

Conservation Measure CM-TAC-01 (2021): on Total Allowable Catches and related conditions for Patagonian Toothfish, Deep-Sea Red Crab, Alfonsino, Orange Roughy and Pelagic Armourhead for 2022 and 2023 in the SEAFO Convention Area.

The Commission, taking account of the scientific advice provided by the Scientific Committee and pursuant to Article 6 of the Convention, has adopted the following measures:

1. Total allowable catches

- a) Patagonian toothfish: 261 tonnes for Sub-area D and zero tonnes for the remainder of the SEAFO CA;
- b) Deep-sea red crab: 162 tonnes in Division B1 and 200 tonnes (Status quo) in the remainder of the Convention Area;
- c) Alfonsino: 200 tonnes for the SEAFO CA of which a maximum of 132 tonnes may be taken in Division B1 (Status quo).
- d) Orange roughy: zero tonnes and a 4 tonnes bycatch allowance in Division B1, and 50 tonnes in the remainder of the SEAFO CA subject to exploratory fishing protocols (Status quo), and
- e) Pelagic amourhead/Southern boarfish: 135 tonnes for the SEAFO CA (Status quo).

2. Vessel reporting requirements

Each Contracting Party shall ensure that their vessels fishing in the SEAFO CA shall send reports as *cf.* Article 10, 11, 12, 13 and 18 of the System of Observation, Inspection, Compliance and Enforcement to the Secretariat.

3. Bycatch of Alfonsino and Pelagic Armourhead

Taking into account that highly selective fishery for pelagic armourhead and alfonsino is practically possible by trawl fishery in the CA, following measures should be applied for trawl fishery targeting armourhead and alfonsino in the CA:

- (a) Any vessels engaging in trawl fisheries targeting pelagic armourhead and/or alfonsino should send daily catch reports to the Secretariat;
- (b) Based on these daily catch reports, the cumulative catches of armourhead and alfonsino should be closely monitored by the Secretariat;
- (c) Fishing activities should be developed by first targeting one species (first target species);

- (d) When the Secretariat determines that 95% of the TAC for one of that species is reached in a management area, the fleet should be instructed by the Secretariat to target the other species (second target species). A total by catch of 5% of the first target species TAC is allowed to be taken when targeting the second species in the same management area; and
- (e) If 95% of the TAC for the second species is already reached by other vessels, the vessel can fish its second target species as long as the TAC is not exhausted.

4. Closure of fisheries

The Executive Secretary shall close the fisheries when the total allowable catches referred to in paragraph 1 are deemed to be exhausted.

5. Status of Conservation Measure

Conservation Measures CM-TAC-01 (2020) is herewith repealed.
