CONSIDERING that the FAO Code of Conduct for Responsible Fisheries provides that States “should apply the precautionary approach widely to conservation, management and exploitation of living aquatic resources in order to protect them and preserve the aquatic environment, taking account of the best scientific evidence available” and that the absence of adequate scientific information should not be used as a reason for postponing or failing to take conservation and management measures;

HAVING REGARD to Article 8 b) ii) of the GFCM Agreement “to minimize impacts of fishing activities on marine living resources and their ecosystems”;

HAVING REGARD to Article 8 b) iv) of the GFCM Agreement “to establish fisheries restricted areas (FRAs) for the protection of vulnerable marine ecosystems (VMEs), including but not limited to nursery and spawning areas [...]”;

RECALLING Resolution GFCM/40/2016/2 for a mid-term strategy (2017–2020) towards the sustainability of Mediterranean and Black Sea fisheries, particularly Target 4, Output 4.2 a) on “the promotion of the identification and establishment of new FRAs to protect priority areas within ecologically or biologically significant marine areas (EBSAs), VMEs, etc. from harmful fishing activities, and the implementation of monitoring and control systems to ensure the efficiency of these spatial measures, also in relation to Target 3”;

RECALLING the 2017 Malta MedFish4Ever Ministerial Declaration, in particular its paragraph 38;

CONSIDERING that the Jabuka/Pomo Pit is identified as an EBSA under the 1992 Convention on Biological Diversity;

NOTING the United Nations Sustainable Development Goal (SDG) 14.5 that specifically calls for conserving at least 10 percent of coastal and marine areas, consistent with national and international law;
