 - (iii) if the licence is surrendered, the continued taking of water by means of the work or from the extraction point will not be authorised under the Act (for example, authorised under another access licence or in exercise of a harvestable right or domestic and stock right or because the Minister agrees to hold the surrendered licence until the taking of water by means of the work or from the extraction point ceases).

13 Cancellation of specific purpose access licences

For the purposes of section 77A (3) of the Act, the following criteria are prescribed as criteria that the Minister must consider when determining whether the purpose for which a specific purpose access licence was granted no longer exists:

- (a) except as provided by paragraph (b), whenever water is taken by means of any of the access licence's nominated water supply works, or
 - (b) if the relevant water sharing plan so provides, whenever water is ordered in relation to any of the access licence's nominated water supply works.
- (2) If a water supply work is nominated in relation to two or more access licences, water allocations taken by means of, or ordered in relation to, the work are to be debited from the water allocation accounts for those access licences:
- (a) to the extent to which the relevant water sharing provisions of a management plan establish priorities in that regard, in accordance with the priorities so established, and

17 Access licences arising from former entitlements

Part 2 of Schedule 4 contains particular provisions relating to access licences arising from former entitlements.

17A Determining value of water illegally taken

(1) For the purposes of section 60G (1) (a) of the Act, the value of water illegally taken from a water source is to be determined in accordance with this clause.

(2) No trading prices published for any period If no trading price data has been published for any period for the water source, the value of water illegally taken is to be determined by multiplying the relevant published water access (entitlement) charge for the valley in which the water source is located for the water year in which the illegal taking of water began (expressed in dollars per megalitre) by the volume of water illegally taken (expressed in megalitres).

(3) Trading prices published for month or some or all months in which water illegally taken If trading price data has been published for the water source for the month or some or all of the months in which water was illegally taken, the value of water illegally taken is to be determined by establishing the weighted average trading price for the water source published for the month or months in which water was illegally taken (expressed in dollars per megalitre) and multiplying that weighted average by the volume of water illegally taken (expressed in megalitres).

(4) Trading prices published for year in which illegal taking of water began and illegal taking of water began in previous water year If the illegal taking of water began in a water year previous to the current water year and trading price data has been published for the water source for that previous water year but not for the month or months in which water was illegally taken, the value of water illegally taken is to be determined by establishing the weighted average trading price for the water source published for that previous water year (expressed in dollars per megalitre) and multiplying it by the volume of water illegally taken (expressed in megalitres).

(5) Trading prices published but not for month or months in which water illegally taken and illegal taking of water began in current water year If the illegal taking of water began in the current water year and no trading price data has been published for the water source for the month or months in which water was illegally taken (whether or not trading price data has been published for the water source for any other month in the current year) and:

(a) trading price data has been published for the water year previous to the current water year--the value of water illegally taken is to be determined by establishing the weighted average trading price for the water source published for that previous water year (expressed in dollars per megalitre) and multiplying that weighted average by the volume of water illegally taken (expressed in megalitres), or

(b) trading price data has not been published for the water year previous to the current water year--the value of water illegally taken is to be determined by multiplying the published water access (entitlement) charge for the valley in which the water source is located for that previous water year (expressed in dollars per megalitre) by the volume of water illegally taken (expressed in megalitres).

(6) No trading prices published for year in which illegal taking of water began and illegal taking of water began in previous water year If the illegal taking of water began in a

water year previous to the current water year and no trading price data has been published for the water source for any month during that previous water year, the value of water illegally taken is to be determined by multiplying the published water access (entitlement) charge for the valley in which the water source is located for that previous water year (expressed in dollars per megalitre) by the volume of water illegally taken (expressed in megalitres).

(7) In this clause: "**illegally taken**" means taken in contravention of Division 1A of Part 2 of the Act. "**published**" means published on the website of the Department of Primary Industries. "**trading price data**" means data about assignments of water allocations under section 71T of the Act occurring in any month, but not any other dealings. "**water access (entitlement) charge**" is the annual charge per unit of entitlement that would be payable under the 1-part tariff for an unregulated river access licence or an aquifer access licence, as imposed by the Minister pursuant to section 114 of the Act. This definition does not apply to regulated river access licences because regulated rivers have trading prices. Details relating to the 1-part tariff for unregulated river access licences and aquifer access licences are published on the website of the Department of Primary Industries.

Division 2 – Exemptions

18 Exemption from requirement for access licence

(1) A person is exempt from section 60A (1) and (2) of the Act in relation to the taking of water from a water source if the person:

(4) An exemption conferred by subclause (1) with respect to approved watering for basic human water needs (within the meaning of clause 14 of Schedule 5) ceases to apply 4 months after the date on which the relevant approval was granted by the Minister or such later date as the Minister may approve of in writing.

(5) An exemption conferred by this clause with respect to the taking of water for the purposes and in the circumstances specified in clause 15B of Schedule 5 (Emergency safety measures) is subject to the condition that the person claiming the exemption must comply with all applicable requirements (if any) of the Minister:

- (a) that are published in the Gazette, or notified in writing to the person, for the purposes of this subclause, and
- (b) that are for the purposes of implementing the water management principles in relation to the taking of water the subject of the exemption.

- (b) an increase in the share or extraction component of an access licence in connection with the assignment of rights under section 71Q of the Act.

21 Exemption from certain requirement concerning registration of security interests in replacement access licences

A person claiming a security interest in a replacement access licence is exempt from the requirement of clause 19 (5) (d) of Schedule 10 to the Act that the person advise the holder of the licence of the existence of the security interest claimed and give written notice of the advice to the Director-General, but only if the licence holder requests the Director-General, in writing, to register the security interest.

Division 8 – Concessions for eligible pensioners and others

Subdivision 1 – Preliminary

210 Application

This Division (Subdivision 5 excepted) applies to and in respect of the following water supply authorities:

(a) Essential Energy,

(b) Cobar Water Board.

211 Definitions

(1) In this Division: "**eligible pensioner**", in relation to a dwelling, means a person who occupies the dwelling as his or her sole or principal residence and:

(a) who receives a pension, benefit or allowance under Chapter 2 of the *Social Security Act 1991* of the Commonwealth, or a service pension under Part III of the *Veterans' Entitlements Act 1986* of the Commonwealth, and who is the holder of a pensioner concession card issued by or on behalf of the Commonwealth, or

(b) who receives a pension from the Commonwealth Department of Veterans' Affairs as:

(i) the widow or widower of a member of the Australian Defence or Peacekeeping Forces, or

(ii) the unmarried mother of a deceased unmarried member of either of those Forces, or

(iii) the widowed mother of a deceased unmarried member of either of those Forces,

(c) who receives a special rate of pension under section 24 of the *Veterans'*

Entitlements Act 1986 of the Commonwealth.

"Gazetted amount" means an amount specified by the Minister, by order published in the Gazette, for the purposes of this Division. **"instalment"**, in relation to a service charge, means an instalment payable under clause 198 in respect of the charge. **"nominal amount"**, in relation to the service charges payable for any land, means the lesser of the following amounts:

- (a) an amount equal to half of all service charges for that land for the current charging year,
- (b) an amount equal to:
 - (i) except as provided by subparagraph (ii), the whole of the Gazetted amount, or
 - (ii) if the only service charge payable for that land is a water service charge, half of the Gazetted amount.

"service charge" includes an instalment of a service charge. **"water service charge"** includes a drainage service charge levied in conjunction with the water service charge.

(2) In this Division, a reference to the time at which a service charge is levied is, in the case of an instalment of the service charge, a reference to the time at which the instalment is due for payment.

Subdivision 2 – Reductions for pensioners

212 When entitlement arises

A water supply authority is to reduce a service charge under this Subdivision if:

- (a) an application for the reduction is made to it by an eligible pensioner, and
- (b) as at the day on which the service charge is levied or imposed, it is satisfied that the eligible pensioner is solely or jointly liable for payment of the charge, and
- (c) sufficient evidence is produced to it to enable the reduction to be calculated.

213 Reduction of total charges

An eligible pensioner who is liable for a service charge for any land for any charging year is required to pay, for all service charges payable for that land for that year, no more than an amount calculated by dividing the nominal amount in relation to those charges by the number of persons liable for those charges.

214 Reduction of instalments for charges

An eligible pensioner who is liable for an instalment of a service charge for any land for any charging year is required to pay, as an instalment for all service charges payable for that land for that year, no more than an amount calculated by:

- (a) dividing the nominal amount in relation to those charges by the number of persons liable for those charges, and
- (b) dividing the result of that division by the number of instalments payable in relation to those charges.

215 Application by person who becomes eligible pensioner after charge is levied

If a person becomes an eligible pensioner after the day on which a service charge is levied or imposed, the person is entitled to a reduction of the charge proportionate to the number of days remaining after the day on which the person becomes an eligible pensioner in the charging year for which the charge is levied or imposed.

Subdivision 3 – Other reductions

216 Extension of reduction to avoid hardship

- (1) If the Minister considers it proper to do so to avoid hardship, the Minister may, by order, direct that:
 - (a) a person specified in the order:

(i) who occupies a dwelling as his or her sole or principal residence together with an eligible pensioner for whom the dwelling is his or her sole or principal residence, and
(ii) who is jointly liable with that eligible pensioner or with that eligible pensioner and one or more other persons for a service charge for the land on which that dwelling is situated, and
(iii) who would not otherwise be entitled to a reduction of the service charge under this Division, or
(b) any person belonging to a class of persons specified in the order, being persons referred to in paragraph (a),
is taken, for the purposes of this Division, to be or to have been an eligible pensioner.
(2) If the Minister considers it proper to do so to avoid hardship, the Minister may, by order, direct that:

(a) an eligible pensioner specified in the order who, although not liable, or although not liable jointly with one or more persons, to the whole of the service charges for the land on which that dwelling is situated:
(i) has paid the whole of those charges for such period as, in the opinion of the Minister, warrants the making of such an order, or
(ii) is, in the opinion of the Minister, likely to pay the whole of those charges in such circumstances as, in the opinion of the Minister, warrant the making of such an order, or
(b) any person belonging to a class of persons specified in the order, being persons referred to in paragraph (a),
is taken, for the purposes of this Division, to be or to have been the person solely liable in respect of the land on which the dwelling is situated.
(3) An order under this clause takes effect on the day that it is made or on such earlier or later day as is specified in the order.

Subdivision 4 – General provisions concerning reductions

An application to a water supply authority under this Division must be made to it within the time, and in the manner, determined by the authority.

Section 344 of the Act provides that it is an offence to make a false or misleading application.

218 Refund of certain overpayments

If a person:

(a) has paid in full a service charge for a charging year, and
(b) would have been entitled to a reduction of the service charge if it had been paid by instalments, and
(c) applies to the water supply authority for a refund of the amount of the reduction,
the water supply authority must make the refund or credit the amount towards payment of any amount then payable in relation to the land concerned by the person liable to pay the amount to the authority.

An eligible pensioner is not liable for a service charge beyond the amount of his or her liability as reduced in accordance with this Division.

Schedule 2 Diagram and map references relating to streams

(Clause 3 (1), definition of "minor stream")

Part 1 – Schematic diagram of stream order of a watercourse

The method of determining the stream order of a watercourse shown on a topographic map is the Strahler system as shown below. The Strahler system is applied to the watercourses shown on the topographic maps as listed in Part 2.

The Strahler system:

â€¢ Starting at the top of a catchment, any watercourse which has no other watercourses flowing into it is classed as a first order stream (1).

â€¢ If two first order streams join, the stream becomes a second order stream (2).

â€¢ If a second order stream is joined by a first order stream, it remains a second order stream.

â€¢ If two second order streams join they form a third order stream (3).

â€¢ A third order stream does not become a fourth order stream until it is joined by another third order stream.

(2) A replacement access licence does not operate (and has no force or effect) until the Minister notifies the licence holder in writing of the terms and conditions of the licence referred to in subclause (1).

(3) For the purpose of establishing the confirmed history of water usage for any eligible land, the Minister may require the landholder to furnish information relevant to that purpose.

(4) The Minister is not required to issue a notice under subclause (2) if he or she is not

satisfied that a confirmed history of water usage for eligible land has been established, whether because the landholder has failed to comply with a requirement under subclause (3) or otherwise.

(5) This Subdivision does not operate:

(a) to create a domestic and stock access licence (or an access licence of a subcategory of a domestic and stock access licence) in relation to land if:

(i) the land has frontage to a tidal pool water source, or

(ii) the share component of the licence, as determined by clause 44 of this Schedule, would be zero or negative, or

(b) to create an unregulated river access licence (or an access licence of a subcategory of an unregulated river access licence) if the share component of the licence, as determined by clause 45 of this Schedule, would be zero or negative.

Because it is an access licence, a replacement access licence can be suspended, cancelled or compulsorily acquired under Division 6 of Part 2 of Chapter 3 of the Act, and discretionary conditions can be imposed under section 66. The licence holder will need to apply for any necessary water use approvals and water supply work approvals if he or she intends to take or use water under the authority of a replacement access licence.

43 Categories of replacement access licence

A replacement access licence is to be:

(a) to the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for domestic consumption or stock watering:

(i) if the water has been used for both domestic consumption and stock watering, a domestic and stock access licence, or

(ii) if the water has been used for domestic consumption only, a domestic and stock [domestic] access licence, or

(iii) if the water has been used for stock watering only, a domestic and stock [stock] access licence, and

(b) to the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used otherwise than for domestic consumption or stock watering:

(i) an unregulated river access licence, or

(ii) an access licence of any subcategory of an unregulated river access licence.

44 Share component for domestic and stock access licences

The share component for a replacement access licence that is a domestic and stock access licence is to be as follows:

(a) except as provided by paragraphs (b) and (c), 4.5 megalitres,

(b) in the case of a domestic and stock [domestic] access licence, 1 megalitre,

(c) in the case of a domestic and stock [stock] access licence, 3.5 megalitres,

subtracting from each such volume the volume of any entitlement under the former 1912 Act that authorised the taking of tidal pool water for domestic consumption or stock watering (or both).

45 Share component for unregulated river access licences

(1) The share component for a replacement access licence that is an unregulated river access licence is to be the amount (in megalitres) equivalent to the maximum average volume of tidal pool water taken annually and used on the eligible land concerned, otherwise than for domestic consumption or stock watering, between 1999 and 2009 (inclusive).

(2) The reference in subclause (1) to the maximum average volume of water is a reference to:

(a) if water was taken during only one of the years between 1999 and 2009, the volume of water taken during that year, or

- (b) if water was taken during only 2 of the years between 1999 and 2009, one half of the sum of the volumes of water taken annually during those years, or
- (c) if water was taken during 3 or more of the years between 1999 and 2009, one third of the sum of the 3 largest volumes of water taken annually during those years,

subtracting from each such volume the volume of any entitlement under the former 1912 Act that authorised the taking of tidal pool water, other than an entitlement that authorised the taking of tidal pool water for domestic consumption or stock watering (or both).

(3) To the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for purposes other than:

- (a) irrigation, or
- (b) domestic consumption, or
- (c) stock watering,

the volume of water taken in any year is to be calculated (in megalitres) on the basis of that history.

(4) To the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for the purposes of irrigation, the volume of water taken in any year for those purposes is to be calculated (in megalitres):

(a) in the case of water taken from the Wallis Creek Tidal Pool Water Source, the Paterson River Tidal Pool Water Source or the Hunter River Tidal Pool Water Source:

- (i) if the confirmed history of water usage for the land indicates which crops specified in Table 1 were grown under irrigation on which parts of the land during that year, as the sum of the amounts obtained by multiplying the number of hectares of land on which each such crop was grown (as indicated by the confirmed history of water usage) by the factor specified in that Table in relation to that crop, or
- (ii) in any other case, as the amount obtained by multiplying the number of hectares of the land on which crops specified in Table 1 were grown under irrigation during that year (as indicated by the confirmed history of water usage for the land) by the smallest factor specified in that Table in relation to those crops, and

(b) in the case of water taken from the Manning River Tidal Pool Water Source:

- (i) if the confirmed history of water usage for the land indicates which crops specified in Table 2 were grown under irrigation on which parts of the land during that year, as the sum of the amounts obtained by multiplying the number of hectares of land on which each such crop was grown (as indicated by the confirmed history of water usage) by the factor specified in that Table in relation to that crop, or
- (ii) in any other case, as the amount obtained by multiplying the number of hectares of the land on which crops specified in Table 2 were grown under irrigation during that year (as indicated by the confirmed history of water usage for the land) by the smallest factor specified in that Table in relation to those crops.

(5) Where more than one crop has been grown on the same land in the same year, the land may not be counted more than once for the purposes of subclause (4), but the higher or highest of the factors relevant to those crops is to be used.

(6) For the purposes of this clause, a reference to a crop specified in Table 1 or 2 includes a reference to any other crop that the Minister determines to be an equivalent to that crop.

Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which 10 hectares were used for growing lucerne, 10 hectares were used for annual pasture and 10 hectares were used for vegetables (as indicated by the confirmed history of water usage for the land). The factors for these crops (using Table 1) are 6 (for lucerne), 3.5 (for annual pasture) and 8 (for vegetables). The volume of water calculated for that year for the land would therefore be 175 megalitres (that is, 10 times 6, plus 10 times 3.5, plus 10 times 8: see subclause (4) (a) (i)). Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which some were used for growing lucerne, some were used for annual pasture and some were used for vegetables (the specific areas not indicated by the confirmed history of water usage for the land). The factors for these crops (using Table 1) are 6 (for lucerne), 3.5 (for annual pasture) and 8 (for vegetables). The volume of water calculated for that year for the land would therefore be 105 megalitres (that is, 30 times 3.5: see subclause (4) (a) (ii)). Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which all 30 were used for growing summer cereals (in summer) and all 30 were used for growing winter cereals (in winter). The factors for these crops (using Table 1) are 4 (for summer cereals) and 3 (for winter cereals). The volume of water calculated for that year for the land would therefore be 120 megalitres (that is, 30 times 4: see subclauses (4) (a) (i) and (5)).

46 Conversion of share components of access licence

Clause 7 of Schedule 10 to the Act applies to and in respect of a replacement access licence in the same way as it applies to and in respect of an access licence arising under that Schedule.

This clause enables the share component of an access licence under this Subdivision to be converted from a specified quantity of water to any other manner (such as a unit share) in which a share component may be expressed under section 56 of the Act.

Subdivision 3 – General

47 Registration of security interests in replacement access licences

(1) Pursuant to clause 1 of Schedule 9 to the Act, clause 19 of Schedule 10 to the Act is to be construed as if the reference in clause 19 (5) to the commencement of Part 2 of Schedule 10 to the Act were a reference to 1 August 2009.

(2) Pursuant to clause 1 of Schedule 9 to the Act, the following subclauses are taken to be inserted after clause 19 (10) of Schedule 10:

(10A) Subclause (10B) applies only to an access licence arising from an entitlement with respect to land in respect of which an interest was, immediately before 1 August 2009, registered under the *Real Property Act 1900* or under the *Corporations Act 2001* of the Commonwealth.

(10B) No dealing that requires the consent of the holder of a security interest may be registered in relation to an access licence until the expiry of the prescribed period unless, before the expiry of that period, the holder of the interest:

- (a) has lodged with the Director-General a notice of the kind referred to in subclause (5) (d), or
- (b) has notified the Director-General that the holder does not propose to seek registration of the interest in the Access Register.

48 Entitlements held by 2 or more co-holders

Pursuant to clause 1 of Schedule 9 to the Act, clause 23 of Schedule 10 to the Act is taken to have been replaced by the following clause:

23 Entitlements held by 2 or more co-holders Two or more co-holders of a replacement access licence are taken to hold the access licence:

(a) if the Minister has a record of the shares in which the former entitlement was held immediately before the appointed day, in the same shares as the former entitlement was so held, or

(b) if the Minister has no such record, but within 2 months after sending a written request to the co-holders seeking information as to their shareholding the Director-General receives:

- (i) a notice, signed by or on behalf of each of them, by which they agree as to the shares in which they hold the access licence, or
- (ii) a notice, signed by any one of them, to the effect that legal proceedings have been commenced for the purpose of obtaining a declaration as to the shares in which they hold the access licence,

in the agreed shares referred to in the notice under subparagraph (i), or in the shares determined pursuant to the legal proceedings referred to in the notice under subparagraph (ii), as the case may be, or

(c) in any other case, as tenants in common with the entitlements conferred by the licence under section 56 apportioned equally between them.

Division 10 – Replacement access licences for entitlements for the Peel Valley Regulated, Unregulated, Alluvium and Fractured Rock Water Sources (1 July 2010)

49 Application of Division

(1) This Division applies to and in respect of each entitlement with respect to the water sources to which the *Water Sharing Plan for the Peel Valley Regulated, Unregulated, Alluvium and Fractured Rock Water Sources 2010* applies and to and in respect of each access licence arising from any such entitlement.

(2) A reference in this Division to an entitlement referred to in Division 7 of Part 4 of this Schedule includes a reference to an entitlement that is issued before 1 July 2010 under section 117J of the former 1912 Act or clause 24 of the *Water (Part 2--General) Regulation 1997* as a result of a transfer of water allocation or water rights and that arises from an entitlement referred to in Division 7 of Part 4 of this Schedule.

50 Aquifer (general security) access licences

(1) Pursuant to clause 1 of Schedule 9 to the Act, the following subclause is taken to be inserted after clause 4 (4) of Schedule 10 to the Act:

(5) This clause does not apply to an entitlement referred to in Division 7 of Part 4 of Schedule 4 to the *Water Management (General) Regulation 2011*.

(2) Pursuant to clause 1 of Schedule 9 to the Act, the following clause is taken to be inserted after clause 4 of Schedule 10 to the Act:

4A Aquifer (general security) access licences A Part 2 or Part 5 entitlement referred to in Division 7 of Part 4 of Schedule 4 to the *Water Management (General) Regulation 2011* is taken to have been replaced by an aquifer (general security) access licence.

(3) Pursuant to clause 1 of Schedule 9 to the Act, the following subclause is taken to be inserted after clause 5 (4) of Schedule 10 to the Act:

(5) Subclause (1) does not apply to an entitlement referred to in Division 7 of Part 4 of Schedule 4 to the *Water Management (General) Regulation 2011*.

51 Registration of security interests in replacement access licences

(1) Pursuant to clause 1 of Schedule 9 to the Act, clause 19 of Schedule 10 to the Act is to be construed as if the reference in clause 19 (5) to the commencement of Part 2 of Schedule 10 to the Act were a reference to 1 July 2010.

(2) Pursuant to clause 1 of Schedule 9 to the Act, the following subclauses are taken to be inserted after clause 19 (10):

(10A) Subclause (10B) applies only to an access licence arising from an entitlement with respect to land in respect of which an interest was, immediately before 1 July 2008, registered under the *Real Property Act 1900* or under the *Corporations Act 2001* of the Commonwealth.

(10B) No dealing that requires the consent of the holder of a security interest may be registered in relation to an access licence until the expiry of the prescribed period unless, before the expiry of that period, the holder of the interest:

(a) has lodged with the Director-General a notice of the kind referred to in subclause (5) (d), or

(b) has notified the Director-General that the holder does not propose to seek registration of the interest in the Access Register.

52 Entitlements held by 2 or more co-holders

Pursuant to clause 1 of Schedule 9 of the Act, clause 23 of Schedule 10 to the Act is taken to have been replaced by the following clause:

23 Entitlements held by 2 or more co-holders Two or more co-holders of a replacement access licence are taken to hold the access licence:

(a) if the Minister has a record of the shares in which the former entitlement was held immediately before the appointed day, in the same shares as the former entitlement was so held, or

(b) if the Minister has no such record, but within 2 months after sending a written request to the co-holders seeking information as to their shareholding the Director-General receives:

(i) a notice, signed by or on behalf of each of them, by which they agree as to the shares in which they hold the access licence, or

(ii) a notice, signed by any one of them, to the effect that legal proceedings

have been commenced for the purpose of obtaining a declaration as to the shares in which they hold the access licence,
in the agreed shares referred to in the notice under subparagraph (i), or in the shares determined pursuant to the legal proceedings referred to in the notice under subparagraph (ii), as the case may be, or
(c) in any other case, as tenants in common with the entitlements conferred by the licence under section 56 apportioned equally between them.

Subdivision 2 – Access licences for tidal pool water sources

54 Temporary exemption from requirements for certain access licences and approvals

(1) All persons are exempt from:

(a) sections 60A (1) and (2), 60C (1)-(4) and 60D of the Act in relation to the taking of tidal pool water, and

(b) section 91A (1) of the Act in relation to the use of tidal pool water, and

(c) section 91B (1) of the Act in relation to:

(i) the use of any water supply work by which tidal pool water is taken

(being a water supply work constructed before 17 December 2010), and

(ii) the maintenance and repair of any such work,

for the period between 17 December 2010 and 17 December 2012 (inclusive).

(2) Subclause (1) ceases to apply to a person in relation to land when the person is given notice under clause 55 of this Schedule of the terms and conditions of the person's replacement access licence for the land.

(3) The Minister may in a particular case by notice in writing to a landholder of eligible land extend the period of the exemption conferred by subclause (1) in its application to the landholder if the Minister is satisfied that the extension is necessary to enable the Minister to establish the landholder's confirmed history of water usage.

55 Replacement access licences arising from confirmed history of water usage

(1) A landholder of eligible land in respect of which there is a confirmed history of water usage is taken to hold an access licence (a **"replacement access licence"**), and such an access licence is taken to have arisen, on the following terms and conditions:

(a) terms identifying:

(i) the category or subcategory of the licence, as determined by clause 56 of this Schedule, and

(ii) the share component of the licence, as determined by clause 57 or 58 of this Schedule, as the case requires,

(b) the mandatory conditions referable to an access licence of the category or subcategory referred to in paragraph (a) (i).

(2) A replacement access licence does not operate (and has no force or effect) until the Minister notifies the licence holder in writing of the terms and conditions of the licence referred to in subclause (1).

(3) For the purpose of establishing the confirmed history of water usage for any eligible land, the Minister may require the landholder to furnish information relevant to that purpose.

(4) The Minister is not required to issue a notice under subclause (2) if he or she is not satisfied that a confirmed history of water usage for eligible land has been established, whether because the landholder has failed to comply with a requirement under subclause (3) or otherwise.

(5) This Subdivision does not operate:

(a) to create a domestic and stock access licence (or an access licence of a subcategory of a domestic and stock access licence) in relation to land if:

(i) the land has frontage to a tidal pool water source, or

(ii) the share component of the licence, as determined by clause 57 of this Schedule, would be zero or negative, or

(b) to create an unregulated river access licence (or an access licence of a subcategory of an unregulated river access licence) if the share component of the licence, as determined by clause 58 of this Schedule, would be zero or negative.

Because it is an access licence, a replacement access licence can be suspended, cancelled or compulsorily acquired under Division 6 of Part 2 of Chapter 3 of the Act, and discretionary conditions can be imposed under section 66. The licence holder will need to apply for any necessary water use approvals and water supply work approvals if he or she intends to take or use water under the authority of a replacement access licence.

56 Categories of replacement access licence

A replacement access licence is to be:

(a) to the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for domestic consumption or stock watering:

(i) if the water has been used for both domestic consumption and stock watering, a domestic and stock access licence, or

(ii) if the water has been used for domestic consumption only, a domestic and stock [domestic] access licence, or

(iii) if the water has been used for stock watering only, a domestic and stock [stock] access licence, and

(b) to the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used otherwise than for domestic consumption or stock watering:

(i) an unregulated river access licence, or

(ii) an access licence of any subcategory of an unregulated river access licence.

57 Share component for domestic and stock access licences

(1) In relation to an entitlement or access licence in respect of the Tweed Estuary Water Source, the Wyrallah Area Water Source or the Coraki Area Water Source, the share component for a replacement access licence that is a domestic and stock access licence is to be as follows:

(a) except as provided by paragraphs (b) and (c), 4 megalitres,

(b) in the case of a domestic and stock [domestic] access licence, 1 megalitre,

(c) in the case of a domestic and stock [stock] access licence, 3 megalitres,

subtracting from each such volume the volume of any entitlement under the former 1912 Act that authorised the taking of tidal pool water for domestic consumption or stock watering (or both).

(2) In relation to an entitlement or access licence in respect of the Merimbula Lake Tributaries Water Source, Pambula Lake Tributaries Water Source, Towamba Estuary Tributaries Water Source, the Bermagui River Water Source or the Wapengo Lagoon Tributaries Water Source, the share component for a replacement access licence that is a domestic and stock access licence is to be as follows:

(a) except as provided by paragraphs (b) and (c), 5.5 megalitres,

(b) in the case of a domestic and stock [domestic] access licence, 1 megalitre,

(c) in the case of a domestic and stock [stock] access licence, 4.5 megalitres,

subtracting from each such volume the volume of any entitlement under the former 1912 Act that authorised the taking of tidal pool water for domestic consumption or stock watering (or both).

58 Share component for unregulated river access licences

(1) The share component for a replacement access licence that is an unregulated river access licence is to be the amount (in megalitres) equivalent to the maximum average volume of tidal pool water taken annually and used on the eligible land concerned, otherwise than for domestic consumption or stock watering, between 2000 and 2010 (inclusive).

(2) The reference in subclause (1) to the maximum average volume of water is a reference to:

- (a) if water was taken during only one of the years between 2000 and 2010, the volume of water taken during that year, or
- (b) if water was taken during only 2 of the years between 2000 and 2010, one half of the sum of the volumes of water taken annually during those years, or
- (c) if water was taken during 3 or more of the years between 2000 and 2010, one third of the sum of the 3 largest volumes of water taken annually during those years,

subtracting from each such volume the volume of any entitlement under the former 1912 Act that authorised the taking of tidal pool water, other than an entitlement that authorised the taking of tidal pool water for domestic consumption or stock watering (or both).

(3) To the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for purposes other than:

- (a) irrigation, or
- (b) domestic consumption, or
- (c) stock watering,

the volume of water taken in any year is to be calculated (in megalitres) on the basis of that history.

(4) To the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for the purposes of irrigation, the volume of water taken in any year for those purposes is to be calculated (in megalitres):

(a) in the case of water taken from the Tweed Estuary Water Source, the Wyrallah Area Water Source or the Coraki Area Water Source:

- (i) if the confirmed history of water usage for the land indicates which crops specified in Table 1 to this clause were grown under irrigation on which parts of the land during that year, as the sum of the amounts obtained by multiplying the number of hectares of land on which each such crop was grown (as indicated by the confirmed history of water usage) by the factor specified in that Table in relation to that crop, or
- (ii) in any other case, as the amount obtained by multiplying the number of hectares of the land on which crops specified in Table 1 to this clause were grown under irrigation during that year (as indicated by the confirmed history of water usage for the land) by the smallest factor specified in that Table in relation to those crops, and

(b) in the case of water taken from the Merimbula Lake Tributaries Water Source, the Pambula Lake Tributaries Water Source, the Towamba Estuary Tributaries Water Source, the Bermagui River Water Source or the Wapengo Lagoon Tributaries Water Source:

- (i) if the confirmed history of water usage for the land indicates which crops specified in Table 2 were grown under irrigation on which parts of the land during that year, as the sum of the amounts obtained by multiplying the number of hectares of land on which each such crop was grown (as indicated by the confirmed history of water usage) by the factor specified in that Table in relation to that crop, or
- (ii) in any other case, as the amount obtained by multiplying the number of

hectares of the land on which crops specified in Table 2 were grown under irrigation during that year (as indicated by the confirmed history of water usage for the land) by the smallest factor specified in that Table in relation to those crops.

(5) Where more than one crop has been grown on the same land in the same year, the land may not be counted more than once for the purposes of subclause (4), but the higher or highest of the factors relevant to those crops is to be used.

(6) For the purposes of this clause, a reference to a crop specified in Table 1 or 2 to this clause includes a reference to any other crop that the Minister determines to be an equivalent to that crop.

Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which 10 hectares were used for growing lucerne, 10 hectares were used for annual pasture and 10 hectares were used for vegetables (as indicated by the confirmed history of water usage for the land). The factors for these crops (using Table 1) are 4.5 (for lucerne), 3 (for annual pasture) and 6 (for vegetables). The volume of water calculated for that year for the land would therefore be 135 megalitres (that is, 10 times 4.5, plus 10 times 3, plus 10 times 6: see subclause (4) (a) (i)). Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which some were used for growing lucerne, some were used for annual pasture and some were used for vegetables (the specific areas not indicated by the confirmed history of water usage for the land). The factors for these crops (using Table 1) are 4.5 (for lucerne), 3 (for annual pasture) and 6 (for vegetables). The volume of water calculated for that year for the land would therefore be 90 megalitres (that is, 30 times 3: see subclause (4) (a) (ii)). Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which all 30 were used for growing summer cereals (in summer) and all 30 were used for growing winter cereals (in winter). The factors for these crops (using Table 1) are 2 (for summer cereals) and 2.5 (for winter cereals). The volume of water calculated for that year for the land would therefore be 75 megalitres (that is, 30 times 2.5: see subclauses (4) (a) (i) and (5)).

59 Conversion of share components of access licence

Clause 7 of Schedule 10 to the Act applies to and in respect of a replacement access licence in the same way as it applies to and in respect of an access licence arising under that Schedule.

This clause enables the share component of an access licence under this Subdivision to be converted from a specified quantity of water to any other manner (such as a unit share) in which a share component may be expressed under section 56 of the Act.

Subdivision 3 – Security interests

60 Application of Subdivision

This Subdivision applies to and in respect of each entitlement with respect to:

- (a) the Bermagui River Water Source, or
- (b) the Coraki Area Water Source, or
- (c) the Merimbula Lake Tributaries Water Source, or
- (d) the Pambula Lake Tributaries Water Source, or
- (e) the Towamba Estuary Tributaries Water Source, or
- (f) the Tweed Estuary Water Source, or
- (g) the Wapengo Lagoon Tributaries Water Source, or
- (h) the Wyrallah Area Water Source,

and to and in respect of each access licence arising from any such entitlement.

61 Registration of security interests in replacement access licences

(1) Pursuant to clause 1 of Schedule 9 to the Act, clause 19 of Schedule 10 to the Act is to be construed as if the reference in clause 19 (5) to the commencement of Part 2 of Schedule 10 to the Act were a reference to 17 December 2010.

(2) Pursuant to clause 1 of Schedule 9 to the Act, the following subclauses are taken to be inserted after clause 19 (10) of Schedule 10 to the Act:

- (10A) Subclause (10B) applies only to an access licence arising from an entitlement with respect to land in respect of which an interest was, immediately before 17 December 2010, registered under the *Real Property Act 1900* or under

the *Corporations Act 2001* of the Commonwealth.

(10B) No dealing that requires the consent of the holder of a security interest may be registered in relation to an access licence until the expiry of the prescribed period unless, before the expiry of that period, the holder of the interest:

- (a) has lodged with the Director-General a notice of the kind referred to in subclause (5) (d), or
- (b) has notified the Director-General that the holder does not propose to seek registration of the interest in the Access Register.

62 Entitlements held by 2 or more co-holders

Pursuant to clause 1 of Schedule 9 of the Act, clause 23 of Schedule 10 to the Act is taken to have been replaced by the following clause:

23 Entitlements held by 2 or more co-holders Two or more co-holders of a replacement access licence are taken to hold the access licence:

- (a) if the Minister has a record of the shares in which the former entitlement was held immediately before the appointed day, in the same shares as the former entitlement was so held, or
- (b) if the Minister has no such record, but within 2 months after sending a written request to the co-holders seeking information as to their shareholding the Director-General receives:
 - (i) a notice, signed by or on behalf of each of them, by which they agree as to the shares in which they hold the access licence, or
 - (ii) a notice, signed by any one of them, to the effect that legal proceedings have been commenced for the purpose of obtaining a declaration as to the shares in which they hold the access licence,in the agreed shares referred to in the notice under subparagraph (i), or in the shares determined pursuant to the legal proceedings referred to in the notice under subparagraph (ii), as the case may be, or
- (c) in any other case, as tenants in common with the entitlements conferred by the licence under section 56 apportioned equally between them.

Division 12 – Replacement access licences for entitlements for certain Bega and Brogo Water Sources (1 April 2011)

Subdivision 1 – Preliminary

63 Definitions

In this Division:

"Bega River Estuary and Tributaries Water Source" means the water source of that name identified in the *Water Sharing Plan for the Bega and Brogo Rivers Area Regulated, Unregulated and Alluvial Water Sources 2011*.

"confirmed history of water usage", in relation to eligible land, means information that indicates the volume of tidal pool water that has been used on the land, and the purposes for which that water has been used, at any time between 1 April 2001 and 1 April 2011, established to the satisfaction of the Minister.

"eligible land" means any land on which the landholder of the land has used tidal pool water at any time between 1 April 2001 and 1 April 2011.

"replacement access licence" means an access licence that is taken to have arisen under this Subdivision.

"tidal pool water" means water taken from a tidal pool water source.

"tidal pool water source" means the Bega River Estuary and Tributaries Water Source.

64 Application of Division

(1) This Division applies to and in respect of each entitlement with respect to the water sources to which the *Water Sharing Plan for the Bega and Brogo Rivers Area Regulated, Unregulated and Alluvial Water Sources 2011* applies and to and in respect of each access licence arising from any such entitlement.

(2) A reference in this Division to an entitlement listed in Subdivision 2 of Division 8 of Part 4 of this Schedule includes a reference to an entitlement that is issued before 1 April 2011 under section 117J of the former 1912 Act or clause 24 of the *Water (Part 2--General) Regulation 1997* as a result of a transfer of water allocation or water rights and that arises from an entitlement listed in Subdivision 2 of Division 8 of Part 4 of this Schedule.

Subdivision 2 – Access licences for tidal pool water sources

65 Temporary exemption from requirements for certain access licences and approvals

(1) All persons are exempt from:

(a) sections 60A (1) and (2), 60C (1)-(4) and 60D of the Act in relation to the taking of tidal pool water, and

(b) section 91A (1) of the Act in relation to the use of tidal pool water, and

(c) section 91B (1) of the Act in relation to:

(i) the use of any water supply work by which tidal pool water is taken (being a water supply work constructed before 1 April 2011), and

(ii) the maintenance and repair of any such work,

for the period between 1 April 2011 and 1 April 2013 (inclusive).

(2) Subclause (1) ceases to apply to a person in relation to land when the person is given notice under clause 66 of this Schedule of the terms and conditions of the person's replacement access licence for the land.

(3) The Minister may in a particular case by notice in writing to a landholder of eligible land extend the period of an exemption conferred by subclause (1) in its application to the landholder if the Minister is satisfied that the extension is necessary to enable the Minister to establish the landholder's confirmed history of water usage.

66 Replacement access licences arising from confirmed history of water usage

(1) A landholder of eligible land in respect of which there is a confirmed history of water usage is taken to hold an access licence (a **"replacement access licence"**), and such an access licence is taken to have arisen, on the following terms and conditions:

(a) terms identifying:

(i) the category or subcategory of the licence, as determined by clause 67 of this Schedule, and

(ii) the share component of the licence, as determined by clause 68 or 69 of this Schedule, as the case requires,

(b) the mandatory conditions referable to an access licence of the category or subcategory referred to in paragraph (a) (i).

(2) A replacement access licence does not operate (and has no force or effect) until the Minister notifies the licence holder in writing of the terms and conditions of the licence referred to in subclause (1).

(3) For the purpose of establishing the confirmed history of water usage for any eligible land, the Minister may require the landholder to furnish information relevant to that purpose.

(4) The Minister is not required to issue a notice under subclause (2) if he or she is not satisfied that a confirmed history of water usage for eligible land has been established, whether because the landholder has failed to comply with a requirement under subclause

(3) or otherwise.

(5) This Subdivision does not operate:

(a) to create a domestic and stock access licence (or an access licence of a subcategory of a domestic and stock access licence) in relation to land if:

(i) the land has frontage to a tidal pool water source, or

(ii) the share component of the licence, as determined by clause 68 of this Schedule, would be zero or negative, or

(b) to create an unregulated river access licence (or an access licence of a subcategory of an unregulated river access licence) if the share component of the licence, as determined by clause 69 of this Schedule, would be zero or negative.

Because it is an access licence, a replacement access licence can be suspended, cancelled or compulsorily acquired under Division 6 of Part 2 of Chapter 3 of the Act, and discretionary conditions can be imposed under section 66. The licence holder will need to apply for any necessary water use approvals and water supply work approvals if he or she intends to take or use water under the authority of a replacement access licence.

67 Categories of replacement access licence

A replacement access licence is to be:

(a) to the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for domestic consumption or stock watering:

(i) if the water has been used for both domestic consumption and stock watering, a domestic and stock access licence, or

(ii) if the water has been used for domestic consumption only, a domestic and stock [domestic] access licence, or

(iii) if the water has been used for stock watering only, a domestic and stock [stock] access licence, and

(b) to the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used otherwise than for domestic consumption or stock watering:

(i) an unregulated river access licence, or

(ii) an access licence of any subcategory of an unregulated river access licence.

68 Share component for domestic and stock access licences

The share component for a replacement access licence that is a domestic and stock access licence is to be as follows:

(a) except as provided by paragraphs (b) and (c), 5.5 megalitres,

(b) in the case of a domestic and stock [domestic] access licence, 1 megalitre,

(c) in the case of a domestic and stock [stock] access licence, 4.5 megalitres,

subtracting from each such volume the volume of any entitlement under the former 1912 Act that authorised the taking of tidal pool water for domestic consumption or stock watering (or both).

69 Share component for unregulated river access licences

(1) The share component for a replacement access licence that is an unregulated river access licence is to be the amount (in megalitres) equivalent to the maximum average volume of tidal pool water taken annually and used on the eligible land concerned, otherwise than for domestic consumption or stock watering, between 2001 and 2011 (inclusive).

(2) The reference in subclause (1) to the maximum average volume of water is a reference to:

(a) if water was taken during only one of the years between 2001 and 2011, the volume of water taken during that year, or

(b) if water was taken during only 2 of the years between 2001 and 2011, one half of the sum of the volumes of water taken annually during those years, or

(c) if water was taken during 3 or more of the years between 2001 and 2011, one third of the sum of the 3 largest volumes of water taken annually during those years,

subtracting from each such volume the volume of any entitlement under the former 1912 Act that authorised the taking of tidal pool water, other than an entitlement that authorised the taking of tidal pool water for domestic consumption or stock watering (or both).

(3) To the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for purposes other than:

- (a) irrigation, or
- (b) domestic consumption, or
- (c) stock watering,

the volume of water taken in any year is to be calculated (in megalitres) on the basis of that history.

(4) To the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for the purposes of irrigation, the volume of water taken in any year for those purposes is to be calculated (in megalitres):

- (a) if the confirmed history of water usage for the land indicates which crops specified in the Table to this clause were grown under irrigation on which parts of the land during that year, as the sum of the amounts obtained by multiplying the number of hectares of land on which each such crop was grown (as indicated by the confirmed history of water usage) by the factor specified in that Table in relation to that crop, or
- (b) in any other case, as the amount obtained by multiplying the number of hectares of the land on which crops specified in the Table to this clause were grown under irrigation during that year (as indicated by the confirmed history of water usage for the land) by the smallest factor specified in that Table in relation to those crops.

(5) Where more than one crop has been grown on the same land in the same year, the land may not be counted more than once for the purposes of subclause (4), but the higher or highest of the factors relevant to those crops is to be used.

(6) For the purposes of this clause, a reference to a crop specified in the Table to this clause includes a reference to any other crop that the Minister determines to be an equivalent to that crop.

Table

Crop under irrigation	Factor
Winter cereal	1
Summer cereal	2.5
Citrus	3.5
Vines	1.5
Summer oilseeds	3
Perennial pasture (dairy)	6.5
Perennial pasture (non-dairy)	4.5
Annual pasture	1.5
Lucerne	5
Vegetables	4.5
Orchards	5.5
Nuts	5.5
Pulses	2.5
Olives	3

Turf	8.5
Cut flowers	4.5
Inactive areas	1

Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which 10 hectares were used for growing lucerne, 10 hectares were used for annual pasture and 10 hectares were used for vegetables (as indicated by the confirmed history of water usage for the land). The factors for these crops (using the Table above) are 5 (for lucerne), 1.5 (for annual pasture) and 4.5 (for vegetables). The volume of water calculated for that year for the land would therefore be 110 megalitres (that is, 10 times 5, plus 10 times 1.5, plus 10 times 4.5: see subclause (4) (a)). Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which some were used for growing lucerne, some were used for annual pasture and some were used for vegetables (the specific areas not indicated by the confirmed history of water usage for the land). The factors for these crops (using the Table above) are 5 (for lucerne), 1.5 (for annual pasture) and 4.5 (for vegetables). The volume of water calculated for that year for the land would therefore be 45 megalitres (that is, 30 times 1.5: see subclause (4) (b)). Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which all 30 were used for growing summer cereals (in summer) and all 30 were used for growing winter cereals (in winter). The factors for these crops (using the Table above) are 2.5 (for summer cereals) and 1 (for winter cereals). The volume of water calculated for that year for the land would therefore be 75 megalitres (that is, 30 times 2.5: see subclauses (4) (a) and (5)).

70 Conversion of share components of access licence

Clause 7 of Schedule 10 to the Act applies to and in respect of a replacement access licence in the same way as it applies to and in respect of an access licence arising under that Schedule.

This clause enables the share component of an access licence under this Subdivision to be converted from a specified quantity of water to any other manner (such as a unit share) in which a share component may be expressed under section 56 of the Act.

Subdivision 3 – General

71 Supplementary water access licences

On 1 April 2011, each entitlement with respect to the water sources to which the *Water Sharing Plan for the Bega and Brogo Rivers Area Regulated, Unregulated and Alluvial Water Sources 2011* applies referred to in Column 1 of Subdivision 1 of Division 8 of Part 4 of this Schedule is taken to have been replaced not only by the relevant access licence referred to in Schedule 11 to the Act but also by a supplementary water access licence with a share component equivalent to the volume of water (expressed in megalitres) specified in Column 2 of Subdivision 1 of Division 8 of Part 4 of this Schedule with respect to that entitlement.

72 Regulated river (high security) access licences

- (1) Pursuant to clause 1 of Schedule 9 to the Act, the following subclause is taken to be inserted after clause 4 (4) of Schedule 10 to the Act:
 - (5) This clause does not apply to an entitlement listed in Subdivision 2 of Division 8 of Part 4 of Schedule 4 to the *Water Management (General) Regulation 2011*.
- (2) Pursuant to clause 1 of Schedule 9 to the Act, the following clause is taken to be inserted after clause 4 of Schedule 10 to the Act:

4A Regulated river (high security) access licences A Part 2 or Part 5 entitlement listed in Subdivision 2 of Division 8 of Part 4 of Schedule 4 to the *Water Management (General) Regulation 2011* is taken to have been replaced by a regulated river (high security) access licence.
- (3) Pursuant to clause 1 of Schedule 9 to the Act, the following subclause is taken to be inserted after clause 5 (4) of Schedule 10 to the Act:
 - (5) Subclause (1) does not apply to an entitlement listed in Subdivision 2 of Division 8 of Part 4 of Schedule 4 to the *Water Management (General) Regulation 2011*.

73 Registration of security interests in replacement access licences

- (1) Pursuant to clause 1 of Schedule 9 to the Act, clause 19 of Schedule 10 to the Act is

to be construed as if the reference in clause 19 (5) to the commencement of Part 2 of Schedule 10 to the Act were a reference to 1 April 2011.

(2) Pursuant to clause 1 of Schedule 9 to the Act, the following subclauses are taken to be inserted after clause 19 (10) of Schedule 10 to the Act:

(10A) Subclause (10B) applies only to an access licence arising from an entitlement with respect to land in respect of which an interest was, immediately before 1 April 2011, registered under the *Real Property Act 1900* or under the *Corporations Act 2001* of the Commonwealth.

(10B) No dealing that requires the consent of the holder of a security interest may be registered in relation to an access licence until the expiry of the prescribed period unless, before the expiry of that period, the holder of the interest:

(a) has lodged with the Director-General a notice of the kind referred to in subclause (5) (d), or

(b) has notified the Director-General that the holder does not propose to seek registration of the interest in the Access Register.

74 Entitlements held by 2 or more co-holders

Pursuant to clause 1 of Schedule 9 of the Act, clause 23 of Schedule 10 to the Act is taken to have been replaced by the following clause:

23 Entitlements held by 2 or more co-holders Two or more co-holders of a replacement access licence are taken to hold the access licence:

(a) if the Minister has a record of the shares in which the former entitlement was held immediately before the appointed day, in the same shares as the former entitlement was so held, or

(b) if the Minister has no such record, but within 2 months after sending a written request to the co-holders seeking information as to their shareholding the Director-General receives:

(i) a notice, signed by or on behalf of each of them, by which they agree as to the shares in which they hold the access licence, or

(ii) a notice, signed by any one of them, to the effect that legal proceedings have been commenced for the purpose of obtaining a declaration as to the shares in which they hold the access licence,

in the agreed shares referred to in the notice under subparagraph (i), or in the shares determined pursuant to the legal proceedings referred to in the notice under subparagraph (ii), as the case may be, or

(c) in any other case, as tenants in common with the entitlements conferred by the licence under section 56 apportioned equally between them.

75 Definitions

In this Division:

"confirmed history of water usage", in relation to eligible land, means information that indicates the volume of tidal pool water that has been used on the land, and the purposes for which that water has been used, at any time between 1 July 2001 and 1 July 2011, established to the satisfaction of the Minister.

Subdivision 2 – Access licences for tidal pool water sources

76 Temporary exemption from requirements for certain access licences and approvals

- (1) All persons are exempt from:
 - (a) sections 60A (1) and (2), 60C (1) and (2) and 60D of the Act in relation to the taking of tidal pool water, and
 - (b) section 91A (1) of the Act in relation to the use of tidal pool water, and
 - (c) section 91B (1) of the Act in relation to:
 - (i) the use of any water supply work by which tidal pool water is taken (being a water supply work constructed before 1 July 2011), and
 - (ii) the maintenance and repair of any such work,for the period between 1 July 2011 and 1 July 2013 (inclusive).
- (2) Subclause (1) ceases to apply to a person in relation to land when the person is given notice under clause 77 of this Schedule of the terms and conditions of the person's replacement access licence for the land.
- (3) The Minister may in a particular case by notice in writing to a landholder of eligible land extend the period of an exemption conferred by subclause (1) in its application to the landholder if the Minister is satisfied that the extension is necessary to enable the Minister to establish the landholder's confirmed history of water usage.

77 Replacement access licences arising from confirmed history of water usage

- (1) A landholder of eligible land in respect of which there is a confirmed history of water usage is taken to hold an access licence (a "**replacement access licence**"), and such an access licence is taken to have arisen, on the following terms and conditions:
 - (a) terms identifying:
 - (i) the category or subcategory of the licence, as determined by clause 78 of this Schedule, and
 - (ii) the share component of the licence, as determined by clause 79 or 80 of this Schedule, as the case requires,
 - (b) the mandatory conditions referable to an access licence of the category or subcategory referred to in paragraph (a) (i).
- (2) A replacement access licence does not operate (and has no force or effect) until the Minister notifies the licence holder in writing of the terms and conditions of the licence referred to in subclause (1).
- (3) For the purpose of establishing the confirmed history of water usage for any eligible land, the Minister may require the landholder to furnish information relevant to that purpose.
- (4) The Minister is not required to issue a notice under subclause (2) if he or she is not satisfied that a confirmed history of water usage for eligible land has been established, whether because the landholder has failed to comply with a requirement under subclause (3) or otherwise.

(5) This Subdivision does not operate:

(a) to create a domestic and stock access licence (or an access licence of a subcategory of a domestic and stock access licence) in relation to land if:

(i) the land has frontage to a tidal pool water source, or

(ii) the share component of the licence, as determined by clause 79 of this Schedule, would be zero or negative, or

(b) to create an unregulated river access licence (or an access licence of a subcategory of an unregulated river access licence) if the share component of the licence, as determined by clause 80 of this Schedule, would be zero or negative.

Because it is an access licence, a replacement access licence can be suspended, cancelled or compulsorily acquired under Division 6 of Part 2 of Chapter 3 of the Act, and discretionary conditions can be imposed under section 66. The licence holder will need to apply for any necessary water use approvals and water supply work approvals if he or she intends to take or use water under the authority of a replacement access licence.

78 Categories of replacement access licence

A replacement access licence is to be:

(a) to the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for domestic consumption or stock watering:

(i) if the water has been used for both domestic consumption and stock watering, a domestic and stock access licence, or

(ii) if the water has been used for domestic consumption only, a domestic and stock [domestic] access licence, or

(iii) if the water has been used for stock watering only, a domestic and stock [stock] access licence, and

(b) to the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used otherwise than for domestic consumption or stock watering:

(i) an unregulated river access licence, or

(ii) an access licence of any subcategory of an unregulated river access licence.

79 Share component for domestic and stock access licences

(1) In relation to an entitlement or access licence in respect of a tidal pool water source in the Hawkesbury and Lower Nepean Rivers Water Source, the Southern Sydney Rivers Water Source or the Northern Sydney Rivers Water Source, the share component for a replacement access licence that is a domestic and stock access licence is to be as follows:

(a) except as provided by paragraphs (b) and (c), 6.5 megalitres,

(b) in the case of a domestic and stock [domestic] access licence, 1 megalitre,

(c) in the case of a domestic and stock [stock] access licence, 5.5 megalitres,

subtracting from each such volume the volume of any entitlement under the former 1912 Act that authorised the taking of tidal pool water for domestic consumption or stock watering (or both).

(2) In relation to an entitlement or access licence in respect of the Shoalhaven River Water Source or the Illawarra Rivers Water Source, the share component for a replacement access licence that is a domestic and stock access licence is to be as follows:

(a) except as provided by paragraphs (b) and (c), 5.5 megalitres,

(b) in the case of a domestic and stock [domestic] access licence, 1 megalitre,

(c) in the case of a domestic and stock [stock] access licence, 4.5 megalitres,

subtracting from each such volume the volume of any entitlement under the former 1912 Act that authorised the taking of tidal pool water for domestic consumption or stock watering (or both).

80 Share component for unregulated river access licences

(1) The share component for a replacement access licence that is an unregulated river access licence is to be the amount (in megalitres) equivalent to the maximum average

volume of tidal pool water taken annually and used on the eligible land concerned, otherwise than for domestic consumption or stock watering, between 2001 and 2011 (inclusive).

(2) The reference in subclause (1) to the maximum average volume of water is a reference to:

- (a) if water was taken during only one of the years between 2001 and 2011, the volume of water taken during that year, or
- (b) if water was taken during only 2 of the years between 2001 and 2011, one half of the sum of the volumes of water taken annually during those years, or
- (c) if water was taken during 3 or more of the years between 2001 and 2011, one third of the sum of the 3 largest volumes of water taken annually during those years,

subtracting from each such volume the volume of any entitlement under the former 1912 Act that authorised the taking of tidal pool water, other than an entitlement that authorised the taking of tidal pool water for domestic consumption or stock watering (or both).

(3) To the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for purposes other than:

- (a) irrigation, or
- (b) domestic consumption, or
- (c) stock watering,

the volume of water taken in any year is to be calculated (in megalitres) on the basis of that history.

(4) To the extent to which the confirmed history of water usage for the land indicates that tidal pool water has been used for the purposes of irrigation, the volume of water taken in any year for those purposes is to be calculated (in megalitres):

(a) in the case of water taken from a tidal pool water source in the Shoalhaven River Source or the Illawarra Rivers Water Source:

- (i) if the confirmed history of water usage for the land indicates which crops specified in Table 1 to this clause were grown under irrigation on which parts of the land during that year, as the sum of the amounts obtained by multiplying the number of hectares of land on which each such crop was grown (as indicated by the confirmed history of water usage) by the factor specified in that Table in relation to that crop, or
- (ii) in any other case, as the amount obtained by multiplying the number of hectares of the land on which crops specified in Table 1 to this clause were grown under irrigation during that year (as indicated by the confirmed history of water usage for the land) by the smallest factor specified in that Table in relation to those crops, and

(b) in the case of water taken from a tidal pool water source in the Hawkesbury and Lower Nepean Rivers Water Source, the Southern Sydney Rivers Water Source or the Northern Sydney Rivers Water Source:

- (i) if the confirmed history of water usage for the land indicates which crops specified in Table 2 to this clause were grown under irrigation on which parts of the land during that year, as the sum of the amounts obtained by multiplying the number of hectares of land on which each such crop was grown (as indicated by the confirmed history of water usage) by the factor specified in that Table in relation to that crop, or
- (ii) in any other case, as the amount obtained by multiplying the number of hectares of the land on which crops specified in Table 2 to this clause were grown under irrigation during that year (as indicated by the confirmed history of water usage for the land) by the smallest factor specified in that

Table in relation to those crops.

(5) Where more than one crop has been grown on the same land in the same year, the land may not be counted more than once for the purposes of subclause (4), but the higher or highest of the factors relevant to those crops is to be used.

(6) For the purposes of this clause, a reference to a crop specified in Table 1 or 2 to this clause includes a reference to any other crop that the Minister determines to be an equivalent to that crop.

Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which 10 hectares were used for growing lucerne, 10 hectares were used for annual pasture and 10 hectares were used for vegetables (as indicated by the confirmed history of water usage for the land). The factors for these crops (using Table 1) are 5 (for lucerne), 1.5 (for annual pasture) and 4.5 (for vegetables). The volume of water

calculated for that year for the land would therefore be 110 megalitres (that is, 10 times 5, plus 10 times 1.5, plus 10 times 4.5: see subclause (4) (a)). Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which some were used for growing lucerne, some were used for annual pasture and some were used for vegetables (the specific areas not indicated by the confirmed history of water usage for the land). The factors for these crops (using Table 1) are 5 (for lucerne), 1.5 (for annual pasture) and 4.5 (for vegetables). The volume of water calculated for that year for the land would therefore be 45 megalitres (that is, 30 times 1.5: see subclause (4) (b)). Suppose, in respect of any year, 30 hectares of a landholding were under irrigation, of which all 30 were used for growing summer cereals (in summer) and all 30 were used for growing winter cereals (in winter). The factors for these crops (using Table 1) are 2.5 (for summer cereals) and 1 (for winter cereals). The volume of water calculated for that year for the land would therefore be 75 megalitres (that is, 30 times 2.5: see subclauses (4) (a) and (5)).

81 Conversion of share components of access licence

Clause 7 of Schedule 10 to the Act applies to and in respect of a replacement access licence in the same way as it applies to and in respect of an access licence arising under that Schedule.

(2) For the purposes of the winding up of the Trust, the assets, rights and liabilities of the

Trust are transferred to the Anabranh Private Irrigation District.

(3) The following provisions have effect with respect to the transfer:

- (a) the assets of the Trust vest in the Anabranh Private Irrigation District by virtue of this clause and without the need for any conveyance, transfer, assignment or assurance,
- (b) the rights and liabilities of the Trust become by virtue of this clause the rights and liabilities of the Anabranh Private Irrigation District,
- (c) all proceedings relating to the assets, rights or liabilities commenced before the transfer by or on behalf of, or against, the Trust and pending immediately before the transfer are taken to be proceedings pending by or against the Anabranh Private Irrigation District,
- (d) any act, matter or thing done or omitted to be done in relation to the assets, rights or liabilities before the transfer by, to or in respect of the Trust is (to the extent to which that act, matter or thing has any force or effect) taken to have been done or omitted by, to or in respect of the Anabranh Private Irrigation District,
- (e) a reference in any instrument to the Trust is (to the extent that it relates to those assets, rights or liabilities), to be read as, or as including, a reference to the Anabranh Private Irrigation District.

(4) The operation of this clause is not to be regarded:

- (a) as a breach of contract or confidence or otherwise as a civil wrong, or
- (b) as a breach of any contractual provision prohibiting, restricting or regulating the assignment or transfer of assets, rights or liabilities, or
- (c) as giving rise to any remedy by a party to an instrument, or as causing or permitting the termination of any instrument, because of a change in the beneficial or legal ownership of any asset, right or liability, or
- (d) as an event of default under any contract or other instrument.

(5) In this clause: "**Anabranh Private Irrigation District**" means the Great Anabranh of the Darling River Private Water Supply and Irrigation District, being the private irrigation district of that name constituted under Part 2 of Chapter 4 of the Act.
