

not adversely affect the property rights or interests of an appropriator located in Wyoming and if the diversion and ultimate use of water will not exceed the allocated share under the compact of any of the signatory states.

(d) The state engineer may approve an application subject to such terms, conditions, restrictions and limitations as the state engineer considers necessary to meet the application criteria listed in W.S. 41-12-605 and this section.

(e) The state engineer's approval of an application pursuant to this act shall not constitute approval for an out of state use of the water pursuant to W.S. 41-3-115.

#### ARTICLE 7 - UPPER NIOBRARA RIVER COMPACT

##### **41-12-701. Generally.**

Ratification and approval is hereby given to the Upper Niobrara River Compact as signed at Cheyenne, Wyoming, on the 26th day of October, A.D. 1962, by E. J. Van Camp, the interstate streams commissioner of the state of Wyoming, and the assistant commissioners, hereinafter named, under and in accordance with the authority of W.S. 41-11-201 through 41-11-204, which compact was also signed by the duly authorized commissioner of the state of Nebraska, and which Upper Niobrara River Compact is in full as follows:

#### UPPER NIOBRARA RIVER COMPACT

The state of Wyoming, and the state of Nebraska, parties signatory to this compact (hereinafter referred to as Wyoming and Nebraska, respectively, or individually as a "state" or collectively as "states"), having resolved to conclude a compact with respect to the use of waters of the Niobrara River basin, and being duly authorized by Act of congress of the United States of America, approved August 5, 1953 (Public Law 191, 83rd congress, 1st Session, chapter 324, 67 Stat. 365) and the Act of May 29, 1958 (Public Law 85-427, 85th congress, S.2557, 72 Stat. 147) and the Act of August 30, 1961 (Public Law 87-181, 87th congress, S.2245, 75 Stat. 412) and pursuant to the acts of their respective legislatures have, through their respective governors, appointed as their commissioners: for Wyoming, Earl Lloyd, Andrew McMaster, Richard Pfister, John Christian, Eugene P. Willson, H. T. Person, Norman B. Gray, E. J. Van Camp; For Nebraska, Dan S. Jones, Jr., who after negotiations participated

in by W. E. Blomgren appointed by the president of the United States of America, have agreed upon the following articles:

#### Article I

(a) The major purposes of this compact are to provide for an equitable division or apportionment of the available surface waters supply of the upper Niobrara River basin between the states; to provide for obtaining information or groundwater and underground water flow necessary for apportioning the underground flow by supplement to this compact; to remove all causes, present and future which might lead to controversies; and to promote interstate comity.

(b) The physical and other conditions peculiar to the upper Niobrara River basin constitute the basis for this compact, and neither of the states hereby concedes that this compact establishes any general principle or precedent with respect to any other interstate stream.

(c) Either state and all others using, claiming or in any other manner asserting any right to the use of the waters of the Niobrara River basin under the authority of that state, shall be subject to the terms of this compact.

#### Article II

(a) The term "upper Niobrara River" shall mean and include the Niobrara River and its tributaries in Nebraska and Wyoming west of range 55 west of the 6th p.m.

(b) The term "upper Niobrara River basin" or the term "basin" shall mean that area in Wyoming and Nebraska which is naturally drained by the Niobrara River west of range 55 west of the 6th p.m.

(c) Where the name of a state or the term "state" or "states" is used, they shall be construed to include any person or entity of any nature whatsoever using, claiming, or in any manner asserting any right to the use of the waters of the Niobrara River under the authority of that state.

#### Article III

(a) It shall be the duty of the two (2) states to administer this compact through the official in each state who is now or may hereafter be charged with the duty of

administering the public water supplies, and to collect and correlate through such officials the data necessary for the proper administration of the provisions of this compact. Such officials may, by unanimous action, adopt rules and regulations consistent with the provisions of this compact.

(b) The states agree that the United States geological survey, or whatever federal agency may succeed to the functions and duties of that agency, insofar as this compact is concerned, may collaborate with the officials of the states charged with the administration of this compact in the execution of the duty of such officials in the collection, correlation, and publication of information necessary for the proper administration of this compact.

#### Article IV

Each state shall itself or in conjunction with other responsible agencies cause to be established, maintained, and operated such suitable water gaging stations as are found necessary to administer this compact.

#### Article V

(a) Wyoming and Nebraska agree that the division of surface waters of the upper Niobrara River shall be in accordance with the following provisions:

(i) There shall be no restrictions on the use of the surface waters of the upper Niobrara River by Wyoming except as would be imposed under Wyoming law and the following limitations:

(A) No reservoir constructed after August 1, 1957, and used solely for domestic and stock water purposes shall exceed twenty (20) acre-feet in capacity.

(B) Storage reservoirs with priority dates after August 1, 1957, and storing water from the main stem of the Niobrara River east of range 62 west of the 6th p.m. and from the main stem of Van Tassel Creek south of section 27, township 32 north, range 60 west of the 6th p.m. shall not store in any water year (October 1 of one (1) year to September 30 of the next year) more than a total of five hundred (500) acre-feet of water.

(C) Storage in reservoirs with priority dates prior to August 1, 1957, and storing water from the main stem of the Niobrara River east of range 62 west and from the main stem of Van Tassel Creek south of section 27, township 32 north, shall be made only during the period October 1 of one (1) year to June 1 of the next year and at such times during the period June 1 to September 30 that the water is not required to meet the legal requirements by direct flow appropriations in Wyoming and Nebraska west of range 55 west. Where water is pumped from such storage reservoirs, the quantity of storage water pumped or otherwise diverted for irrigation purposes or other beneficial purposes from any such reservoir in any water year shall be limited to the capacity of such reservoir as shown by the records of the Wyoming state engineer's office, unless additional storage water becomes available during the period June 1 to September 30 after meeting the legal diversion requirements by direct flow appropriations in Wyoming and Nebraska west of range 55 west.

(D) Storage in reservoirs with priority dates after August 1, 1957 and storing water from the main stem of the Niobrara River east of range 62 west and the main stem of Van Tassel Creek south of section 27, township 32 north, shall be made only during the period October 1 of one (1) year to May 1 of the next year and at such times during the period May 1 and September 30 that the water is not required for direct diversion by ditches in Wyoming and in Nebraska west of range 55 west.

(E) Direct flow rights with priority dates after August 1, 1957, on the main stem of the Niobrara River east of range 62 west and Van Tassel Creek south of section 27, township 32 north, shall be regulated on a priority basis with Nebraska rights west of range 55 west, provided that any direct flow rights for maximum of one hundred forty-three (143) acres which may be granted by the Wyoming state engineer with a priority date not later than July 1, 1961 for lands which had territorial rights under the Van Tassel No. 4 Ditch with a priority date of April 8, 1882, and the Van Tassel No. 5 Ditch with a priority date of April 18, 1882, shall be exempt from the provisions of this subsection (E).

(F) All direct flow diversions from the main stem of the Niobrara River east of range 62 west and from Van Tassel Creek south of section 27, township 32 north shall at all times be limited to their diversion rates as specified by Wyoming law, and provided that Wyoming laws relating to diversion of "surplus water" (W.S. 41-4-317 through 41-4-324)

shall apply only when the water flowing in the main channel of the Niobrara River west of range 55 west is in excess of the legal diversion requirements of Nebraska ditches having priority dates before August 1, 1957.

#### Article VI

(a) Nebraska and Wyoming recognize that the future use of ground water for irrigation in the Niobrara River basin may be a factor in the depletion of the surface flows of the Niobrara River, and since the data now available are inadequate to make a determination in regard to this matter, any apportionment of the ground water of the Niobrara River basin should be delayed until such time as adequate data [data] on ground water of the basin are available.

(b) To obtain data on ground water, Nebraska and Wyoming, with the cooperation and advice of the United States geological survey, ground water branch, shall undertake ground water investigations in the Niobrara River basin in the area of the Wyoming-Nebraska state line. The investigations shall be such as are agreed to by the state engineer of Wyoming and the director of water resources of Nebraska, and may include such observation wells as the said two (2) officials agree are essential for the investigations. Costs of the investigations may be financed under the cooperative ground water programs between the United States geological survey and the states, and the states' share of the costs shall be borne equally by the two (2) states.

(c) The ground water investigations shall begin within one (1) year after the effective date of this compact. Upon collection of not more than twelve (12) months of ground water data Nebraska and Wyoming with the cooperation of the United States geological survey shall make, or cause to be made an analysis of such data to determine the desirability or necessity of apportioning the ground water by supplement to this compact. If, upon completion of the initial analysis, it is determined that apportionment of the ground water is not then desirable or necessary, re-analysis shall be made at not to exceed two (2) year intervals, using all data collected until such apportionment is made.

(d) When the results of the ground water investigations indicate that apportionment of ground water of the Niobrara River basin is desirable, the two (2) states shall proceed to negotiate a supplement to this compact apportioning the ground water of the basin.

(e) Any proposed supplement to this compact apportioning the ground water shall not become effective until ratified by the legislatures of the two (2) states and approved by the congress of the United States.

#### Article VII

The provisions of this compact shall remain in full force and effect until amended by action of the legislatures of the signatory states and until such amendment is consented to and approved by the congress of the United States in the same manner as this compact is required to be ratified and consented to in order to become effective.

#### Article VIII

Nothing in this compact shall be construed to limit or prevent either state from instituting or maintaining any action or proceeding, legal or equitable, in any court of competent jurisdiction for the protection of any right under this compact or the enforcement of any of its provisions.

#### Article IX

(a) Nothing in this compact shall be deemed:

(i) To impair or affect any rights or powers of the United States, its agencies, or instrumentalities, in and to the use of the waters of the upper Niobrara River basin nor its capacity to acquire rights in and to the use of said waters; provided that any beneficial uses of the waters allocated by this compact hereafter made within a state by the United States, or those acting by or under its authority, shall be taken into account in determining the extent of use within that state.

(ii) To subject any property of the United States, its agencies, or instrumentalities to taxation by either state or subdivision thereof, nor to create an obligation on the part of the United States, its agencies, or instrumentalities, by reason of the acquisition, construction or operation of any property or works of whatsoever kind, to make any payment to any state or political subdivision thereof, state agency, municipality, or equity whatsoever in reimbursement for the loss of taxes.

(iii) To subject any property of the United States, its agencies, or instrumentalities, to the laws of any state to an extent other than the extent to which these laws apply without regard to the compact.

(iv) To affect the obligations of the United States of America to Indians or Indian tribes, or any right owned or held by or for Indians or Indian tribes which is subject to the jurisdiction of the United States.

#### Article X

Should a court of competent jurisdiction hold any part of this compact contrary to the constitution of any state or of the United States, all other severable provisions shall continue in full force and effect.

#### Article XI

This compact shall become effective when ratified by the legislatures.

IN WITNESS WHEREOF, the commissioners have signed this compact in triplicate original, one (1) of which shall be filed in the archives of the United States of America and shall be deemed the authoritative original, and one (1) copy of which shall be forwarded to the governor of each of the signatory states.

Done at the city of Cheyenne, in the state of Wyoming, this 26th day of October, in the year of our Lord, One Thousand Nine Hundred Sixty-Two 1962.

Commissioners for the state of Nebraska

/s/Dan S. Jones, Jr.

Commissioners for the state of Wyoming

/s/ Earl Lloyd

/s/ Eugene P. Willson

/s/ Andrew McMaster

/s/ H. T. Person

/s/ Richard Pfister

/s/ Norman B. Gray

/s/ John Christian

/s/ E. J. Van Camp

I have participated in the negotiation of this compact and intend to report favorably thereon to the congress of the United States.

/s/W. E. Blomgren

Representative of the United States of America.

**41-12-702. When binding; notice of ratification.**

The said compact shall not be binding or obligatory upon the state of Wyoming or any of the other high contracting parties thereto unless or until the same shall have been ratified by the legislature of Nebraska, and consented to by the congress of the United States. The governor of Wyoming shall give notice of the ratification and approval of said compact by the Wyoming legislature to the governor of Nebraska and to the president of the United States.

ARTICLE 8 - WATER DEVELOPMENT STUDIES

**41-12-801. Studies authorized for waters allocated by certain compacts.**

In order to more fully utilize the waters allocated to the state of Wyoming by the Yellowstone River Compact (W.S. 41-12-601), the Colorado River Compact (W.S. 41-12-301), and the Upper Colorado River Compact (W.S. 41-12-401), the state engineer is hereby directed to initiate studies to plan the development of these waters, including, but not limited to, transbasin diversions within the state wherever shown feasible as projects of the state of Wyoming. Such studies shall show the diligent intent of the state to fully utilize all of Wyoming's compact share of the Big Horn River and its tributaries, the Green River and its tributaries, and other tributaries of the Colorado River within the boundaries of the state of Wyoming.

CHAPTER 13 - WATERCRAFT

ARTICLE 1 - REGISTRATION; ACCIDENTS

**41-13-101. Definitions; classification of motorboats.**

(a) As used in this act:

(i) "Commission" means the Wyoming game and fish commission;

(ii) "Department" means the Wyoming game and fish department;
