

**RECOMMENDATION BY ICCAT AMENDING RECOMMENDATION 19-08 ON  
MANAGEMENT MEASURES FOR THE CONSERVATION OF  
SOUTH ATLANTIC BLUE SHARK CAUGHT IN ASSOCIATION WITH ICCAT FISHERIES**

*NOTING* the need to continue with sound management for the conservation of the South Atlantic blue shark;

*CONSIDERING* that the SCRS has offered no new advice for management measures for the South Atlantic blue shark;

*CONFIRMING* that additional time is needed in order for the SCRS to be able to assess the stock and provide sound advice;

THE INTERNATIONAL COMMISSION FOR THE CONSERVATION  
OF ATLANTIC TUNAS (ICCAT) RECOMMENDS THAT:

The following amendments shall be made to Recommendation 19-08:

1. Paragraph 2 shall be replaced with:
  - “2. An annual Total Allowable Catch (TAC) of 28,923 t for South Atlantic blue shark is established. The Annual TAC may be revised subject to a decision of the Commission based on the updated advice of the SCRS in 2023, or at an earlier stage if enough information is provided by the SCRS.”
2. Paragraph 3 shall be replaced with:
  - “3. An allocation of the future TAC shall be decided by the Commission, if possible in 2022 and not later than 2023.”
