Schedule 2 s
Species 3(1)
threatened by
trade

The classes, families and species listed in this schedule are arranged in descending order by class then in alphabetical order by order, family, and species. This order of arrangement is adopted in the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES).

The entries in the column headed "Exceptions/limitations" have the effect of either—

- (a) excluding nominated populations in the listed species; or
- (b) limiting the applications of the listed species to only those populations nominated; or
- (c) excluding certain species from a generic listing; or
- (d) excluding nominated varieties of specimens of the listed species; or
- (e) limiting the application of the listed species to only those categories of specimens nominated.

Schedule 3
Species exploited by trade

s 3(1)

The classes, families, and species listed in this schedule are arranged in descending order by class then in alphabetical order by order, family, and species. This order of arrangement is adopted in the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES).

The countries listed in the column headed “Exceptions/limitations and Countries requiring export permit” are parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora that require an export permit to authorise trade in the species listed in the schedule. Trade in the species in relation to other countries that are party to the Convention requires a certificate of origin.
