all payments to the Government are digitized in line with Government's Digital Finance Flagship Projects and as part of the PFMRs reforms. This will aim to increase revenue collection, minimize the cost of collection and enhance service delivery.

"The environment and the economy are two sides of the same coin. If we cannot sustain the environment, we cannot sustain ourselves."

Prof. Wangari Maathai

CHAPTER 8. MONITORING, EVALUATION AND REPORTING FRAMEWORK

MONITORING, EVALUATION AND REPORTING FRAMEWORK

8.1. Overview

This Chapter describes how the Ministry will undertake monitoring, evaluation and reporting of the implementation process of the Strategic Plan 2023-2027. The main objective of the exercise is to measure progress towards planned outputs and outcomes of strategies in the key results areas. The exercise therefore tracks the implementation of policies, programmes and projects in the plan period. Monitoring and Evaluation (M&E) is a tool that will assist the management realize the achievement of the stated organizational goals and objectives.

8.2. Monitoring Framework

The Ministry will develop a robust framework for monitoring and reporting of the implementation process of the Strategic Plan 2023-2027. The Ministry will institutionalize annual performance/status report as one of the key deliverables. The monitoring framework defines the frequency and responsibility of the actors in the exercise. Further, the framework provides the key monitoring reports that will be prepared including the users of the reports. This will involve developing standard formats for data collection and reporting to ensure uniformity. The framework also outlines periods to be covered, and details of information to be supplied. The users of the developed reports include both the internal and external stakeholders of the Ministry.

The Central Planning and Project Monitoring Department (CPPMD) is responsible for designing monitoring and evaluation (M&E) tools, data analysis and generation of reports. The Department is also responsible for coordinating and supervising the collection of data emanating from all the departments. Further, CPPMD will report the performance of projects and programmes in the Monitoring and Evaluation tools that have been adopted by the Government which includes, The National Integrated Monitoring and Evaluation System (NIMES), the Government Project Reporting System (GPRS) and Electronic Project Monitoring Information System (E-PROMIS).

8.3. Performance Standards

The Ministry will deploy the following methodologies in undertaking monitoring, evaluation and learning; quantitative and qualitative data collection, analysis, storage and indicator development, results analysis and report writing, dissemination, capacity development and policy coordination.

The key deliverables under the M&E Framework will be as follows:

- i. Establish a reporting format incorporating Key Performance Indicators for each reporting unit as well as the periods to be covered in the reports;
- ii. Determine the reporting requirements and M&E officers from implementing departments and agencies who will provide pertinent data to the CPPMD to assist in the performance analysis;

- iii. Advice on the projects monitoring work plan including the resources required and monitor its implementation;
- iv. Monitor progress of the technical implementation against a roadmap of priorities as defined by the Project and agreed by the Project's implementing departments and agencies;
- v. Document best practices and lessons learnt in the M&E exercise; and
- vi. Disseminate M&E reports and lessons learnt to stakeholders.

8.4. Evaluation Framework

The Evaluation Framework will be designed to provide a systematic feedback mechanism that indicates as early as possible any shortcomings and challenges regarding disbursement of funds, delivery of inputs, execution of activities or production of output to meet the expected outcomes in order for the corrective and timely measures to be instituted. The framework will therefore provide information that will be used to:

- i. Track progress on implementation of all the policies, programmes and projects;
- ii. Identify gaps and weaknesses in the implementation process;
- iii. Plan, prioritize, allocate and manage resources; and
- iv. Review the impact of implemented policies projects/ programmes to stakeholders.

To ensure objectivity of the evaluation process, the Ministry will incorporate external reviewers during the exercise. The Ministry will therefore have the following timelines to ensure fruitful evaluation process:

8.4.1. Mid-Term Evaluation

The Ministry will undertake Mid-Term Evaluation at the implementation mid-point of the Strategic Plan. It will therefore be undertaken in the mid-year of the financial year 2025/2026. The Ministry will collect and assess the implementation of the planned goals, objectives, targets and strategic activities against pre-selected indicators to determine the extent to which achievement has matched the set standard or target and prepare pertinent reports. The Mid-term evaluation will also provide a scorecard on the extent to which the commitments have been achieved and identify bottlenecks and emerging issues that may hinder attainment of the goals and objectives.

8.4.2. End-Term Evaluation

This will involve collection and analysis of data at the end of the Strategic Plan period to determine the implementation status of policies, projects and programmes in order to establish the extent to which they have achieved their objectives and to assess their overall performance. This terminal evaluation will assess overall implementation effectiveness and draw lessons for preparation of the subsequent Strategic Plan.

8.5. Reporting Framework and Feedback Mechanism

Reporting will be undertaken by the CPPMD in collaboration with all Departments and Agencies in the Ministry. The reporting framework will involve a systematic and continuous process of collecting and analyzing information based on the indicators and targets and the achievements, challenges, lessons learnt and recommendation from the feedback will inform the next cycle of the Strategic Planning process in the Ministry.

The Ministry will therefore have the following timelines while undertaking monitoring:

- a. Quarterly Monitoring and reporting;** This involves monitoring of projects at the end of each quarter in every financial year of the period.
- b. Annual Monitoring and Reporting;** This involves tracking of the implementation status of policies, projects and programmes at the end of each financial year of the Strategic Plan period.
- c. End-Term monitoring and Reporting;** This involves tracking the progress of the planned targets and objectives at the end of the plan period.

Table 8.5: Outcome Performance Matrix

Key Result Area	Outcome	Outcome Indicator	Baseline		Target	
			Value	Year	Mid-term Period	End of Plan Period
Environment, Climate Change and Forestry Governance and Coordination	Improved service delivery	No. of Laws and Policies developed and reviewed	-	2023	15	29

Key Result Area	Outcome	Outcome Indicator	Baseline		Target	
			Value	Year	Mid-term Period	End of Plan Period
Conservation, Protection, restoration and Management of Environment and Forest and Ecosystems	Clean, safe, healthy and sustainably managed ecosystems	% of tree cover	12.3	2022	25	30 (2032)
		% of forest cover	8.83	2022	14	17
		% reduction of plastic pollution	56	2022	60	75
		No. of counties with dumpsites with 10 minimum points	1	2022	5	10
		% reduction of degraded landscapes (2.6 million ha.)	-	2022	10	20
Climate Change Adaptation and Mitigation	Climate Change resilience and low emission development	GHG emission per year (CO ₂ eMt)	98	2022	94	90
Agro-forestry and Commercial Forestry Development	Improved livelihoods income and environment conservation	Area (ha.) of woodlots established	-	2022	15,000	30,0000
		No. of community groups supported in livelihood nature based enterprises	-	2022	1,500	2,500
Resource Mobilization and Partnerships.	Adequate and Sustainable resources	Value of resources mobilized (Ksh. Mn)	45,102	2022	115,013.5	230,027

"If you fail to plan, you plan to fail"

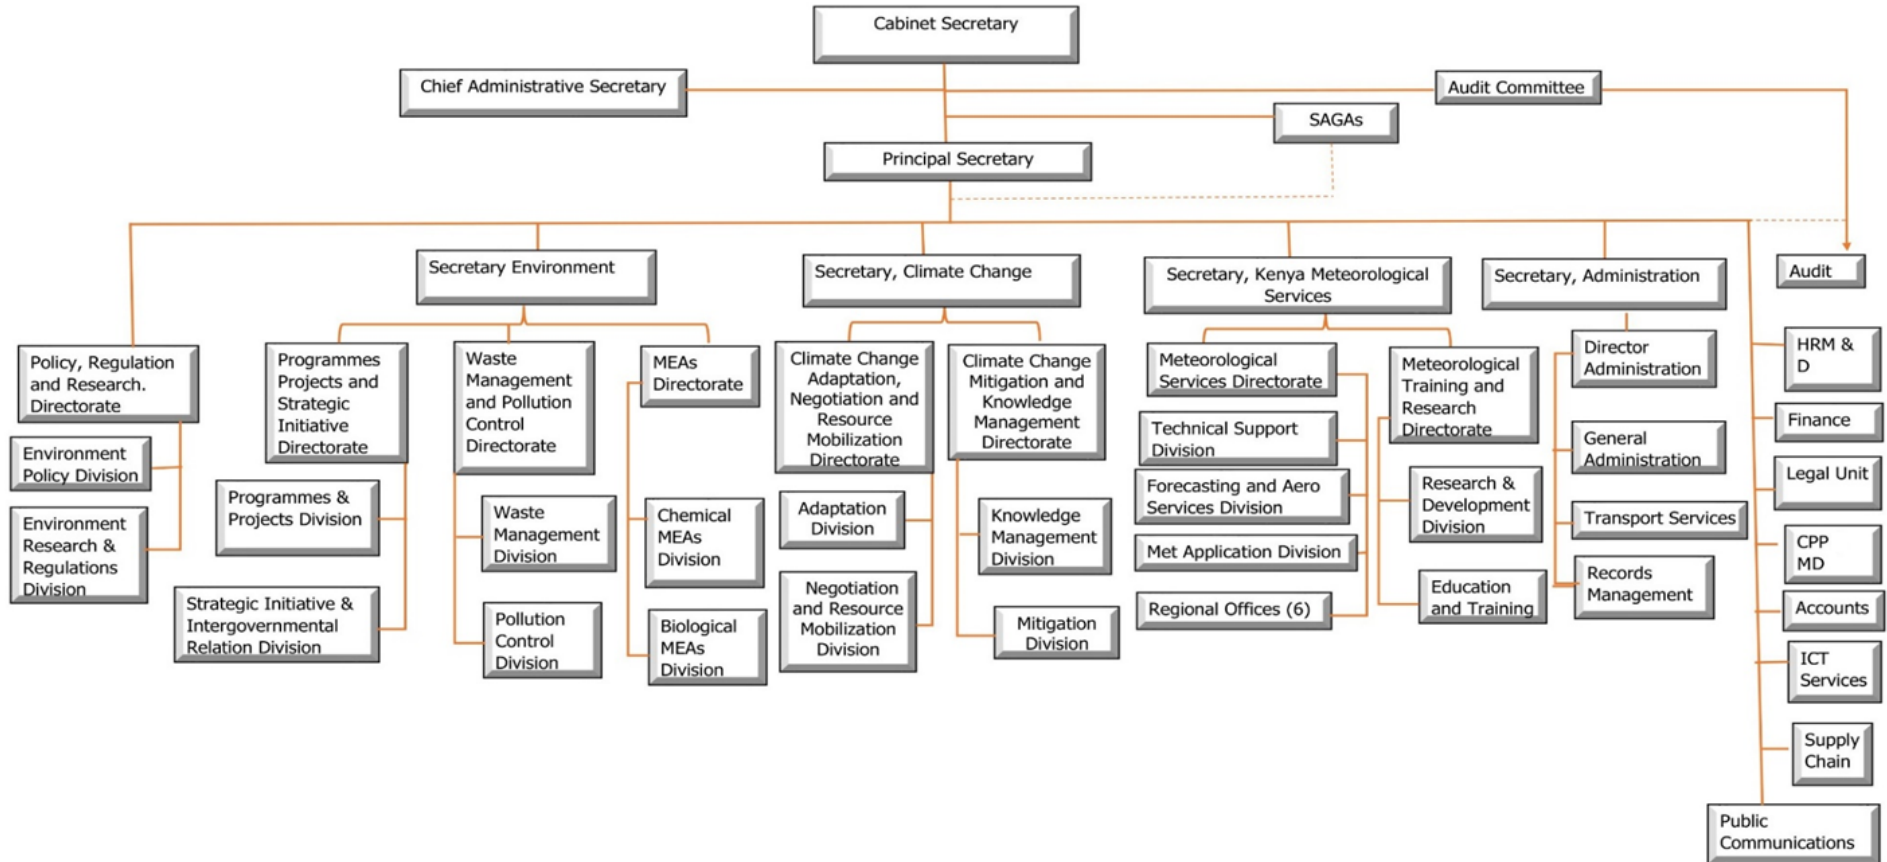

Benjamin Franklin

ANNEX I: POLICIES AND LEGISLATIONS

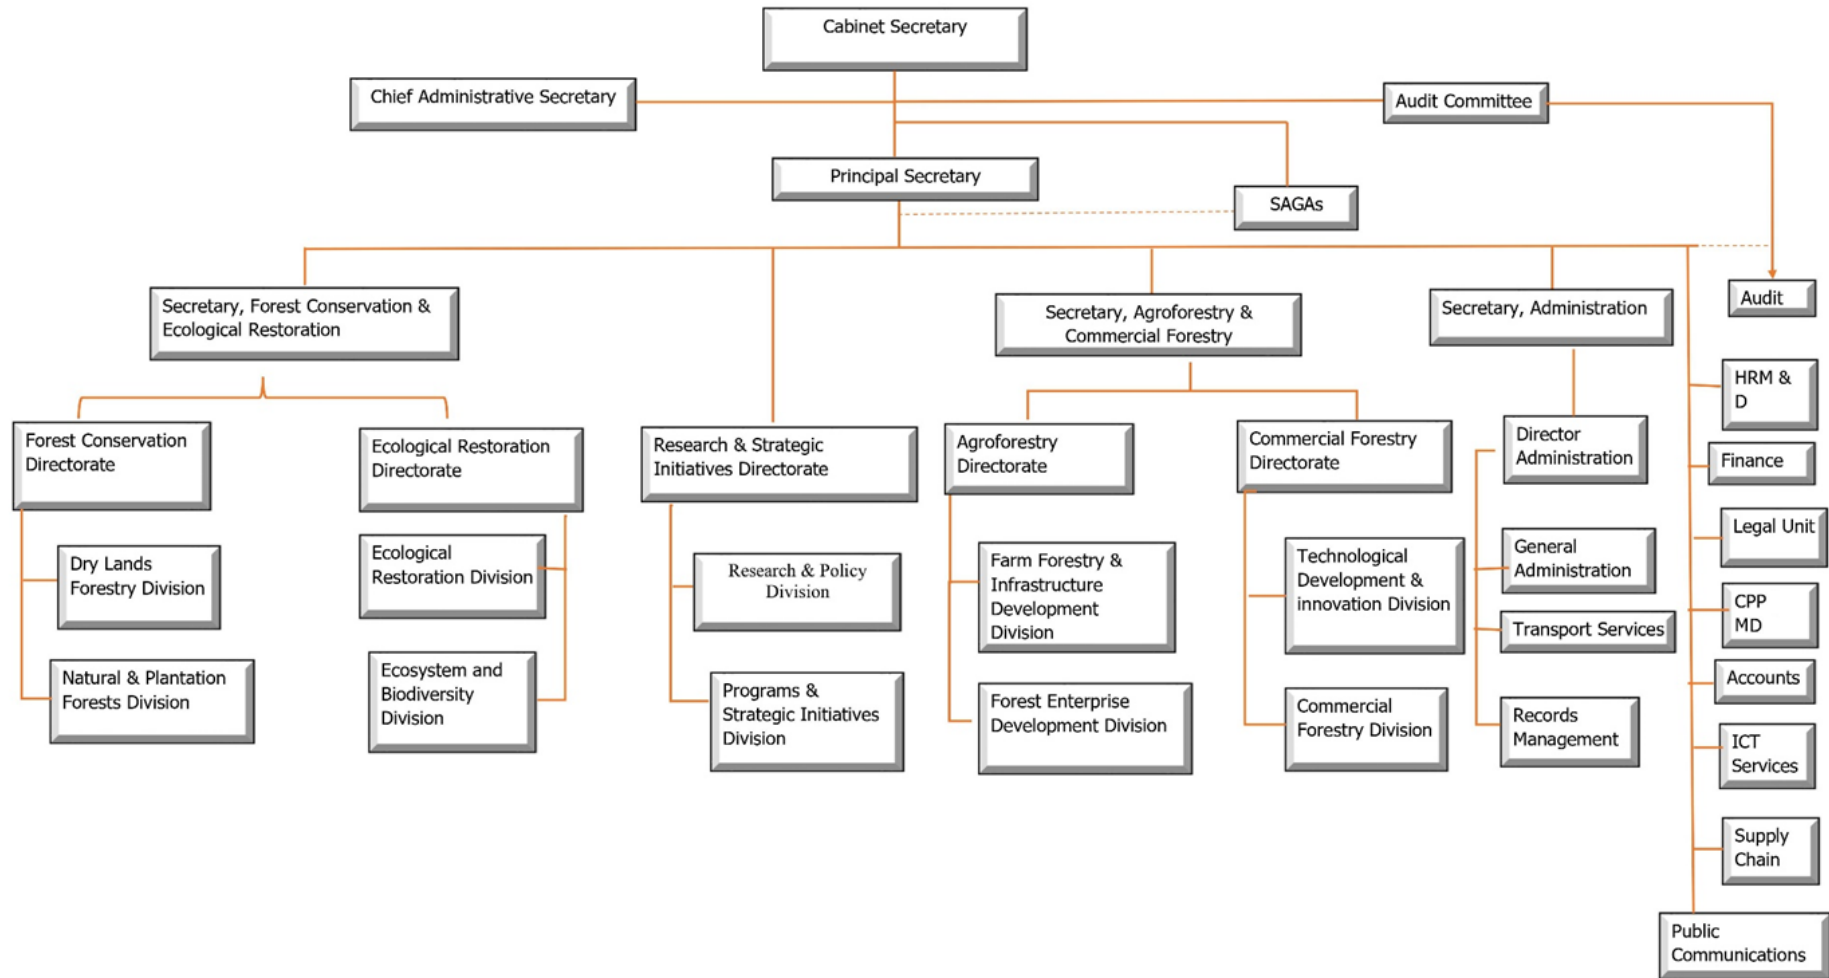

S/ NO.	LEGISLATIONS AND POLICIES TO BE DEVELOPED	S/ NO.	LEGISLATIONS AND POLICIES TO BE REVIEWED
