

B 3034

L.N. 303 of 2018**ENVIRONMENT PROTECTION ACT
(CAP. 549)****Limitation of Emissions of Certain Atmospheric Pollutants
Regulations, 2018**

BY VIRTUE of the powers conferred by articles 54 and 55 of the Environment Protection Act, the Minister for the Environment, Sustainable Development and Climate Change, in consultation with the Environment and Resources Authority, has made the following regulations:-

- Citation. **1.** The title of these regulations is the Limitation of Emissions of Certain Atmospheric Pollutants Regulations, 2018.
- Scope. **2.** (1) These regulations provide for the implementation of Directive (EU) 2016/2284 of the European Parliament and of the Council of 14 December 2016 on the reduction of national emissions of certain atmospheric pollutants, amending Directive 2003/35/EC and repealing Directive 2001/81/EC (hereinafter referred to as "Directive (EU) 2016/2284"), and the Protocol to Abate Acidification, Eutrophication and Ground-level Ozone to the LRTAP Convention as amended.
- (2) These regulations apply to emissions from all sources occurring in the territory of Malta.
- Interpretation. **3.** For the purpose of these regulations and unless the context otherwise requires:-
- Cap. 549. "Act" means the Environment Protection Act;
- "air quality objectives" means the limit values, target values and exposure concentration obligations for air quality set out in the Ambient Air Quality Regulations;
- S.L. 549.59. "anthropogenic emissions" means atmospheric emissions of pollutants associated with human activities;
- "the Authority" or "competent authority" means the Environment and Resources Authority established under article 6 of the Act;
- "black carbon" or "BC" means carbonaceous particulate matter that absorbs light;

"emission" means the release of a substance from a point or diffuse source into the atmosphere;

"emission limits" means the maximum amount of the pollutant in tonnes, which can be emitted in the atmosphere by the specified date of compliance;

"emission reduction" means the percentage reduction in the emission of the pollutant relative to total emissions of the same pollutant in 2005, to be achieved by the specified date of compliance;

"fine particulate matter" or "PM_{2,5}" means particles with an aerodynamic diameter equal to or less than 2,5 micrometres (µm);

"international maritime traffic" means journeys at sea and in coastal waters by water-borne vessels of all flags, except fishing vessels, that depart from the territory of one country and arrive in the territory of another country;

"landing and take-off cycle" or "LTO" means the cycle that includes taxi in and taxi out, take-off, climb out, approach, landing and all other aircraft activities that take place below the altitude of 3,000 feet;

"LRTAP Convention" means the Convention on Long-Range Transboundary Air Pollution;

"national emission reduction commitment" means Malta's obligation in the reduction of emissions of a substance; it specifies the emission reduction that as a minimum has to be delivered in the target calendar year, as a percentage of the total of emissions released during the base year (2005);

"nitrogen oxides" or "NO_x" means nitric oxide (NO) and nitrogen dioxide (NO₂), expressed as nitrogen dioxide;

"non-methane volatile organic compounds" or "NMVOC" means all organic compounds other than methane, that are capable of producing photochemical oxidants by reaction with nitrogen oxides in the presence of sunlight;

"ozone precursors" means nitrogen oxides, non-methane volatile organic compounds, methane, and carbon monoxide;

"sulphur dioxide" or "SO₂" means all sulphur compounds expressed as sulphur dioxide, including sulphur trioxide (SO₃),

B 3036

sulphuric acid (H_2SO_4), and reduced sulphur compounds such as hydrogen sulphide (H_2S), mercaptans and dimethyl sulphides.

National
Emission
Reduction
Commitments.

4. (1) The competent authority shall publish on its website the emission limits in tonnes equivalent to the emission reductions in sub-regulations (2), (3) and (4). The calculation of the emission limits shall refer to the year 2005 as a baseline. The emission limits may be subject to any adjustments, which may be made by the competent authority to the 2005 national atmospheric emissions inventory according to Part 4 of Annex IV of Directive (EU) 2016/2284.

(2) By 1 January 2020, the total anthropogenic emissions of SO_2 , NO_x , NMVOC, ammonia (NH_3) and $\text{PM}_{2,5}$ shall, as a minimum, be limited to the following emission reductions and their corresponding emission limits:

- (a) SO_2 emission reduction of 77%;
- (b) NO_x emission reduction of 42%;
- (c) NMVOC emission reduction of 23%;
- (d) NH_3 emission reduction of 4%; and
- (e) $\text{PM}_{2,5}$ emission reduction of 25%.

(3) For the period from 1st January 2020 to 1st January 2025, the competent authority shall ensure that emission reductions follow a linear trajectory aimed at achieving the following indicative emission reductions and their corresponding emission limits:

- (a) SO_2 emission reduction of 86%;
- (b) NO_x emission reduction of 60%;
- (c) NMVOC emission reduction of 25%;
- (d) NH_3 emission reduction of 14%; and
- (e) $\text{PM}_{2,5}$ emission reduction of 38%.

(4) By 1st January 2030, without prejudice to sub-regulations (2) and (3), the competent authority shall ensure that the total anthropogenic emissions of SO_2 , NO_x , NMVOC, NH_3 and $\text{PM}_{2,5}$ shall as a minimum be limited to the following emission reductions and their corresponding emission limits:

- (a) SO_2 emission reduction of 95%;

- (b) NO_x emission reduction of 79%;
- (c) NMVOC emission reduction of 27%;
- (d) NH₃ emission reduction of 24%; and
- (e) PM_{2,5} emission reduction of 50%.

(5) The competent authority shall allow for deviations from the trajectory specified in sub-regulation (3) if it is technically and economically more efficient to do so and as long as the emission limits in sub-regulation (4) and the respective emission reductions are unaltered. These alternative trajectories together with the reasons behind them shall be appropriately described in the air pollution control programme for Malta, prepared pursuant to regulation 5.

(6) If the indicative emission limits in sub-regulation (3) and the respective emission reductions cannot be achieved, then the competent authority shall include the reasons behind any deviations from these indicative targets in Malta's subsequent informative inventory reports, prepared pursuant to sub-regulation (4) of regulation 6. These informative inventory reports shall also include any measures to be taken, which would realign the emission levels and the respective emission reductions with those in sub-regulation (3).

(7) In order to:

(a) ensure compliance with the national emission reduction commitments in sub-regulations (2), (3) and (4), the competent authority shall apportion the total emission limits resulting from these national emission reduction commitments for the pollutants covered by these regulations, among the major contributors to the emissions of these pollutants;

(b) apportion the emission limits among the major polluters, the competent authority may use any information relating to emissions by these polluters including the inventories referred to in regulation 6(1) and the projections referred to in regulation 6(3).

(8) The following emissions are not to be taken into account for the purpose of compliance with the above national emission reduction commitments:

- (a) aircraft emissions beyond those released during the landing and take-off cycle (LTO);
- (b) emissions from international maritime traffic; and

B 3038

(c) emissions of nitrogen oxides and non-methane volatile organic compounds from activities falling under the 2014 Nomenclature for Reporting (NFR) as provided by the LRTAP Convention categories 3B (manure management) and 3D (agricultural soils).

Air Pollution
Control
Programme.

5. (1) In order to achieve the reductions in anthropogenic emissions in regulation 4, the competent authority, in collaboration with the Ministry responsible for the Environment and any other relevant public body, shall compile, adopt and implement an air pollution control programme in accordance with Part 1 of the Second Schedule.

(2) The air pollution control programme shall:

(a) include an assessment of the likelihood of impacts on the air quality in both Malta and in neighbouring Member States, from emissions in Malta. This shall be determined using, where appropriate, the data and methodologies developed by the European Monitoring and Evaluation Programme (EMEP) under the Protocol to the LRTAP Convention on long-term financing of the cooperative programme for monitoring and evaluation of the long-range transmission of air pollutants in Europe;

(b) take account of the need to reduce air pollutant emissions for the purpose of reaching compliance with air quality objectives in Malta and where appropriate in neighbouring Member States;

(c) prioritise the emission reduction measures for BC when taking measures to achieve the emission limits and emission reductions for PM_{2,5};

(d) be coherent with other relevant plans and programmes arising from obligations under both National and European Union legislation.

(3) The air pollution control programme shall include the obligatory measures listed in Part 2 of the Second Schedule, and may include the optional measures in the same Schedule, or measures having an equivalent mitigation effect on emissions.

(4) The competent authority shall update the air pollution control programme at least every four years.

(5) If according to the data submitted through the national emissions inventory in sub-regulation (1) of regulation 6, the targets in regulation 4 are not complied with or if there is a risk that these targets

will not be complied with, then the emission reduction policies and measures in the air pollution control programme shall without prejudice to sub-regulation (4), be updated within eighteen months from the submission of the latest national atmospheric emissions inventory or the emissions projections.

(6) The competent authority shall consult the public and any relevant institutional stakeholders which by reason of their specific environmental responsibilities in the field of air pollution, quality and management, may be affected by the measures in this programme, in accordance with the Plans and Programmes (Public Participation) Regulations, on the draft air pollution control programme, and on any significant updates prior to the finalisation of this programme. S.L. 549.41.

(7) Transboundary consultations shall also be conducted when appropriate.

(8) The competent authority shall compile the first air pollution control programme by not later than 1st April 2019.

(9) The competent authority shall notify any updates to the air pollution control programme pursuant to sub-regulation (5) to the European Commission within two months.

6. (1) The competent authority shall prepare and annually update the national atmospheric emissions inventory for the pollutants listed in Table A of the First Schedule, in accordance with the requirements set out therein. National Atmospheric Emissions Inventory.

(2) The competent authority shall prepare and update every four years spatially disaggregated national atmospheric emission inventories and large point source inventories, for the pollutants in Table B of the First Schedule, in accordance with the requirements set out therein.

(3) The competent authority shall prepare and update every two years national emission projections for pollutants set out in Table B of the First Schedule, in accordance with the requirements set out therein.

(4) The competent authority shall compile an informative inventory report accompanying the national atmospheric emissions inventory in sub-regulation (1) and the projections in sub-regulation (3), in accordance with the requirements set by Table C of the First Schedule.

(5) The competent authority shall prepare and update the national atmospheric emissions inventory, the emissions projections,

B 3040

the spatially disaggregated national atmospheric emissions inventory, large point sources inventory and the accompanying informative inventory report in accordance with the Third Schedule.

(6) The competent authority shall forward the national atmospheric emissions inventory and emission projections, spatially disaggregated national atmospheric emissions inventory, large point sources inventory and the informative inventory report to the European Commission and the European Environment Agency (EEA) by the reporting dates set out in the First Schedule.

(7) The competent authority shall ensure that the reporting requirements in sub-regulation (6) are consistent with the reporting to the Secretariat of the LRTAP Convention.

Monitoring Air
Pollution
Impacts.

S.L. 549.44.

S.L. 549.59.
S.L. 549.100.

7. (1) The competent authority shall ensure, where applicable, the monitoring of the negative impacts of air pollution on ecosystems based on a network of monitoring sites representative of freshwater, natural and semi-natural habitats and forest ecosystem types, taking a cost-effective and risk-based approach. The competent authority shall coordinate this program with other monitoring programmes established under the Flora, Fauna and Natural Habitats Protection Regulations, the Ambient Air Quality Regulations, and the Water Policy Framework Regulations, and if appropriate, the LRTAP Convention. The competent authority may, where appropriate, make use of data collected under those monitoring programmes.

(2) The optional monitoring indicators in the Fourth Schedule may be used in order to satisfy the requirements in sub-regulation (1).

(3) The competent authority shall forward to the European Environment Agency and the European Commission the following information:

(a) the location of the monitoring sites and associated indicators used to monitor for air pollution impacts by 1st July 2018 and every four years thereafter; and

(b) the monitoring data in sub-regulation (1) by 1st July 2019 and every four years thereafter.

Collection of
information.

8. The competent authority may prepare forms, questionnaires and other records for the collection of information related to the activity of any sources deemed relevant to the compilation of any of the reporting obligations listed in regulation 6 and shall specify the date or the period within which these forms, questionnaires and other records, completed with the requested information, shall be returned to the competent authority.

9. Notwithstanding anything contained in any other law Requirements. enjoining secrecy, the competent authority may for the purpose of obtaining the information in regulation 8 require any person to:

- (a) complete a form, questionnaire or other record;
- (b) answer any questions; or
- (c) provide any information or records,

and any information so obtained shall be subject to the restrictions on use and prohibition on disclosure of information specified in regulation 12.

10. Notwithstanding anything contained in any other law Records. enjoining secrecy, any person holding records, which in the opinion of the competent authority, could lead to the compilation of the information in regulation 6, shall grant to the competent authority access to such records for obtaining the said information.

11. The competent authority may request any public body to consult and cooperate with it for the purpose of assessing the potential of records of the authority as a source of information, which could contribute to the compilation of the obligations in regulation 6, and the public body shall comply with any such request, in so far as resources permit. Co-operation of public bodies.

12. No information obtained in any way under these regulations, which can be related to an identifiable person shall, except with the written consent of that person, be disseminated, shown or communicated to any person except: Information obtained.

(a) for the purpose of a prosecution of an offence under these regulations;

(b) to officers of the competent authority in the course of their duties under the Act; and

(c) if the information is within the scope of the Freedom S.L. 549.39. of Access to Information on the Environment Regulations.

13. Without prejudice to the Freedom of Access to Information Access to information. S.L. 549.39. on the Environment Regulations, the competent authority shall ensure that the following information is made publicly available through electronic means:

(a) the air pollution control programme and any updates thereof;

B 3042

(b) the national atmospheric emission inventory (including, where applicable, the adjusted national atmospheric emissions inventories), the national emission projections, the informative inventory reports and additional reports and information provided to the European Commission in accordance with regulation 6(6).

Penalties.

14. (1) Any person who:

(a) fails to submit data or any other information requested by the Authority;

(b) submits false data or information to the Authority; or

(c) fails to comply with the emission limits apportioned by the Authority,

shall be guilty of an offence against these regulations.

(2) Any person who fails to submit data or any other information requested by the Authority shall be liable:

(a) on a first conviction a fine (*multa*) of not less than one thousand five hundred euro (€1,500) but not exceeding three thousand euro (€3,000);

(b) on a second or subsequent conviction to a fine (*multa*) of not less than three thousand euro (€3,000) but not exceeding six thousand euro (€6,000).

(3) Any person who submits false data or information to the Authority shall be liable:

(a) on a first conviction to a fine (*multa*) of not less than seven thousand five hundred euro (€7,500) but not exceeding fifteen thousand euro (€15,000);

(b) on a second conviction or subsequent conviction to a fine (*multa*) of not less than fifteen thousand euro (€15,000) but not exceeding thirty thousand euro (€30,000).

(4) Any person who fails to comply with the emission limits apportioned by the Authority shall be liable:

(a) if the limit is exceeded by up to 30%, on a first conviction to a fine (*multa*) of not less than five hundred thousand euro (€500,000) but not exceeding seven hundred and fifty thousand euro (€750,000);

(b) if the limit is exceeded by more than 30% but less than 60%, on a first conviction to a fine (*multa*) of not less than seven hundred and fifty thousand euro (€750,000) but not exceeding one million euro (€1,000,000);

(c) if the limit is exceeded by more than 60%, on a first conviction to a fine (*multa*) of not less than one million euro (€1,000,000) but not exceeding one million and five hundred thousand euro (€1,500,000):

Provided that on a second or subsequent conviction such fine (*multa*) shall be doubled, but shall not exceed two million and five hundred thousand euro (€2,500,000):

Provided further that the court shall order any person who has been found guilty of committing an offence against these regulations to pay for the expenses incurred by the competent authority or other public entity as a result of the said offence, to undertake mitigation or prevention measures in order to address offence-related damages, if applicable, the revocation of any permit issued by the competent authority and the confiscation of the *corpus delicti*.

15. (1) The provisions of articles 23 and 30(1) of the Criminal Code shall, *mutatis mutandis*, apply to proceedings, in respect of offences against these regulations, so however that the disqualification from holding or obtaining a license, permit or authority shall in no case be for less than one year. Applicability of the Criminal Code. Cap. 9.

(2) Notwithstanding the provisions of article 370 of the Criminal Code, proceedings for an offence against these regulations shall be taken before the Court of Magistrates (Malta) or the Court of Magistrates (Gozo), as the case may be, and shall be in accordance with the provisions of the Criminal Code regulating the procedure before the said courts as courts of criminal judicature. Cap. 9.

(3) Notwithstanding the provisions of the Criminal Code, the Attorney General shall always have a right of appeal to the Court of Criminal Appeal from any judgment given by the Court of Magistrates (Malta) or the Court of Magistrates (Gozo) in respect of proceedings for any offence against these regulations. Cap. 9.

16. The First Schedule to the Fourth Schedule to these regulations are being published in the English language in the English text of these regulations in accordance with article 54(3) of the Act. Language of the Schedules.

17. The regulations listed hereunder shall be repealed with effect from the date of publication of these regulations: Repeal of regulations.

B 3044

S.L. 549.32. (a) the National Emissions Ceilings for Certain Atmospheric Pollutants Regulations; and

S.L. 549.115. (b) the Limitation of Emissions of Certain Atmospheric Pollutants Regulations.

**FIRST SCHEDULE
(Regulation 6)**

Monitoring and Reporting of Atmospheric Emissions

Table A. Reporting of annual emissions pursuant to sub-regulation (1) of regulation 6

Element	Pollutant	Time series	Reporting Requirement	Reporting dates
<i>Gaseous Pollutants</i>				
Total national emissions by NFR ⁽¹⁾ source category ⁽²⁾ .	SO ₂	Annual from 1990 to reporting year minus 2 (X-2)	compulsory	15 February
	NO _x		compulsory	
	NMVOC		compulsory	
	NH ₃		compulsory	
	CO		compulsory	
<i>Particulate Matter</i>				
Total national emissions by NFR ⁽¹⁾ source category ⁽²⁾ .	PM ₁₀ ⁽³⁾	Annual from 2000 to reporting year minus 2 (X-2)	compulsory	15 February
	PM _{2,5}		compulsory	
	BC (if available)		compulsory	
	TSP		optional	15 February
<i>Heavy Metals</i>				
Total national emissions by NFR ⁽¹⁾ source category ⁽²⁾ .	Cd ⁽⁴⁾	Annual from 1990 to reporting year minus 2 (X-2)	compulsory	15 February
	Hg ⁽⁵⁾		compulsory	
	Pb ⁽⁶⁾		compulsory	
	As and its compounds		optional	
	Cr and its compounds		optional	
	Cu and its compounds		optional	
	Ni and its compounds		optional	
	Se and its compounds		optional	
	Zn and its compounds		compulsory	

B 3046

<i>Persistent Organic Pollutants (POPs)</i>				
Total national emissions by NFR ⁽¹⁾ source category ⁽²⁾ .	Benzo(a)pyrene	Annual from 1990 to reporting year minus 2 (X-2)	compulsory	15 February
	Benzo(b)fluoranthene		compulsory	
	Benzo(k)fluoranthene		compulsory	
	Indeno(1,2,3-cd)pyrene		compulsory	
	Total PAHs ⁽⁷⁾		compulsory	
	Dioxins/Furans		compulsory	
	PCBs ⁽⁸⁾		compulsory	
	HCB ⁽⁹⁾		compulsory	
<p>⁽¹⁾Nomenclature for reporting (NFR) as provided by the LRTAP Convention. ⁽²⁾Natural emissions shall be reported in accordance with the methodologies laid down in the LRTAP Convention and the EMEP/EEA air pollutant emission inventory guidebook. They shall not be included in national totals and shall be separately reported. ⁽³⁾"PM₁₀" means particles with an aerodynamic diameter equal to or less than 10µm. ⁽⁴⁾Cadmium. ⁽⁵⁾Mercury. ⁽⁶⁾Lead. ⁽⁷⁾Polyaromatic hydrocarbons. ⁽⁸⁾Polychlorinated biphenyls. ⁽⁹⁾Hexachlorobenzene.</p>				

Table B. Reporting requirements on emissions and projections pursuant to sub-regulations (2) and (3) of regulation 6

Element	Pollutants	Time series/target years	Reporting dates
National gridded data of emissions by source category (GNFR)	SO ₂ , NO _x , NMVOC, CO, NH ₃ , PM ₁₀ , PM _{2,5}	Every four years for reporting year minus 2 (X-2) as from 2017	1 May ⁽¹⁾
	Cd, Hg and Pb.		
	Total PAHs, HCB, PCBs, dioxins/furans		
	BC (if available)		
Large Point Sources (LPS) by source category (GNFR)	SO ₂ , NO _x , NMVOC, CO, NH ₃ , PM ₁₀ , PM _{2,5}	Every four years for reporting year minus 2 (X-2) as from 2017	1 May ⁽¹⁾
	Cd, Hg and Pb.		
	Total PAHs, HCB, PCBs, dioxins/furans		
	BC (if available)		

Projected emissions by aggregated NFR	SO ₂ , NO _x , NMVOC, CO, NH ₃ , PM ₁₀ , PM _{2,5}	Biennial, covering projections years 2020, 2025, 2030 and where available, 2040 and 2050 as from 2017	15 March
	BC (if available)		
(1) re-submissions due to errors shall be provided within our weeks and include a clear explanation of the changes made.			

Table C. Reporting requirements on informative inventory report pursuant to sub-regulation (4) of regulation 6

Element	Pollutants	Time series/target years	Reporting dates
Informative Inventory Report	SO ₂ , NO _x , NMVOC, CO, NH ₃ , PM ₁₀ , PM _{2,5}	All years from 1990 onwards	15 March
	Cd, Hg and Pb.	All years from 1990 onwards	
	BC	All years from 2000 onwards	
	TSP	All years from 2000 onwards	
	Total PAHs, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, indeno(1,2,3-cd)pyrene HCB, PCBs, dioxins/ furans	All years from 1990 onwards	
If available: As, Cr, Cu, Ni, Se, and Zn and their compounds.	All years from 1990 onwards		

**SECOND SCHEDULE
(Regulation 5)**

Content of the Air Pollution Control Programmes in regulation 5

Part 1. Minimum content of the Air Pollution Control Programme

1. The initial national air pollution control programmes referred to in regulation 5 shall at least cover the following content:
 - (a) the air quality and pollution policy framework in which context the programme has been developed, including:
 - (i) the policy priorities and their relationship to priorities set in other relevant policy areas, including climate change and, when

B 3048

- appropriate, agriculture, industry and transport;
- (ii) the responsibilities attributed to authorities other than the competent authority;
 - (iii) the progress made by current policies and measures in reducing emissions and improving air quality, and the degree of compliance with national and European Union obligations;
 - (iv) the projected further evolution assuming no change to already adopted policies and measures;
- (b) the policy options considered to comply with the emission reduction commitments for the period between 2020 and 2029 and for 2030 onwards and the intermediate emission levels determined for 2025 and to contribute to further improve the air quality, and their analysis, including the method of analysis; where available, the individual or combined impacts of the policies and measures on emission reductions, air quality and the environment and the associated uncertainties;
 - (c) the measures and policies selected for adoption, including a timetable for their adoption, implementation and review and the competent authorities responsible;
 - (d) where relevant, an explanation of the reasons why the indicative emission levels for 2025 cannot be met without measures entailing disproportionate costs;
 - (e) where relevant, an account of the use of the flexibilities set out in Article 5 of Directive (EU) 2016/2284 and any environmental consequences arising from such use;
 - (f) an assessment of how selected policies and measures ensure coherence with plans and programmes set up in other relevant policy areas.
2. The national air pollution control programme updates referred to in regulation 5 shall at least include:
- (a) an assessment of the progress made with implementation of the programme, the reduction of

emissions and the reduction of concentrations;

- (b) any significant changes in the policy context, assessments, the programme or the implementation timetable thereof.

**Part 2. Emission reduction measures referred to in sub-regulation
(2) of regulation 5.**

The UNECE Guidance Document on Preventing and Abating Ammonia Emissions from Agricultural Sources of 2014 (the 'Ammonia Guidance Document'), together with the best available techniques in accordance with Directive 2010/75/EU of the European Parliament and of the Council of 24 November 2010 on industrial emissions (integrated pollution prevention and control) (Recast), shall be taken into account in order to comply with the emission reduction commitments contained in regulation 4.

A. Measures to control ammonia emissions.

1. An advisory code of good agricultural practice shall be established to control ammonia emissions, taking into account the UNECE Framework Code for Good Agricultural Practice for Reducing Ammonia Emissions of 2014, covering at least the following items:
 - (a) nitrogen management, taking into account the whole nitrogen cycle;
 - (b) livestock feeding strategies;
 - (c) low-emission manure spreading techniques;
 - (d) low-emission manure storage systems;
 - (e) low-emission animal housing systems;
 - (f) possibilities for limiting ammonia emissions from the use of mineral fertilisers.
2. A national nitrogen budget may be established in order to monitor the changes in overall losses of reactive nitrogen from agriculture, including ammonia, nitrous oxide, ammonium, nitrates and nitrites, based on the principles set out in the UNECE Guidance Document on Nitrogen Budgets.
3. The use of ammonium carbonate fertilisers shall be

B 3050

prohibited and ammonia emissions from inorganic fertilisers may be reduced by using the following approaches:

- (a) replacing urea-based fertilisers by ammonium nitrate-based fertilisers;
 - (b) where urea-based fertilisers continue to be applied, using methods that have been shown to reduce ammonia emissions by at least 30 % compared with the use of the reference method, as specified in the Ammonia Guidance Document;
 - (c) promoting the replacement of inorganic fertilisers by organic fertilisers and, where inorganic fertilisers continue to be applied, spreading them in line with the foreseeable requirements of the receiving crop or grassland with respect to nitrogen and phosphorus, also taking into account the existing nutrient content in the soil and nutrients from other fertilisers.
4. Ammonia emissions from livestock manure may be reduced by using the following approaches:
- (a) reducing emissions from slurry and solid manure application to arable land and grassland, by using methods that reduce emissions by at least 30 % compared with the reference method described in the Ammonia Guidance Document and on the following conditions:
 - (i) only spreading manures and slurries in line with the foreseeable nutrient requirement of the receiving crop or grassland with respect to nitrogen and phosphorus, also taking into account the existing nutrient content in the soil and the nutrients from other fertilisers;
 - (ii) not spreading manures and slurries when the receiving land is water saturated, flooded, frozen or snow covered;
 - (iii) applying slurries spread to grassland using a trailing hose, trailing shoe or through shallow or deep injection;
 - (iv) incorporating manures and slurries spread to arable land within the soil within four hours of

spreading;

- (b) reducing emissions from manure storage outside of animal houses, by using the following approaches:
 - (i) for slurry stores constructed after 1 January 2022, using low emission storage systems or techniques which have been shown to reduce ammonia emissions by at least 60 % compared with the reference method described in the Ammonia Guidance Document, and for existing slurry stores at least 40 %;
 - (ii) covering stores for solid manure;
 - (iii) ensuring farms have sufficient manure storage capacity to spread manure only during periods that are suitable for crop growth;
- (c) reducing emissions from animal housing, by using systems which have been shown to reduce ammonia emissions by at least 20 % compared with the reference method described in the Ammonia Guidance Document;
- (d) reducing emissions from manure, by using low protein feeding strategies which have been shown to reduce ammonia emissions by at least 10 % compared with the reference method described in the Ammonia Guidance Document.

B. Emission reduction measures to control emissions of fine particulate matter and black carbon.

1. Without prejudice to Annex II on cross-compliance of Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agricultural policy and repealing Council Regulations (EEC) No 352/78, (EC) No 165/94, (EC) No 2799/98, (EC) No 814/2000, (EC) No 1290/2005 and (EC) No 485/2008, the open field burning of agricultural harvest residue and waste and forest residue may be banned.

The implementation of any ban implemented in accordance with the first sub-paragraph, shall be monitored and enforced. Any exemptions to such a ban shall be limited to

B 3052

preventive programmes to avoid uncontrolled wildfires, to control pest or to protect biodiversity.

2. An advisory code of good agricultural practice may be established for the proper management of harvest residue, on the basis of the following approaches:
 - (a) improvement of soil structure through incorporation of harvest residue;
 - (b) improved techniques for incorporation of harvest residue;
 - (c) alternative use of harvest residue;
 - (d) improvement of the nutrient status and soil structure through incorporation of manure as required for optimal plant growth, thereby avoiding burning of manure (farmyard manure, deep-straw bedding).

C. Preventing impacts on small farms.

The impacts on small and micro farms shall be taken into account fully when measures such as the ones outlined in Sections A and B are taken.

For instance small and micro farms can be exempt from these measures where possible and appropriate in view of the applicable reduction commitments.

THIRD SCHEDULE

(Regulation 6)

Methodologies for the preparation and updating of atmospheric emission inventories and projections, informative inventory reports referred to in regulation 6.

An atmospheric emissions inventory shall be prepared for the pollutants referred to in the First Schedule. The atmospheric emissions inventories, emission projections, spatially disaggregated atmospheric emission inventories, large point source inventories and informative inventory reports, shall be prepared using the methodologies adopted by Parties to the LRTAP Convention (EMEP Reporting Guidelines). In addition, atmospheric emissions inventories shall be prepared using the EMEP/EEA air pollutant emission inventory Guidebook (EMEP/EEA Guidebook). Supplementary information, in particular the activity data, needed for the assessment of the atmospheric

emission inventories and projections shall be prepared in accordance with the same guidelines. Reliance upon the EMEP Reporting Guidelines is without prejudice to the additional arrangements specified in this Schedule and to the requirements on reporting nomenclature, time series and reporting dates specified in the First Schedule.

Part 1. National annual emission inventories

1. National emission inventories shall be transparent, consistent, comparable, complete and accurate.
2. Emissions from identified key categories shall be calculated in accordance with the methodologies defined in the EMEP/EEA Guidebook and with the aim of using a Tier 2 or higher (detailed) methodology. Other scientifically based and compatible methodologies for establishing atmospheric emission inventories may be used if these methodologies produce more accurate estimates than the default methodologies set out in the EMEP/EEA Guidebook.
3. Emissions from transport, shall be calculated and reported in a way consistent with national energy balances reported by Malta to Eurostat.
4. Emissions from road transport shall be calculated and reported on the basis of the fuels sold in Malta. As an alternative, emissions from road transport may be reported and calculated on the basis of fuels used or kilometres driven in Malta.
5. The annual atmospheric emissions shall be expressed in the applicable unit specified in the NFR reporting template of the LRTAP Convention.

Part 2. Emissions projections

1. Emission projections shall be transparent, consistent, comparable, complete and accurate and reported information shall include at least the following:
 - (a) clear identification of the adopted and planned policies and measures included in the projections;
 - (b) where appropriate, the results of sensitivity analysis performed for the projections;

B 3054

- (c) a description of methodologies, models, underlying assumptions and key input and output parameters.
2. Projections of emissions shall be estimated and aggregated to relevant source sectors. Emissions projections report shall include a 'with measures' (adopted measures) projection and, where relevant, a 'with additional measures' (planned measures) projection for each pollutant in accordance with the guidance established in the EMEP/EEA Guidebook.
 3. Emission projections shall be consistent with the annual atmospheric emission inventory for the year x-3 and with projections reported under Regulation (EU) No 525/2013 of the European Parliament and of the Council of 21 May 2013 on a mechanism for monitoring and reporting greenhouse gas emissions and for reporting other information at national and Union level relevant to climate change and repealing Decision No 280/2004/EC.

Part 3. Informative Inventory Report

The informative inventory reports shall be prepared in accordance with the EMEP Reporting Guidelines and reported using the template for inventory reports as specified therein. The inventory report shall include, as a minimum, the following information:

- (a) descriptions, references and sources of information of the specific methodologies, assumptions, emission factors and activity data, as well as the rationale for their selection;
- (b) a description of the national key categories of emission sources;
- (c) information on uncertainties, quality assurance and verification;
- (d) a description of the institutional arrangements for inventory preparation;
- (e) recalculations and planned improvements;
- (f) if relevant, information on the use of the flexibilities provided for under Article 5(1), (2), (3) and (4) of Directive (EU) 2016/2284;

- (g) if relevant, information on the reasons for deviating from the reduction trajectory determined in accordance with sub-regulation 3 of regulation 4, as well as the measures to converge back on the trajectory;
- (h) an executive summary.

FOURTH SCHEDULE
(Regulation 7)

**Optional Indicators for monitoring the impact of air pollution
referred to in regulation 7.**

- (a) For freshwater ecosystems: establishing the extent of biological damage, including sensitive receptors (microphytes, macrophytes and diatoms), and loss of fish stock or invertebrates:

the key indicator acid neutralising capacity (ANC) and the supporting indicators acidity (pH), dissolved sulphate (SO_4^{2-}), nitrate (NO_3^-) and dissolved organic carbon;

frequency of sampling: from yearly (in lake autumn turnover) to monthly (streams).

- (b) For terrestrial ecosystems: assessing the soil acidity, soil nutrients loss, nitrogen status and balance as well as biodiversity loss:

- (i) the key indicator soil acidity: exchangeable fractions of base cations (base saturation) and exchangeable aluminium in soils:

frequency of sampling: every 10 years;

supporting indicators: pH, sulphate, nitrate, base cations, aluminium concentrations in soil solution;

frequency of sampling: every year (where relevant);

- (ii) the key indicator soil nitrate leaching ($\text{NO}_3^-_{\text{leach}}$):

frequency of sampling: every year;

- (iii) the key indicator carbon-nitrogen ratio (C/N) and the supporting indicator of total nitrogen in soil (N_{tot}):

B 3056

frequency of sampling: every 10 years;

- (iv) the key indicator nutrient balance in foliage (N/P,N/
K, N/Mg):

frequency of sampling: every four years.

- (c) For terrestrial ecosystems: assessing ozone damage to
vegetation growth and biodiversity:

- (i) the key indicator vegetation growth and foliar
damage and the supporting indicator carbon flux
(C_{flux}):

frequency of sampling: every year;

- (ii) the key indicator exceedance of flux-based critical
levels:

frequency of sampling: every year during the growing
season.
